

2021-2022 GRADUATE AND UNDERGRADUATE
COURSE CATALOG

**MASSACHUSETTS
COLLEGE of PHARMACY
and HEALTH SCIENCES**

MASSACHUSETTS COLLEGE of PHARMACY
and HEALTH SCIENCES

This catalog is intended to provide working guidelines and descriptions of the general and academic policies of the University applicable to students. It is not intended and cannot be construed as a contract or guaranty of any kind, express or implied, and the University may change, delete, or add to these guidelines unilaterally in its sole discretion and without notice. The University also reserves the right to determine the applicability of any policy to a particular situation or set of circumstances and to depart from the guidelines contained herein in a given case. This catalog supersedes any previous catalog, policies, or practices relating to students. It is the responsibility of the students to know and understand the University's policies. The University may, from time to time, acquire or develop new programs, or expand its offerings in other locations, including distance learning programs, and the guidelines in this catalog shall apply to all such programs and locations. The University may, from time to time, elect to phase out programs to reflect changes in the healthcare education marketplace. Should this happen, the University will provide academic plans for students then currently enrolled in affected programs to enable them to complete the program requirements. Students are expected to know the contents of this catalog relating to their program of study, and should consult the University's website for any changes made to the catalog since the latest printing. Additional guidelines and policies are contained in the individual course syllabi. Students are expected to know the contents of the course syllabi relating to their program of study.

Telephone 617.732.2800; students outside Massachusetts and within the continental United States may call toll-free 1.800.225.5506.

Nondiscrimination Policy

MCPHS University ("MCPHS" or the "University") is committed to maintaining a positive learning, working, and living environment. The University does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, ancestry, genetic information, military service, or veteran status in admission and access to, and treatment and employment in, its educational programs and activities and actively complies with the requirements of Federal Executive Orders 11246 and 11375 as amended; the Civil Rights Act of 1964 as amended; Title IX of the Educational Amendments of 1972; Sections 503 and 504 of the Rehabilitation Act of 1973; Section 402, Vietnam Era Veterans Readjustment Assistance Act of 1974; the Age Discrimination Act of 1975; the Americans with Disabilities Act of 1990 (as amended by the ADA Amendments Act of 2008); and pertinent laws, regulations, and executive directives of the Commonwealth of Massachusetts and other applicable state and federal statutes. The University will not tolerate acts of discrimination or harassment based upon Protected Classes, or related retaliation against or by any employee or student. For purposes of this policy, "Protected Classes" refers to race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, ancestry, genetic information, military service, or veteran status or any other category protected by applicable law.

This policy (1) provides a definition of discrimination and harassment based upon protected classes and related retaliation; (2) prohibits discrimination and harassment based upon protected classes and related retaliation; and (3) sets out procedures to follow when a member of the MCPHS University community believes a violation of the policy has occurred.

Individuals who violate this policy shall be disciplined or subjected to corrective action, up to and including termination or expulsion.

Inquiries regarding the University's compliance with equal opportunity and affirmative action laws may be directed to Richard Lessard, President, at 617.732.2880.

Sexual Harassment

Title VII of the 1964 Civil Rights Act and Title IX of the Education Amendments of 1972 specifically prohibit sexual harassment. All members of the University community, including faculty, administration, staff, and students, have a right to be free from sexual harassment by any member of the University community. Any member of the MCPHS community who has a complaint or concern about sexual harassment, or would like more information about the University's policies regarding sexual harassment, should contact Dawn M. Ballou, JD, Title IX Coordinator, Office of the President, 179 Longwood Avenue, Boston, MA 02115; 617.732.2077; Dawn.Ballou@mcphs.edu.

Occupational Health and Safety Master Plan

MCPHS strives to provide a learning, teaching, working, and research environment free from recognized health and safety hazards. Pursuant to the requirements of the U.S. Occupational Safety and Health Administration, the City of Boston, the Federal Emergency Management Agency, and the Nuclear Regulatory Commission, MCPHS has established protocols and procedures to protect its students and employees from potential occupational, health, safety, and radiation hazards. For further information, please contact the Director of Environmental Health and Safety at 617.732.2861.

COVID-19 Notice

During the ongoing COVID-19 pandemic, the University is issuing guidance and updates on the MCPHS University COVID-19 Information webpage: <https://www.mcphs.edu/covid> (the "COVID-19 Guidance"), which MCPHS University students, faculty, and staff are expected to consult regularly and comply with as applicable. In the event the COVID-19 Guidance conflicts with anything contained in this Catalog, the COVID-19 Guidance shall govern.

Annual Notification of Student Rights under FERPA

The Family Educational Rights and Privacy Act (FERPA) of 1974, as amended, affords students certain rights with respect to their own education records. These rights include the following:

1. The right to inspect and review student education records within 45 days of the day the University receives a request for access. Students should submit to the Office of the Registrar written requests that identify the record(s) they wish to inspect. The registrar will make arrangements for access within 45 days from the date of such request, and will notify the students of the time and place where the records may be inspected. The University reserves the right to deny a copy of a student education record (including, without limitation, a transcript) for which a financial hold exists (a hold is imposed if the student fails to pay bills, fees, or fines owed to the University). A hold will not interfere with the right to visually examine student education records. Questions about the University's policies and practices relating to the Act should be addressed to the Office of the Registrar.

2. The right to request an amendment of student education records that students believe are inaccurate or misleading. Students should write the University registrar, clearly identify the part of the records they want changed, and specify why the records are inaccurate or misleading. If the University decides not to amend the records as requested, it will notify the students of the decision and advise the students of their right to a hearing. Additional information regarding the hearing procedures will be provided to the students when they are notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in student education records, except to the extent that FERPA authorizes disclosure without consent. One exception that permits disclosure without consent is disclosure to appropriate parties in connection with a health or safety emergency. Another exception that permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review a student education record in order to fulfill his or her professional responsibility. Upon request, the University may disclose student education records without consent to officials of another school in which a student seeks or intends to enroll if the disclosure is for purposes related to the student's enrollment or transfer. Education records may be compelled and disclosed without consent by, or notice to, the student pursuant to a valid subpoena issued under the USA Patriot Act. Finally, personally identifiable "directory information" may be released freely unless the student files the appropriate form requesting that such information not be released. This form is available at the Office of the Registrar. Directory information includes the following:

- Name
- Gender
- Student ID
- Local address
- Permanent address
- University email address
- Major and minor field(s) of study, including the division or program in which a student is enrolled
- Classification as a freshman, sophomore, junior, senior, or graduate, or by number referring to such classes
- Course load—full time or part time
- Participation in officially recognized activities
- Dates of attendance and graduation, and degrees received
- Most recent previous educational institution attended
- Honors and awards received, including selection to a dean's list or an honorary organization
- New England School of Acupuncture Clinical Internship Schedule

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. The office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-5920

Clinical Rotations and Background Screenings

For some MCPHS programs, placement in clinical rotations at healthcare providers is a required part of the MCPHS curriculum. Some healthcare providers require background screenings, and a conviction for a criminal offense might present an issue. It is possible that certain types of criminal convictions, whether prior to being a student at MCPHS or while attending MCPHS, could preclude a student from being able to complete a required clinical rotation. For additional information, please contact the MCPHS Office of Legal Affairs.

MCPHS University Complaint Procedure Regarding University Licensure Requirements; Violation of State Law, etc.

United States Department of Education Regulation 34 CFR 600.9, the "Program Integrity Rule," was adopted to ensure that students have the opportunity to voice concerns through a state governmental process relating to programs offered by postsecondary educational institutions authorized under Title IV of the Higher Education Act, as amended. The regulations require states to have a process to review and appropriately act on complaints about the University such as violation of (i) the University's licensure requirements, or (ii) state laws; and allegations of state consumer protection violations, including, but not limited to fraud and false advertising, among other things.

Students may direct complaints to the following, as applicable:

Office of the Attorney General

Consumer Advocacy & Response Division

One Ashburton Place

Boston, MA 02108

Fall 2021

Dear MCPHS Student,

On behalf of the administration, faculty, and staff of MCPHS University (MCPHS), I want to extend our warmest greetings and best wishes.

You are attending MCPHS at a particularly exciting time in our long and distinguished history.

Enrollment is more than 7,200 students, which is a ringing endorsement of our position as a global leader in preparing graduates for rewarding careers in the health professions.

In order to support this unprecedented growth, the University continues to expand and enhance the buildings on our campuses in Boston, Worcester, and Manchester. These new and renovated facilities feature state-of-the-art technology and laboratories that ensure the best possible educational experience for students. MCPHS is truly a learner-centered institution.

I know the importance of developing strong professional relationships with faculty and staff, whose primary goal is to help you succeed. I hope each of you will take advantage of the many educational and co-curricular activities that are available to you at MCPHS.

When you complete your course of studies, you will become one of more than 37,000 MCPHS alumni who are enjoying productive careers in the health sciences. I hope that each of you will develop a personal relationship with the University as your professional home away from home—your alma mater.

Once again, I wish you good luck with your studies, and I look forward to meeting many of you at various University functions in the years ahead.

Sincerely,

Richard J. Lessard
President

9-May 3, 2022

Introduction

Our Mission

MCPHS University prepares our graduates to advance health and serve communities worldwide through excellence, innovation and collaboration in teaching, practice, scholarship, and research.

Our Vision

MCPHS University is an innovator in health and professional education, preparing future generations of global leaders and promoting systems to improve the health of the public.

- **STUDENT SUCCESS:** Our graduates are prepared and professionally equipped to be successful in their chosen careers and in life.
- **STUDENT EXPERIENCE:** Our students are active participants in their learning, connected to community with a sense of belonging, and empowered to participate in creating an experience that meets their personal and professional goals.
- **FACULTY and STAFF SUCCESS:** Our faculty and staff are recognized as leaders in higher education, through their continued efforts to grow professionally and to collaborate as a community.
- **INFRASTRUCTURE and TECHNOLOGY:** MCPHS has intellectual, physical, and digital environments that invite engagement, advance learning, embrace innovation, promote collaboration, and support quality in all that we do.

Our Core Values

STUDENT-CENTERED: Keep the needs of students as a priority when making decisions. Develop a holistic approach to engage students as successful life-long learners.

RESPECT: Treat others as they would like to be treated. Seek out the best in others. Actively listen, encourage feedback, choose the best way and time to deliver meaningful information. Deal with conflicts quickly and directly. Assume positive intent of others.

DIVERSITY and INCLUSION: Through teaching, discovery, and advocacy, promote equity in access to quality health care. Foster a culture of inclusion and cultural competence among all students, faculty, staff, and other key stakeholders.

INTEGRITY and AUTHENTICITY: Seek truth. Be intellectually and interpersonally honest with others. Make ethical decisions.

INNOVATION: Embrace change and challenge the status quo. Find new and better ways to enhance education, inside and outside the classroom. Enhance work quality and address institutional needs. Continually improve and upgrade skills and abilities. Through education and example, develop our students to be innovative.

PERSONAL and PROFESSIONAL ACCOUNTABILITY: Be mission-focused. Honor and follow through on commitments and agreements made to others. Work collaboratively as a team member. Be reflective and transparent in communications with others. Always provide your best effort in work performance. Speak up when professional or ethical standards are being violated.

LEADERSHIP ACCOUNTABILITY: Provide resources to address priorities. Communicate in a transparent manner. Ensure transparency in decision-making. Make decisions using data. Create a safe-to-say environment. Foster and engage leadership at all levels. Maximize individual contributions.

University Learning Outcomes

With a tradition of excellence in health care and science education since its founding in 1823, MCPHS University offers its students degree programs and co-curricular activities that are focused on knowledge and skills development. The University's mission statement affirms its primary goal of preparing students for successful careers in health care through excellence in teaching, scholarship, professional service and community engagement.

MCPHS University prepares its graduates to:

- Possess interpersonal, oral, and written communication skills to effectively interact with a diverse population including patients, clients, customers, and colleagues.
- Create and sustain positive and productive professional relationships with patients, clients, customers, and colleagues.
- Apply technical knowledge, information literacy, cultural sensitivity, critical thinking skills, and problem-solving strategies necessary in professional settings to provide comprehensive services to patients, clients, and others.
- Collaborate effectively as a team member to bring projects to successful completion.
- Behave in a responsible manner and hold oneself and colleagues to the professional and ethical standards of their profession.
- Engage in lifelong learning and regular self-assessment to achieve continuous professional growth.

The Boston Campus

Founded in 1823, MCPHS is the oldest institution of higher education in the city of Boston, and its pharmacy program is the second oldest in the United States. The main campus is located in Boston's Longwood Medical and Academic Area, and the University enjoys working affiliations with some of the world's finest health institutions, including Beth Israel Deaconess Medical Center, Brigham and Women's Hospital, Boston Children's Hospital, Boston Medical Center, Tufts Medical Center, and Massachusetts General Hospital. Among its neighbors are Emmanuel College; Massachusetts College of Art and Design; Simmons University; Wentworth Institute of Technology; and Harvard University's medical school, dental school, and school of public health. In this invigorating and stimulating environment, students have access to unsurpassed educational resources.

Undergraduate degree programs offered at the Boston campus include biology, chemistry, dental hygiene, health psychology, premedical health studies, pharmaceutical sciences, public health, healthcare management, medical imaging, and radiologic sciences. First professional degrees are offered in pharmacy, physician assistant studies, and nursing. Each of these programs combines the basic sciences with liberal arts and provides an education for lifelong enrichment. Graduate programs are offered in chemistry, regulatory affairs, pharmaceuticals, pharmacology, clinical research, pharmaceutical economics and policy, nursing, healthcare management, clinical management, healthcare administration, and dental hygiene.

The Worcester Campus

The Worcester campus opened in 2000 and is home to an accelerated 33-month PharmD program for students who have already completed their preprofessional requirements; a Fast Track Bachelor of Science in Dental Hygiene program for individuals with a prior baccalaureate degree in another field or that have completed pre-requisite coursework; a Fast Track Bachelor of Science degree program in Diagnostic Medical Sonography (General or Echo); a postbaccalaureate Bachelor of Science in Nursing program for individuals with a prior baccalaureate degree in another field; a 24-month Master of Physician Assistant Studies program; a three-year Doctor of Physical Therapy degree program; and a four-year Doctor of Optometry (OD) program. The New England School of Acupuncture (NESA) joined MCPHS University in fall 2016, providing two 3-year master's programs in Acupuncture or Acupuncture with a Chinese Herbal Medicine Specialization. NSEA also offers a 4-year Doctor of Acupuncture. The Chinese herbal medicine curriculum is also offered as a Certificate of Advanced Graduate Study designed for those currently enrolled in or who have completed an ACAHM-accredited/pre-accredited entry level program (master's level or professional doctoral) in acupuncture.

Worcester is the second largest city in New England and is well known for its premier educational and healthcare institutions. The Worcester campus is located adjacent to Saint Vincent Hospital and in close proximity to the Fallon Clinic, University of Massachusetts Memorial Medical Center, and the medical school of the University of Massachusetts.

The Manchester Campus

MCPHS–Manchester became an entity of the University in May 2002 when MCPHS assumed responsibility for the Physician Assistant (PA) Studies program and its faculty and staff from Notre Dame College upon its closing. The campus building at 1260 Elm Street was purchased in November 2002, and the first class of PA students, faculty, and staff occupied the building in January 2003. A second building at 22 Fir Street, was purchased in fall 2009 and houses a state of the art technology center, several large classrooms, laboratories, a microcart that offers fresh grab and go style food options and drinks, and the "Hub," commonly known as the student lounge. In conjunction with the School of Pharmacy–Worcester, the accelerated Doctor of Pharmacy (PharmD) degree program admitted its first class in Manchester in the fall of 2004. A postbaccalaureate 16-month Bachelor of Science in Nursing degree program for individuals with a prior baccalaureate in another field admitted its first cohort in September 2007. A 24-month Master of Science in Occupational Therapy for individuals with a bachelor degree in another field admitted its first cohort in September 2016.

Manchester is New Hampshire's largest city and is the center of the state's diversified technology and service economy, which developed in response to the decline of the mill dynasty in the 1930s. The University is situated parallel to the historic Amoskeag Mills, which house educational institutions, businesses, and global technology companies.

Degree and Certificate Programs

School of Arts and Sciences

Bachelor of Arts in Health Humanities
Bachelor of Science in Chemistry
Bachelor of Science in Chemistry/Master of Science in Pharmaceutical Chemistry
Bachelor of Science in Health Psychology (4 Pathways)
 Bachelor of Science in Health Psychology, Occupational Therapy
 Bachelor of Science in Health Psychology, Physical Therapy

Accreditation

New England Commission of Higher Education

MCPHS University is accredited by the New England Commission of Higher Education (formerly the Commission on Institutions of Higher Education of the New England Association of Schools and Colleges, Inc.). Accreditation of an institution of higher education by the Commission indicates that it meets or exceeds criteria for the assessment of institutional quality periodically applied through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation. Accreditation by the Commission is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding the accreditation status by the Commission should be directed to the Office of the Provost at 617.732.2854.

Individuals may also contact: New England Commission of Higher Education, 3 Burlington Woods Drive, Suite 100, Burlington, MA 01803-4514; tel: 781.425.7785; email: info@neche.org.

Commonwealth of Massachusetts

MCPHS University is approved by the Commonwealth of Massachusetts to grant the degrees and certificates awarded by programs on the Boston and Worcester campuses.

State of New Hampshire

MCPHS University is approved by the New Hampshire Department of Education, Division of Higher Education – Higher Education Commission to award the Master of Science in Occupational Therapy, Master of Physician Assistant Studies, Doctor of Pharmacy, Bachelor of Science and Master of Science in Nursing degrees on the Manchester campus, contingent upon continuing accreditation by ACOTE, ARC-PA, ACPE, and CCNE, respectively.

Accreditation Commission for Acupuncture and Herbal Medicine (ACAHM)

The following programs offered by MCPHS University – New England School of Acupuncture are accredited by the Accreditation Commission for Acupuncture and Herbal Medicine (ACAHM):

- (1) Master of Acupuncture
- (2) Master of Acupuncture with a Chinese herbal medicine specialization [currently named Master of Acupuncture and Chinese Herbal Medicine]
- (3) Certificate in Chinese herbal medicine [currently named Certificate in Advanced Graduate Study in Chinese Herbal Medicine]

Accreditation status and notes may be viewed on the ACAHM Directory (<https://acaom.org/directory-menu/directory/pg/2/>).

ACAHM is recognized by the United States Department of Education as the specialized accreditation agency for institutions/programs preparing acupuncture and Chinese herbal medicine practitioners. ACAHM does not accredit any programs at the undergraduate/bachelor level. ACAOM is located at 8941 Aztec Drive, Eden Prairie, Minnesota 55347; phone 952/212-2434; fax 952/657-7068; www.acaom.org

The Doctor of Acupuncture programs offered by MCPHS University are approved to begin enrolling students but are not accredited or pre-accredited by ACAHM. These programs are eligible for ACAHM accreditation, and MCPHS University is currently in the process of seeking ACAHM pre-accreditation/accreditation for the program. However, MCPHS University can provide no assurance that pre-accreditation or accreditation will be granted by ACAHM. Graduates of an unaccredited program are not considered to have graduated from an ACAHM-accredited or pre-accredited program and may not rely on ACAHM accreditation or pre-accreditation for professional licensure or other purposes.

Accreditation Council for Occupational Therapy Education

The entry-level occupational therapy master's degree program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o AOTA is (301) 652-6611 and its Web address is www.acoteonline.org.

Accreditation Council on Optometric Education

The Doctor of Optometry (OD) program on the Worcester campus is accredited by the Accreditation Council on Optometric Education (243 N. Lindbergh Blvd., St. Louis, MO 63141; phone: 800.365.2219).

Accreditation Council for Pharmacy Education

The School of Pharmacy–Boston Doctor of Pharmacy program and the School of Pharmacy–Worcester/Manchester Doctor of Pharmacy program are separately accredited by the Accreditation Council for Pharmacy Education (ACPE), 190 S. LaSalle Street, Suite 2850, Chicago, IL 60603-3499; tel.: 312.664.3575; fax: 866.228.2631; website: www.acpe-accredit.org.

Accreditation Review Commission on Education for the Physician Assistant, Inc.

The Master of Physician Assistant Studies program on the Boston campus and the Master of Physician Assistant Studies program on the Manchester/Worcester campuses are separately accredited by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), 3325 Paddocks Parkway, Suite 345 Suwanee, GA 30024 ; tel.: 770.476.1224; fax: 770.476.1738; website: www.arc-pa.org.

American Dental Association's Commission on Dental Accreditation

The Forsyth School of Dental Hygiene is accredited by the American Dental Association's Commission on Dental Accreditation (CODA) and has been granted the accreditation status of Approval Without Reporting Requirements. The Commission is a specialized accrediting body recognized by the United States Department of Education. Individuals may contact the Commission on Dental Accreditation at 211 East Chicago Avenue, Chicago, IL 60611; tel.: 312.440.4653; fax: 312.440.2915; website: www.ada.org.

American Registry of Radiologic Technologists

For MRI programs based in postsecondary degree–granting institutions, a current accreditation mechanism acceptable to the American Registry of Radiologic Technologists (ARRT) is accreditation by a regional institutional accrediting agency. MCPHS has been recognized by ARRT as meeting this requirement, and thus graduates of its MRI program are eligible to participate in the ARRT MRI examination. Individuals may contact ARRT at 1255 Northland Drive, St. Paul, MN 55120; tel.: 651.687.0048; website: www.rrt.org.

Commission on Accreditation in Physical Therapy Education

The School of Physical Therapy program at MCPHS University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 3030 Potomac Ave., Suite 100, Alexandria, Virginia 22305-3085; telephone: 703-706-3245; email: accreditation@apta.org; website: <http://www.capteonline.org>. If needing to contact the program/institution directly, please call 508-373-5741 or email DPT@mcphs.edu.

Commission on Accreditation of Allied Health Education Programs

The Diagnostic Medical Sonography, Echocardiography and General Ultrasound Programs are accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org), upon the recommendation of the Joint Review Committee on Education in Cardiovascular Technology and Diagnostic Medical Sonography. Mailing address: Commission on Accreditation of Allied Health Education Programs, 9355-113th St. N, #7709 Seminole FL 33775; www.caahep.org.

Commission on Collegiate Nursing Education

The Bachelor of Science in Nursing degree program at MCPHS University is accredited by the Commission on Collegiate Nursing Education: <http://www.ccnaccreditation.org>.

The Master of Science in Nursing degree program at MCPHS University is accredited by the Commission on Collegiate Nursing Education: <http://www.ccnaccreditation.org>.

655 K Street, NW, Suite 750, Washington, DC 20001, tel.: 202.887.6791

Council on Education for Public Health

The Master of Public Health program is accredited by the Council on Education for Public Health (CEPH), an independent agency recognized by the U.S. Department of Education to accredit schools of public health, and public health programs outside schools of public health, 1010 Wayne Avenue, Suite 220, Silver Spring, MD 20910; tel: 202.789.1050; website: <https://ceph.org/>.

Joint Review Committee on Educational Programs in Nuclear Medicine Technology

The Nuclear Medicine Technology program is accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology, 820 W Danforth Rd, #B1 Edmond, OK 73003 Phone: (405) 285-0546 Fax: (405) 285-0579 email: mail@jrcnmt.org; website: www.jrcnmt.org.

Joint Review Committee on Education in Radiologic Technology

The Radiation Therapy program and the Radiography program are accredited programmatically by the Joint Review Committee on Education in Radiologic Technology, 20 N. Wacker Drive, Suite 2850, Chicago, IL 60606-3182; tel.: 312.704.5300; fax: 312.704.5304; website: www.jrcert.org.

Massachusetts Board of Registration in Nursing

The Postbaccalaureate Bachelor of Science in Nursing (BSN) program in Worcester has received Full Approval from MBORN, 239 Causeway Street, Suite 200, 2nd Floor, Boston, MA 02114, tel.: 800.414.0168 or 617.973.0900; fax: 617.973.0984; website: www.mass.gov/dph/boards/rn.

The Bachelor of Science in Nursing (BSN) program in Boston has received Full Approval from MBORN, 239 Causeway Street, Suite 200, 2nd Floor, Boston, MA 02114, tel.: 800.414.0168 or 617.973.0900; fax: 617.973.0984, website: www.mass.gov/dph/boards/rn.

New Hampshire Board of Nursing

The Bachelor of Science in Nursing (BSN) on the Manchester campus have received Full Approval from the New Hampshire Board of Nursing, located at 121 South Fruit Street, Concord, NH 03301-2431; tel.: 603.271.2323; fax: 603.271.6605; website: www.nh.gov/nursing.

Facilities

Boston, MA Campus Facility Information

Ronald A. Matricaria Academic and Student Center

To accommodate the growing number of students as well as the growth in program offerings, MCPHS added the 93,000-square-foot Ronald A. Matricaria Academic and Student Center on the Longwood campus in 2004. The Center preserves the signature façade and columns of the George Robert White building within a dramatic glass atrium while enhancing the University's capacity for teaching, scholarly research, and student development. The building features:

- laboratory space for chemistry, professional pharmacy practice, and pharmaceuticals;
- a library, making possible state-of-the-art learning and information resources;
- two floors of apartment-style student residence space;
- two office suites;
- twelve large, modern classrooms; and
- extensive quiet study areas and several group study rooms.

George Robert White Building

Constructed through the generosity of Boston philanthropist George Robert White, the building bearing his name houses administrative and faculty offices, classrooms, laboratories, lecture halls, White Hall, and the Forsyth Dental Hygiene Clinic. The state-of-the-art dental hygiene clinic and teaching laboratory opened in 2005 and, occupying a large portion of the first floor, is named for benefactor and Forsyth alumna Esther M. Wilkins DH '39, DMD.

In addition to the dental hygiene clinic, the White Building houses several teaching and research laboratories, multiple classrooms, and faculty and administrative office suites. In 2009, the Center for Academic Success and Enrichment was created to house an array of academic support services in a renovated suite on the first floor of this historic building. In 2011, a state-of-the-art diagnostic medical imaging suite was completed to support the University's Diagnostic Medical Sonography program—the first in Massachusetts to offer a bachelor's degree in this discipline.

John Richard Fennell Building and Theodore L. Iorio Research Center

This building is an eight-story, mixed-use facility of approximately 230,000 square feet, completed in 1996. The John Richard Fennell Building occupies the east end; the west end is the Theodore L. Iorio Research Center. This structure offers classrooms, conference rooms, the Cardinal lounge, faculty offices, a residence hall, a coffee shop, and underground parking for faculty and staff. The Rombult Atrium adjoining the White Building is used for group study and social events.

Several research and teaching laboratories also are housed in the building, including laboratories for anatomy and physiology, biology and microbiology, cell culture, biology research, physiology research, pharmacology research, behavioral and neuropharmacology, chemistry, physics, and nuclear medicine. The Channing Laboratory division of Brigham and Women's Hospital occupies the building's west end through a long-term lease arrangement.

Henrietta DeBenedictis Library, Boston

The library occupies the second floor of the Matricaria Academic and Student Center and provides open and comfortable seating areas to accommodate various styles of student study, including group study rooms.

The Henrietta DeBenedictis Library maintains research-level collections in pharmacy, pharmacy education, and drug information, as well as core collections in clinical medicine, nursing, and the allied health sciences. Most of the collections have been converted into an electronic format, enabling users to access material remotely and from all three campuses. More than 49,000 journals are made available through a combination of owned subscriptions and titles made accessible through the library's full-text databases. In addition to the electronic journal collections, the library has access to more than 202,000 e-books and 188 databases. Holdings are further extended through membership in the Fenway Library Organization (FLO), a group of 10 full-member libraries and 27 affiliate members that share resources and allows the MCPHS community to directly borrow material. In addition, FLO supports an online public catalog of more than one million volumes held by member institutions. Taking advantage of Boston's extensive research universities and colleges, the MCPHS libraries offer an interlibrary loan service that provides timely delivery of journal articles and books, usually at no cost to our students, faculty, and staff. Professional librarians offer on-campus and virtual reference and information literacy instruction.

Richard E. Griffin Academic Center

In 2009, the University opened the Richard E. Griffin Academic Center, at 670 Huntington Avenue. The center contains 50,000 square feet of classrooms, faculty and staff offices, teaching laboratories, a 250-seat auditorium, and a multifunction room. Students from all degree programs on the Boston campus attend classes in this facility. The upper floors of the six-story building house the University's Nursing, Physician Assistant Studies, and Medical Imaging and Therapeutics programs, as well as offices for Alumni, Advancement, Continuing Education, Community Relations, and the Center for Professional Career Development.

Brant House

The Brant House, which serves as a private residence for the University President, was created in 2002 by joining two adjacent historic three-story brownstone buildings into one building. The first and second floors, which are public floors, are used for receptions, meetings, and other events.

Crossroads Café and Cardinal Lounge

The Cardinal Lounge is a hub of student life on the MCPHS–Boston campus. Members of the MCPHS community use the Cardinal Lounge as a place to meet, study, and relax in a welcoming, supportive environment. At the adjacent Crossroads Café, students can grab a quick cup of coffee on their way to class or pick up a light lunch or an afternoon snack.

Dining Facilities

The University's main dining facility for the Boston campus is located a short walk across Palace Road and is situated above the MCPHS bookstore. The dining hall is shared with Massachusetts College of Art and Design and Wentworth Institute of Technology, and is housed in MassArt's Kennedy Building. A wide range of hot and cold entrées, salad bar offerings, and specialty foods are available for breakfast, lunch, and dinner. The facility is generally open year-round, with some reduction in hours during summer and holiday breaks. A Peet's Coffee & Tea is also housed in these premises.

Bookstore

The MCPHS bookstore is located on Palace Road, across the street from the main campus, and serves both MCPHS and neighboring Massachusetts College of Art and Design. Renovated and expanded in 2009, and located in the lower level of MassArt's Kennedy Building, the bookstore stocks new and used MCPHS textbooks, reference books, insignia clothing, and other college-related items. Textbooks may be ordered or rented online at www.masspharmacy.bkstr.com. The bookstore's telephone number is 617.739.4770; the email is masspharmacy@bkstr.com

Computer Facilities

Beginning in the fall of 2021, students are required to have laptops by all academic programs. A limited number of computer kiosks are available to students across each of the campuses. The University also maintains a virtual technology center (VTC). Accessing the VTC from the Internet provides students with access to all the applications and resources available in the libraries and physical computer labs. All campuses have complete wireless coverage for convenient access to the Internet and email.

Public Transportation and Parking

Students may purchase monthly Massachusetts Bay Transportation Authority (MBTA) passes from the University at a discount. For more information, contact the Center for Campus Life at 617.732.2876.

There is no student parking on the Boston campus. For off-campus parking information, contact Public Safety at 617.732.2900.

Residence Halls

Fennell Hall adjoins the George Robert White building. It provides traditional corridor-style living arrangements with double, triple, and quad rooms. Each room is furnished with beds, dressers, wardrobes, desks, and desk chairs, and is equipped with wireless Internet. Students residing in Fennell have a mandatory full meal plan during the fall and spring semesters. Fennell is supervised by an Area Coordinator, who is a full-time professional staff member who lives on-campus, as well as five student resident assistants (one on each floor). The building has 24-hour security and houses first-year students.

Matricaria Residence Hall provides apartment-style living in two- to five-person apartments. Each unit has a common room with living area, a kitchen, a bathroom, and double and/or single bedrooms. The bedrooms are equipped with beds, dressers, wardrobes, desks, and desk chairs, as well as wireless Internet. The common room has a loveseat, chairs, occasional tables, dining table and chairs, and a kitchen with storage space. Students living in this apartment residence hall are required to purchase a partial meal plan but have the option to purchase a full meal plan. This building is supervised by an Area Coordinator, who is a live-in, full-time professional staff member as well as six student resident assistants (two on each floor). The building has 24-hour security.

University-sponsored housing also is provided in local Colleges of the Fenway (COF) residence halls. The Treehouse residence hall at Massachusetts College of Art and Design houses approximately 250 MCPHS residents. Students live in a suite-style layout with single, double, and triple bedrooms with a shared suite bathroom. The layout of the building lends itself to a creative and community-focused learning environment. Public areas include common space on most floors, a game room, group study rooms, laundry facilities, a fitness room, a vending area, and a lobby with 24-hour security. Treehouse is supervised by an Area Coordinator, who is a full-time professional staff member who lives on campus, as well as nine student resident assistants (one on each floor).

In a long-term partnership with Emmanuel College, a new residence hall containing beds for approximately 250 MCPHS students, opened in the fall of 2018. This 18-story tower features contemporary apartment-style living spaces. Two-bedroom apartments will house four people each with two bedrooms and two bathrooms, a full kitchen, a living room and in-unit washer and dryer. The vibrant ground floor will serve as a common area for the whole community, with a café, convenience store, dance and fitness center, and study/gathering spaces.

All residence halls and University-sponsored housing house students and an area designated as a wellness-themed living-learning community. All residents have access to laundry facilities and each resident is assigned an individual mailbox. Students taking courses during the summer may apply for summer housing.

The Office of Residence Life assists students in identifying off-campus housing resources; see www.mcphs.edu/mcphs-life/boston/housing/off-campus. All questions regarding housing should be directed to the Office of Residence Life at 617.732.2866 or residencelife@mcphs.edu. For a description of the Boston residence halls, as well as additional information regarding residence life in Boston, refer to the website at www.mcphs.edu/mcphs-life/boston/housing.

Worcester, MA Campus Facility Information

Henrietta DeBenedictis Building

The Worcester campus opened in 2000 in a state-of-the-art facility located at 19 Foster Street, named after alumna and benefactor Henrietta DeBenedictis, which includes two auditoriums equipped for videoconferencing, classrooms, laboratories, the Blais Family Library, a student lounge, a help desk and study space, the Brant student services area, and faculty and staff offices.

Thomas Henry Borysek Living and Learning Center

The Thomas Henry Borysek Living and Learning Center, located at 25 Foster Street, contains administrative and faculty offices, a conference room, classrooms, a technology center, patient assessment and clinical simulation laboratories, and six floors of suite-style student housing (all with private bedrooms). The basement provides comfortable group study/social (lounge) space for students. The first floor houses a 24-hour micromart that offers fresh grab and go style food options and drinks café/study space and wellness center. The wellness center has cardio and weight machines along with fitness on demand for access to yoga, spin, and a variety of other on demand classes. A portion of the ninth floor also houses the Fuller Conference Room, a spacious area designed for conferences, board meetings, receptions, and other University gatherings.

Lincoln Square Academic and Student Center

The Lincoln Square Academic and Student Center, located at 10 Lincoln Square, is a state-of-the-art facility that contains administrative and faculty offices, conference rooms, classrooms, clinical labs, an optometry clinic, an optical store, a dental hygiene clinic, the Physical Therapy Balance, Movement and Wellness center, a 24-hour café that offers fresh grab and go style food options and drinks, a quiet study space, a spacious event space, and seven floors of student housing. The center provides facilities for academic programs in physical therapy, physician assistant studies, optometry, dental hygiene, and medical imaging.

Maher Academic Center

The Maher Academic Center at 40 Foster Street houses 30,000 square feet of academic and student space. Two 250-seat auditoriums and three “smart” classrooms feature the latest instructional technology and interactive videoconferencing capability. The street-level multipurpose laboratory includes a model pharmacy that simulates community and institutional practice environments. A student lounge, student meeting rooms, quiet study areas, and faculty and administrative offices complete the facility.

Academic Affairs – Academic Innovation & Academic Technology/Instructional Support, Brant Building, 28 Mechanic Street

This building houses the staff members charged with new program development and academic technology/instructional support. Both units are divisions within Academic Affairs. There are also members of the School of Healthcare Business and the School of Professional Studies housed here. There is a small conference room on the first floor for staff groups

at the Worcester campus.

19 Norwich Street Building

This building opened in Fall 2016 for the New England School of Acupuncture and houses classrooms, practice labs, student lounge, study space, and faculty and administrative offices. The Acupuncture Treatment Center occupies the first floor, where student interns offer acupuncture and herbal services to the public, closely supervised by senior faculty. A small store and herbal dispensary support students and providers.

Blais Family Library, Worcester

A branch of the Henrietta DeBenedictis Library, which is located on the Boston campus, the Blais Family Library contains a core collection of pharmacy, clinical medicine, optometry, physical therapy, dental hygiene, and nursing print material. Professional librarians provide reference and library instruction. Interlibrary loan and document delivery are available from Boston's collections as well as from the collections of many New England medical and academic libraries.

The Blais Family Library is a member of the Academic and Research Collaborative, a consortium of 18 libraries including that of the University of Massachusetts Worcester Medical School, which participates in free cross-borrowing services.

Computer Facilities

Beginning in the fall of 2021, students are required to have laptops by all academic programs. A limited number of computer kiosks are available to students across each of the campuses. The University also maintains a virtual technology center (VTC). Accessing the VTC from the Internet provides students with access to all the applications and resources available in the libraries and physical computer labs. All campuses have complete wireless coverage for convenient access to the Internet and email.

Parking

Student parking on the MCPHS–Worcester campus is limited, provided based on availability, and not guaranteed to any individual. Parking on campus is an additional fee that is charged per semester. For information, please contact the Administrative Coordinator for the Worcester campus at 508.373.5754.

Residence Halls

The Thomas Henry Borysek Living and Learning Center (located at 25 Foster Street), with student residences on the fourth through ninth floors, offers apartment-, studio-, and suite-style housing options. All students enjoy the privacy of a single bedroom within an apartment/suite equipped with a kitchen. The building also has laundry, vending machines, two study rooms, and student mailboxes, and can accommodate 145 resident students. Three resident assistants reside in the building. Additionally, there are 24-hour security personnel. The building adjoins the Henrietta DeBenedictis Building (19 Foster Street), which includes the Blais Family Library; the residence halls are located directly above classrooms, study space, and administrative offices.

The Lincoln Square Academic and Student Center (located at 10 Lincoln Square), with student residences on the third through ninth floors, offers private bedrooms and bathrooms. Lincoln Square is a short three-block walk from the Foster Street end of campus. The building also houses a common kitchen, café, laundry facilities, vending machines, student mailboxes, classrooms, labs, faculty and administrative offices, a large meeting/event space, and a parking garage. The building can accommodate approximately 202 resident students. Four resident assistants reside in the building. Additionally, there are 24-hour security personnel.

The Lancaster Street Apartments (located at 7, 11, and 15 Lancaster Street) are located within 10 minutes of the Lincoln Square Academic and Student Center and the academic buildings on Foster Street and offer two-bedroom apartments with a shared bathroom. Students have the privacy of an individual bedroom and share the common areas such as the living room, kitchen, and bathroom with one roommate. There is on-site laundry for resident students. High-speed Internet and streaming services are provided. This building can accommodate 36 students. There is also one resident assistant residing in the living area.

The Apartments at 72 Salisbury Street are located within 10 minutes of the Lincoln Square Academic and Student Center and offer one- and two-bedroom apartments. Each apartment has personal bedrooms for each occupant and shared kitchen, living room, and bathroom for two-person apartments. These apartments have hardwood floors, laundry facilities on site, and one resident assistant assigned to the building.

The Apartments at 50 and 60 Salisbury Street are located within 10 minutes of the Lincoln Square Academic and Student Center, and offer single and two-person apartments with shared kitchen, living room, and bathroom(s). These very spacious apartments have unique features that vary between the specific apartments, including walk-in closets, second floors, patios, large kitchen areas, or living rooms. Each apartment is equipped with laundry machines. One full-time professional staff member resides in 50 Salisbury Street, and one resident assistant resides in 60 Salisbury Street.

The Apartments at 379 Main Street are located a block away from the Foster and Norwich Street academic buildings. There are student residences on the second-fifth floors of the building. All spaces are studio-style apartments with a private bathroom, a two-burner stovetop and a convection microwave oven. The building also houses common study spaces on each floor, student mailboxes and a coin-operated laundry room. This building can accommodate 52 students. There is a part-time graduate assistant and one resident assistant residing in the living area.

All residence hall rooms and apartments are gender-specific.

The Residence Life staff also plans programming focused on providing opportunities for stress relief, social justice and socializing with fellow MCPHS–Worcester students outside the classroom. The staff strives to create fun, relaxed events that encourage students to take a much-deserved break.

Contact a member of the Residence Life staff, consisting of the Director of Residence Life (508.373.5628) or the Area Coordinator for Lincoln Square, Salisbury Street, and Lancaster Street (508.373.5642) on the Worcester campus for more information regarding Residence Life or visit the website at www.mcphs.edu/campuses/worcester/housing. For questions related to housing placement or the housing process, please contact the Administrative Coordinator for the Worcester campus at 508.373.5754.

Student Lounge

The National Association of Chain Drug Stores (NACDS) student lounge/café is located in the lower level of the Henrietta DeBenedictis Building (19 Foster Street). It contains student lockers and is a gathering place for students to meet, study, or have a meal in a relaxed atmosphere. Internet and email access are available.

Manchester, NH Campus Facility Information

Joseph F. and Francis P. Brant Academic and Student Center

Located in the heart of Manchester, New Hampshire, the Joseph F. and Francis P. Brant Academic and Student Center is a 33,000-square-foot, three-story space consisting of classrooms, a physical assessment laboratory, a clinical simulation laboratory, a professional pharmacy practice laboratory, a library / learning resource space, state-of-the-art videoconference classrooms linked to the Worcester campus, student lounge, seminar rooms, a Student Government office, a resource area, and faculty and staff offices.

The Brant Hub

Brant Hub is more than 15,000 square feet. The first floor houses a micromart that offers fresh grab and go style food options and drinks, several quiet study areas, the student lounge, a large Adirondack style fireplace, pediatric and adult labs, and Occupational Therapy, and Physician Assistant Studies faculty offices. The second floor includes two videoconference classrooms linked to the Worcester campus, and with an information monitor, chairs, and couches). Wireless Internet is available.

Library and Computer Facilities, Manchester

The library, a branch of the Henrietta DeBenedictis Library in Boston, contains a core collection of pharmacy, clinical medicine, and nursing texts. Students have access to all of the Boston library's electronic resources, as well as interlibrary loan from Boston's collections and those of many New England medical and academic libraries. Reference and library instruction is provided by a professional librarian. The library is a member of the New Hampshire College and University Council, providing access to the collections of its member libraries.

The campus is equipped with wireless technology for convenient access to the Internet and email.

Laboratory Facilities

The patient assessment laboratory is a multifunction laboratory serving courses such as physical assessment, anatomy, and clinical medicine. The laboratory houses 14 physical assessment stations, small medical equipment, and anatomical models and specimens. The professional pharmacy practice / pharmaceuticals laboratory simulates a working pharmacy to introduce students to pharmacy operations and the role of a pharmacist. The clinical simulation laboratory is designed to replicate a hospital environment and consists of six medical/surgical bays, one pediatric/infant bay, and two critical care units. Each bay contains a hospital bed, bedside table and chest, overhead lights, live medical gases at each station (vacuum, air, oxygen), and other patient-monitoring equipment. Sophisticated, computer-controlled simulated patients (adult and pediatric) are an important teaching aid in this lab.

The School of Occupational Therapy learning laboratories consist of a Sensory-Based Pediatric Lab, a Functional Living Adult Lab, and an Upper-Extremity Orthopedic Lab. The pediatric lab houses a 3-point sensory suspension system and

multimodal sensory equipment. The adult lab houses a training kitchen and living space and a training bathroom. The upper-extremity lab houses Bioness equipment, splinting area, and a therapeutic exercise training station.

Parking

Limited student parking is available near the Manchester campus. For information, contact Administrative Services for the Manchester campus at 603.314.1760.

Brant Student Lounge

The student lounge serves as the gathering place for students to study, converse, meet, share a meal, relax, and hold celebrations, and includes lockers, a small kitchen area, a large-screen TV, an information monitor, and comfortable chairs and couches.

Interinstitutional Cooperation

Consortia

Colleges of the Fenway (COF)

MCPHS is one of five institutions of higher education in the Longwood Medical and Academic Area of Boston that joined together in 1996 to form a consortium that includes MCPHS, Emmanuel College, Massachusetts College of Art and Design, Simmons University, and Wentworth Institute of Technology. The five institutions, each with its own unique mission, offer a world of learning and experience on and off campus. Collectively, the COF represent more than 20,000 undergraduate and graduate students, more than 700 full-time faculty, and 2,300 course offerings. Shared initiatives among the five institutions are aimed at enhancing the quality of education, enriching student experiences, and reducing costs through the sharing of resources. Collaborative student opportunities include cross-registration, which broadens access to courses otherwise not available on the student's home campus; intramurals; performing arts; student life programs and activities; sustainability initiatives, and study abroad opportunities. www.colleges-fenway.org

Higher Education Consortium of Central Massachusetts (HECCMA)

MCPHS is one of 11 institutions of higher education in the central Massachusetts area that joined together to form a consortium that includes Anna Maria College, Assumption College, Becker College, Clark University, College of the Holy Cross, Cummings School of Veterinary Medicine (Tufts University), Quinsigamond Community College, UMass Medical School, Worcester Polytechnic Institute, and Worcester State University. HECCMA's 11 member colleges and universities offer a diverse set of courses in many academic disciplines, adding to the rich cultural fabric of Worcester and Central Massachusetts. Students can take advantage of opportunities for sharing courses and facilities. This partnership provides opportunities to participate in college career fairs and internships through member institutions. www.heccma.org

Massachusetts Independent College Transfer Guarantee (Massachusetts Guarantee)

MCPHS University, the New England Board of Higher Education Association of Independent Colleges and Universities in Massachusetts and the Massachusetts Association of Community Colleges have established a formal articulation agreement with all Massachusetts Community Colleges. This program begins with two years at a Massachusetts Community College, earning any Associates degree, and concludes with two years completing one of the following programs: Health Humanities, Healthcare Management, Health Psychology, Health Science, or Public Health on the MCPHS-Boston campus. The curriculum that Massachusetts Community Colleges offers is a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, totaling 60 credits allowing for direct entry in junior status for students who qualify.

New Hampshire College and University Council (NHCUC)

NHCUC is a consortium of 16 public and private institutions of higher education in the state of New Hampshire. MCPHS joined the council when it opened its Manchester, New Hampshire, campus in 2002. The council's mission is the advancement of higher education in the state through collaborative efforts among the 22 colleges and universities and the enhancement of educational opportunities for the more than 70,000 students who attend the council's member institutions. The council works to coordinate collaborative initiatives among academic, library, and informational technology offices; sponsors professional development conferences for faculty; and promotes awareness and understanding of higher education among legislators and the public. www.nhcuc.org

Institutional Agreements

MCPHS has agreements with academic institutions that offer a seamless pathway of study from a variety of majors including: Health Psychology, Health Sciences, Medical and Molecular Biology, Pharmaceutical Business, Premedical Health Studies, or Public Health majors to several graduate and professional degree programs (see details in the larger Institutional Agreements section of this catalog or at www.mcphs.edu).

Prospective first-year students should speak with an admission counselor at the University about prerequisites for admission into majors for these programs.

Entry from MCPHS to Other Health Professions Programs

Drexel University College of Medicine (Philadelphia, Pennsylvania)

Interdepartmental Medical Science (IMS)

Drexel University College of Medicine and MCPHS have an affiliation that provides reserved admission to MCPHS Premedical Health Studies students who wish to complete the certificate in Interdepartmental Medical Science. Established in 1981, the Interdepartmental Medical Science (IMS) program has been successful in helping students gain entry into U.S. medical schools. The IMS program offers an interdisciplinary curriculum that integrates first-year medical school basic science courses and delivers them through clinical system-based modules. Students apply to medical or other health professional schools either during or after completion of the IMS program. Successful completion of the coursework (B grades or better) demonstrates to health professional schools the student's ability to handle medical school coursework.

Lake Erie College of Osteopathic Medicine (Erie, Pennsylvania, or Bradenton, Florida)

Doctor of Osteopathic Medicine (DO)

MCPHS and Lake Erie College of Osteopathic Medicine (LECOM) have established an early acceptance program whereby MCPHS students are enrolled jointly by MCPHS and LECOM to facilitate the admission of MCPHS students into LECOM's Doctor of Osteopathic Medicine program. LECOM will interview students prior to their enrollment at MCPHS or within the first two years of study at MCPHS. Students who interview successfully will be offered a provisional acceptance to LECOM's Doctor of Osteopathic Medicine program. Provisionally accepted students may not apply to any other medical school. Application to another medical school will result in the loss of the student's provisional acceptance. Upon meeting the criteria for final acceptance, students will matriculate at the LECOM campus of their choice: Erie, Pennsylvania, or Bradenton, Florida. The early acceptance program offers two tracks: (1) The "4+4" track is the recommended pathway for most students. (2) The "3+4" track is available to all students but is typically utilized by the highly motivated student who wishes to enter medical school before receiving an undergraduate degree or a nontraditional student who already has a degree. Students enrolled in this track may receive a baccalaureate degree in an appropriate field from MCPHS upon successful completion of at least 30 credit hours at LECOM.

Lake Erie College of Osteopathic Medicine (Bradenton, Florida)

Doctor of Dental Medicine (DMD)

MCPHS and Lake Erie College of Osteopathic Medicine (LECOM) have established an early acceptance program agreement for MCPHS students into LECOM's Doctor of Dental Medicine program. LECOM will interview the student prior to enrollment at MCPHS or within the first two years of study at MCPHS. Students interviewing successfully will be offered a provisional acceptance to LECOM's Doctor of Dental Medicine program. Provisionally accepted students may not apply to any other dental school. Application to another dental school will result in the loss of the student's provisional acceptance. Upon meeting the criteria for final acceptance, students will matriculate at the LECOM Bradenton, Florida, campus. Students complete four years of undergraduate education at MCPHS and four years of dental school education at LECOM and its associated clinical training sites.

St. George's University School of Veterinary Medicine (Grenada)

Doctor of Veterinary Medicine (DVM)

MCPHS University and St. George's University (SGU) School of Veterinary Medicine have an affiliation that offers qualified students the opportunity to pursue a career in veterinary medicine at Saint George's University, following successful graduation from MCPHS University. St. George's School of Veterinary Medicine program offers students a unique, innovative, international approach to veterinary medicine. Great emphasis is placed upon clinical instruction as a method of formulating basic science curriculum into clinical practice with the use of simulation models, case-based teaching and outstanding student to faculty ratios. With state-of-the-art teaching and laboratory facilities, students receive exemplary experiences in preparation for clinical training rotations and for general veterinary practice following graduation. Students receive extensive opportunities designed to foster the understanding and confidence required for success as veterinary professionals, including research, practice management and responsibilities of veterinarians to local and global public health.

The program offers three years of didactic coursework in basic sciences and introductory clinical work in medicine and surgery in Grenada, followed by a fourth year of clinical training at one of twenty-nine AVMA-Accredited affiliated veterinary schools in the United States, United Kingdom, Ireland, Canada and Australia.

William James College (Newton, Massachusetts)

MCPHS University and William James College (WJC) have established an agreement whereby WJC will offer an interview and consider the applications of up to ten qualified MCPHS students per year, from any academic program, for their Master of Arts programs (Clinical Mental Health Counseling MA, Applied Behavior Analysis MA, School Psychology MA, Organizational Psychology MA) and Doctor of Psychology in Clinical Psychology (PsyD) program.

A.T. Still University / Kirksville College of Osteopathic Medicine (Kirksville, Missouri)

Doctor of Osteopathic Medicine (DO)

A.T. Still University / Kirksville College of Osteopathic Medicine (KCOM) and MCPHS have an affiliation that provides reserved admission to KCOM for highly qualified MCPHS students through the Still Scholars preosteopathic program. Students are admitted to KCOM at the beginning of their third year at MCPHS. If they continue to meet KCOM admission requirements, the MCAT exam is waived and, following completion of the four-year Bachelor of Science in Premedical Health Studies degree, they have a reserved space at KCOM. This professional pathway provides an exceptional opportunity for the highly motivated high school student with a professional goal of becoming a Doctor of Osteopathic Medicine. A.T. Still founded the Kirksville College of Osteopathic Medicine in the late nineteenth century; it is the oldest school of osteopathic medicine in the United States.

The program allows for completion of the bachelor of science degree at MCPHS in four years and the doctor of osteopathic medicine degree at A.T. Still University / Kirksville College of Osteopathic Medicine in another four years. The osteopathic curriculum involves four years of postbaccalaureate academic study. Reflecting the osteopathic philosophy, the curriculum emphasizes preventive medicine and holistic patient care. Medical students learn to use osteopathic principles and techniques for the diagnosis and treatment of disease.

Entry from Other Institutions to MCPHS Health Professions Programs

Assumption College (Worcester, Massachusetts)

Nursing (BSN)

Assumption College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Assumption College, earning a Bachelor of Science degree in Biology (or related field), and concludes with 16 months in the accelerated Bachelor of Science in Nursing (Postbaccalaureate) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at Assumption College offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Assumption, and the specified preprofessional coursework for entry to the BSN program.

Optometry (OD)

Assumption College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Assumption College, earning a bachelor of arts degree in biology (or related field), and concludes with four years in the Doctor of Optometry (OD) program on the MCPHS–Worcester campus. The curriculum at Assumption College offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Assumption, and the specified preprofessional coursework for entry to the OD program.

Pharmacy (PharmD)

Assumption College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Assumption College, earning a bachelor of arts degree in biology (or related field), and concludes with three years in the Doctor of Pharmacy (Accelerated PharmD) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at Assumption College offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Assumption, and the specified preprofessional coursework for entry to the PharmD program.

Physical Therapy (DPT)

Assumption College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Assumption College, earning a bachelor of arts degree in biology (or related field), and concludes with three years in the Doctor of Physical Therapy (DPT) program on the MCPHS–Worcester campus. The curriculum at Assumption College offers a blend of liberal arts and sciences that meets the MCPHS general education

curriculum requirements, the specific degree requirements at Assumption, and the specified preprofessional coursework for entry to the DPT program.

Physician Assistant Studies (MPAS)

Assumption College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Assumption College, earning a bachelor of arts degree in biology (or related field), and concludes with two years in the Master of Physician Assistant Studies (Accelerated MPAS) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at Assumption College offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Assumption, and the specified preprofessional coursework for entry to the MPAS program.

Bunker Hill Community College (Boston, Massachusetts)

Pharmacy (PharmD)

Bunker Hill Community College (BHCC) and MCPHS University- School of Pharmacy Worcester/Manchester have a formal affiliation agreement that begins with two years at BHCC, earning an Associate in Science (A.S.) Degree in Biological Sciences: Medical Professions, and guarantees an interview to qualified BHCC students for a three-year accelerated Doctor of Pharmacy degree program.

Clark University (Worcester, Massachusetts)

Nursing (BSN)

Clark University and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Clark University, earning a Bachelor of Arts degree in Biology (or related field), and concludes with 16 months in the accelerated Bachelor of Science in Nursing (Postbaccalaureate) program on the MCPHS–Worcester campus. The curriculum at Clark University offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Clark University, and the specified preprofessional coursework for entry to the BSN program.

Pharmacy (PharmD)

Clark University and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Clark University, earning a Bachelor of Arts degree in Biology (or related field), and concludes with three years in the Doctor of Pharmacy (Accelerated PharmD) program on the MCPHS–Worcester campus. The curriculum at Clark University offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Clark University, and the specified preprofessional coursework for entry to the PharmD program.

Physician Assistant Studies (MPAS)

Clark University and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Clark University, earning a Bachelor of Arts degree in Biology (or related field), and concludes with two years in the Master of Physician Assistant Studies (Accelerated MPAS) program on the MCPHS–Worcester campus. The curriculum at Clark University offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Clark University, and the specified preprofessional coursework for entry to the MPAS program.

College of the Holy Cross (Worcester, Massachusetts)

Nursing (BSN)

College of the Holy Cross and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Holy Cross, earning a Bachelor of Arts degree in Biology (or related field), and concludes with 16 months in the accelerated Bachelor of Science in Nursing (Postbaccalaureate) program on the MCPHS–Worcester campus. The curriculum at Holy Cross offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Holy Cross, and the specified preprofessional coursework for entry to the BSN program.

Pharmacy (PharmD)

College of the Holy Cross and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Holy Cross, earning a Bachelor of Arts degree in Biology (or related field), and concludes with three years in the Doctor of Pharmacy (Accelerated PharmD) program on the MCPHS–Worcester campus. The curriculum at Holy Cross offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Holy Cross, and the specified preprofessional coursework for entry to the PharmD program.

Physical Therapy (DPT)

College of the Holy Cross and MCPHS have a formal affiliation agreement that admits students into an articulated

program that begins with four years at Holy Cross, earning a Bachelor of Arts degree in Biology (or related field), and concludes with three years in the Doctor of Physical Therapy (DPT) program on the MCPHS–Worcester campus. The curriculum at Holy Cross offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Holy Cross, and the specified preprofessional coursework for entry to the DPT program.

Physician Assistant Studies (MPAS)

College of the Holy Cross and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Holy Cross, earning a Bachelor of Arts degree in Biology (or related field), and concludes with two years in the Master of Physician Assistant Studies (Accelerated MPAS) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at Holy Cross offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Holy Cross, and the specified preprofessional coursework for entry to the MPAS program.

Drexel University (Philadelphia, PA)

Pharmacy (PharmD)

Drexel University and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Drexel University, earning a Bachelor's degree in biology (or related field), and concludes with three years in the Doctor of Pharmacy (PharmD) program on the MCPHS Worcester campus. The curriculum at Drexel University offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Drexel, and the specified preprofessional coursework for entry into the PharmD program.

Framingham State University (Framingham, Massachusetts)

Pharmacy (PharmD)

Framingham State University (FSU) and MCPHS have a formal affiliation agreement that begins with completion of a four-year Bachelor of Science in Biology, Biochemistry or Chemistry Degree program, and guarantees an interview to qualified students for a three-year accelerated Doctor of Pharmacy degree program at MCPHS on the Worcester or Manchester campuses.

New England College (Henniker, New Hampshire)

Nursing (BSN)

New England College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with 6 semesters at New England College in the Health Science major and concludes with 4 semesters in the accelerated Bachelor of Science in Nursing (Postbaccalaureate) program on the MCPHS-Manchester campus. Upon successful completion of all the requirements, students will earn a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at New England College, and the specified preprofessional coursework for entry to the BSN. Program.

Pharmacy (PharmD)

New England College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at New England College, earning a Bachelor of Science degree and completing successfully all courses in the prepharmacy program, and concludes with three years in the Doctor of Pharmacy (Accelerated PharmD) program on the MCPHS–Manchester campus. The curriculum at New England College offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at New England College, and the specified preprofessional coursework for entry to the PharmD program.

Physician Assistant Studies (MPAS)

New England College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at New England College, earning a Bachelor of Science degree and completing successfully all courses in the pre-physician assistant studies program, and concludes with two years in the Master of Physician Assistant Studies (Accelerated MPAS) program on the MCPHS–Manchester campus. The curriculum at New England College offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at New England College, and the specified preprofessional coursework for entry to the MPAS program.

Quinsigamond Community College (Worcester, Massachusetts)

Nursing (MSN)

Quinsigamond Community College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with earning an Associate of Science degree in Nursing and concludes with three years in the RN to MSN Bridge program at MCPHS Online. Qualified students must meet all prerequisite and GPA requirements and have a current RN license prior to matriculation in order to be eligible for entry to the MSN program.

Dental Hygiene (DH)

Quinsigamond Community College and MCPHS have a formal affiliation agreement that admits students into the Fast Track BS in Dental Hygiene program at MCPHS Worcester upon successful completion of an AS degree from QCC and successful completion of all prerequisite requirements. QCC students must complete all application requirements as outlined on the MCPHS website. Matriculation into the DH program is offered only for fall entry.

Diagnostic Medical Sonography (DMS)

Quinsigamond Community College and MCPHS have a formal affiliation agreement that admits students into the Fast Track BS in Diagnostic Medical Sonography (DMS) program at MCPHS Worcester upon successful completion of an AS degree from QCC and successful completion of all prerequisite requirements. QCC students must complete all application requirements as outlined on the MCPHS website. Matriculation into the DMS program is offered only for fall entry.

Pharmacy (PharmD)

Quinsigamond Community College and MCPHS have a formal affiliation agreement that guarantees an on-campus faculty interview, with priority consideration in the final admission process, for the PharmD program at MCPHS Worcester upon successful completion of an AS degree from QCC and successful completion of all prerequisite requirements. QCC students must complete all application requirements as outlined on the MCPHS website. Matriculation into the PharmD program is offered only for fall entry.

Saint Anselm College (Manchester, New Hampshire)

Nursing (BSN)

Saint Anselm College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Saint Anselm, earning a Bachelor of Arts degree in Biology (or related field), and concludes with 16 months in the accelerated Bachelor of Science in Nursing (Postbaccalaureate) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at Saint Anselm offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Saint Anselm, and the specified preprofessional coursework for entry to the BSN program.

Optometry (OD)

Saint Anselm College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Saint Anselm, earning a Bachelor of Arts degree in Biology (or related field), and concludes with four years in the Doctor of Optometry (OD) program on the MCPHS–Worcester campus. The curriculum at Saint Anselm offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Saint Anselm, and the specified preprofessional coursework for entry to the OD program.

Pharmacy (PharmD)

Saint Anselm College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Saint Anselm, earning a Bachelor of Arts degree in Biology (or related field), and concludes with three years in the Doctor of Pharmacy (Accelerated PharmD) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at Saint Anselm offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Saint Anselm, and the specified preprofessional coursework for entry to the PharmD program.

Physical Therapy (DPT)

Saint Anselm College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Saint Anselm, earning a Bachelor of Arts degree in Biology (or related field), and concludes with three years in the Doctor of Physical Therapy (DPT) program on the MCPHS–Worcester campus. The curriculum at Saint Anselm offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Saint Anselm, and the specified preprofessional coursework for entry to the DPT program.

Physician Assistant Studies (MPAS)

Saint Anselm College and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Saint Anselm, earning a Bachelor of Arts degree in Biology (or related field), and concludes with two years in the Master of Physician Assistant Studies (Accelerated MPAS) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at Saint Anselm offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Saint Anselm, and the specified preprofessional coursework for entry to the MPAS program.

Salem State University (Salem, Massachusetts)

Optometry (OD)

Salem State University and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Salem State, earning a Bachelor's degree in biology, chemistry, or related field, and concludes with four years in the Doctor of Optometry (OD) program on the MCPHS–Worcester campus. The curriculum at Salem State offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Salem State, and the specified preprofessional coursework for entry to the OD program.

Pharmacy (PharmD)

Salem State University and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Salem State, earning a Bachelor's degree in biology, chemistry, or related field, and concludes with three years in the Doctor of Pharmacy (Accelerated PharmD) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at Salem State offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Salem State, and the specified preprofessional coursework for entry to the PharmD program.

Physical Therapy (DPT)

Salem State University and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Salem State, earning a Bachelor's degree in biology, chemistry, or related field, and concludes with three years in the Doctor of Physical Therapy (DPT) program on the MCPHS–Worcester campus. The curriculum at Salem State offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Salem State, and the specified preprofessional coursework for entry to the DPT program.

Physician Assistant Studies (MPAS)

Salem State University and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at Salem State, earning a Bachelor's degree in biology, chemistry, or related field, and concludes with two years in the Master of Physician Assistant Studies (Accelerated MPAS) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at Salem State offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at Salem State, and the specified preprofessional coursework for entry to the MPAS program.

University of Maine (Orono, Maine)

Nursing (BSN)

University of Maine and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at University of Maine, earning a Bachelor of Science degree in Biology (or related field), and concludes with 16 months in the accelerated Bachelor of Science in Nursing (Postbaccalaureate) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at University of Maine offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at University of Maine, and the specified preprofessional coursework for entry to the BSN program.

Pharmacy (PharmD)

University of Maine and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at University of Maine, earning a Bachelor of Science degree in Biology (or related field), and concludes with three years in the Doctor of Pharmacy (Accelerated PharmD) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at University of Maine offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at University of Maine, and the specified preprofessional coursework for entry to the PharmD program.

Physician Assistant Studies (MPAS)

University of Maine and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at University of Maine, earning a Bachelor of Science degree in Biology (or related field), and concludes with two years in the Master of Physician Assistant Studies (Accelerated MPAS) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at University of Maine offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at University of Maine, and the specified preprofessional coursework for entry to the MPAS program.

University of New Hampshire at Manchester (Manchester, New Hampshire)

Pharmacy (PharmD)

University of New Hampshire at Manchester (UNH Manchester) and MCPHS–Manchester have a formal affiliation agreement that admits students into an articulated program that begins with three years of prepharmacy study at UNH

Manchester and concludes with the three-year Doctor of Pharmacy (Accelerated PharmD) program on the MCPHS–Manchester campus. After successfully completing the first year of required coursework in the PharmD program at MCPHS, students will earn a Bachelor of Science (BS) or Bachelor of Arts (BA) degree (as applicable) from UNH Manchester. The first three years at UNH Manchester offer a blend of liberal arts and sciences that meets both the MCPHS general education curriculum requirements and the specific science track requirements at UNH Manchester. MCPHS provides the coursework needed for the student to earn the BS or BA degree from UNH Manchester at the end of the first year of professional study, as well as the professional education required to earn the doctor of pharmacy degree at the end of three years at MCPHS–Manchester.

Physician Assistant Studies (MPAS)

University of New Hampshire at Manchester (UNH Manchester) and MCPHS–Manchester have a formal affiliation agreement that admits students into an articulated program that begins with four years at UNH Manchester, earning a Bachelor of Science (BS) or Bachelor of Arts (BA) degree (as applicable) and completing successfully all courses in the pre-physician assistant studies program, and concludes with two years in the Master of Physician Assistant Studies (Accelerated MPAS) program on the MCPHS–Manchester campus. The curriculum at UNH Manchester offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at UNH Manchester, and the specified preprofessional coursework for entry to the MPAS program.

Worcester Polytechnic Institute (Worcester, Massachusetts)

Optometry (OD)

Worcester Polytechnic Institute (WPI) and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at WPI, earning a Bachelor of Science degree in biology, chemistry, or a related field, and concludes with four years in the Doctor of Optometry (OD) program on the MCPHS–Worcester campus. The curriculum at WPI offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at WPI, and the specified preprofessional coursework for entry to the OD program.

Pharmacy (PharmD)

Worcester Polytechnic Institute (WPI) and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at WPI, earning a Bachelor of Science degree in biology, chemistry, or a related field, and concludes with three years in the Doctor of Pharmacy (Accelerated PharmD) program on the MCPHS–Worcester campus. The curriculum at WPI offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at WPI, and the specified preprofessional coursework for entry to the PharmD program.

Physical Therapy (DPT)

Worcester Polytechnic Institute (WPI) and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at WPI, earning a Bachelor of Science degree in biology, chemistry, or a related field, and concludes with three years in the Doctor of Physical Therapy (DPT) program on the MCPHS–Worcester campus. The curriculum at WPI offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at WPI, and the specified preprofessional coursework for entry to the DPT program.

Physician Assistant Studies (MPAS)

Worcester Polytechnic Institute (WPI) and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at WPI, earning a Bachelor of Science degree in biology, chemistry, or a related field, and concludes with two years in the Master of Physician Assistant Studies (Accelerated MPAS) program on the MCPHS–Worcester campus. The curriculum at WPI offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at WPI, and the specified preprofessional coursework for entry to the MPAS program.

Worcester State University (Worcester, Massachusetts)

Nursing (BSN)

Worcester State University (WSU) and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins at WSU with the completion of 80 credits toward a Bachelor of Science (BS) degree in Public Health at WSU and concludes with 16 months in the accelerated Bachelor of Science in Nursing (Postbaccalaureate) program on the MCPHS–Worcester or MCPHS–Manchester campus. Under this agreement, students will earn a BS in public health degree from WSU and a BSN degree from MCPHS after completion of the entire program. The curriculum at WSU offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at WSU, and the specified preprofessional coursework for entry to the BSN program.

Optometry (OD)

Worcester State University (WSU) and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at WSU, earning a Bachelor of Arts degree in Biology (or related field), and concludes with four years in the Doctor of Optometry (OD) program on the MCPHS–Worcester campus. The curriculum at WSU offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at WSU, and the specified preprofessional coursework for entry to the OD program.

Pharmacy (PharmD)

Worcester State University (WSU) and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with three years at WSU in one of four science tracks—biology, biotechnology, chemistry, or natural science—and concludes with the three-year Doctor of Pharmacy (Accelerated PharmD) program on the MCPHS–Worcester or MCPHS–Manchester campus. After successfully completing the first year of required coursework in the PharmD program at MCPHS, students will earn a Bachelor of Science (BS) degree from WSU. The first three years at WSU offer a blend of liberal arts and sciences that meets both the MCPHS general education curriculum requirements and the specific science track requirements at WSU. MCPHS provides the coursework needed for students to earn the BS degree from WSU at the end of the first year of professional study, as well as the professional education required to earn the Doctor of Pharmacy degree at the end of three years at MCPHS.

Physical Therapy (DPT)

Worcester State University (WSU) and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at WSU, earning a Bachelor of Arts degree in Biology (or related field), and concludes with three years in the Doctor of Physical Therapy (DPT) program on the MCPHS–Worcester campus. The curriculum at WSU offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at WSU, and the specified preprofessional coursework for entry to the DPT program.

Physician Assistant Studies (MPAS)

Worcester State University (WSU) and MCPHS have a formal affiliation agreement that admits students into an articulated program that begins with four years at WSU, earning a Bachelor of Arts degree in Biology (or related field), and concludes with two years in the Master of Physician Assistant Studies (Accelerated MPAS) program on the MCPHS–Worcester or MCPHS–Manchester campus. The curriculum at WSU offers a blend of liberal arts and sciences that meets the MCPHS general education curriculum requirements, the specific degree requirements at WSU, and the specified preprofessional coursework for entry to the MPAS program.

State Authorization Reciprocity Agreement (SARA)

Complaint Procedures

Students enrolled in distance education courses or online programs who are residents of states other than Massachusetts and New Hampshire, and when such state is a SARA participating state, may submit complaints to the Associate Provost, Academic Innovation by completing the complaint form. Students may also submit complaints to their dean or program director or the Office of Student Affairs. Additionally, students may submit information anonymously through the University's Compliance Hotline, a toll-free, 24-hours-a-day, 7 days-a-week resource. The Compliance Hotline is staffed and managed by Lighthouse Services, Inc., a company that is not affiliated with MCPHS University and provides this service under contract. The Compliance Hotline may be contacted by:

Telephone: 877.472.2110

Email: reports@lighthouse-services.com (please indicate that your report concerns MCPHS University)

Fax: 215.689.3885 (please indicate that your report concerns MCPHS University)

Efforts will be made to conclude the investigation, make a determination as to the appropriate course of action, and notify the student within 90 days following the receipt of a complaint.

Complaints under Title IX may also be submitted following the procedures outlined in the University's Title IX policy. All such complaints will be forwarded to the University's Title IX Coordinator and handled in accordance with the University's Title IX Policy.

The University will not in any way retaliate against an individual who reports a perceived violation of MCPHS policy, state, federal, or local law. It will also not retaliate against anyone associated with the individual who engages in such protected conduct, such as a family member, or any person who participates in an investigation. MCPHS further will not tolerate retaliation by any employee or student.

After the conclusion of the process outlined above, students enrolled in distance education courses or online programs who are residents of states other than Massachusetts and New Hampshire, and when such state is a SARA participating state, may appeal the University's decision to the Massachusetts Department of Higher Education which makes complaint forms available on its website. The contact information for the SARA Coordinator at the Massachusetts Department of Higher Education is:

SARA Coordinator
Massachusetts Department of Higher Education
One Ashburton Place, Room 1401
Boston, MA 02108
617.994.6910
SARAINquiries@dhe.mass.edu
www.mass.edu/sara

Professional Licensure

A chart of MCPHS University's courses and programs that customarily lead to professional licensure, and the states where such programs meet, do not meet, or have not yet been determined to meet a state's educational requirements for professional licensure may be found at <https://www.mcphs.edu/about-mcphs/legal>.

Residency

Course and program availability varies by state. Admission into a program is dependent on program availability in the state where the student is physically located at the time of admission. If a student moves to a different state after admission to the program, continuation within the program will depend on the availability of the program within the new state where the student is physically present. It is the student's responsibility to notify the college of a change in physical presence.

Student Services

Center for Academic Success and Enrichment (CASE)

The goal of the Center for Academic Success and Enrichment (CASE) on all three campuses, is to assist students in maximizing their potential to be more efficient, effective, and independent learners. The CASE seeks to develop the whole student by enhancing integrity, professionalism, and self-responsibility. Students who are willing to make a commitment to their academic success and are serious about pursuing their educational and professional goals will learn how academic support outside the classroom contributes to that success. These University resources are designed to provide students with the tools that they will need to succeed in their academic programs and that they can ultimately use to enhance their professional careers. Services are described below, and more information is available on the MCPHS website.

The **CASE Boston** offers several key services to assist students with exploring majors, minors and careers, managing course registration each semester, and acquiring new learning and study strategies. At the CASE Boston, students can interact regularly with their major-specific MAC Team, which consists of a Faculty Mentor (M) and an Academic Coach (AC).

Faculty Mentoring (CASE Boston)

The Faculty Mentor program on the Boston campus was created to provide additional support for our students in the areas of career discernment, long-term course planning and goal-setting. Faculty Mentors are full-time faculty members who have weekly office hours within the CASE. The Mentors represent each major at MCPHS University and students are paired with a Faculty Mentor within their own major. The Mentors work in conjunction with the Academic Coaches to make up MAC teams, which work together to provide more well-rounded guidance and support for our students.

Academic Coach (CASE Boston)

Academic Coaches are committed to shaping a dynamic advising environment designed to meet the educational and developmental needs of the student body. The professional staff who work in the center are available to assist students with goal setting, course registration, referral to campus resources, and other services designed to contribute to their academic experience. They provide focused advising for each degree program by helping students understand their specific program requirements and policies.

The **CASE Worcester and Manchester** works in collaboration with faculty and deans to provide students with the tools they need to succeed in the accelerated professional programs. Academic counselors on both campuses hold workshops on study skills, time management, test-taking strategies, academic reading, and critical thinking to help students maximize their performance. All students are encouraged to meet with an academic counselor with any questions concerning the curriculum or if they are looking for academic assistance with their coursework. Writing support is also available.

The CASE also offers support to students in the Boston, Worcester, Manchester and Online programs via the University Learning Network (ULN), which provides Peer Tutoring, Supplemental Instruction, Professional Tutoring, the Writing Center, and the Math and Physics Center.

Academic Success Plans

Each student on probation is required to meet with a designated member of the CASE on their home campus by the end of the second week of the probationary semester to develop and agree to—in writing—an Academic success plan (ASP). The ASP may include mandatory study/advising sessions, mandatory class attendance, or other stipulations aimed at encouraging and supporting student success. For more information about probation, please view the Academic Probation section under Academic Policies and Procedures.

The University Learning Network – ULN

The ULN centralizes key academic support resources such as Peer Tutoring, Supplemental Instruction, The Writing Center and Math & Physics Center in Boston.

Peer Tutoring (Boston, Worcester and Manchester)

Peer tutoring is one tool available to students interested in reinforcing the material presented in the classroom. Students are able to meet with a tutor one to one or in small group settings. During these tutoring sessions, students meet regularly with a student peer tutor to clarify and reinforce course materials in many of the more challenging courses at the University. The CASE staff members work in collaboration with faculty to provide peer tutoring that facilitates and

enriches students' learning and understanding of course content. Peer tutors are students who excel in their areas of study and who enjoy helping their fellow students achieve academic success. Free online tutoring is available through TutorMe. There are no additional fees for group or online tutoring services.

Peer Mentoring and Enrichment Tutors (Boston, Worcester and Manchester)

Peer Mentors are upper-level students who work with first-year students to acquaint them with the University and to help them make a smooth transition to MCPHS. On the Worcester and Manchester campuses, Peer Mentors begin working with new students shortly after acceptance. On the Boston campus, Peer Mentors provide workshops and advice and participate in the Introduction to the Major (ITM) course required for all first-year students in the fall semester. On the Worcester and Manchester campuses, each student is assigned an Enrichment Tutor at Orientation. Enrichment Tutors acquaint the new cohorts with program expectations and the adjustment to an accelerated professional curriculum.

Writing Center (All Campuses)

The Writing Center offers free individual consultation on an appointment or basis to MCPHS students, staff, and faculty. The Writing Center is staffed by professionals with extensive experience in classroom teaching, writing, and editing. Clients include first-year students in the required writing sequence; upper-division students writing course papers and preparing for essay exams. In addition to in person meetings, the Writing Center has the capability of meeting with students online. For more information, email uln@mcphs.edu.

Math and Physics Center (Boston)

Mathematics lies at the foundation of all sciences. Proficiency in mathematics is essential for success in all MCPHS degree programs. The Center provides guidance in learning mathematics, assistance with homework, and help in preparing for exams. The Center offers free drop-in tutoring and individual tutoring by appointment. For more information, email uln@mcphs.edu.

English Language Resource Center (Boston, Worcester and Manchester)

The English Language Resource Center (ELRC) provides support in studying effectively in English to multilingual students. ESL faculty members offer tutoring, workshops, and other forms of support to students in writing, understanding texts/reading, pronunciation, presentation preparation, test prep, and other areas of need. For more information, email sunniako.davis@mcphs.edu.

Early Alert and Mid-semester Warnings

At multiple points during each semester, faculty members submit academic warnings via WebAdvisor, which are processed by the CASE on each campus.

Students who receive academic warnings will be notified by their academic departments/programs by email to their official MCPHS emails and provided additional instructions.

Boston: Each student placed on academic warning will be encouraged to attend academic skill-building workshops and to meet with their Academic Coach in the Center for Academic Success and Enrichment. These actions may be required of students who receive more than one academic warning (as stipulated in a letter from their school dean).

Worcester/Manchester: Each student placed on academic warning will be required (as stipulated in their notification letter) to meet with an Academic Counselor in the Center for Academic Success and Enrichment (Worcester/Manchester) and meet with a faculty advisor.

Pharmacy Learning Groups (Worcester and Manchester)

Worcester and Manchester pharmacy students are organized into assigned learning groups, which are designed to enhance learning and group support. Each learning group consists of students who remain together as a unit throughout the curriculum, and each group is assigned a faculty member as an academic mentor. Peer Mentors are assigned to learning groups to further facilitate peer support.

Center for Professional Career Development

The Center for Professional Career Development provides all students with individualized advising, industry-specific information and resources, development of job search skills, and the opportunity for hands-on professional experiences to support personal goals and career success. Through workshops, job fairs, alumni and community networking, and employer partnerships, students have access to a range of programs to meet their needs and their schedules. The center works in collaboration with academic departments, student services, student organizations, and professional associations to ensure quality engagements and timely information. By utilizing the services of the Center, students will become proficient in defining their goals and equipping themselves with the tools to gain access to industries and careers of their choice.

Counseling Services

The mission of Counseling Services is to support the intellectual, emotional, social, and cultural development of students in a multicultural environment. Counseling Services offers varied services to students of the Boston, Worcester, and Manchester campuses. These include short-term counseling (four to eight sessions); crisis management; psychoeducational workshops and programs; a resource and referral service; and consultation to student groups, faculty, and the University community. The staff values an atmosphere that is welcoming and comfortable for all students regardless of race, gender, ethnic background, age, sexual orientation, religion, citizenship, or disability.

In the case of a serious mental health emergency on the Boston Campus:

If you are experiencing a mental health emergency during regular business hours (M-F 8:30am-4:30pm) come to our office at Fennel B09, or call us at 617-732-2837. **Outside of business hours, please call 617-732-2837 and press 9 to be directly connected to the after-hours counselor. Additionally, for emergencies, call 911, or go to your local emergency room.**

In the case of a serious mental health emergency on the Worcester Campus:

If you are experiencing a mental health emergency during regular business hours (M-F 8:30am-4:30pm) come to our office at 10 Lincoln Square, 4th Floor of the Academic Tower. At any hour, any day call us at 508.373.5718 **and press 9 to be put in touch with a mental health counselor. Additionally, for physical emergencies, contact Public Safety, call 911, or go to your local emergency room.**

In the case of a serious mental health emergency on the Manchester Campus:

If you are experiencing a mental health emergency during regular business hours come to our office at 1260 Elm Street, office 118D, on the lower level, or call us at 603.314.1781 or 603.314.1783. **Outside of business hours, please call 603-314-1781 and press 9 to be directly connected to the after-hours counselor. Additionally, for emergencies, you can call Manchester Mental Health at 603-668-4111, call 911, or go to your local emergency room.**

If you are worried about another student, please follow the same protocol listed above in order to ensure the safety of that student.

If you are experiencing a period of increased difficulties or a change in your emotional well-being, please contact MCPHS Counseling Services to set up an appointment to discuss these concerns with a mental health care professional.

Please refer to <https://my.mcphs.edu/departments/counseling-services> for more detailed information about services available at each campus, as well as interactive screenings, questions, and answers about Counseling Services, and other helpful links.

Office of Student Access and Accommodations (All Campuses)

The Office of Student Access and Accommodations (OSAA) is a part of the Division of Student Affairs and provides accommodations to students across all MCPHS campuses (Manchester, Boston and Worcester) and online. Students who are eligible for accommodations must present documentation to demonstrate evidence of a current condition that interferes with one or more major life functions as defined by the ADAA 2008 and/or Section 504 of the Rehabilitation Act of 1973.

Determination of reasonable accommodations is a deliberative and collaborative process between the student and the OSAA. Documentation must present evidence that the student may have current functional limitations and/or may currently experience accessibility barriers in the educational or physical environment. The OSAA will consider the student's disability, history, experiences, request for services, as well as the unique characteristics of the course and program requirements, in order to determine if a specific accommodation is reasonable. MCPHS University ensures FERPA compliance and therefore all information submitted to OSAA will remain confidential. To learn more about our services or to request a meeting with an OSAA staff member, please email OSAA@mcphs.edu or call 617.879.5995.

Food and Financial Insecurity Resources (All Campuses)

There is a food pantry located in Boston, and resources available for all campuses.

- **Food Insecurity** is the limited or uncertain availability of nutritionally adequate and safe foods, or the inability to acquire such foods in a socially acceptable manner.
- **Housing Insecurity** includes a broader set of challenges such as the inability to pay rent/utilities or a need to move frequently.

Students on all campuses can contact the Associate Dean of Students in Office of Student Affairs, Fennell 107 or call 617.732.2929.

Health Insurance

According to the Commonwealth of Massachusetts and MCPHS policy, all matriculated students (regardless of enrollment) must be covered by a health insurance program. The University makes available a general health insurance program that meets these standards. This policy is provided by an independent carrier beginning September 1 and continuing for 12 months. University student health insurance information is located on the MCPHS website under Student Health. Students will be automatically enrolled in this plan unless a waiver is completed and received by Student Financial Services prior to the first day of classes. Students registering late must submit the waiver at that time. The waiver stipulates that personal coverage will be maintained during the enrollment period. **If Student Financial Services does not receive the waiver prior to the first day of classes, the student will be billed for the insurance premium and will remain responsible for payment of said premium. The waiver must be renewed annually.**

All international students will be enrolled in the University student health insurance plan automatically, with the exception of those international students whose sponsoring institutions have a signed agreement with MCPHS that complies with the University's health insurance waiver requirements, or international students with a plan for which the insurer's primary home office is based in the United States *and* the policy provides comparable coverage to the University student health insurance plan. International students who do not fall under one of the two conditions above *must* purchase the University student health insurance plan.

Financial Responsibility of Students Following an Injury, Accident, Exposure, or Needle Stick

Students are responsible for all costs and expenses resulting from any injuries, accidents, exposures, including exposure to communicable diseases (such as COVID-19), or needle sticks in which they are involved on campus or during any clinical rotation.

When seeking treatment for any such injury, accident, exposure, including exposure to communicable diseases (such as COVID-19), or needle stick, a student must present their own health insurance information to the healthcare provider. Any deductible or copayment is the student's responsibility. All students must follow the claims procedures required by their respective insurance companies.

Students are not eligible for workers' compensation benefits from MCPHS University or any affiliated teaching hospital or clinical site to which they are assigned while completing their clinical requirements, unless required by applicable state law, because students are not employees of either the University or such clinical facilities.

Health Services

For routine healthcare while on the Boston campus, MCPHS students utilize the Massachusetts College of Art and Design/Optum Student Health Services located on the second floor of 578 Huntington Avenue, in the Treehouse residence hall. Students utilize their personal health insurance for these visits. Optum accepts a large number of health insurance plans. For more information about the array of medical services, directions, and the small list of nonaccepted health insurance plans at Student Health Services, please visit <https://my.mcphs.edu/departments/health-services/boston>.

Health Services for Worcester and Manchester students are available through many local healthcare providers.

Identification Policy

For reasons of safety and security, all students must be readily identifiable while they are on campus and/or engaged in required off-campus activities, including internships and clinical rotations. Therefore, any head covering that obscures a student's face may not be worn, either on campus or at clinical sites, except when required for medical or religious reasons. In addition, all students are required to wear their University-issued ID at all times when on campus and/or engaged in required off-campus activities, and to show it upon request of a properly identified official or member of the MCPHS staff, and to remove any covering that obscures the student's face in order to verify the student's identity for security purposes.

Loss of an ID card should be reported immediately to the MCPHS Department of Public Safety. The fee to replace an ID card—for any reason—is \$25; application and payment for replacement is made at the Office of Student Financial Services. The ID card also serves as the University library card.

MCPHS University Immunization Policy

In accordance with state law and University policy, students must show proof of required immunizations. Non-compliance with University immunization requirements will result in adverse action up to and including administrative withdrawal from the University, and may negatively impact progression in an academic program.

How and when to report your immunizations to MCPHS:

Students must submit documentation demonstrating compliance with the MCPHS Immunization Policy prior to the first day of the first semester of admission to the University. MCPHS University works with external companies, SentryMD and CastleBranch, to support immunization tracking and management.

- All existing MCPHS students enrolled prior to the 2013 summer semester should continue to submit their immunization documentation to SentryMD.
- All new students to MCPHS beginning with the 2013 summer semester should submit their immunization documentation to CastleBranch.

The following MCPHS students must show proof of required immunizations:

- All full-time students, including students attending MCPHS while on a visa who will be on campus;
- All part-time students, including students attending MCPHS while on a visa who will be on campus;
- All online students who might be in contact with patients;
- All online students whose program involves an on-campus component; and
- All students attending or visiting MCPHS as part of a formal academic visitation or exchange program.

ACUPUNCTURE

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>. Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.
- Hepatitis B immunization series (3 doses) followed by laboratory evidence of immunity; or Heplisav-B vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given at least 28 days after the first dose) followed by laboratory evidence of immunity. Laboratory evidence of immunity alone is also acceptable.
- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Annual Tuberculosis skin test or Tuberculosis blood test. If results are positive, a clear chest x-ray (with laboratory report or physician verification of results) or a physician letter verifying the student is symptom free is required each year.
- Annual influenza shot (Must be obtained as soon as the vaccine for the annual flu season becomes available each fall).
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.

DENTAL HYGIENE

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>. Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.
- Hepatitis B immunization series (3 doses) followed by laboratory evidence of immunity; or Heplisav-B vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given

at least 28 days after the first dose) followed by laboratory evidence of immunity. Laboratory evidence of immunity alone is also acceptable.

- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Tuberculosis skin test or Tuberculosis blood test within the past 12 months. If results are positive, a clear chest x-ray (with laboratory report or physician verification of results) or a physician letter verifying the student is symptom free is required each year.
- Annual influenza shot (Must be obtained as soon as the vaccine for the annual flu season becomes available each fall).
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.

DOCTOR OF PHARMACY

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>. Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.
- Hepatitis B immunization series (3 doses) followed by laboratory evidence of immunity; or HepB vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given at least 28 days after the first dose) followed by laboratory evidence of immunity. Laboratory evidence of immunity alone is also acceptable.
- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Annual Tuberculosis skin test or Tuberculosis blood test. If results are positive, a clear chest x-ray (with laboratory report or physician verification of results) or a physician letter verifying the student is symptom free is required each year.*
- Annual influenza shot (Must be obtained as soon as the vaccine for the annual flu season becomes available each fall). *
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.

***Doctor of Pharmacy-Boston students** must complete these requirements during Year III (First Professional Year of the curriculum) and annually thereafter.

DIAGNOSTIC MEDICAL SONOGRAPHY, MAGNETIC RESONANCE IMAGING, NUCLEAR MEDICINE TECHNOLOGY, RADIATION THERAPY, AND RADIOGRAPHY

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>.

Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.

- Hepatitis B immunization series (3 doses) followed by laboratory evidence of immunity; or Heplisav-B vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given at least 28 days after the first dose) followed by laboratory evidence of immunity. Laboratory evidence of immunity alone is also acceptable.
- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Annual Tuberculosis skin test or Tuberculosis blood test. If results are positive, a clear chest x-ray (with laboratory report or physician verification of results) or a physician letter verifying the student is symptom free is required each year.
- Annual influenza shot (Must be obtained as soon as the vaccine for the annual flu season becomes available each fall).
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.

MEDICAL IMAGING AND THERAPEUTICS

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>. Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.
- Hepatitis B immunization series (3 doses) followed by laboratory evidence of immunity; or Heplisav-B vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given at least 28 days after the first dose) followed by laboratory evidence of immunity. Laboratory evidence of immunity alone is also acceptable.
- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Annual Tuberculosis skin test or Tuberculosis blood test. If results are positive, a clear chest x-ray (with laboratory report or physician verification of results) or a physician letter verifying the student is symptom free is required each year.
- Annual influenza shot (Must be obtained as soon as the vaccine for the annual flu season becomes available each fall).
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.

NURSING

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.

- Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>. Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.
- Hepatitis B immunization series (3 doses) followed by laboratory evidence of immunity; or Heplisav-B vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given at least 28 days after the first dose) followed by laboratory evidence of immunity. Laboratory evidence of immunity alone is also acceptable.
- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Annual Two-step Tuberculosis skin test (two tests within the last 12 months, completed 1-3 weeks apart) or Tuberculosis blood test within the past 12 months. If results are positive, a clear chest x-ray (with laboratory report or physician verification of results) or a physician letter verifying the student is symptom free is required each year. *
- Annual influenza shot (Must be obtained as soon as the vaccine for the annual flu season becomes available each fall).*
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.

***Bachelor of Science Nursing-Boston** this requirement must be met prior to entering the professional practice phase of the program and will need to be repeated at least yearly but maybe more often depending on the requirements of our clinical partners.

OCCUPATIONAL THERAPY

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>. Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.
- Hepatitis B immunization series (3 doses) followed by laboratory evidence of immunity; or Heplisav-B vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given at least 28 days after the first dose) followed by laboratory evidence of immunity. Laboratory evidence of immunity alone is also acceptable.
- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Annual Two-step Tuberculosis skin test (two tests within the last 12 months, completed 1-3 weeks apart) or Tuberculosis blood test within the past 12 months. If results are positive, a clear chest x-ray (with laboratory report or physician verification of results) or a physician letter verifying the student is symptom free is required each year.
- Annual influenza shot (Must be obtained as soon as the vaccine for the annual flu season becomes available each fall).
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.

OPTOMETRY

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>. Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.
- Hepatitis B immunization series (3 doses) followed by laboratory evidence of immunity; or Heplisav-B vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given at least 28 days after the first dose) followed by laboratory evidence of immunity. Laboratory evidence of immunity alone is also acceptable.
- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Annual Tuberculosis skin test or Tuberculosis blood test within the past 12 months. If results are positive, a clear chest x-ray (with laboratory report or physician verification of results) or a physician letter verifying the student is symptom free is required.
- Annual influenza shot (Must be obtained as soon as the vaccine for the annual flu season becomes available each fall).
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.

PHYSICAL THERAPY

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>. Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.
- Hepatitis B immunization series (3 doses) followed by laboratory evidence of immunity; or Heplisav-B vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given at least 28 days after the first dose) followed by laboratory evidence of immunity. Laboratory evidence of immunity alone is also acceptable.
- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Two-step Tuberculosis skin test (two tests within the last 12 months, completed 1-3 weeks apart) or Tuberculosis blood test within the past 12 months; followed by an annual 1 step TB test. If results are positive, a clear chest x-ray (with laboratory report or physician verification of results) or a physician letter verifying the student is symptom free is required each year.
- Annual influenza shot (Must be obtained as soon as the vaccine for the annual flu season becomes available each fall).
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.

PHYSICIAN ASSISTANT STUDIES

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>. Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.
- Hepatitis B immunization series (3 doses) followed by laboratory evidence of immunity; or Heplisav-B vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given at least 28 days after the first dose) followed by laboratory evidence of immunity. Laboratory evidence of immunity alone is also acceptable.
- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Annual Tuberculosis skin test or Tuberculosis blood test. If results are positive, a clear chest x-ray (with laboratory report or physician verification of results) or a physician letter verifying the student is symptom free is required each year.
- Annual influenza shot (Must be obtained as soon as the vaccine for the annual flu season becomes available each fall).
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.

All Other Programs:

- Measles vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Mumps vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Rubella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday) or laboratory evidence of immunity.
- Tetanus Diphtheria Pertussis vaccinations 1 dose of Tdap and either a history of DTaP primary series or age appropriate catch-up vaccination <https://www.cdc.gov/vaccines/schedules/hcp/imz/catchup.html#note-tdap>. Tdap given ≥ 7 years may be counted, but a dose at age 11-12 is recommended if Tdap was given earlier as part of a catch-up schedule. Td should be given if it has been ≥ 10 years since last Tdap.
- Hepatitis B immunization series (3 doses); or Heplisav-B vaccine (2 doses, first dose must be given on or after the student's 18th birthday, and the second dose must be given at least 28 days after the first dose). Laboratory evidence of immunity is also acceptable.
- Varicella vaccinations (2 immunizations at least 4 weeks apart; first dose must be received on or after the student's 1st birthday); laboratory evidence of immunity; or physician diagnosis of varicella.
- Meningococcal vaccination: 1 dose of MenACWY (formerly MCV4) received on or after the student's 16th birthday required only for students under the age of 22. Meningococcal B vaccine does not meet this requirement.
- Covid-19: Please see <https://www.mcphs.edu/covid/vaccination-eligibility> for up to date information on meeting the Covid-19 immunization requirement.
- An annual influenza vaccine is **strongly recommended**.

WAIVERS/EXEMPTIONS

If a student is unable to obtain one or more immunizations due to medical or religious reasons, they may upload the Vaccine Exemption Form available at <https://www.mcphs.edu/covid/vaccination-eligibility> to CastleBranch. Students who are unable to obtain one or more immunizations for medical reasons must also submit a letter (on official letterhead with a signature) from the student's health care provider certifying that the provider has personally examined the student

and is of the opinion that the student's health would be endangered by the immunization. Medical and religious exemptions must be renewed annually at the start of each school year.

In addition to the medical and religious exemptions detailed above, students may qualify for an exemption from the meningococcal immunization requirement if the student (or the student's parent or legal guardian, if the student is a minor) signs a waiver stating that the student has received information about the dangers of meningococcal disease, reviewed the information provided and elected to decline the vaccine. A copy of this waiver is available for download in your CastleBranch account.

Requirements for clinical rotations are set by clinical sites and MCPHS does not have the authority to override these requirements. Medical and religious exemptions may be accepted at the discretion of clinical sites. Failure to obtain all immunizations required to participate in clinicals or other activities with patient contact may negatively impact progression in certain academic programs. Please contact your Clinical Coordinator for your academic program to discuss how waivers/exemptions may affect your clinical rotation requirements.

ADDITIONAL INFORMATION

Certain health care agencies and clinical training and service learning sites may have additional immunization requirements. In order to be eligible for clinical placements or service learning experiences, students must meet all University immunization requirements and any additional site requirements. In cases where the site does not pay for the completion of additional immunization requirements, the student is responsible for paying any associated fees, if it is not covered by their personal health insurance. Without clearance with respect to all University and site immunization requirements, students will not be permitted to begin clinical or service learning placements, and therefore, would be unable to meet program requirements.

Students who change academic programs must become compliant with all immunization requirements of their new academic program. Students must contact their Program Director/Clinical Coordinator for necessary steps to review their immunization compliance with the new academic program. MCPHS works with a confidential health information service company that maintains and processes all student immunization records and monitors compliance with state law immunization requirements. Authorized officials at MCPHS have access to student immunization records to monitor compliance. (*September 2021*)

Internships, Licensure, and Certification

Students graduating from the Acupuncture, Dental Hygiene, Nursing, Occupational Therapy, Optometry, Pharmacy, Physical Therapy, and Physician Assistant programs at MCPHS University will seek professional licensure in conjunction with a national examination in order to practice in their chosen profession. Regulations governing licensure (and internship) differ from state to state and country to country. The Registrar's Office completes application materials for licensure candidates and assists students in navigating the overall licensing process. Licensure application preparation sessions are offered for students prior to graduation.

Licensure application materials for all programs will not be released by the Registrar's Office until the degree and date awarded have been posted to student records. Only materials with a submission deadline required for specific state board testing will be released prior to degree posting.

Students enrolled in the Doctor of Pharmacy program will take part in practical experience overseen by a registered pharmacist. National Association of Boards of Pharmacy guidelines require that pharmacy students complete 1,500 clock hours of practical pharmacy experience prior to applying for licensure. Students completing their practical experience must register as a pharmacy intern (as applicable) with the state in which they complete their internship experience. Internship hours must be documented as specified on the internship application form or state board of pharmacy website. As with licensure, intern eligibility criteria and paperwork differ from state to state. Mandatory intern preparation sessions are scheduled for students before they can apply for internship.

Further information regarding the licensure and internship process can be found on the Registrar's Office page of the University website.

Residence Life (Boston)

Residence Life seeks to empower students and staff to create a safe, welcoming, and inclusive residence hall community that supports the academic mission of the University. We provide a living and learning environment in which all students can be successful in their personal and academic pursuits. The cooperative effort of each resident student ensures that life in the residence halls is a positive learning experience, contributing to both personal and professional growth. Living on campus provides each resident the opportunity to strengthen interpersonal skills and enhance awareness of differences. Residence Life provides a safe, clean, and affordable living and learning environment.

For a description of the Boston residence halls, see the Facilities section. For additional information regarding residence life in Boston, refer to the website at <https://my.mcphs.edu/departments/housing-residence-life/boston>.

Residence Life (Worcester)

For a description of the Worcester residence halls, see the Facilities section. For additional information regarding residence life in Worcester, refer to the website at www.mcphs.edu/campuses/worcester/housing.

Off Campus Housing (Manchester)

For a description of off campus housing options, please refer to www.mcphs.edu/mcphs-life/manchester/off-campus-housing.

Schumann Fitness Center (Boston)

The Schumann Fitness Center, located in the Flanagan Campus Center on the Wentworth Institute of Technology (WIT) campus, offers fitness opportunities to MCPHS, WIT, and Massachusetts College of Art and Design students. The Schumann Fitness Center offers an array of Nautilus, cardiovascular, and free-weight equipment. In addition, group exercise and wellness classes such as kickboxing, Pilates, yoga, and Zumba are offered to meet campus needs.

The Schumann Fitness Center houses the Colleges of the Fenway (COF) intramurals program, which promotes team sports activities between and among the five COF campuses. Students participate in recreational sports, including basketball, volleyball, flag football, and soccer (for both men and women). The COF intramural program achieves the benefits of a large university setting while still catering to the diverse needs of each institution. For more information, refer to the COF website at www.colleges-fenway.org.

Recreation and Wellness (Worcester)

All students have free 24 hours, 7 day a week access to the University wellness center located at 25 Foster St. The gym includes cardio and strength training equipment and a state of the art computerized Fitness-On-Demand space for interactive classes tailored to individual needs.

Recreation and Wellness (Manchester)

The Manchester Student Government Association is exploring local fitness options and should have updates late fall.

Campus Life/Student Activities (All Campuses)

Campus Life/Student Activities enhances and supports the academic mission of the University. Through participation in cultural, educational, and social programming, as well as a variety of student groups and clubs, students can develop leadership and organizational skills to function in a diverse society.

The office strategically coordinates programs that foster a campus environment that recognizes, celebrates, and values diversity of religion, race, ethnicity, gender, age, disability, sexual orientation, and nationality. Students at MCPHS–Boston are members of the Colleges of the Fenway Consortium and have access to the resources at the other four colleges in the area. Check out the Cardinal Pride portal for daily updates.

Orientation (All Campuses)

The University holds mandatory Orientation programs during the summer and in January on the Boston, Manchester, and Worcester campuses for newly enrolled students. Orientation provides an opportunity for students to be introduced to the University's facilities, faculty, and staff, and to their new peers. The mission of student Orientation is to prepare incoming students to be successful members of the MCPHS community. Orientation programs emphasize academic excellence, successful transition to the healthcare profession, and an opportunity to familiarize oneself with campus resources and meet colleagues early on in the program.

Student Clubs and Organizations (All Campuses)

There are more than 125 recognized student clubs and organizations at the University that provide the campus communities with many options for activities and programming. Contact resources for student organizations are the Center for Campus Life and Leadership in Boston, the Office of Campus Life in Worcester, and the Office of Student Affairs in Manchester. The University encourages and promotes participation in student organizations. Involvement in cocurricular programs and activities helps students develop leadership skills that support the achievement of personal and professional goals. MCPHS recognizes, appreciates, and supports the contributions made by student organizations to enhance the quality of student life at the University. A list of currently recognized student clubs and organizations can be found on the MCPHS website at <https://my.mcphs.edu/clubs-and-organizations>, and Blackboard for the Boston Campus.

PROTECTION FROM SEXUAL HARASSMENT (TITLE IX) POLICY

I. POLICY STATEMENT

MCPHS University ("MCPHS" or the "University") is committed to maintaining a positive living, learning, and working environment that is free from all forms of Sexual Harassment, which is a form of sex discrimination. The University does not discriminate based on sex, in admission and access to, and treatment and employment in, its education program or activity or while a person is attempting to participate in an education program or activity. For discrimination and harassment that is not of a sexual nature, please refer to the University's Protection from Discrimination and Harassment Policy.

The University actively complies with the requirements of Title IX of the Educational Amendments of 1972 and pertinent laws, regulations, and executive directives of the Commonwealth of Massachusetts and other applicable state and federal statutes.

This Policy defines prohibited sexual misconduct and identifies the procedures that will be utilized to investigate and adjudicate possible violations of this policy. This policy does not preclude application or enforcement of other University policies.

Individuals who violate this Policy are subject to discipline and corrective action, up to and including termination or expulsion.

The University will not tolerate sexual harassment in any form or related retaliation against or by any employee or student. The University recognizes that discrimination and harassment related to a person's sex can occur in connection with misconduct related to a person's sexual orientation, gender identity, gender expression, race, color, ethnicity, national origin, religion, age, disability, or other protected classes. Targeting a person based on these characteristics is also a violation of state and federal law and the University's Protection from Discrimination and Harassment Policy. As appropriate, the University will endeavor to coordinate the investigation and resolution of sexual harassment complaints with the investigation and resolution of complaints of discrimination or harassment based on other protected classes.

There is a presumption that the Respondent is not responsible for the alleged conduct until a determination regarding responsibility is made at the conclusion of the grievance process. There is a presumption of innocence throughout the grievance process, with the burden on the university to gather information and to prove that the conduct violated the policy.

Inquiries regarding the University's compliance with Equal Opportunity and Affirmative Action laws should be directed to Richard J. Lessard, President, at 617.732.2132.

II. REPORTING OBLIGATIONS

Obligations to Report Sexual Harassment. In order to take appropriate corrective action, the university must be aware of sexual harassment, and related retaliation that occurs in university employment, educational programs, and activities. The following individuals have a duty to report whenever they witness, receive notification of, or otherwise have knowledge of an incident of discrimination, harassment, or related retaliation that occurred in the course of University employment, educational programs, or activities.

- All University Officers;
- All Deans, Department Chairs, and Program Directors;
- The Title IX Coordinator;
- All employees with supervisory authority;
- All employees in Human Resources; and
- All employees in Public Safety.

Where to Report. Anyone who believes that they experienced, witnessed, or otherwise have knowledge of sexual harassment **shall** immediately report such behavior to the:

- Title IX Coordinator or;
- Human Resources (for employees); or
- Senior Student Affairs Officer-Dean of Students (for students).

An individual may choose to report sexual harassment to a faculty or staff member. All employees with supervisory authority have a duty to report potential Title IX violations and every employee is encouraged to report and inform the reporting individual that:

- You are not a confidential source; and
- You will report their concerns to the Title IX Coordinator.

Dawn M. Ballou, Title IX Coordinator
179 Longwood Avenue, Boston, MA 02115
617.732.2077 – office
857.337.4117 – cell
Dawn.Ballou@mcphs.edu

When to Report. All reports or complaints shall be made as promptly as possible after the occurrence. For students, while they should expect that faculty and staff would inform the Title IX Coordinator, students are strongly encouraged to contact the Title IX Coordinator or the Dean of Students directly.

Failure to Report is a Violation. A failure to report this information by a mandated reporter is a violation of this policy, except in the case of an individual whose profession and university responsibilities requires them to keep certain communications confidential (e.g., a professional counselor). Such an individual is not required to report confidential communications received while performing those university responsibilities.

Right to File Criminal Complaint. A complainant has the right to file a criminal complaint before, during or after the university's Title IX investigation.

Amnesty Policy. The university encourages the reporting of all concerns regarding sexual harassment. Sometimes individuals are hesitant to report instances of sexual harassment because they fear being charged with other policy violations. Because the university has a paramount interest in protecting the well-being of its community and remedying sexual harassment, other policy violations will be considered, if necessary, separately from allegations under this policy.

Zero-Tolerance for Retaliation. The university will not tolerate retaliation by any employee or student. Retaliation is a serious violation of this policy, as well as of federal, state, and local law. Anyone who believes he or she is a victim of retaliation should report the matter immediately according to the same procedure provided in this policy for making complaints of discrimination, harassment, or sexual assault.

III. PROHIBITED CONDUCT

Sexual Harassment as defined by Title IX. Unwelcome conduct determined by a reasonable person on the basis of sex that is so severe, pervasive, and objectionably offensive that it effectively denies a person equal access to the school's education program or activity; or an employee of the school conditioning the provision of aid, benefit, or service of the school's on an individual's participation in unwelcome sexual conduct (quid pro quo); or sexual assault (as defined by the Clery Act), dating violence, domestic violence, or stalking (as defined by the Violence Against Women the Act (VAWA)). The conduct occurs in the United States and within the University's "education program or activity."

Sexual Assault:

Sexual Assault–Non-consensual Sexual Contact: Behavior including any intentional touching of a sexual nature, however slight, whether clothed or unclothed, with any object or body part by a person against another person that is without Affirmative Consent and/or by force. Examples include, but are not limited to:

- Intentional contact with the breasts, buttocks, groin, or genitals;
- Intentional touching of another with breasts, buttocks, groin, or genitals;
- Compelling someone to touch another person or oneself in a sexual manner; and
- Any intentional bodily contact in a sexual manner.

Sexual Assault–Non-consensual Sexual Intercourse: Behavior including any sexual intercourse, however slight, with any object or body part by a person against another person that is without Affirmative Consent and/or by force. Examples include, but are not limited to:

- Vaginal penetration by a penis, object, tongue or finger;
- Anal penetration by a penis, object, tongue or finger; and
- Oral copulation (mouth-to-genital contact or genital-to-mouth contact).

Sexual Exploitation: When an individual takes non-consensual or abusive sexual advantage of another for their own advantage or benefit, or to benefit or advantage anyone other than the one being exploited, and the behavior does not otherwise constitute another form of prohibited conduct as defined by this policy. Examples include, but are not limited to:

- Invasion of sexual privacy;
- Prostituting another person;
- Non-consensual taking and/or distributing photography, video, or audio-taping of sexual activity;
- Allowing others to observe sexual activities without Consent;
- Engaging in voyeurism;
- Knowingly transmitting a sexually transmitted infection or human immunodeficiency virus (HIV) to another person;
- Exposing one's genitals in non-consensual circumstances; and
- Inducing another to expose their genitals.

Domestic Violence: A felony or misdemeanor crime of violence committed against a victim by: a current or former spouse or intimate partner of the victim; a person with whom the victim shares a child in common; a person who is cohabiting with or has cohabited with the victim as a spouse or intimate partner; a person similarly situated to a spouse of the victim under the domestic or family violence laws of the jurisdiction in which the crime of violence occurred; or by any other person against an adult or youth victim who is protected from that person's acts under the domestic or family violence laws of the jurisdiction in which the crime of violence occurred.

Dating Violence: Violence committed by a person who is or has been in a social relationship of a romantic or intimate nature with the victim. The existence of such a relationship shall be determined based on the reporting party's statement and with consideration of the length of the relationship, the type of relationship, and the frequency of interaction between the persons involved in the relationship. Dating Violence includes, but is not limited to, sexual or physical abuse or the threat of such abuse.

Stalking: Engaging in a course of conduct directed at a specific person that would cause a reasonable person to fear for his or her safety or the safety of others; or (B)suffer substantial emotional distress.

Sexual Harassment other than as defined by Title IX: Unwelcome, verbal or physical conduct that is based on sex/gender or is of a sexual nature and that has the purpose or effect of unreasonably interfering with a student's ability to participate in or benefit from the educational programs or activities and conduct that unreasonably interferes with a person's work performance or creates an intimidating, hostile or humiliating or offensive work environment. The unwelcome behavior may be based on power differentials (*quid pro quo*) or create a hostile environment.

IV. DEFINITIONS

Actual Knowledge – notice has been given of sexual harassment or allegations of sexual harassment to the Title IX Coordinator or any official of the university who has authority to institute corrective measures on behalf of the university.

Complainant – an individual who is alleged to be the victim of conduct that could constitute sexual harassment.

Consent – an agreement given freely to engage in sexual activity without any undue influence of pressure. Consent is a clear yes and not the absence of no. Consent can only be given by someone of sound mind and cannot be given by someone with intellectual disabilities. Consent will not be recognized if a person is asleep or unconscious, frightened, coerced, intimidated, intoxicated, or under the influence of drugs. Either party can withdraw consent at any time. Prior consent does not imply current or future consent; even in the context of an ongoing relationship.

Course of conduct – two or more acts, including, but not limited to, acts in which the stalker directly, indirectly, or through third parties, by any action, method, device, or means, follows, monitors, observes, surveils, threatens, or communicates to or about a person, or interferes with a person's property.

Decision Makers – University officials who preside over live hearings and make a determination regarding responsibility with respect to Title IX allegations.

Education Program or Activity – for purposes of Title IX, this includes locations, events, or circumstances over which the university exercises substantial control over both the respondent and the context in which the sexual harassment occurs, and also includes any building owned or controlled by a student organization that is officially recognized by the university. This includes university networks and technology.

Formal Complaint - a document filed by the complainant or signed by the Title IX Coordinator alleging sexual harassment against a respondent and requesting that the university investigate the allegation of sexual harassment.

Informal Resolution – a process available to the parties after the filing of a complaint alleging potential sexual harassment.

Investigators – University officials who investigate allegations of sexual harassment.

Live Hearing – Complainant and respondent through their respective advisors are permitted to ask the other party and any witnesses all relevant questions, including questions challenging credibility by cross-examination. The parties may be located in separate rooms with technology enabling the decision makers and parties to simultaneously see and hear the party or the witness testimony. An audiovisual recording, or transcript, of any live hearing must be made and available to the parties for inspection and review.

Preponderance of the Evidence – the evidentiary standard used to determine responsibility with respect to sexual harassment complaints.

Respondent – an individual who has been reported to be the perpetrator of conduct that could constitute sexual harassment.

Supportive Measures - are to be non-disciplinary, non-punitive in nature. Designed to restore or preserve access to the school's education program or activity without unreasonably burdening the other party, protect the safety of all parties and the school's educational environment, and deter sexual harassment. The measures may include but are not limited to counseling, changes to academic schedules and housing, escort services, and no contact orders. Supportive measures will be provided without fee or charge to either party. Equitable treatment of both parties that is impartial but reasonable in light of the circumstances is required. Supportive measures are available before or after the filing of a formal complaint or where no formal complaint has been filed.

Title IX Coordinator – the university official designated to disseminate the Title IX policy, coordinate efforts to comply with the regulations, and adopt and publish grievance procedures.

V. EVALUATION OF THE COMPLAINT

Upon notification of a potential Title IX violation, the Title IX Coordinator will promptly contact the complainant to discuss supportive measures; to consider the complainant's wishes with respect to supportive measures; to inform the complainant of availability of these measures with or without the filing of a formal complaint; and to explain the grievance process and the procedure for filing a formal complaint.

Emergency Removal of a student-respondent may still be appropriate, provided the university does an individualized safety and risk analysis; determines there is an immediate threat to the physical health or safety of students or employees that justifies removal; and, provides notice and an opportunity for the respondent to challenge the decision immediately following removal. Non-student employees may be placed on administrative leaves during investigations.

The complainant or Title IX Coordinator files a document alleging sexual harassment against a respondent and requesting that the university investigate the allegation of sexual harassment, known as a "formal complaint." A complainant may only file a formal Title IX complaint under this policy if the complainant is participating in or attempting to participate in an education program or activity of the university.

When a formal complaint is filed, the Title IX Coordinator or designee must evaluate the complaint to determine whether the allegations may be investigated and adjudicated under the Title IX Grievance Process or if they should be referred to another university officer for appropriate action, such as investigation and adjudication under the Discrimination and Harassment Investigation Procedures.

- 1. Mandatory Dismissal.** If the conduct alleged in the formal complaint, even if proven, would not constitute sexual harassment as defined by Title IX, or did not occur in the university's education program or activity, or did not occur against a person in the United States, then the Title IX Coordinator must dismiss the formal complaint from the Title IX Grievance Process. Such dismissal does not preclude action under another policy or provision of the university's code of conduct. Upon dismissal, the Title IX Coordinator must promptly send written notice of the dismissal and reason for the dismissal simultaneously to the parties. Both parties will have a right to appeal the dismissal from the Title IX Grievance Process pursuant to the appeal procedures described below. In circumstances in which the conduct alleged in the dismissed Title IX complaint could constitute sexual harassment not covered by Title IX, sexual exploitation, or a violation of another university

policy, the Title IX Coordinator will refer the allegations to the appropriate university officer(s) for consideration. Dismissed allegations of sexual harassment not covered by Title IX and sexual exploitation will be investigated under the Protection from Discrimination and Harassment Policy. Dismissed allegations of sexual assault, domestic violence, dating violence and/or stalking will be investigated in accordance with the Title IX investigation process set forth in Section VI.B. below prior to referral for adjudication through the student Code of Conduct process when the respondent is a student or through the Employee Handbook or the Faculty Manual when the respondent is an employee.

2. **Discretionary Dismissal.** The Title IX Coordinator may dismiss the formal complaint from the Title IX Grievance Process, if at any time during the investigation or hearing: the complainant notifies the Title IX Coordinator in writing that the complainant wishes to withdraw the formal complaint; the respondent is no longer enrolled or employed by the university; or circumstances prevent the gathering of evidence sufficient to reach a determination regarding responsibility. Both parties will have a right to appeal the dismissal pursuant to the appeal procedures described below.

VI. THE TITLE IX GRIEVANCE PROCESS

The complainant and respondent are treated equitably while addressing allegations of sexual harassment. Equitable remedies should include supportive measures for the parties that are non-disciplinary, non-punitive in nature and designed to restore or preserve equal access to education programs and activities while addressing the allegations through a fair and unbiased grievance process.

A. THE COMPLAINT

The university has actual knowledge of a potential Title IX violation when notification is given to the Title IX Coordinator or any official who has the authority to institute corrective measures.

Upon notification of a potential Title IX violation, the Title IX Coordinator will promptly contact the complainant to discuss supportive measures; to consider the complainant's wishes with respect to supportive measures; to inform the complainant of availability of these measures with or without the filing of a formal complaint; and to explain the grievance process and the procedure for filing a formal complaint.

Emergency Removal of a student-respondent may still be appropriate, provided the university does an individualized safety and risk analysis; determines there is an immediate threat to the physical health or safety of students or employees that justifies removal; and, provides notice and an opportunity for the respondent to challenge the decision immediately following removal. Non-student employees may be placed on administrative leaves during investigations.

The complainant or Title IX Coordinator file a document alleging sexual harassment against a respondent and requesting that the university investigate the allegation of sexual harassment, known as a "formal complaint." A complainant may only file a formal Title IX complaint under this policy if the complainant is participating in or attempting to participate in an education program or activity of the university.

The university treats the complainant and respondent equitably throughout the grievance process. All university officials involved in the grievance process must not have a conflict of interest or bias for or against either party. The respondent is presumed not to be responsible for the alleged conduct until a determination regarding responsibility is made at the conclusion of the grievance process. The parties are advised as to the range of possible disciplinary sanctions and remedies that the university may implement following any determination of responsibility. The university will determine responsibility based on the evidentiary standard of Preponderance of the Evidence and both parties are permitted to appeal the final decision.

The university will provide for an informal resolution process such as mediation after the filing of a formal complaint. Informal resolution does not involve a full investigation and adjudication. The informal resolution process may begin at any time prior to a determination regarding responsibility. The university must provide the parties with the written notice as to the allegations and the requirements of the informal resolution process. The parties must voluntarily agree and provide written consent to the Informal resolution process. The parties have the right to withdraw from the informal process and participate in the formal grievance process any time prior to a determination regarding responsibility. Informal resolution is not permitted in cases of harassment of a student by an employee.

B. TITLE IX INVESTIGATION

1. **Initiating the investigation.** Upon receipt of a formal complaint, the Title IX Coordinator will provide written notice to the parties of the allegations of sexual harassment, including sufficient details known at the time of

filing and allowing sufficient time to prepare a response before the initial interview. The details include the identity of the parties, the alleged conduct constituting sexual harassment, the date and location of the alleged conduct. The written notice must contain a statement that the respondent is presumed not responsible for the alleged conduct and that a determination regarding responsibility is made at the conclusion of the grievance process. The notice must inform the parties that they may have an advisor of their choice, who may be, but is not required to be, an attorney. The notice must inform the parties of the section of the Student Code of Conduct that prohibits knowingly making false statements or knowingly submitting false information during the grievance process.

2. **Time frame.** The university will endeavor to complete its investigation in sixty (60) days. However, there may be reasonable delays or extensions as circumstances arise.
3. **Standard of Proof.** The “preponderance of the evidence” standard shall be applied to sexual harassment complaints. This standard requires a finding that it is more likely than not that sexual harassment occurred in order to assign responsibility to the respondent.
4. **Gathering information.** The university will conduct prompt and thorough interviews of the complainant, the respondent, and any witnesses. Both parties will have an opportunity to suggest witnesses. The investigator will interview the suggested witnesses unless the investigator determines that the information that the party claims the witness will share is not relevant. The burden of gathering both inculpatory and exculpatory evidence and proof sufficient to reach a determination of responsibility is on the university. The university will not restrict the ability of either party to discuss the allegations under investigation or gather and present relevant evidence. The parties are both allowed to have their advisor of choice present during any grievance proceeding. The university may restrict the extent to which the advisor may participate in the proceedings as long as the restrictions apply equally to both parties. Written notice of the date, time, location, participants, and purpose of all hearings, interviews or meetings must be provided to a party whose participation is invited or expected with sufficient time for the party to prepare to participate. An investigative report will be generated at the end of the investigation. Prior to completion of the investigative report, the Title IX Coordinator will send each party and their advisors any evidence gathered that is directly related to the allegations for their inspection and review with ten (10) days-notice to submit a written response, prior to completion of the final investigative report. The final investigative report is sent to the parties and their advisors ten (10) days prior to the live hearing.

Once the Title IX Coordinator is satisfied that the investigation is completed, the Title IX Coordinator will notify the complainant and the respondent as to the live hearing.

C. Live Hearing

The parties (through their advisors) may make opening statements and the decision makers may question the parties and their witnesses prior to and after any cross-examination.

1. **Cross-examination.** The decision makers preside over the live hearing, permit each party’s advisor to ask the other party, and witnesses all relevant questions. The cross-examination must be conducted directly, orally, and in real time by the advisor and not the party. Either party can request that the live hearing occur virtually with the parties in separate rooms. The technology is to allow the decision makers and parties to simultaneously see and hear the cross-examination of the party or witness. Only relevant questions will be answered. The decision makers make a determination as to relevancy after the question is asked and before the answer given. The university must provide an advisor, without fee, to a party who does not have an advisor present for the live hearing. Parties or witnesses who do not submit to cross-examination will preclude the decision makers from relying on their statements in determining responsibility.
2. **Recording or Transcript.** The university must create an audiovisual recording or transcript of the live hearing and make it available to the parties for inspection and review.
3. **Determination Regarding Responsibility.** The decision makers must issue a written determination regarding responsibility simultaneously to the parties using the preponderance of the evidence standard. The written statement must include the allegations constituting sexual harassment, describe the procedural steps taken, the findings of fact supporting the determination, conclusions regarding the application of this Policy and a statement the findings and the rationale, as well as the procedures and basis for appeal.

D. Appeal.

Both respondent and complainant may appeal a determination regarding responsibility and from a dismissal of a formal complaint based on: (1) procedural irregularity that affected the outcome; (2) new evidence not previously available that could affect the outcome; and (3) bias or conflict of interest on the part of a Title IX official that affected the outcome.

The university must maintain records for seven years of all sexual harassment investigations, appeals, informal resolutions, all materials used to train Title IX officials and make such materials available on its website, hearing recordings and transcripts, records of any actions, including supportive measures, taken in response to reports or formal complaint of sexual harassment.

V. COMPLAINTS INVOLVING TWO OR MORE MCPHS UNIVERSITY CAMPUSES

The Title IX Coordinator has oversight for all Title IX cases. When an alleged violation of this policy involves more than one MCPHS University campus, individuals approved by the Title IX Coordinator at the campus with disciplinary authority over the respondent may handle the complaint.

VI. COMPLAINTS BY AND AGAINST UNIVERSITY EMPLOYEES AND STUDENTS ARISING IN AN AFFILIATED ENTITY

University employees and students sometimes work or study at the worksite or program of another organization affiliated with MCPHS. When a violation of this policy is alleged by or against University employees or students in those circumstances, the complaint should immediately be directed to the Title IX Coordinator. The University will follow the designated protocol for all Title IX allegations.

VII. NO LIMITATION ON EXISTING AUTHORITY

No provision of this policy shall be construed as a limitation on the authority of an appointing or disciplinary authority under applicable policies and procedures to initiate appropriate action. If a Title IX investigation is conducted under this policy and no policy violation is found, that finding does not prevent discipline of the respondent for inappropriate or unprofessional conduct under other applicable policies and procedures.

VIII. ANNUAL REPORT

For the purposes of the Clery Report, the Office of Public Safety shall maintain an annual report documenting: (1) the number of reports or complaints received pursuant to this policy; (2) the categories of those involved in the allegations; (3) the number of policy violations found; and (4) examples of sanctions imposed for policy violations. The annual report does not contain any personally identifying information regarding the complainant or the respondent.

IX. EDUCATION

The University will broadly disseminate this policy, distribute a list of resources available to respond to concerns of Protected Class discrimination, harassment, and related retaliation and develop and present appropriate educational programs for students and employees.

X. STATE AND FEDERAL REMEDIES

In addition to the above, students or employees may file a formal complaint with the U. S. Equal Employment Opportunity Commission (EEOC), the Office of Civil Rights, the U. S. Department of Education or the applicable state or local governmental agencies where they reside. Using the University's complaint process does not prohibit a student or employee from filing a complaint with these agencies.

XI. RELATED POLICIES

MCPHS University Protection from Discrimination and Harassment Policy provides that the University expect its employees and students to report discrimination and harassment.

MCPHS University Professional Conduct in the Workplace Policy Statement provides that the University expect its employees to respect the dignity of others and show the same respect and concern for all community members.

MCPHS University Student Conduct Policies and Procedures address student conduct that occurs on or as it relates to university property, or at official functions and university-sponsored programs conducted away from the campus. For related complaint, grievance or disciplinary processes see the Student Code of Conduct and Student Discipline System.

This policy complies with Titles VI and VII of the Civil Rights Act of 1964; Title IX of the Education Amendments of 1972; The Age Discrimination in Employment Act of 1976; the Equal Pay Act of 1963; sections 503 and 504 of the Rehabilitation Act of 1973; the Vietnam Era Veterans Adjustment Act; the Americans with Disabilities Act.

MCPHS UNIVERSITY PROTECTION FROM DISCRIMINATION AND HARASSMENT POLICY

I. POLICY STATEMENT

MCPHS University ("MCPHS" or the "University") does not discriminate in admission, treatment, or access to its programs or activities or in employment in its programs or activities on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, ancestry, genetic information, military service, marital status, or veteran status and actively complies with the requirements of Federal Executive Orders 11246 and 11375 as amended; the Civil Rights Act of 1964 as amended; Title IX of the Educational Amendments of 1972 as amended; Sections 503 and 504 of the Rehabilitation Act of 1973; Section 402, Vietnam Era Veterans Readjustment Assistance Act of 1974; the Age Discrimination Act of 1975; the Americans with Disabilities Act of 1990 (as amended by the ADA Amendments Act of 2008); and pertinent laws, regulations, and executive directives of the Commonwealth of Massachusetts and other applicable state and federal statutes.

The University will not tolerate acts of discrimination or harassment based upon Protected Classes, or related retaliation against any employee or student for complaining of or participating in an investigation or proceeding relating to a complaint of discrimination or harassment based upon a Protected Class. For purposes of this policy, Massachusetts "Protected Classes" refers to race, color, national origin, sex, pregnancy, age, disability, creed, religion, ethnicity, sexual orientation, gender, gender identity, gender expression, ancestry, genetic information, military service, marital status, veteran status and any other characteristic protected by law. In addition, employers have an affirmative responsibility to provide parental leave to biological and adoptive parents.

Discrimination: Treating individuals or groups less favorably because of their Protected Class.

Harassment: Unwelcome and/or offensive behavior, based on one or more of the Protected Classes, that subjects an individual to inferior terms, conditions or privileges of education or employment. Harassing conduct rises above the level of what a similarly situated reasonable person would consider petty slights or trivial inconveniences. Harassment can take many forms, such as words, visual images, gestures, or other verbal or physical conduct by any means. Harassment may include, but is not limited to:

- Epithets, slurs, or negative stereotyping;
- Threatening, intimidating, or hostile acts; and
- The circulation or display of written or graphic material that belittles or shows hostility or aversion toward an individual or group including through e-mail and other electronic media.

The process outlined in this policy applies to all complaints of unlawful discrimination or harassment, except those alleging any form of Sexual Harassment. Any person alleging Sexual Harassment, including sexual assault, domestic violence, dating violence and stalking, on the part of any University student, faculty or staff member, affiliate (e.g. visitor, vendor, etc.) or non-affiliate, should refer to the University's Protection from Sexual Harassment (Title IX) Policy. Allegations of Sexual Harassment must be evaluated by the Title IX Coordinator to determine whether the conduct falls within the definition of Title IX. Allegations that do fall within the jurisdiction of the Title IX policy, as determined by the Title IX Coordinator, may be referred for investigation and adjudication pursuant to the procedures set forth below.

Inquiries regarding the University's compliance with Equal Opportunity and Affirmative Action laws may be directed to Richard J. Lessard, President, at 617.732.2132. He is the designated coordinator for complaints arising under Title VI and Title VII of the Civil Rights Act and Massachusetts General Laws Chapter 151B.

II. REPORTING OBLIGATIONS

Obligation to Report Discrimination and Harassment. In order to take appropriate corrective action, the University must be aware of discrimination, harassment, and related retaliation that occurs in University employment, educational programs, and activities. Anyone who believes that they have experienced discrimination, harassment, or related retaliation shall immediately report such behavior. The following individuals have a duty to report whenever they witness, receive notification of, or otherwise have knowledge of an incident of discrimination, harassment, or related retaliation that occurred in the course of University employment, educational programs, or activities.

All University Officers;

- All Deans, Department Chairs, and Program Directors;
- The Title IX Coordinator;
- All employees with supervisory authority;
- All employees in Human Resources; and
- All employees in Public Safety.

Where to Report. Allegations or complaints may be directed to Human Resources, Deans, Department Chairs, Program Directors, and designated University Officers listed above.

When to Report. All reports or complaints shall be made as promptly as possible after the occurrence.

Failure to Report is a Violation. A failure to report this information is a violation of this Policy, except in the case of an individual whose profession and university responsibilities requires them to keep certain communications confidential (e.g., a professional counselor). Such an individual is not required to report confidential communications received while performing those University responsibilities.

Right to file criminal complaint. A complainant has the right to file a criminal complaint before, during or after the University's investigation.

Amnesty Policy. The University encourages the reporting of all concerns regarding Discrimination and Harassment. Sometimes individuals are hesitant to report instances of Discrimination or Harassment because they fear being charged with other policy violations. Because the University has a paramount interest in protecting the well-being of its community and remedying Discrimination and Harassment, other policy violations will be considered, if necessary, separately from allegations under the Policy.

Confidentiality. The University will maintain the privacy of the complaint, and the privacy of the persons involved, to the greatest extent possible, consistent with its goal of conducting a thorough and complete investigation and to the extent permitted by law. It is important to understand that while the University will treat information it has received with appropriate sensitivity, nonetheless there may be a need to share certain information within the University for the purposes of investigating, stopping, or preventing Discrimination and Harassment.

Zero-Tolerance for Retaliation. The University will not tolerate retaliation against any employee or student based upon such individual's filing of a complaint of discrimination or harassment or participation in the investigation or adjudication of such a complaint. Retaliation is a serious violation of this policy, as well as of federal, state, and local law. Anyone who believes he or she is a victim of retaliation should report the matter immediately according to the same procedure provided in this policy for making complaints of discrimination or harassment.

III. DISCRIMINATION AND HARASSMENT INVESTIGATION PROCEDURES

1. Initiating the investigation. The designated University officer shall determine the most appropriate means for addressing the report or complaint. The investigation will be prompt, thorough, and impartial. The complainant (the person bringing the complaint) and the respondent (the person who is the subject of the complaint) can request written notice of the complaint and a statement of the allegations, as soon after the commencement of the investigation as is practicable and to the extent permitted by law.
2. Withdrawing a complaint. Prior to the conclusion of a discrimination or harassment investigation, the complainant may withdraw his or her complaint. Withdrawal of the complaint will ordinarily end the investigation and resolution process. However, the University reserves the right to proceed with the complaint, even after the complainant withdraws it, to protect the interests and safety of the University community, as necessary.
3. Time frame. An investigation will be concluded within reasonable time frames and a determination finalized no later than sixty (60) days after the receipt of the report of the investigation, absent extenuating circumstances.
4. Standard of proof. The "preponderance of the evidence" standard is applied to the investigator's findings to determine whether the respondent is responsible. The standard requires a finding that it is more likely than not that discrimination or harassment occurred in order to assign responsibility to the respondent.
5. Collecting information. The University will conduct prompt, thorough, and impartial interviews of the complainant, the respondent, and any witnesses.
6. The investigator will review evidence and consider information relevant to the complaint. Throughout the investigation, including at any hearing, both parties will have an equal opportunity to present relevant witnesses and other information. The complainant and the respondent have the same access to any information used at any hearings. Before the final determination, both parties will have an opportunity to respond.
7. Notice of outcome. At the conclusion of an investigation, the investigator shall prepare a written report that shall include a statement of factual findings and a determination of whether there is a policy violation. The designated University officer may consult with the investigator, consult with the parties, and request that the same or another investigator, do further investigation. Once the University officer is satisfied that the investigation is completed the University officer will notify both parties, to the extent permitted by law.
8. Remedy and enforcement. The appointing authority or disciplinary authority must initiate formal action against the respondent for a policy violation or if they acted inappropriately or unprofessionally.
9. Appeal Process. Both respondent and complainant may appeal a final decision adjudicated under this policy. Student appeals are handled pursuant to the Student Code of Conduct. Employee appeals by staff members are handled pursuant to the Dispute Resolution section of the Employee Handbook. Faculty members should refer to the Faculty Manual for information regarding dispute resolution procedures for faculty. The University's determination will be presumed to have been reached reasonably and appropriately.
10. Document retention. In all cases, the designated University officer shall retain the investigator's report for a minimum of three (3) years or for such longer period as any administrative or legal action, arising out of the complaint is pending. In the case of a student respondent(s), records will be retained according to policies administered by the Office of the Dean of Students.

All records of discrimination and harassment and related retaliation reports and investigations shall be considered private and shall not be disclosed publicly except to the extent required by law.

IV. COMPLAINTS BY AND AGAINST UNIVERSITY EMPLOYEES AND STUDENTS ARISING IN AN AFFILIATED ENTITY.

University employees and students sometimes work or study at the worksite or program of another organization affiliated with MCPHS. When a violation of this policy is alleged by or against University employees or students in those circumstances, the complaint should immediately be directed to the designated University officer. The designated University officer will consult the affiliation agreement between MCPHS and the other entity for any language relating to the handling of the allegation. In the absence of an affiliation agreement or a provision addressing this issue, MCPHS will follow the designated protocol for all discrimination or harassment allegations.

V. NO LIMITATION ON EXISTING AUTHORITY

No provision of this policy shall be construed as a limitation on the authority of an appointing authority/disciplinary authority under applicable policies and procedures to initiate appropriate action.

VI. EDUCATION

MCPHS will broadly disseminate this policy, distribute a list of resources available to respond to concerns of Protected Class discrimination, harassment, and related retaliation and develop and present appropriate educational programs for students and employees.

VII. STATE AND FEDERAL REMEDIES

In addition to the above, students or employees may file a formal complaint with the U.S. Equal Employment Opportunity Commission (EEOC), the Office of Civil Rights, the U. S. Department of Education or the applicable state or local governmental agencies where they reside. Using the University's complaint process does not prohibit a student or employee from filing a complaint with these agencies.

VIII. RELATED POLICIES

MCPHS University Protection from Sexual Harassment (Title IX) Policy provides that the University expects its employees and students to report sexual harassment.

MCPHS University Professional Conduct in the Workplace Policy Statement provides that the University expect its employees to respect the dignity of others and show the same respect and concern for all community members.

MCPHS University Student Conduct Policies and Procedures addresses student conduct that occurs on or as it relates to university property, or at official functions and university-sponsored programs conducted away from the campus. For related complaint, grievance or disciplinary processes see the Student Code of Conduct and Student Discipline System.

*This policy complies with Titles VI and VII of the Civil Rights Act of 1964 as amended; Title IX of the Education Amendments of 1972 as amended; The Age Discrimination in Employment Act of 1976; the Equal Pay Act of 1963; sections 503 and 504 of the Rehabilitation Act of 1973; the Vietnam Era Veterans Adjustment Act; the Americans with Disabilities Act.

Center for Interprofessional Practice and Education (CIPE)

Over the past decade, MCPHS has embraced the importance of collaborative practice in healthcare delivery and has advanced Interprofessional Practice and Education (IPE) across a wide array of healthcare programs. Given the significance of preparing our graduates for interprofessional experiences within the healthcare environment and for the communities that they serve, IPE has been fully adopted by key stakeholders across the University. The IPE Boston and Worcester/Manchester Working Groups have provided an excellent framework and foundation in which to deliver IPE initiatives. The Academic Affairs Leadership is committed to supporting the faculty, staff, and students in advancing IPE experiences in curricular and co-curricular settings. The Offices of the President and Provost have fully supported the collaboration of the University's IPE Working Groups and the Academic Affairs Leadership with a vision of creating a unified IPE model across the University.

The **Center for Interprofessional Practice and Education (CIPE)** at MCPHS will support the University's vision of educating and training the next generation of collaborative healthcare leaders. The overall goal of the CIPE is to integrate and centralize IPE initiatives throughout the University. With the full support of the University's Academic Affairs Leadership and the IPE Working Groups from all campuses and online programs, the CIPE will serve as a resource for all MCPHS students to engage in IPE practice, education, scholarship/research, and service. The CIPE will provide the necessary infrastructure and support that will result in positive outcomes for our students, the faculty/staff, and the institution as a whole. The organizational structure and governance of CIPE will support a unified strategy for advancing IPE goals even further. The Center will focus on advancing diversity, equity, and inclusion in healthcare, fostering interprofessional approaches to transform health disparities, and improve healthcare for underserved populations.

Center for International Studies (CIS)

The Center for International Studies (CIS) is a network of individuals and departments that provides a spectrum of services to international students drawn to MCPHS University from around the world, and to all students seeking educational and professional opportunities abroad. The Center focuses on student success and global engagement, from enrollment through all aspects of the academic experience, and encourages collaboration among students, faculty, and alumni in achieving an international perspective on healthcare education, research, and practice.

International Programs

The International Programs office serves as a resource for faculty and students who are interested in international service trips, exchange programs, clinical rotations, and travel courses. By working together to build and enhance international programs, our collaborative projects complement academic and co-curricular programs around the world.

Immigration and International Support Services

Immigration Services provides immigration advice and assistance to international students both before and after their arrival in the United States. The office creates F-1 I-20 forms and provides information regarding visa guidelines, travel signatures, employment opportunities, and Social Security cards.

International Academic Services

International Academic Services serves as a resource to faculty, staff and students for academic and intercultural issues specific to international students and exchange visitors. This office focuses on international student success efforts and internationally-focused collaborations on all MCPHS campuses.

Admission

General Admission Policies

General MCPHS University admission policies and application procedures that apply to all applicants are stated below.

- An application for admission must be complete in order to be evaluated. An application is considered complete when the Admission Office has received the completed admission application, all required credentials, and the nonrefundable application fee (if applicable).
- All credentials must be sent directly from the issuing agency to the Admission Office either at the Boston Campus or the campus where the program to which the applicant is applying is offered. Transfer applicants to the Doctor of Pharmacy program (Transfers entering into the 1st and 2nd year of the PharmD program do not submit application through PharmCAS), or applicants to the Master of Physician Assistant Studies program, Doctor of Physical Therapy program, Master of Science in Occupational Therapy program, and Doctor of Optometry program should send official transcripts directly to the Pharmacy College Application Service (PharmCAS), Central Application Service for Physician Assistants (CASPA), Occupational Therapist Centralized Application Service (OTCAS), Physical Therapist Centralized Application Service (PTCAS), Dental Hygiene Centralized Application Service or Optometry Centralized Application Service (OptomCAS), respectively. Application to the BS in Nursing programs through Nursing Centralized Application Service (NursingCAS) is optional.
- Applicants may apply to only one MCPHS campus and/or program per academic year.
- A new application, complete with updated credentials, must be submitted each time a candidate reapplies for admission to the University.
- Preference is given to candidates whose application files are complete and received by the priority deadline. However, applications will continue to be reviewed until all available spaces are filled.
- Interviews are required for transfer applicants applying to the third year of the Doctor of Pharmacy program (Boston) who have met or plan to complete all required preprofessional courses prior to matriculation, the Physician Assistant Studies program (Boston, Manchester, and Worcester), the Doctor of Health Sciences (Online), Doctor of Pharmacy (Accelerated) program (Worcester and Manchester), the Doctor of Optometry program (Worcester), the Doctor of Physical Therapy program (Worcester), the Doctor of Physician Assistant Studies, the Doctor of Healthcare Administration program (Online), the Master of Acupuncture program (Worcester), the Doctor of Acupuncture program (Worcester), and the Postbaccalaureate Doctor of Pharmacy program (Online). These interviews are by invitation only. Candidates who are invited are contacted by email directly by the Admission Office.
- Upon notification of acceptance, all students are required to pay an enrollment deposit to secure a place in the entering class. The deposit must be in U.S. dollars, in the form of a credit card payment, money order, or check drawn on a U.S. bank (made payable to MCPHS). The University accepts wire transfers by Flywire and credit card payments by Visa, Discover, or MasterCard. MCPHS does not accept cash. The deposit must be received by the specified deadline and is credited in full to the tuition cost of the first term of enrollment. Deposit amounts and deadlines vary according to campus and program, and are specified in the letter of acceptance. Deposits are non-refundable.

Tests and Testing Agencies

FOR SAT, AP, CLEP, TOEFL, and GRE
CONTACT Educational Testing Service, Princeton, NJ 08541

Priority Dates and Campus Mailing Addresses

MCPHS establishes priority dates for admission to all academic programs. If space permits, the University continues to accept and review applications beyond the dates listed.

Boston Campus

MCPHS University
Admission Office
179 Longwood Avenue
Boston, MA 02115
Tel: 617.732.2850 / 800.225.5506 / Fax: 617.732.2118

Freshman Admission Priority Dates

Early action I—November 1
Early action II—December 1
Regular decision—February 1

Undergraduate Transfer Admission Priority Date

All programs—February 1

Fast Track / Postbaccalaureate Programs Priority Dates

Bachelor of Science in Diagnostic Medical Sonography (Fast Track)—February 1 (fall entry)
Bachelor of Science in Magnetic Resonance Imaging (Fast Track)—November 15 (spring entry)
Bachelor of Science in Nuclear Medicine Technology (Fast Track)—February 1 (summer entry)
Bachelor of Science in Radiation Therapy (Fast Track)—February 1 (summer entry)
Bachelor of Science in Radiography (Fast Track)—February 1 (summer entry)
Bachelor of Science in Nursing, Postbaccalaureate—October 1 (spring entry), May 1 (fall entry)
Advanced Medical Imaging Certificate Programs Priority Dates
Computed Tomography (CT)—February 1 (summer and fall entry)
Certificate in Advanced Pharmacy Practice Studies (CAPPS)—Rolling
Doctor of Pharmacy—February 1

Graduate Admission Priority Dates

Master of Physician Assistant Studies—September 1 (fall entry)
Master of Public Health—February 1 (fall entry)
Master of Science in Clinical Research—June 1 (fall entry), November 15 (spring entry), February 1 (summer entry)
Master of Science / PhD in Medicinal Chemistry—February 1 (fall entry)
Master of Science / PhD in Pharmaceutical Economics and Policy—February 1 (fall entry), November 1 (spring entry)
Master of Science / PhD in Pharmaceutics—February 1 (fall entry)
Master of Science / PhD in Pharmacology—February 1 (fall entry)
Master of Science in Regulatory Affairs and Health Policy—June 1 (fall entry), November 15 (spring entry), February 1 (summer entry)
Graduate Certificate in Clinical Research—June 1 (fall entry), November 15 (spring entry), February 1 (summer entry)
Graduate Certificate in Health Policy—June 1 (fall entry), November 15 (spring entry), February 1 (summer entry)
Graduate Certificate in Regulatory Affairs—June 1 (fall entry), November 15 (spring entry), February 1 (summer entry)

Worcester Campus

AS to MS in Dental Hygiene Bridge Program—June 1
RN to Master of Science in Nursing Bridge (Family Nurse Practitioner Track)—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
RN to Master of Science in Nursing Bridge (Psychiatric/Mental Health Nurse Practitioner Track)—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Bachelor of Science in Dental Hygiene Degree Completion—June 1
Bachelor of Science in Health Sciences Degree Completion—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Doctor of Pharmacy (Postbaccalaureate Pathway)—June 1
Advanced Certificate in Magnetic Resonance Imaging—February 1
Advance Certificate in Nuclear Medicine Technology- February 1 (summer entry)
Certificate of Advanced Graduate Studies in Nursing (Family Nurse Practitioner Track) November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Certificate of Advanced Graduate Studies in Nursing (Psychiatric Mental Health Nurse Practitioner Track)—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Graduate Certificate in Clinical Management—November 15 (spring entry), June 1 (fall entry)
Graduate Certificate in Clinical Research—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Graduate Certificate in Healthcare Management—November 15 (spring entry), June 1 (fall entry)
Graduate Certificate in Health Policy—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Graduate Certificate in Public Health—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Graduate Certificate in Regulatory Affairs—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Master of Business Administration in Healthcare Management—November 15 (spring entry), June 1 (fall entry)
Master of Science in Clinical Management—November 15 (spring entry), June 1 (fall entry)
Master of Science in Clinical Research—November 15 (spring entry), June 1 (fall entry),
Master of Science in Regulatory Affairs and Health Policy—November 15 (spring entry), June 1 (fall entry)
Master of Health Sciences—November 15 (spring entry), June 1 (fall entry)
Master of Public Health—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Master of Science in Dental Hygiene—June 1
Master of Science in Nursing (Family Nurse Practitioner Track)—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Master of Science in Nursing (Psychiatric/Mental Health Nurse Practitioner Track)—November 15 (spring entry), June 1 (fall entry), February 1 (summer entry)
Doctor of Acupuncture Completion Program—May 1

Doctor of Health Sciences—November 15 (spring entry), June 1 (fall entry)
Doctor of Healthcare Administration—November 15 (spring entry), June 1 (fall entry)
Doctor of Science in Physician Assistant Studies—November 15 (spring entry), June 1 (fall entry)

Freshman Admission (Boston)

Requirements

An applicant's secondary school program of study must include at least 16 units of coursework in the following subject areas:

- 4 units of English
- 3 units of mathematics (algebra I and II; geometry)
- 2 units of social sciences (including 1 in history)
- 2 units of laboratory science (1 each in biology and chemistry)
- 5 units of additional college preparatory courses

Eligible applicants for first-year admission completing 12 or more credits following high school graduation will be classified as a transfer student for admission, unless the student was enrolled in a college prep or ESL program during those two years. Incoming freshmen students may transfer in no more than a total of 18 credits of work in combination of dual enrollment, AP, or IB credit. Dual-enrollment is defined as college-credit bearing coursework taken while enrolled in high school.

Early Action

Early action is open to prospective first-year students only. Candidates with solid academic records who have decided that MCPHS is a "top choice" college are encouraged to apply under Early Action I or Early Action II. Applicants must submit the application and all required materials by the deadlines listed above. The Admission Office makes decisions on Early Action I by the middle of December and Early Action II by the middle of January. Accepted students have until May 1 to respond to the University's offer of admission.

Application

An application for first-year admission is reviewed when the file is complete. To be considered complete, the applicant's file must contain all of the following:

- Completed Common Application (www.commonapp.org)
- Official high school transcript(s) from all secondary schools attended, including most recent grades (or official GED test score report)
- Official transcripts from colleges or universities attended, if applicable
- One letter of recommendation from a college/guidance counselor or teacher (up to three letters of recommendation will be considered).

Transcripts

Transcripts must clearly indicate all credits and grades received and indicate coursework currently in progress. All transcripts must be official. Transcripts can be sent by the institution electronically or by mail. If mailed in, they must be presented in a sealed envelope with the institution's stamp or a college/university official's signature across the closure. Photocopies and hand-carried documents not in a sealed, stamped envelope are not accepted.

All deposited students are expected to submit a final high school transcript by the first day of classes. The diploma awarded and the date of the award must be clearly indicated on the final transcript.

Standardized Tests

Standardized testing, such as the SAT and ACT, is optional for all freshmen and transfer students applying to MCPHS University. Candidates for whom English is not the primary spoken language are required to take the TOEFL, iTEP, IELTS, PTE, Duolingo, OSSLT or the English Proficiency exam offered on campus. This test requirement may be waived on an individual basis for applicants who have attended all four years of high school in the United States (exclusive of ESL courses), who have completed four years of study in a U.S.-accredited, IB or UK curricula outside the United States where English is the only medium of instruction (exclusive of ESL courses), who have scored 480 or higher on the Evidence-Based Reading and Writing section of the SAT, or who have scored 21 or higher on the English section of the ACT. (Please refer to the International Applicants section.)

Official score reports must be sent directly to the Admissions Office from the high school, Common Application, Naviance, or the testing agency.

School of Nursing – Boston – Program-Specific Admission Requirements

Transfer Applicants [from colleges/universities outside of MCPHS] – Minimum Requirements

- Cumulative GPA – 2.7; Science and Math GPAs – 2.7.
- In order to be granted transfer credit for prerequisite courses, students must achieve a grade of C+/78 or better. Transfer credits will not be accepted for courses repeated more than one time.
- TOEFL – Minimum proficiency level of 79 – candidates for whom English is not the primary language.
- ** If applying for a fall year 2 start as a transfer student – must achieve a minimum score of 65.3% on the Test of Essential Academic Skills (TEAS). The test must have been completed within 3 years of the applicant's proposed enrollment date. The exam may only be taken 3 times (total) to achieve the above score. Candidates must arrange for official test score results to be sent directly from ATI to MCPHS University.

Internal Transfer Applicants [from within other majors in MCPHS] – Minimum Requirements

- Cumulative GPA – 2.7
- Completion of all prerequisite courses with a grade of C+/78 or better.
- TOEFL - Minimum proficiency level of 79 – candidates for whom English is not the primary language.
- Completion of an essay and interview with Nursing Faculty.
- **Qualified applicants are accepted on a space available basis and must achieve a minimum score of 65.3% on the Test of Essential Academic Skills (TEAS). The test must have been completed within 3 years of the applicant's proposed enrollment date. The exam may only be taken 3 times (total) to achieve the above score.

Advanced Course Credit

Freshmen may be awarded a limited amount of MCPHS course equivalency credit in transfer for Advanced Placement (AP) courses, International Baccalaureate (IB) courses, and/or college coursework taken during high school. Credit for science course equivalency will not be awarded. The minimum score on an AP test for credit consideration is a 4 or a 5. The minimum score on an HL (high-level) IB exam for credit consideration is 5.

Dual Credit Programs

Courses taken for college credit while a student is enrolled in high school will receive transfer credit only if the course was administered in a college setting. A grade of C+ or higher is required. Courses taken in a high school that are taught by teachers who have been certified to offer college-level courses will not receive transfer credit.

Delayed Enrollment for Accepted Students

Students who are accepted for admission may request approval of delayed enrollment (deferral) for one full academic year due to military enlistment or student medical reasons. To do so, they must

- submit a written request to the Admission Office and
- provide documentation for military enlistment or student medical reasons and
- promise, in writing, that they will not attend any other college or university during the deferral period.

MCPHS reserves the right to deny requests for deferral. The candidate must submit a nonrefundable enrollment deposit before requesting a deferral. This deposit will reserve a place in the class starting in the fall of the following academic year. If the student enrolls at that time, the deposit will be credited in full toward the first-semester tuition.

Students are canceled from the accepted applicant pool if

- they are denied deferral and choose not to enroll at the University in the fall for which they were admitted or
- they defer but do not enroll in the fall of the academic year following the deferral period.

Students who are canceled from the accepted applicant pool must forfeit their accepted student status and full amount of the corresponding enrollment deposit (deposit is forfeited after May 1 of the freshman applicant's senior year)..

Transfer Admission

Candidates who are accepted as transfer students may receive a limited number of course credits in transfer. Please refer to Residency Requirement in the section Academic Policies and Procedures. Transfer credit is not awarded for life experience or work experience. Transfer credit can be achieved through

- coursework taken prior to enrollment at other regionally accredited colleges and universities,
- successful passing of Advanced Placement (AP) and/or College-Level Examination Program (CLEP) examinations (see below), and
- successful passing of International Baccalaureate (IB) examinations.

Policies that determine the amount of transfer credit awarded and that identify courses accepted in transfer vary among programs. Candidates interested in transfer credit should contact the Admission Office about their particular program of interest. Transfer credit for professional coursework is very limited and is awarded on a case-by-case basis through special petition to the dean of the school in which the program is offered. All petitions must be processed through the Admission Office and initiated by August 1 prior to fall enrollment or by December 15 if entering in the spring semester.

The Admission Office conducts a transfer credit evaluation on all transcripts in a candidate's file during the application review process. Accepted students receive access to an online student portal where they are able to view their transfer credit evaluation. Courses considered for transfer credit must meet the following requirements:

- Comparable in breadth and depth to those in the preprofessional phase of the specific program to which the candidate is applying. Comparability is determined by the Admission Office in collaboration with the Office of the Registrar, school deans, program directors, and faculty in related discipline(s).
- Successfully completed with a grade of C (2.0) or better at a regionally accredited college or university. Transfer credits for Nursing prerequisites will only be accepted if a grade of C+ or higher is earned.
- Completed within the last 10 years at the time of enrollment. This restriction is limited to courses in the area of mathematics and the natural, physical, and behavioral sciences.
- Submitted with an official transcript by August 15 (fall entry), December 15, (spring entry) or May 1 (summer entry). For transcripts submitted after these deadlines, and no later than the add/drop deadline of the subsequent term, the student must work with their academic dean for approval.

AP examination results are accepted for transfer credit for selected coursework. Students must achieve a score of 4 or better on an AP examination for transfer credit to be awarded. Transfer credits are limited to exams in English, Mathematics, language, and the arts.

CLEP results are accepted as transfer credit for selected subject matter for incoming transfer students. Candidates must receive a score of 50 or better per subject to be awarded CLEP credit. Examination(s) must be taken before the student's first semester of enrollment at MCPHS. Those who achieve a score below 50 may not repeat the examination and must take the course. CLEP is an opportunity for students whose coursework is comparable but not otherwise transferable (e.g., exceeds the 10-year limit, earned grade is below C) and others who have not taken coursework but believe they have comparable knowledge.

IB courses will be accepted for transfer credit for selected coursework. Students must achieve a score of 5 or better on an HL (high-level) IB exam. Transfer credits are limited to exams for English, Mathematics language, and the arts. Transfer students accepted into the professional phase of an MCPHS degree program will receive transfer credit for IB courses accepted by a previous college.

Transfer credit of AP, IB, CLEP, and/or dual enrollment courses is limited to a total of 18 semester hours of credit. Exam documentation must be provided to MCPHS no later than August 15 (fall entry), December 15, (spring entry) or May 1 (summer entry).

Candidates who desire to receive credit based on AP and CLEP examinations must arrange for official test score results to be sent directly from Educational Testing Service (ETS) to the Admissions Office in Boston. A complete list of the AP and CLEP examinations and the corresponding MCPHS courses for which transfer of credit is allowed is available upon request through the Admissions Office.

Dual Credit Programs

Courses taken for college credit while a student is enrolled in high school will receive transfer credit only if the course was administered in a college setting. Courses taken in a high school that are taught by teachers who have been certified to offer college-level courses will not receive transfer credit. Transfer credits are limited to English, Mathematics, language, and the arts.

Petition for Additional Transfer Credit Post Matriculation

Once a student has matriculated at the University, no courses taken outside of MCPHS will be accepted for transfer credit. (NOTE: COF courses are allowed for Boston students.) Exceptions to this policy may be granted in instances involving delay of graduation or extreme hardship.

Prior to taking a course for transfer credit at another institution, students must submit a Petition to Transfer Credit form to the Center for Academic Success and Enrichment, which approves or denies the petition. Notification of the decision will be distributed to (1) the student, (2) the program director, (3) the school dean, (4) the Office of the Registrar, and (5) others as appropriate. The student is responsible for requesting that official transcripts be sent to the Office of the Registrar, which will verify the credit and post a grade of TR in the student's transcript. Official transcripts must be

received no later than the add/drop deadline of the subsequent semester. These petitions are reviewed on a case-by-case basis and may take up to two weeks to receive official notification. Students are advised not to enroll in or make payments for non-MCPHS courses without official University approval.

Fast Track, Postbaccalaureate, and Graduate Admission (Boston)

NOTE: All candidates must refer to General Admission Policies for additional information including interviews, mailing address, and deadlines.

Fast Track and Postbaccalaureate Programs

At MCPHS University, Fast Track is used to identify options for transfer students to complete a bachelor's degree in the shortest possible time. Fast Track transfer options are available for students entering BS programs in Dental Hygiene, Medical Imaging and Therapeutics, and Nursing:

- Students who have already earned a bachelor's degree (BS) in any field of study may complete a second bachelor's degree at MCPHS by taking only the professional courses and related prerequisites. 60 semester hours of credit is awarded and the MCPHS Core Curriculum requirement is waived upon admission.
- Students who have already earned an associate's degree (AS) in any field of study may complete a bachelor's degree at MCPHS by taking professional courses and related prerequisites, plus any additional courses in the MCPHS Core Curriculum requirement that were not included in the applicant's associate degree program.
- Students who have taken college-level courses at another institution may transfer up to 60 semester hours toward an MCPHS bachelor's degree. Students must complete a minimum of 60 semester hours at MCPHS by taking professional courses, plus any prerequisites and MCPHS Core Curriculum requirements that were not taken at the prior institution.

Students entering MCPHS through a Fast Track option must meet the University's residency and course transfer requirements.

Applications are accepted for the following graduate and fast track programs:

Graduate Programs

Master of Physician Assistant Studies

Master of Public Health

Master of Science in Clinical Research

Master of Science or Doctor of Philosophy in Medicinal Chemistry

Master of Science or Doctor of Philosophy in Pharmaceutical Economics and Policy

Master of Science or Doctor of Philosophy in Pharmaceutics

Master of Science or Doctor of Philosophy in Pharmacology

Master of Science in Regulatory Affairs and Health Policy

Graduate Certificate in Clinical Research

Graduate Certificate in Health Policy

Graduate Certificate in Regulatory Affairs

Fast Track / Postbaccalaureate Programs

Bachelor of Science in Dental Hygiene (Fast Track)

Bachelor of Science in Diagnostic Medical Sonography (Fast Track)

Bachelor of Science in Magnetic Resonance Imaging (Fast Track)

Bachelor of Science in Nuclear Medicine Technology (Fast Track)

Bachelor of Science in Radiation Therapy (Fast Track)

Bachelor of Science in Radiography (Fast Track)

Bachelor of Science in Nursing (Postbaccalaureate)

Advanced Imaging Certificates for Licensed Radiologic Technologists

Computed Tomography

Mammography

Magnetic Resonance Imaging

Nuclear Medicine Technology

Requirements

NOTE: Additional program-specific requirements may be found in the individual program descriptions in this catalog.

Candidates for admission to all graduate, fast track, or postbaccalaureate programs must have the following:

- An earned bachelor's degree from an accredited college or university (some fast track programs do not require a prior bachelor's degree)
- An earned master's degree in a related field for those applying to a PhD program within the Division of Graduate Studies
- An overall grade point average (GPA) of 3.0 or higher (on a 4.0 scale) for graduate programs
- A TOEFL, IELTS, PTE, Duolingo, MCPHS on-campus English Proficiency Exam (EPE), or ITEP for all candidates for whom English is not the primary spoken language. This test requirement may be waived on an individual basis for applicants who have attended all four years of high school in the United States (exclusive of ESL courses), who have completed four years of study in a U.S.-accredited, IB or UK curricula outside the United States where English is the only medium of instruction (exclusive of ESL courses) or have an earned degree (bachelor's or higher) from a college or university within the U.S. or a native English speaking country whereas the program was fully taught in English. (Please refer to the International Applicants section.)

Preference is given to those who

- have an overall GPA of 3.0 or better (on a 4.0 scale) with consistent performance of 3.0 or better in prerequisite courses and other subjects related to the major field of study; and
- have volunteer, research, or work experience related to the major field of study.

Application

An application for graduate, fast track, or postbaccalaureate admission is reviewed when the file is complete. To be considered complete, the applicant's file must contain all of the following:

- Completed application, which may be found online for all programs (except Physician Assistant Studies) at www.mcphs.edu. All Physician Assistant Studies application materials must be submitted through CASPA.
- Official transcripts from all colleges or universities attended, including those outside the United States
- Official reports of GRE and TOEFL, ITEP, MCPHS EPE, PTE, Duolingo, or IELTS scores, if applicable
- One letter of recommendation recommended from faculty or work/research supervisors, which solidly support the candidate's ability to complete graduate-level work successfully in the chosen discipline
- For the Advanced Certificate in Medical Imaging programs, a copy of the applicant's current ARRT/NMTCB/ARDMS certificate and certification number, a copy of the Massachusetts Radiation Control Program radiologic technologist license, and a copy of the current CPR certification
- Master of Physician Assistant Studies Applicants - Students applying to the Master of Physician Assistant Studies program must apply through CASPA (www.caspaonline.org). Candidates with international credentials must refer to the International Applicants section in this catalog.

Admissions Prerequisites:

- Overall CASPA Verified GPA: 3.0
- Overall Science CASPA Verified GPA: 3.0
- Prerequisite GPA: 3.0

Transcripts

Transcripts must clearly indicate all credits and grades received and indicate coursework currently in progress. Degree(s) or diploma(s) that have been received, dates awarded, and major courses of study must be clearly noted. Transcripts can be sent by the institution electronically or by mail. If mailed in, they must be presented in a sealed envelope with the institution's stamp or a college/university official's signature across the closure. Photocopies and hand-carried documents not in a sealed, stamped envelope are not accepted. Official transcripts must be received no later than August 15 (fall entry), December 15 (spring entry), or May 1 (summer entry).

All applicants—including U.S. citizens and permanent residents—who have academic credentials from countries outside the United States are required to supply additional documents in order to be considered for admission.

Non-U.S. Transcripts

Candidates must submit official transcripts of coursework taken outside the United States to an approved credential evaluation service. Currently approved credential evaluation services are:

World Education Services (WES)
www.wes.org
and
Education Credential Evaluators (ECE)
www.ece.org

A course-by-course evaluation is required for foreign transcript evaluation. Photocopies of transcripts and test scores are not accepted. Official transcripts for courses taken outside the United States also must be submitted directly to the Admission Office in addition to the WES or ECE evaluation.

Standardized Tests

GRE scores are required (regardless of graduation date from a college or university) for the following programs: Pharmaceutics, Pharmacology, Medicinal Chemistry, and Pharmaceutical Economics and Policy (PhD only),

Candidates for whom English is not the primary spoken language are required to take the TOEFL, ITEP, MCPHS on-campus English Proficiency Exam (EPE), Duolingo, or IELTS. This test requirement may be considered satisfied on an individual basis for applicants who have attended all four years of high school in the United States (exclusive of ESL courses), who have completed four years of study in a U.S.-accredited, IB or UK curricula outside the United States where English is the only medium of instruction (exclusive of ESL courses) or who have an earned degree (bachelor's or higher) from a U.S. college or university. (Please refer to the International Applicants section.)

Recommendations

Letters of recommendation must be sent from the recommender electronically or by mail. Personal copies, photocopies, or hand-delivered recommendations that are not in individual sealed, stamped/signed envelopes are not acceptable.

Interview

On-campus interviews are required for some programs. These interviews are by invitation only. Candidates who are invited are contacted directly by the Admission Office.

Graduate Transfer of Credit

Transfer credit for graduate-level coursework taken at other accredited institutions may be accepted for transfer toward a student's degree requirements pending approval of the Graduate Council. Only courses that are clearly relevant to the student's program of study and have not been used to fulfill requirements for another degree may be considered for transfer credit. A maximum of 8 semester hours for MS and 12 semester hours for PhD programs may be transferred for coursework in which grades of B or higher have been attained. In some instances, transfer hours received in certain courses taken on a pass/fail basis may be approved by the Graduate Council. It is the responsibility of the student's Graduate Advisory Committee to determine the student's comprehension of the material before such hours are shown on the program of study for credit toward the degree. Research credit from another institution cannot be accepted for transfer credit. Coursework must have been completed not more than two years prior to the date of the request for transfer. Transfer credit for all MS coursework, including research credits, taken at MCPHS is acceptable for transfer toward a student's PhD degree requirements, provided that the coursework is clearly relevant to the student's program of study.

Graduate Student Status

At the time of acceptance, each student is classified as regular, provisional, or non-matriculating.

Regular Status

Candidates who have met all requirements for admission to a graduate degree program are admitted as regular students. The transcript must show sufficient and satisfactory undergraduate preparation in the major field, a minimum GRE score, and (if applicable) a TOEFL, ITEP, MCPHS EPE, PTE, Duolingo, or IELTS score. (Please refer to the International Applicants section.)

Candidates who are accepted to the MS track of graduate studies in the pharmaceutical sciences and desire consideration for acceptance to the PhD track may do so after successful completion of one full year in the master's degree track at MCPHS. A candidate must submit a letter of petition to the Associate Dean of Graduate Studies carefully outlining his or her career goals and reasons for consideration. Additional documentation may be requested at the discretion of the Associate Dean or the Graduate Advisory Committee. Candidates will be notified of the decision by the Associate Dean. Those who are not approved will continue in the master's degree track contingent upon satisfactory performance.

A graduate student is considered to have full-time status if they are

- registered for 9 or more graduate credits, or
- registered for 6 or more graduate credits while appointed as a graduate assistant for 15-20 hours per week, or
- registered for DRA 810A Case Study Thesis, or
- registered for PEP 880 MS Thesis Research in Pharmaceutical Economics and Policy, or

- registered for PEP 890 PhD Dissertation Research in Pharmaceutical Economics and Policy, or
- registered for PSB 872 Special Problems in Pharmaceutical Sciences (internships), or
- registered for PEP 899 Special Topics in Pharmaceutical Economics and Policy, or
- registered for PSB 880, CHE 880, or CHE 885 Research, or
- registered for PSB 895 Graduate Student Extension (thesis/dissertation completion, no credit), or
- registered for DHY 895 Graduate Extension of Thesis
- registered for CHE 895 Graduate Study Extension

Provisional Status

The University may, at its discretion, admit candidates into a graduate degree program on a trial basis as provisional students to ascertain their ability to do graduate work. Provisional students are those who have not met the minimum undergraduate grade point averages and/or GRE scores for admission. Provisional status also may be applied to students whose credentials do not meet specific program requirements. Provisional students must adhere to regulations established by the Graduate Council and be working toward a degree on a full-time basis. In order to achieve regular status, the student must complete the equivalent of two academic semesters (at least 9 semester hours) of full-time work with an overall grade point average of 3.0. If the student had not taken the GRE at the time of admission as a provisional student, the student must take the GRE during the first semester of provisional status.

At any time during the first year of matriculation following completion of the above criteria, a student may initiate an Approval for Change of Student Status in the Office of Graduate Studies. However, the student's graduate advisor also may initiate the change and should do so when the student has met the required criteria, or may request the change of status before the student has completed 9 semester credits. The change from provisional to regular status must be approved by the Assistant Dean of Graduate Studies. No student may remain on provisional status for more than two consecutive semesters. If a student admitted to provisional status fails to meet the conditions stated in the letter of admission, the student may be dismissed from the program.

Admission (Worcester and Manchester)

Applications are accepted for the following programs:

- Accelerated Doctor of Pharmacy (PharmD)
- Master of Acupuncture (MAc)
- Master of Acupuncture / Doctor of Acupuncture (MAc/DAc)
- Master of Acupuncture with a Chinese Herbal Medicine Specialization (MAc CHM)
- Master of Acupuncture with a Chinese Herbal Medicine Specialization / Doctor of Acupuncture (MAc CHM/DAc)
- Master of Physician Assistant Studies (MPAS)
- Master of Science in Occupational Therapy (MSOT)
- Fast Track Bachelor of Science in Dental Hygiene (BS)
- Fast Track Bachelor of Science in Diagnostic Medical Sonography (BS)
- Postbaccalaureate Bachelor of Science in Nursing (BSN)
- Doctor of Optometry (OD)
- Doctor of Physical Therapy (DPT)

Requirements

- Candidates for admission for the accelerated Doctor of Pharmacy (PharmD) program who do not have a previously earned Bachelor of Science or Bachelor of Arts degree must have completed or plan to complete an equivalent of 67 semester hours of preprofessional coursework at the college or university level prior to entry in the program. Applicants who have a previously earned BS or BA degree from a U.S.-regionally accredited institution must have completed or plan to complete the equivalent of 40 semester hours of math and science coursework at the college or university level prior to entry in the program. The PharmD program does not require a specific overall minimum GPA. The School utilizes a holistic admissions process. A minimum grade of C is required in all pre-requisites.
- Candidates for admission to the Master of Acupuncture (MAc) or Master of Acupuncture with a Chinese Herbal Medicine Specialization (MAc CHM) must have satisfactorily complete at least two (2) years of undergraduate-level education (60 semester credits or 90 quarter credits) from an institution accredited or pre-accredited by an agency recognized by the U.S. Secretary of Education. In considering the acceptance of education and training obtained in foreign countries, credits earned at a foreign educational institution must be validated by a recognized, educational credentials, evaluation service.
- Candidates for admission to the Certificate of Advanced Graduate Study (CAGS) in Chinese Herbal Medicine must include current enrollment in, or the satisfactory completion of, an ACAHM-accredited/pre-accredited entry-level (i.e., master's-level or professional doctoral) program in acupuncture or in

acupuncture with a Chinese herbal medicine specialization. In considering the acceptance of education and training obtained in foreign countries, credits earned at a foreign educational institution must be validated by a recognized educational credentials evaluation service.

- Candidates for admission to the Doctor of Acupuncture (DAc) program must have satisfactorily completed at least three (3) years of undergraduate-level education (90 semester credits or 135 quarter credits) from an institution accredited or pre-accredited by an agency recognized by the U.S. Secretary of Education. In considering the acceptance of education and training obtained in foreign countries, credits earned at a foreign educational institution must be validated by a recognized, educational credentials, evaluation service. Prerequisite undergraduate-level education required for admission to the Doctor of Acupuncture must include chemistry, biology and psychology.
- Candidates to the Master of Physician Assistant Studies (MPAS), Master of Science in Occupational Therapy (MSOT), Bachelor of Science in Nursing (BSN), and Doctor of Physical Therapy (DPT) programs must have completed a bachelor's degree and prerequisite courses.
- Candidates to the Fast Track Bachelor of Science in Dental Hygiene or Fast Track Bachelor of Science in Diagnostic Medical Sonography program must have completed a bachelor's degree or specific prerequisite courses with an overall 2.5 GPA on a 4.0 scale. A minimum grade of C is required in all prerequisites.
- Candidates for admission to the Accelerated Master of Physician Assistant Studies program must have a cumulative and science academic grade point average of at least 3.0 or higher on a 4.0 scale and a prerequisite course grade point average of at least 3.0 or higher on a 4.0 scale attained at a regionally accredited college or university. A minimum of grade of C is required in all prerequisites.
- Candidates for admission to the Master of Science in Occupational Therapy program must have a cumulative grade point average of at least 3.0 or higher on a 4.0 scale attained at a regionally accredited college or university. A minimum grade of C is required in all prerequisites.
- Candidates for admission to the Accelerated (Postbaccalaureate) Bachelor of Science in Nursing program must have a cumulative academic grade point average of at least 2.7 or higher on a 4.0 scale attained at a regionally accredited college or university. A minimum grade of C+ is required in all prerequisites.
- Candidates for admission to the Doctor of Optometry program should have a minimum overall grade point average of 3.0, a minimum grade of C in all prerequisite courses, at least 90 credits earned at a regionally accredited college or university, and evidence of familiarity with optometry (e.g., proof of shadowing a practitioner or volunteer work in optometric offices).
- Candidates for admission to the Doctor of Physical Therapy program must have an overall grade point average of at least 3.0 or higher on a 4.0 scale and a prerequisite course grade point average of at least 3.0 or higher on a 4.0 scale attained at a regionally accredited college or university. A minimum of grade of C is required in all prerequisite courses and a minimum of 10 hours of physical therapy exposure/experience in a clinical setting.

Preference is given to candidates who demonstrate

- scores in the 50th percentile or above in each section of the GRE (see Standardized Tests for a list of programs that require the GRE);
- minimum OAT (Optometry Admission Test) score of 300 (see Standardized Tests for a list of programs that require the OAT);
- consistent academic performance in a full-time program with above-average grades in mathematics and sciences without having to withdraw or repeat courses; and
- an ability to articulate clearly, in a written essay, the reasons for their choice of program study at MCPHS.

Application

An application for admission to the PharmD, MPAS, MSOT, OD or DPT program is reviewed when the file is complete. To be considered complete, the applicant's file must contain a completed Pharmacy College Application Service (PharmCAS), Central Application Service for Physician Assistants (CASPA), Occupational Therapist Centralized Application Service (OTCAS), Physical Therapist Centralized Application Service (PTCAS), or Optometry Centralized Application Service (OptomCAS) application including the following documents, which must be submitted directly to PharmCAS (www.pharmacas.org), CASPA (www.caspaonline.org), OTCAS (www.otcas.org), PTCAS (www.ptcas.org), or OptomCAS (www.optomcas.org), respectively:

- Official transcripts from all colleges or universities attended
- One letter of recommendation, except for applicants to the Master of Physician Assistant Studies, Doctor of Physical Therapy or Doctor of Optometry programs which must submit two letters of recommendation (see below)
- A written essay

Additionally, the following documents must be submitted directly to the Admission Office on the campus to which the applicant is applying:

- Official high school transcript(s) or official GED test scores for applicants without a bachelor's degree
- Official reports of standardized test scores, if applicable (see below).

An application for admission to the Postbaccalaureate BSN, Fast Track Bachelor of Science in Dental Hygiene, Fast Track Diagnostic Medical Sonography, Master of Acupuncture (MAc), Master of Acupuncture with a Chinese Herbal Medicine Specialization (MAc CHM), or Doctor of Acupuncture (DAc) program is reviewed when the file is complete. To be considered complete, the applicant's file must contain all of the following items:

- Completed application that may be found online at www.mcphs.edu
- Official transcripts from all colleges or universities attended
- Official reports of standardized test scores, if applicable (see below)
- One letter of recommendation (see below)
- A written Statement of Purpose (for MAc, MAc CHM, or DAc)

Transcripts

Official transcripts reflecting all prerequisite courses must be received in the Admission Office no later than August 15 (fall entry) or December 15, (spring entry). Students failing to submit these documents by this deadline will be dropped from all classes. Transcripts must clearly indicate all credits and grades received. Transcripts can be sent by the institution electronically or by mail. If mailed in, they must be presented in a sealed envelope with the institution's stamp or a college/university official's signature across the closure. Photocopies and hand-carried documents not in a sealed, stamped envelope are not accepted.

All applicants, including U.S. citizens and permanent residents, who have academic credentials from countries outside the United States are required to supply additional documents in order to be considered for admission.

Non-U.S. Transcripts

Candidates must submit official transcripts of coursework taken outside the United States to:
World Education Services (WES)
Tel.: 212.966.6311
www.wes.org

A course-by-course evaluation is required for foreign transcript evaluation. Photocopies of transcripts and test scores are not accepted. Official transcripts for courses taken outside the United States also must be submitted directly to the Admission Office in addition to the WES evaluation. A WES evaluation is not required for applicants into the first year of undergraduate programs.

Standardized Tests

Applicants for admission are required to submit official reports of standardized test scores as indicated below:

- Candidates for whom English is not the primary spoken language are required to take the TOEFL, ITEP, MCPHS on-campus English Proficiency Exam (EPE), Duolingo or IELTS. This test requirement may be considered satisfied, on an individual basis, for applicants who have attended all four years of high school in the United States (exclusive of ESL courses) who have completed four years of study in a U.S.-accredited, IB or UK curricula outside the United States where English is the only medium of instruction (exclusive of ESL courses) or who have an earned degree (bachelor's or higher) from a U.S. college or university. (Please refer to the International Applicants section.)
- Candidates who have completed Advanced Placement (AP) and/or College-Level Examination Program (CLEP) examinations are required to submit official score reports (refer to the Prerequisite Course Credit section for additional information).
- Candidates applying for the Doctor of Physical Therapy program (Worcester) are required to submit official GRE scores.
- International applicants applying to the New England School of Acupuncture whose native language is not English are required to provide proof of English proficiency for admission to degree, certificate, and non-degree graduate programs. This must be demonstrated by one of the following means:
 1. The applicant must have completed one of the following:
 - a) four years at a U.S. high school demonstrably delivered in English;

- b) at least two-years (60 semester credits or 90 quarter credits) of undergraduate- or graduate-level education in an institution accredited by an agency recognized by the U.S. Secretary of Education;
- c) at least two-years (60 semester credits or 90 quarter credits) of undergraduate- or graduate-level education demonstrably delivered in English;
- d) high school or two-years (60 semester credits or 90 quarter credits) of undergraduate- or graduate-level education in an institution in one of the following countries or territories: American Samoa; Anguilla; Antigua & Barbuda; Australia; Bahamas; Barbados; Belize; Bermuda; Botswana; British Virgin Islands; Cameroon; Canada (except Quebec); Cayman Islands; Christmas Island; Cook Islands; Dominica; Federated States of Micronesia; Fiji; The Gambia; Ghana; Gibraltar; Grenada; Guam; Guyana; Ireland; Isle of Man; Jamaica; Kenya; Lesotho; Liberia; Malawi; Montserrat; Namibia; New Zealand; Nigeria; Norfolk Island; Papua New Guinea; Philippines; Pitcairn Islands; Sierra Leone; Singapore; South Africa; South Sudan; St. Helena; St. Kitts & Nevis; St. Lucia; St. Vincent & the Grenadines; Swaziland; Tanzania; Trinidad and Tobago; Turks and Caicos Islands; United Kingdom; U.S. Virgin Islands; Uganda; Zambia; Zimbabwe.
 - i. In all cases, English must have been both the language of instruction and the language of the curriculum used.

OR

2. The applicant must have completed one of the following assessments at the required level:

- a) Test of English as a Foreign Language Internet-Based Test (TOEFL iBT - Total: 61),
 - b) International English Language Testing System (IELTS), Academic Format (Overall Band: 6),
 - c) Duolingo English Test (Score of 90),
 - d) China Standard of English Language (CSE – Score of 6),
 - e) Cambridge First Certificate of English (FCE – Score of C),
 - f) Cambridge English Advanced (CAE – Score of C),
 - g) Common European Framework Reference (CEFR – Score of B2),
 - h) Occupational English Test (OET – Score of 250, C),
 - i) Pearson Test of English (PTE), Academic (Overall: 45).
- Candidates applying to the Doctor of Optometry program (Worcester) are required to submit official Optometry Admission Test (OAT) or official GRE scores.
 - Official score reports must be sent directly to the Admission Office from the appropriate testing agency.

Recommendations

Candidates for Worcester/Manchester admission should submit one letter of recommendation, except for applicants to the Master of Physician Assistant Studies, Doctor of Physical Therapy or the Doctor of Optometry programs, which must submit two letters of recommendation. Preferably one letter of recommendation should be from a mathematics or science professor and one letter of recommendation from a work supervisor or academic advisor. Letters of recommendation for the Doctor of Optometry, Doctor of Pharmacy, Doctor of Physical Therapy, or Master of Physician Assistant Studies, or Master of Science in Occupational Therapy should be submitted through OptomCAS, PharmCAS, PTCAS, CASPA, or OTCAS, respectively. Letters of recommendation must be sent from the recommender electronically or by mail. Personal copies, photocopies, or hand-delivered recommendations that are not in individual sealed, stamped/signed envelopes are not acceptable.

Interview

Interviews are required for applicants applying to the Master of Acupuncture, Master of Acupuncture with a Chinese Herbal Medicine Specialization, Doctor of Acupuncture, Doctor of Pharmacy, Master of Physician Assistant Studies, Doctor of Physical Therapy, and Doctor of Optometry programs. These interviews are by invitation only. Candidates who are invited are contacted directly by the Admission Office.

Although interviews may not be required of candidates applying to other programs, all candidates are encouraged to visit the University to meet with an admission counselor and tour the campus. To arrange an appointment or a tour, interested candidates should call the Manchester Admission Office at 603.314.1701 or the Worcester Admission Office at 508.373.5607.

Transfer and Prerequisite Course Credit

Candidates who are accepted to the Worcester/Manchester Postbaccalaureate BSN, Fast Track Diagnostic Medical Sonography, Fast Track Bachelor of Science in Dental Hygiene, accelerated Doctor of Pharmacy (PharmD), Master of Physician Assistant Studies, Master of Science in Occupational Therapy, Doctor of Optometry (OD), or Doctor of

Physical Therapy (DPT) program must complete all prerequisite courses required of the program prior to matriculation. Prerequisite course credit is not awarded for life experience or work experience.

Transfer of Credit

Accepted students may receive a limited number of course credits in transfer. Please refer to Residency Requirement in the section *Academic Policies and Procedures*. Transfer credit is not awarded for life experience or work experience. Transfer credit can be achieved through

- coursework taken prior to enrollment at other regionally accredited, degree-granting colleges and universities
- PHY 270 Foundations of Physics I – Students who, prior to matriculation at MCPHS, have completed either one semester of calculus-based physics or two semesters of algebra-based physics will receive transfer credit for PHY 270. To be eligible for transfer credit, the courses must have been completed at a college or university and grades of C or better must have been earned in each class. This policy applies only to transfer credit requested for courses taken prior to matriculation at MCPHS.
- successful passing of the examinations listed below. Students receiving transfer credit for examinations must also pass the internal MCPHS placement exams during orientation in order to maintain their transfer credit. Transfer credits for examinations is limited to 18 credits overall.
- Advanced Placement (AP) examinations (see below)
- College-Level Examination Program (CLEP) examinations (see below)
- International Baccalaureate (IB) examinations (see below).

The Admission Office conducts a transfer credit evaluation on all transcripts in a candidate's file during the application review process. Accepted transfer students receive access to an online student portal where they are able to view their transfer credit evaluation. Courses considered for transfer credit must meet the following requirements:

- Comparable in breadth and depth to those in the preprofessional phase of the specific program to which the candidate is applying. Comparability is determined by the Admission Office in collaboration with the Office of the Registrar, school deans, program directors, and faculty in related discipline(s).
- Successfully completed with a grade of C (2.0) or better at a regionally accredited college or university (C+ for better for BSN)
- Completed within the last 10 years at the time of enrollment. This restriction is limited to courses in the area of mathematics and the natural, physical, and behavioral sciences.
- Submitted with an official transcript by August 15 (fall entry) or December 15 (spring entry), May 15. Courses not submitted by that time will not be awarded transfer credit.

The New England School of Acupuncture awards transfer credit towards the completion of its programs based on review of an applicant's official transcripts.

The credits must have been earned at a post-secondary institution of higher education accredited or pre-accredited by an agency recognized by the United States Secretary of Education. Credits earned at a foreign educational institution must be evaluated by a recognized educational credentials evaluation service. Petition for transfer credit must be submitted to the Admission Office prior to enrollment into the New England School of Acupuncture. Applicants must meet program admissions requirements that are in effect at the time of matriculation.

NESA considers the following criteria when determining if a course is eligible for transfer credit:

- The course content must be equivalent.
- The course must be taught at a similar level of instruction and at a similar depth and breadth.
- The course must be greater than or equal in hours.
 - If a course has fewer hours, it is up to the Dean to determine if the competencies of the courses in question have been met by this prior coursework.
 - The Dean determines if these competencies have been met or may determine that a challenge exam may be necessary to determine if the course competencies have been met.
- The student must attain a minimum grade point of C (2.0) as reflected on an official student transcript.
- Credits earned more than five (5) years prior to admission may only be accepted for transfer after validating and documenting that the student has retained the content knowledge and competencies of the respective course(s) for which transfer credits are being assessed.

NESA requires course descriptions and syllabi when determining the award of transfer credit for acupuncture coursework which must have been completed within the last three years. Non-acupuncture coursework earned more than five years prior to admission may be accepted for transfer credit if the applicant provides evidence of retained

competencies of the coursework in their specified field for which transfer credits are being assessed. New England School of Acupuncture reserves the right to require a challenge exam in the determination of all transfer credit.

Courses submitted to satisfy admissions requirements cannot be used towards transfer credit. Continuing education coursework is not eligible for transfer credit.

NESA allows a maximum of 50% of the coursework needed for graduation from a degree program or certificate of advanced graduate studies to be accepted for transfer. Of that 50% no more than 25% of the program clinical training requirement may be accepted as transfer credit.

AP Credit

AP examination results are accepted for transfer credit for selected coursework. Students must achieve a score of 4 or better on an AP examination for transfer credit to be awarded

CLEP Credit

CLEP results are accepted as transfer credit for selected subject matter for incoming transfer students. Candidates must receive a score of 50 or better per subject to be awarded CLEP credit. Examination(s) must be taken before the student's first semester of enrollment at MCPHS. Those who achieve a score below 50 may not repeat the examination and must take the course. CLEP is an opportunity for students whose coursework is comparable but not otherwise transferable (e.g., exceeds the 10-year limit, earned grade is below C) and others who have not taken coursework but believe they have comparable knowledge.

IB Credit

IB courses will be accepted for transfer credit for selected coursework. Students must achieve a score of 5 or better on an HL (high-level) IB exam. Transfer credits are limited to exams for English, language, and the arts.

Candidates who desire to receive credit based on AP, CLEP and IB examinations must arrange for official test score results to be sent directly from Educational Testing Service (ETS) to the Admission Office. A complete list of the AP, CLEP and IB examinations and the corresponding MCPHS courses for which transfer of credit is allowed is available upon request through the Admission Office. Transfer credit by exam is limited to 18 credits total.

Dual Credit Programs

Courses taken for college credit that count toward the high school diploma will receive transfer credit only if the course credit is awarded by a regionally accredited, degree-granting college or university. Students must provide an official college transcript to receive credit.

Transfer credit for professional coursework

This transfer credit is very limited and is awarded on a case-by-case basis through special petition to the dean of the school in which the program is offered. All petitions must be processed through the Admission Office and initiated by August 15 prior to fall enrollment or by December 15 if entering in the spring semester.

Policies that determine the amount of prerequisite course or transfer credit awarded and that identify courses accepted in transfer vary among programs. Candidates interested in transfer credit should contact the Admission Office about their particular program of interest.

Petition for Additional Transfer Credit Post Matriculation

Once a student has matriculated at the University, no courses taken outside of MCPHS will be accepted for transfer credit. (NOTE: COF courses are allowed for Boston students.) Exceptions to this policy may be granted in instances involving delay of graduation or extreme hardship.

Prior to taking a course for transfer credit at another institution, students must submit a Petition to Transfer Credit form to the Center for Academic Success and Enrichment, which approves or denies the petition. Notification of the decision will be distributed to (1) the student, (2) the program director, (3) the school dean, (4) the Office of the Registrar, and (5) others as appropriate. The student is responsible for requesting that official transcripts be sent to the Office of the Registrar, which will verify the credit and post a grade of TR in the student's transcript. Official transcripts must be received no later than the add/drop deadline of the subsequent semester. These petitions are reviewed on a case-by-case basis and may take up to two weeks to receive official notification. Students are advised not to enroll in or make payments for non-MCPHS courses without official University approval.

Admission (Online Programs)

Applications are accepted for the following programs:

Graduate Programs

Doctor of Health Sciences (DHS)
Doctor of Healthcare Administration (DHA)
Doctor of Science in Physician Assistant Studies (DScPAS)
Master of Health Sciences (MHS)
Master of Public Health (MPH)
Master of Business Administration in Healthcare Management (MBA)
Master of Science in Clinical Management (MS)
Master of Science in Clinical Research (MSCR)
Master of Science in Dental Hygiene (MSDH)
Master of Science in Nursing (MSN) (Family Nurse Practitioner)
Master of Science in Nursing (MSN) (Psychiatric/Mental Health Nurse Practitioner)
Master of Science in Pharmaceutical Economics and Policy
Master of Science in Regulatory Affairs and Health Policy

Certificate Programs

Advanced Certificate in Magnetic Resonance Imaging
Advanced Certificate in Mammography
Advanced Certificate in Nuclear Medicine Technology
Graduate Certificate in Clinical Management
Graduate Certificate in Healthcare Management
Graduate Certificate in Health and Pharmacoepidemiology
Graduate Certificate in Health Economics and Outcomes Research
Graduate Certificate in Health Policy
Graduate Certificate in Oral Health Professions Education
Graduate Certificate in Public Health
Graduate Certificate in Regulatory Affairs
Certificate of Advanced Graduate Studies in Nursing (Family Nurse Practitioner Track)
Certificate of Advanced Graduate Studies in Nursing (Psychiatric/Mental Health Nurse Practitioner)

Postbaccalaureate Programs

Postbaccalaureate Doctor of Pharmacy Pathway (PharmD)

Bridge Programs

RN to Master of Science in Nursing (MSN) (Family Nurse Practitioner)
RN to Master of Science in Nursing (MSN) (Psychiatric/Mental Health Nurse Practitioner)
AS to Master of Science in Dental Hygiene (MSDH)

Degree Completion Programs

Bachelor of Science in Dental Hygiene
Bachelor of Science in Health Sciences
Bachelor of Science in Healthcare Management Completion
Doctor of Acupuncture Completion

Requirements

NOTE: Additional program-specific requirements may be found in the individual program descriptions in this catalog or online at www.mcphs.edu

Candidates for admission to all online graduate and postbaccalaureate programs must have:

- an earned bachelor's degree from an accredited college or university and
- a TOEFL, ITEP, PTE, MCPHS EPE, Duolingo, or IELTS if English is not the candidate's primary spoken language. This test requirement may be waived on an individual basis for applicants who have attended all four years of high school in the United States (exclusive of ESL courses) or who have an earned degree (bachelor's or higher) from a U.S. college or university. (Please refer to the International Applicants section.)

Candidates for admission to all online bridge and bachelor's degree completion programs must have:

- an earned associate degree from an accredited college or university, and;

- a TOEFL, ITEP, PTE, MCPHS EPE, Duolingo, or IELTS if English is not the candidate's primary spoken language. This test requirement may be waived on an individual basis for applicants who have attended all four years of high school in the United States (exclusive of ESL courses) or have an earned degree (bachelor's or higher) from a U.S. college or university. (Please refer to the International Applicants section.)
- Preference is given to those who
- have an overall grade point average (GPA) of 3.0 or better (on a 4.0 scale) with consistent performance of 3.0 or better in prerequisite courses and other subjects related to the major field of study; and
- have volunteer, research, or work experience related to the major field of study.

Application

An application for online admission is reviewed when the file is complete. To be considered complete, the applicant's file will likely require all or some of the following:

- Completed application, which may be found online for all programs (<http://www.mcphs.edu/apply>)
- Official reports of TOEFL, ITEP, PTE, MCPHS EPE, Duolingo or IELTS score, if applicable
- Letter(s) of recommendation from faculty or work/research supervisors, which solidly support the candidate's ability to complete coursework successfully in the chosen discipline
- Official transcripts from all colleges or universities attended, including those outside the United States
- Successful interview, if requested by Admission Office

The following are requirements for specific program applicants:

- Copy of a valid U.S. pharmacy license is required for Postbaccalaureate Doctor of Pharmacy Pathway program applicants.
- Applicants to all online Dental Hygiene programs must provide a copy of current license or proof of successful completion of the National Board Dental Hygiene Examination prior to participating in Orientation.
- Candidates to the ADN to Master of Science in Nursing Bridge program must have an earned AD from a state-approved program, a minimum cumulative GPA of 3.0 (on a 4.0 scale) in prelicensure nursing courses, and an RN license to practice nursing. A copy of the license must be provided.
- Candidates to the Master of Science in Nursing (MSN) programs must have an earned BSN (Bachelor of Science in Nursing) from an accredited college or university and RN license eligibility. A copy of the license must be provided. Master of Science in Nursing (MSN) candidates for admission also must have a cumulative academic grade point average of at least a 3.0 or better on a 4.0 scale.
- Candidates for transfer admission into the Bachelor of Science in Health Sciences Completion program must have a cumulative academic grade point average of at least 2.5 or higher on a 4.0 scale. Candidates also must hold an associate's degree in a health sciences field and be currently licensed in an area of healthcare.
- Candidates for admission to the Doctor of Acupuncture (DAc) Completion program must have satisfactorily completed at least three (3) years of undergraduate-level education (90 semester credits or 135 quarter credits) from an institution accredited or pre-accredited by an agency recognized by the U.S. Secretary of Education. In considering the acceptance of education and training obtained in foreign countries, credits earned at a foreign educational institution must be validated by a recognized, educational credentials, evaluation service. Prerequisite undergraduate-level education required for admission to the Doctor of Acupuncture must include chemistry, biology and psychology. In addition, candidates for admission must demonstrate satisfactory completion of a master's-level program in acupuncture or acupuncture with a Chinese herbal medicine specialization from an ACAHM accredited/pre-accredited program or institution.
- Candidates for the Doctor of Health Sciences program must have an earned master's degree in healthcare or a related field from a regionally accredited university and a 3.0 or higher on a 4.0 scale.
- Candidates for the Doctor of Healthcare Administration program must have an earned master's degree in healthcare, business, or a related field from a regionally accredited university and a 3.0 or higher on a 4.0 scale.
- Candidates for the Doctor of Science in Physician Assistant Studies program must have an earned MPAS (or equivalent) from a regionally accredited university, a 3.0 or better on a 4.0 scale. Graduate PA's must submit proof of state licensure (or equivalent) and current NCCPA certification.

For the most up-to-date admission requirements, visit <http://www.mcphs.edu>.

Transcripts

Transcripts must clearly indicate all credits and grades received and indicate coursework currently in progress. Degree(s) or diploma(s) that have been received, dates awarded, and major courses of study must be clearly noted.

All transcripts must be official and presented in a sealed envelope with the institution's stamp or a college/university official's signature on the closure. Photocopies and hand-carried documents not in a sealed, stamped envelope are not accepted. Official transcripts must be received no later than the add/drop deadline of the term of entry.

All applicants—including U.S. citizens and permanent residents—who have academic credentials from countries outside the United States are required to supply additional documents in order to be considered for admission.

Non-U.S. Transcripts

Candidates must submit official transcripts of coursework taken outside the United States to:

World Education Services (WES)

Tel.: 212.966.6311

www.wes.org

A course-by-course evaluation is required for foreign transcript evaluation. Photocopies of transcripts and test scores are not accepted. Official transcripts for courses taken outside the United States also must be submitted directly to the Admission Office in addition to the WES evaluation. A WES evaluation is not required for applicants into the first year of undergraduate programs.

Standardized Tests

Candidates for whom English is not the primary spoken language are required to take the TOEFL, ITEP, PTE, MCPHS EPE, Duolingo, or IELTS. This test requirement may be waived on an individual basis for applicants who have attended all four years of high school in the United States (exclusive of ESL courses) and have scored 480 or higher on the Evidence-Based Reading and Writing section of the SAT, who have completed four years of study in a U.S.-accredited, IB or UK curricula outside the United States where English is the only medium of instruction (exclusive of ESL courses), or who have an earned degree (bachelor's or higher) from a U.S. college or university. (Please refer to the International Applicants section.)

Recommendations

Letters of recommendation must be sent from the recommender directly to the Admission Office in a sealed envelope with the recommender's signature over the closure. Personal copies, photocopies, or hand-delivered recommendations that are not in individual sealed, stamped/signed envelopes are not acceptable. Electronic or fax recommendations must be sent directly from the recommender to the Admission Office.

Graduate Transfer of Credit

Transfer credit for graduate-level coursework taken at other accredited institutions may be accepted for transfer toward a student's degree requirements pending approval of the academic department. Only courses that are clearly relevant to the student's program of study and have not been used to fulfill requirements for another degree may be considered for transfer credit. A maximum of 9 semester hours for Master of Science programs may be transferred for coursework in which grades of B or higher have been attained. - It is the responsibility of the academic department to determine the student's comprehension of the material before such hours are shown on the program of study for credit toward the degree. Research credit from another institution cannot be accepted for transfer credit.

Graduate Student Status

At the time of acceptance, each student is classified as regular, provisional, or nonmatriculating.

Regular Status

Candidates who have met all requirements for admission to a graduate degree program are admitted as regular students. The transcript must show sufficient and satisfactory undergraduate preparation in the major field, and (if applicable) a TOEFL, ITEP, PTE, MCPHS EPE, Duolingo, or IELTS score. (Please refer to the International Applicants section.)

A graduate student is considered to have full-time status if they are

- registered for 9 or more graduate credits, or
- registered for 6 or more graduate credits while appointed as a graduate assistant for 15 to 20 hours per week, or
- registered for PSB 880 Research (at least 1 graduate credit), or
- registered for PSB 895 Graduate Student Extension (Thesis/Dissertation completion, no credit), or
- registered for DHY 895 Graduate Extension of Thesis, or
- registered for PBH 895 Prep Seminar, Culminating Experience, or

- registered for CHE 880 Research (3 cr) or CHE 885 Literature-based Research (3 cr), or
- registered for CHE 895 Graduate Study Extension (no credit), or
- registered for DRA 810 Case Study/Thesis or DRA 814 Data Analysis and Presentation Capabilities in Regulatory Affairs

Provisional Status

The University may, at its discretion, admit candidates into a graduate degree program on a trial basis as provisional students to ascertain their ability to do graduate work. Provisional students are those who have not met the minimum undergraduate grade point averages. Provisional status also may be applied to students whose credentials do not meet specific program requirements. Provisional students must adhere to regulations established by the Graduate Council and be working toward a degree on a full-time basis.

In order to achieve regular status, the student must complete the equivalent of two academic semesters (at least 9 semester hours) of full-time work with an overall grade point average of 3.0.

At any time during the first year of matriculation following completion of the above criteria, a student may initiate an Approval for Change of Student Status in the Office of Graduate Studies. However, the student's graduate advisor also may initiate the change and should do so when the student has met the required criteria, or may request the change of status before the student has completed 9 semester credits. The change from provisional to regular status must be approved by the Associate Dean of Graduate Studies. No student may remain on provisional status for more than two consecutive semesters. If a student admitted on provisional status fails to meet the conditions stated in the letter of admission, the student may be dismissed from the program.

Admission (International Applicants)

International Freshman and First-Year Transfer Application

An application for first-year admission is reviewed when the file is complete. To be considered complete, the international freshman applicant's file must contain all of the following:

- Completed MCPHS Application (portal.mcphs.edu) or Common Application (www.commonapp.org)
- Official high school transcript(s) from all secondary schools attended; including most recent grades (seniors must include a list of senior courses)
- Official transcripts from colleges or universities attended, if applicable
- Official reports of any standardized test scores: SAT I or ACT; TOEFL, ITEP, PTE, MCPHS EPE, or IELTS
- One letter of recommendation (from a mathematics or science teacher or a guidance counselor)
- SAT and ACT are optional. If an applicant chooses to submit either test, the score(s) will be considered as one of many factors that the admission committee uses to evaluate applicants.
- Candidates for whom English is not the primary spoken language are required to take the TOEFL, ITEP, MCPHS on-campus English Proficiency Exam (EPE), Duolingo, OSSLT, or IELTS. This test requirement may be considered satisfied, on an individual basis, for applicants who have attended all four years of high school in the United States (exclusive of ESL courses) who have completed four years of study in a U.S.-accredited, IB or UK curricula outside the United States where English is the only medium of instruction (exclusive of ESL courses) or who have an earned degree (bachelor's or higher) from a U.S. college or university. (Please refer to the International Applicants section.)

Transcripts - Transfer, Fast Track, Postbaccalaureate, and Graduate Applicants

Transcripts must clearly indicate all grades received and indicate coursework currently in progress. All transcripts must be official with the institution's stamp or a college/university official's signature.

All official transcripts from U.S. institutions must be submitted per the application requirements of the program to which a candidate is applying. Please see Admission, Freshman Admission, Transfer Admission, Fast Track, Postbaccalaureate and Graduate Admission for more information. Final high school transcripts stating graduation from secondary education must be sent directly from the student's high school prior to the start of classes if applicant does not have a prior bachelor's degree.

All applicants, including U.S. citizens and permanent residents, who have academic credentials from countries outside the United States are required to supply additional documents in order to be considered for admission.

Non-U.S. Transcripts

Candidates must submit official transcripts of coursework taken outside the United States to:

World Education Services (WES)
Tel.: 212.966.6311
www.wes.org

A course-by-course evaluation is required for foreign transcript evaluation. Photocopies of transcripts and test scores are not accepted. Official transcripts for courses taken outside the United States also must be submitted directly to the Admission Office in addition to the WES evaluation. A WES evaluation is not required for applicants into the first year of undergraduate programs.

Official Language Proficiency Test Scores - All Applicants

MCPHS requires all students whose first language is not English to submit official TOEFL (Test of English as a Foreign Language), IELTS (International English Language Testing System) or iTEP (International Test of English Proficiency), Duolingo English Test, OSSLT (Ontario Secondary School Literacy Test), or PTE Academic (Pearson Test of English) test scores, or pass the MCPHS English Proficiency Exam (EPE) prior to matriculation. This test requirement may be considered satisfied, on an individual basis, for applicants who have attended all four years of high school in the United States (exclusive of ESL courses), who have completed four years of study in a U.S.-accredited, IB or UK curricula outside the United States where English is the only medium of instruction (exclusive of ESL courses), who have an earned degree (bachelor's or higher) from a U.S. college or university who have scored 480 or higher on the Evidence-Based Reading and Writing section of the SAT, or who have scored 21 or higher on the English section of the ACT.

- The minimum required TOEFL score for all MCPHS undergraduate programs is 79 for the Internet-based exam (83 required for Nursing program). The minimum TOEFL score for all lab-based or clinical graduate programs is 90 on the Internet-based exam.
- The minimum required IELTS score is 6.5 for all undergraduate programs. The DPT, CAPPs and all lab-based or clinical graduate programs require a score of 7.
- The minimum required iTEP score is 4.0 for all undergraduate programs and 4.5 for lab-based and clinical graduate programs.
- The minimum required MCPHS on-campus English Proficiency Exam for all undergraduate programs is 57. The DPT, CAPPs and all lab-based and clinical graduate programs require a higher proficiency level of 62.
- The minimum required PTE Academic score for all undergraduate program is 58 and 73 for all lab-based and clinical graduate programs.
- The minimum required Duolingo score for all undergraduate programs is 105 and 115 for all lab-based and clinical graduate programs.
- The minimum required OSSLT score for all undergraduate programs is 300.
- International applicants applying to the New England School of Acupuncture whose native language is not English are required to provide proof of English proficiency for admission to degree, certificate, and non-degree graduate programs. This must be demonstrated by one of the following means:
 1. The applicant must have completed one of the following:
 - e) four years at a U.S. high school demonstrably delivered in English;
 - f) at least two-years (60 semester credits or 90 quarter credits) of undergraduate- or graduate-level education in an institution accredited by an agency recognized by the U.S. Secretary of Education;
 - g) at least two-years (60 semester credits or 90 quarter credits) of undergraduate- or graduate-level education demonstrably delivered in English;
 - h) high school or two-years (60 semester credits or 90 quarter credits) of undergraduate- or graduate-level education in an institution in one of the following countries or territories: American Samoa; Anguilla; Antigua & Barbuda; Australia; Bahamas; Barbados; Belize; Bermuda; Botswana; British Virgin Islands; Cameroon; Canada (except Quebec); Cayman Islands; Christmas Island; Cook Islands; Dominica; Federated States of Micronesia; Fiji; The Gambia; Ghana; Gibraltar; Grenada; Guam; Guyana; Ireland; Isle of Man; Jamaica; Kenya; Lesotho; Liberia; Malawi; Montserrat; Namibia; New Zealand; Nigeria; Norfolk Island; Papua New Guinea; Philippines; Pitcairn Islands; Sierra Leone; Singapore; South Africa; South Sudan; St. Helena; St. Kitts & Nevis; St. Lucia; St. Vincent & the Grenadines; Swaziland; Tanzania; Trinidad and Tobago; Turks and Caicos Islands; United Kingdom; U.S. Virgin Islands; Uganda; Zambia; Zimbabwe.
 - i. In all cases, English must have been both the language of instruction and the language of the curriculum used.

OR

2. The applicant must have completed one of the following assessments at the required level:

- j) Test of English as a Foreign Language Internet-Based Test (TOEFL iBT - Total: 61),
 - k) International English Language Testing System (IELTS), Academic Format (Overall Band: 6),
 - l) Duolingo English Test (Score of 90),
 - m) China Standard of English Language (CSE – Score of 6),
 - n) Cambridge First Certificate of English (FCE – Score of C),
 - o) Cambridge English Advanced (CAE – Score of C),
 - p) Common European Framework Reference (CEFR – Score of B2),
 - q) Occupational English Test (OET – Score of 250, C),
 - r) Pearson Test of English (PTE), Academic (Overall: 45).
- MCPHS does not accept scores that are more than two years old.

Official score reports must be sent directly to the Admission Office from the testing agency.

TOEFL exam information may be found on the Internet at www.ets.org. IELTS exam information may be found at www.ielts.org. iTEP exam information may be found at www.itep.org. PTE Exam information may be found on <http://pearsonpte.com/>. Duolingo exam information may be found at <https://englishtest.duolingo.com/home>. OSSLT exam information may be found at <https://www.eqao.com/the-assessments/osslt/>.

Academic Bridge Program

Freshmen and first-year transfer students who are academically admissible but who have not reached Language Proficiency may be eligible for the Academic Bridge Program. The Academic Bridge program provides a full-time, structured transition-to-university curriculum, combining content courses for degree credit with English language courses taught by ESL faculty. For more information, go to <https://www.mcphs.edu/admission-and-aid/international-applicants/bridge-program>.

Advanced Course Credit

Students may be awarded a limited amount of MCPHS course equivalency credit in transfer for Advanced Placement (AP) courses, International Baccalaureate (IB) courses, CLEP exams, and/or college coursework taken during high school. Specific policies that govern MCPHS transfer credit equivalency are explained in detail in the Freshman and Transfer Admission sections of this catalog.

International Student Visa Information

Most non-U.S. citizens require a Form I-20 and visa to study in the United States. Canadian citizens do not need to undergo a visa interview prior to traveling to the United States,

Tuition, Room and Board, Fees

2021-2022 Academic Program Tuition

Tuition charges for each academic term will be determined using the following criteria:

- Boston undergraduate students enrolled in 12 to 18 credits for fall and spring semesters will be charged the flat rate for qualifying programs. Graduate students are charged at the rate of \$1,275 per credit other than the Master of Physician Assistant Studies program which is charged at the flat rate for 12-18 credits (during didactic years). Boston undergraduate students and Master of Physician Assistant Studies students enrolled in fewer than 12 credits for fall and spring semesters will be charged at the rate of \$1,275 per credit.
- Boston undergraduate students and Master of Physician Assistant Studies students in more than 18 credits for fall or spring semester will be charged \$1,275 per credit in addition to the flat tuition charge.
- Students whose registrations are in excess of the cumulative 69-credit threshold in the Boston PharmD program will be charged at the professional rate.
- Boston students enrolled in summer sessions will be charged at the per-credit rate except for majors in the School of Medical Imaging and Therapeutics, Dental Hygiene BS, and Nursing, which have a flat summer tuition rate for 9 to 18 credits. Students in these programs enrolled in more than 18 credits for the summer semester will be charged \$1,275 per credit in addition to the flat tuition charge.
- Worcester and Manchester students enrolled in 9 or more credits per semester will be charged the flat tuition rate except for postbaccalaureate/undergraduate students. Worcester/Manchester postbaccalaureate/undergraduate students enrolled in 12 to 18 credits will be charged the flat tuition rate for fall and spring semesters. For the summer semester, the flat tuition rate for postbaccalaureate/undergraduate programs is for 9 or more credits.
- Students enrolled in all Online graduate degree and graduate certificate programs during the 2021-2022 academic year will pay \$1,020 per credit hour. Rates per credit hour for online undergraduate and professional programs are noted below.

Online Programs

Graduate Programs (\$1,020/credit)

Doctor of Healthcare Administration (DHA)

Doctor of Health Sciences (DHS)

Doctor of Science in Physician Assistant Studies (DScPAS)

Master of Science in Clinical Research (MSCR)

Master of Business Administration in Healthcare Management (MBA)

Master of Science in Clinical Management

Master of Science in Clinical Research

Master of Health Sciences (MHS)

Master of Public Health (MPH)

Master of Science in Dental Hygiene (MSDH)

Master of Science in Nursing (MSN) (Family Nurse Practitioner)

Master of Science in Nursing (MSN) (Psychiatric Mental Health Nurse Practitioner)

Master of Science in Regulatory Affairs and Health Policy (MS)

Graduate Certificate in Clinical Management

Graduate Certificate in Clinical Research

Certificate in Healthcare Management

Graduate Certificate in Health Policy

Graduate Certificate in Principles of Healthcare Business

Graduate Certificate in Public Health

Graduate Certificate in Regulatory Affairs

Certificate of Advanced Graduate Studies in Nursing (Family Nurse Practitioner Track)

Certificate of Advanced Graduate Studies in Nursing (Psychiatric/Mental Health Nurse Practitioner Track)

School of Professional Studies

Self-Paced Online Prerequisite Courses for Non-Matriculated Students (\$460/credit)

On-Campus Labs (\$785)

Postbaccalaureate Programs

Postbaccalaureate Doctor of Pharmacy Pathway (\$1,020 /credit)

Bridge Programs (\$1,020 credit)

AD to Master of Science in Dental Hygiene

ADN to Master of Science in Nursing (Family Nurse Practitioner and Psychiatric/Mental Health Nurse Practitioner)

Degree Completion Programs

Bachelor of Science in Health Sciences (\$460/credit)
 Bachelor of Science in Healthcare Management (\$460/credit)
 Bachelor of Science in Dental Hygiene (\$785/credit)
 Bachelor of Science in Diagnostic Medical Sonography, Nuclear Medicine Technology, Radiography, Radiation Therapy and Magnetic Resonance Imaging (\$785/credit)
 Doctor of Acupuncture Completion (\$785/credit)

Undergraduate Certificate Programs

Advanced Certificate in Magnetic Resonance Imaging (MRI) (\$460/credit)
 Advanced Certificate in Computer Tomography (CT) Imaging (\$460/credit)
 Advanced Certificate in Nuclear Medicine Technology (NMT) (\$460/credit)
 Advanced Certificate in Mammography (\$460/credit)

Other program-specific tuition policies are noted below.

Health Insurance	
Per year	\$3,417

According to the Commonwealth of Massachusetts and MCPHS policy, all Boston, Worcester, and Manchester matriculated students (regardless of enrollment) must be covered by a health insurance program. The University makes available a general health insurance program that meets the required standards. This policy is provided by Blue Cross Blue Shield, beginning September 1 and continuing 12 months. Insurance brochures will be available online. Students will be automatically enrolled in this plan unless a waiver is completed and received by Student Financial Services prior to the following waiver deadlines: Fall starts – August 1; Spring starts – December

1, Summer starts – May 1. Students registering late must submit the waiver at that time. The waiver stipulates that personal coverage will be maintained during the enrollment period. If Student Financial Services does not receive the waiver prior to the applicable deadline, the student will be billed for the insurance premium and will remain responsible for payment of said premium. The waiver must be renewed annually.

All international students will be enrolled in the Blue Cross Blue Shield student health insurance plan automatically, with the exception of those international students whose sponsoring institutions have a signed agreement with MCPHS that complies with the University's health insurance waiver requirements, or those international students with a plan for which the health insurance company's primary home office is based in the United States *and* the policy provides coverage comparable to that of the University student health insurance plan. Travel insurance plans and short-term limited duration plans are not comparable. International students who do not fall under one of the two conditions above *must* purchase the University's student health insurance plan.

Criminal Background Information Fees

Any out-of-pocket expenses for criminal or sex offender background checks that may be required by clinical rotation sites, including, without limitation, Criminal Offender Record Information (CORI), Sex Offender Registry Information (SORI) checks, or level 1 background checks, must be paid by the student.

Credit Cards

The University accepts MasterCard, Visa, Discover, and American Express through its online payment provider. Credit and Debit card payments are subject to a service fee equal to 2.75% of the payment amount (minimum \$1.00 fee). The service fee will be charged and retained by the online payment provider. Service fee percentage is current as of June 2021 and is subject to change.

Payment Schedule

Tuition and applicable fees are due and payable on a semester basis, prior to the following deadlines:

Fall semester:	August 1
Spring semester:	December 1
Summer semester:	May 1

Students not adhering to these deadlines may be administratively withdrawn from the University.

For students with outstanding balances, the University reserves the right to refuse

- to release official transcripts,
- to release the diploma certifying graduation,
- to complete board examination certification, or
- to register the student for any additional coursework.

A late payment fee will be assessed for all outstanding balances immediately following the due date.

Late Fees

Late payment fee	\$500
Late Registration fee	\$150
Returned check fee	\$30
Account Placement Fee	\$100

If a student has more than two checks returned by the bank, he/she will be required to make all future payments by money order, certified bank check, Discover, MasterCard, Visa, or American Express. Credit and Debit card payments are subject to a service fee equal to 2.75% of the payment amount (minimum \$1.00 fee). The service fee will be charged and retained by the online payment provider. Service fee percentage is current as of June 2021 and is subject to change.

PLEASE NOTE: Students who have not paid their balance in full by the deadlines above, may also be subject to administrative withdrawal from their programs.

Other Estimated Expenses

In addition to the direct costs of tuition, fees, and room and board, students also should budget for indirect expenses, such as books and supplies, transportation expenses, and other miscellaneous expenses that will vary depending on personal spending habits and choices.

Add/Drop Period

Add/drop period deadline for all programs is specified for each academic term, usually within the first week of classes. During add/drop period, tuition is fully refundable for a course withdrawal. Student accounts are adjusted automatically,

and any additional charges must be paid at the time of the transaction. After the add/drop deadline, there will be no tuition refund for individual course withdrawal.

University Withdrawal, Leave of Absence and Refund

The following graduated scale of charges for tuition and residence hall fees is used for purposes of determining refunds for students completely withdrawing from the University during the semester, as well as students taking a Leave of Absence:

PERIOD OF ATTENDANCE	REFUND
Add/drop period	100%
First week after the add/drop period	75%
Second week after the add/drop period	50%
Third week after the add/drop period	25%
Fourth week and beyond after the add/drop period	0%

Students who withdraw from the University, please review Withdrawal and Approved Leave of Absence from the University, under the Student Financial Services section of the catalog.

Students taking a Leave of Absence from the University must contact their Academic Dean to complete the official process. Approved refunds are computed on the basis of the date appearing on the form. *Absence from class without completing the form does not constitute withdrawal or approved Leave of Absence from the University. Students should contact Student Financial Services to determine how this withdrawal affects their financial aid.*

Veterans' Affairs (VA)

Currently enrolled or accepted students with Veterans Affairs (VA) benefits must submit a copy of their VA Certificate of Eligibility (COE) to the Registrar's Office via e-mail, fax, or mail. The Registrar's Office may require additional information to properly certify enrollment. Students must complete a Veterans Affairs Request form to request that their certification of enrollment be submitted to the VA. The form must be completed each semester a student is enrolled, no later than 60 days prior to the start of the semester. The request form and additional support resources provided by the University Educations Team (UVET) are available online at <https://my.mcphs.edu/departments/registrar/veterans-affairs>. The UVET is comprised of faculty and staff members that contribute to the university's overall mission of support and advocacy for our student veterans and other military-associated students.

Prior Credit

MCPHS University maintains written records of previous education and training of the veteran or eligible person and indicates appropriate credit has been given for previous education and training.

Students Receiving Veterans Benefits under 38 U.S.C. Ch. 31 and 38 U.S.C. Ch. 33

MCPHS University will permit any covered individual to attend or participate in the course of education during the period beginning on the date on which the individual provides to the educational institution a certificate of eligibility for entitlement to educational assistance under chapter 31 or 33 (a "certificate of eligibility" can also include a "Statement of Benefits" obtained from the Department of Veterans Affairs' (VA) website – eBenefits, or a VAF 28-1905 form for chapter 31 authorization purposes) and ending on the earlier of the following dates:

- The date on which payment from VA is made to the institution.
- 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.

MCPHS University will not impose any penalty, including, the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from VA under chapter 31 or 33.

Delayed VA Payments

Under S2248 PL 115-407 Section 103, MCPHS University will not impose a late fee, denial of access to facilities, or other penalty against a veteran or eligible dependent due to a late payment of tuition and/or fees from the VA up to the certified benefits amount. Any portion of the student bill not covered by VA benefits is still expected to be settled by the due date.

Students are responsible for all charges and fees not covered by the veteran or other eligible beneficiary's VA educational benefits (for example, housing, meal plans, or beneficiary is less than 100% eligible).

but do require a Form I-20 for entry The Form I-20 is the first step in the visa process. A Form I-20 is a government document that informs the United States government that you are eligible for F-1 (Academic Student) status. It certifies that you are or expect to be a bona fide student; that you meet our admission requirements; that you will pursue a full course of study; and that you have the financial capability to study and live in the United States for the duration of your program. The Admission Office at MCPHS issues a Form I-20 to eligible new students after they have been accepted to the University, have submitted their enrollment deposit, and have correctly filled out and submitted the Form I-20 application and supporting materials (copy of valid passport, and financial documents).

Students currently studying at another U.S. institution must submit additional documents to have their SEVIS record transferred before MCPHS can issue a Form I-20. These documents include:

- Copies of all Form I-20s
- Copy of your visa
- Copies of I-94 admission record
- MCPHS Transfer of Schools Form (gives current institution authorization to transfer the student's Form I-20)

Those students who wish to bring their dependents with them during their course of study must send copies of dependent passports, and proof of funds to support each dependent (\$12,500 annually for a spouse, \$3,600 annually per child). Only a spouse or child can be considered a dependent.

A Form I-20 cannot be issued to any international student studying at MCPHS University's Online campus. Most Online campus programs are offered entirely in a virtual environment and therefore interested international candidates may complete programs (that do not require U.S. licensure or U.S. employment in the profession) from their current country of residence.

All financial documents must be in English, and less than six months old. Your financial support may come from any combination of the following sources in the United States and abroad:

- Sponsors (parent[s], relative[s], spouse, organization[s], government, etc.). Each of your sponsors is required to complete and sign an Affidavit of Support form. Sponsors also may provide you with support in the form of room and board. When you live with someone and do not have to pay for your room and food, you are considered to have free room and board; however, proof of residency is required.
- Personal funds that come from your own resources, not those of a sponsor
- Funds from MCPHS University, such as a scholarship, housing grant, assistantship, or fellowship

As a reminder, F-1 status students are not permitted to work off-campus, but may work a limited amount of hours with authorization. Questions regarding the I-20 process should be directed to the Admission Office at 617.732.2188.

Student Financial Services

Applying for Financial Aid

The Office of Student Financial Services at MCPHS is dedicated to providing comprehensive education financing counseling to students and their families. The staff is available to assist students by answering questions regarding the aid application process, their financial aid award, and their student account.

The University offers a variety of scholarships, loans, and employment opportunities to assist students in meeting the costs of education that cannot be met through the family's own resources. To apply for financial aid for the 2021–22 academic year, the current application required is the 2021-2022 Free Application for Federal Student Aid (FAFSA). The FAFSA may be completed online at www.fafsa.gov. Students who submitted a 2021-2022 FAFSA should use their FSA ID from the Department of Education to complete the online renewal application.

The Office of Student Financial Services will notify students if additional information or documentation is required to complete their financial aid applications. Students should not send additional documentation unless requested to do so by Student Financial Services.

Notification of award: Notification of award letters will be emailed to students once the financial aid file is complete. It is recommended that students complete the FAFSA as soon as they are available on October 1 of each year. The student's demonstrated need is recalculated each year, and award amounts are contingent upon the University's level of allocated funds.

Eligibility for Financial Aid

To be eligible for federal student aid, the student must be

- a citizen, permanent resident, or other eligible noncitizen of the United States;
- registered with the Selective Service System or exempt from registration;
- not in default on any federal student loan or owing a refund on any federal grant;
- not convicted of any federal or state drug offense while receiving federal student aid; and
- in good academic standing.

*For the 2021/22 award year Selective Service and Drug requirements no longer require resolution.

By completing the application instructions previously outlined, students are automatically considered for all possible funding opportunities, including those offered by the federal government, the state (if eligible), and the University. Please keep in mind that students who meet the March 15 financial aid application deadline are given priority consideration for all available funds, which are limited by allocations and budgets.

Degree Standing

A student's standing as an undergraduate or graduate student is an important factor in the financial aid application and award process. The FAFSA asks students to identify whether they are in an undergraduate or graduate/professional program. These questions should be answered based on the following criteria:

Undergraduate Students

Students in the following programs are considered undergraduate students for financial aid purposes:

- Chemistry
- Dental Hygiene
- Diagnostic Medical Sonography
- Global Healthcare Management
- Healthcare Management
- Health Psychology
- Health Sciences
- Magnetic Resonance Imaging
- Medical and Molecular Biology
- Nuclear Medicine Technology
- Nursing
- Pharmaceutical Business
- Pharmaceutical Sciences

- Pharmacology/Toxicology
- PharmD–Boston campus: Years I–IV
- Premedical Health Studies
- Public Health
- Radiation Therapy
- Radiography
- Bachelor of Pre-Dental-Dental Hygiene
- Bachelor of Science in Health Care Management
- Postbaccalaureate Bachelor of Science in Nursing
- Bachelor of Science in Health Sciences, Acupuncture Pathway

Graduate Students

Students in the following programs are considered graduate/professional students for financial aid purposes:

- Master of Health Sciences
- Master of Physician Assistant Studies (Boston and Manchester/Worcester)
- Master of Public Health
- Master of Regulatory Affairs and Health Policy
- Doctor of Acupuncture
- Doctor of Acupuncture & Integrative Health
- Doctor of Health Sciences
- Doctor of Healthcare Administration
- Doctor of Pharmacy (PharmD)–Boston campus: Years V and VI
- Doctor of Pharmacy (PharmD)–Worcester/Manchester campuses: all years (unless advised by Student Financial Services)
- Doctor of Optometry
- Doctor of Physical Therapy
- Master of Science in Dental Hygiene
- Master of Science in Nursing
- Master of Science / PhD in Medicinal Chemistry
- Master of Science / PhD in Pharmaceutical Economics and Policy
- Master of Science / PhD in Pharmaceutics
- Master of Science / PhD in Pharmacology
- Master of Science in Clinical Research
- Master of Science in Occupational Therapy
- Master of Acupuncture
- Master of Acupuncture with a Chinese Herbal Specialization
- Master of Business Administration in Healthcare Management
- Master of Science in Clinical Management
- Master of Science in Personalized Medicine
- Doctor of Science in Personalized Medicine
- Doctor of Science in Physician Assistant Studies

Students whose program is not listed here should contact the Office of the Registrar for assistance in identifying their degree standing.

Student Status

Doctor of Pharmacy (PharmD)–Boston: Years I through IV are classified undergraduate, and full-time status is a minimum of 12 semester hours; at the point a PharmD student attains fifth-year status, full-time status is a minimum of 9 semester hours and are classified as graduate students. Full time status for rotations in Year 6 is a minimum of 6 semester hours.

Doctor of Pharmacy (PharmD)–Worcester/Manchester: Year I is classified undergraduate for students entering the program with a minimum of 72 credits, and full-time status is a minimum of 9 semester hours. Year 1 is classified as undergraduate for students entering the program with less than 72 credits, and full-time status is a minimum of 12 semester hours; for Years II and III, full-time status is 9 semester hours.

AS to Master of Science in Dental Hygiene Bridge Program Online: Year 1 is classified as undergraduate, and full time status is a minimum of 12 semester hours; subsequent years are classified as graduate and full status is a minimum of 9 semester hours.

For all baccalaureate degree programs, students are classified as undergraduates, and full-time status is a minimum of 12 semester hours.

For all masters, MS, other doctoral, and PhD programs, full-time status is a minimum of 9 semester hours.

Dependency Status

For the 2021-2022 school year (July 1, 2021 through June 30, 2022), the U.S. Department of Education considers the following students to be independent of their parent(s) for purposes of awarding federal financial aid:

- Students who were born before January 1, 1998
- Students who are orphans or wards of the court, or were wards of the court at any point during or after age 13
- Students who are veterans of the U.S. Armed Forces
- Students who have children, if they provide more than half of the support for the child
- Students who have dependents (other than a child or spouse) living with them, if they provide more than half of the support for the dependent
- Students who are married
- Students who will be graduate/professional students in 2021-2022 (see Degree Standing to determine who is considered a graduate/professional student for financial aid purposes)
- Students who are serving in the U.S. Armed Forces or are National Guard or Reserves enlistees for purposes other than state or training
- Students who are or were emancipated minors as determined by a court
- Students who are or were in a legal guardianship on the date the student became an adult, as determined by a court
- Students who are or were considered an unaccompanied youth who was homeless on or after July 1, 2020

As the criteria above indicate, financial independence is not one of the criteria used in determining whether a student is considered dependent or independent. Parental data must be provided on the FAFSA for students who are unable to answer “yes” to any of the listed criteria. The University uses the U.S. Department of Education definition of dependency status for all federal, state, institutional, and private financial aid programs. Students should refer to the FAFSA for specific details on each of the above criteria or contact the Office of Student Financial Services for assistance in determining status.

Prior Bachelor’s Degree

Students who are in possession of a baccalaureate degree prior to their enrollment at the University are not eligible for certain grant programs, including the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, and state scholarship/grant programs.

Massachusetts Residency

Massachusetts residency is defined as having resided in Massachusetts for purposes other than attending college for at least one year prior to the beginning of the academic year. (The beginning of the academic year is defined as July 1 by the Commonwealth.) Parents of dependent students also must have resided in Massachusetts for at least one year prior to the beginning of the academic year. Programs funded by the Commonwealth are limited to undergraduate students without a prior bachelor’s degree.

Yellow Ribbon Program for Veterans

MCPHS University participates in the Yellow Ribbon Program. Only Veterans entitled to the maximum benefit rate, as determined by service requirements, or their designated transferees may receive this funding. Details on eligibility can be found, here: https://www.benefits.va.gov/gibill/yellow_ribbon.asp. In order to receive a full acceptance of a Yellow Ribbon Scholarship, students must submit their Certificate of Eligibility for Post-9/11 GI Bill®* from the VA to the University. For additional details or questions regarding eligibility, please email: sfs@mcphs.edu.

*GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at <https://www.benefits.va.gov/gibill>.

Enrollment Status

Financial aid awards are based on full-time attendance at the University. Full-time attendance, during the fall semester and the spring semester, is defined as a minimum of 12 credits for undergraduate students and 9 credits for graduate students (see Degree Standing to determine graduate/professional student status for financial aid purposes). Enrollment is reviewed for all students receiving financial aid at the end of the official add/drop period each semester, at which time adjustments to financial aid awards are made.

The following aid programs require full-time enrollment. Less than full-time enrollment will result in complete loss of the award:

- Massachusetts State Funds
- Health Professions Loan
- Nursing Student Loan
- Most other state grants

The following programs are prorated based on enrollment status. For these programs, undergraduate students will receive a portion of the awarded amount if the student enrolls less than full-time for a given semester:

- Federal Pell Grant
- MCPHS Need-Based Awards
- MCPHS Merit-Based Awards

The following programs require at least half-time enrollment. Less than half-time enrollment will result in complete loss of the award. Half-time enrollment is defined as 6 credits for undergraduate students and 4.5 credits for graduate students:

- Federal PLUS loan
- Federal Stafford Loans (Subsidized and Unsubsidized)
- Many alternative/private loans

Graduate Students

Graduate students who want to apply for assistantships, scholarships, and fellowships should contact the Associate Dean for Graduate Studies.

International Applicants

Financial aid in the form of grants and loans are generally not available to international students. Students may qualify for a Private Educational Loan with a credit worthy U.S. Citizen Co-signer.

Satisfactory Academic Progress

The University is required to establish minimum standards of satisfactory academic progress (SAP) for students receiving financial aid. The University applies these standards to all federal, state, and institutional funds.

The Office of Student Financial Services will disburse financial aid only to those students who are in good academic standing and are making satisfactory progress toward completion of their degree.

Requirements

A student is not making satisfactory academic progress if any of the following conditions exist:

- The student's cumulative grade point average (GPA) is below 2.0 at the end of the second year of their academic program. Grade point averages are reviewed by the Academic Standing Committee at the end of each semester.
- The student's earned credits (completed with a passing grade) are less than 67% of all attempted credits (coursework), as calculated at the end of each semester.
- The student has exceeded the maximum time frame of attempted credits (150%) of the published length of their degree program.

Satisfactory academic progress is reviewed at the end of each semester (payment period).

The following describes how types of coursework are used in the SAP calculation:

- Dropped coursework is not included.
- Failing grades (F) are included in the GPA and in earned and attempted credits.
- Withdrawals are included in earned and attempted credits.
- Repeated coursework is included in the GPA and in earned and attempted credits.
- Pass/fail coursework is included in earned and attempted credits.
- Audit coursework is not included.

- Colleges of the Fenway (COF) coursework is included in the GPA and in earned and attempted credits.
- Transfer coursework (applicable to current program) is included in earned and attempted credits.
- Satisfactory/unsatisfactory coursework (graduate programs only) is included in earned and attempted credits.
- Remedial coursework is not included.

If a student is not making satisfactory academic progress, they will be placed on financial aid warning. A student then has one semester to make satisfactory progress. If, after one semester on financial aid warning, a student is not making satisfactory academic progress, the student becomes ineligible for aid and will be notified by email.

Students who are ineligible for financial aid because they are not making satisfactory academic progress may appeal to regain eligibility for the subsequent semester to achieve the SAP standards. Students may also continue to take coursework without the use of financial assistance until eligibility is reinstated by achieving the required SAP standards, subject to the approval of the university and the student's academic department.

Appeals are considered when a student can demonstrate that an extraordinary circumstance existed (for example, student illness, the illness or death of a family member) that prevented the student from achieving satisfactory academic progress. Students considering an SAP appeal should contact the Office of Student Financial Services to make an appointment to discuss the situation. Appeals are due by the posted deadline in the email notification of academic status and loss of aid eligibility; however, an appeal does not exclude the student's payment responsibility associated with the semester's bill due date. Incomplete appeals will not be reviewed. Students with an approved appeal will be placed on financial aid probation and have one semester to achieve satisfactory academic progress. If the student fails to achieve the SAP standards after probation, then they will not be eligible for aid until the standards are achieved. If MCPHS determines, based on the appeal, the student will require more than one academic semester to meet progress standards, the University may grant a subsequent appeal; if an academic plan is developed for the student, the student must successfully complete the program in the specified time. Students will be reviewed at the end of one academic semester to determine if they are meeting the requirements of the plan. If the student is meeting the requirement of the academic plan, the student is eligible to receive Title IV funds as long as the student continues to meet those requirements, and is reviewed according to the requirements detailed in the plan. Non-matriculating students are not eligible for financial aid.

Process for Awarding Financial Aid

In selecting financial aid recipients, primary emphasis is placed upon financial need, availability of funds, the student's academic achievement, and/or satisfactory academic progress.

Determining Need

To determine a student's need, the University uses the Free Application for Federal Student Aid (FAFSA). The information provided on the FAFSA is used to determine what amount a family can be expected to contribute toward the cost of attending the University (the expected family contribution, or EFC).

The University uses the standard federal formula (known as the federal methodology, or FM) in computing the expected parental and student contributions. Some of the factors used in the analysis include income, assets, family size, and number of family members in college. The student's expected contribution is added to the parental expected contribution to produce the total expected family contribution. The student's financial need is determined by subtracting the expected family contribution from the total cost of attending the University. The cost of attendance includes tuition and fees as well as an allowance for room and board, books and supplies, travel, federal loan fees, and other education-related expenses.

The Financial Aid Package

After the student's financial need is determined, Student Financial Services will develop a financial aid package for the student. MCPHS utilizes scholarships, loans, and employment opportunities to assist students in meeting as much of their demonstrated financial need as possible. The University makes every effort to distribute the available funds in an equitable fashion in order to assist the greatest number of eligible students. The total amount of aid a student receives may not exceed his or her total cost of attendance.

The University offers a variety of scholarships, which are funded through endowments, gifts, and other monies raised by the University. Scholarships are awarded primarily based on financial need and academic achievement. Students applying for financial aid are automatically considered for each scholarship for which they may qualify. Major programs providing financial aid to students are described in the 2021-2022 MCPHS Student Financial Services handbook.

Merit Aid

University Merit Aid is determined at the time of admission. Students are required to maintain a 2.5 cumulative GPA in order to continue receiving their merit award. Students who fail to meet the 2.5 GPA requirements will have one semester to improve their GPA to a 2.5 cumulative or the merit award will be cancelled and cannot be reinstated.

Private Funding Sources

In addition to the federal, state, and University programs offered through the University's financial aid application process, students also are encouraged to apply for outside aid to help meet the costs of education. Several free scholarship search services are available through the Internet (please visit the University's website at www.mcphs.edu for further information). In addition, most high school and public libraries have resources detailing private scholarship opportunities.

Verification Process

Each year the federal government and/or MCPHS selects students who have completed the FAFSA for verification. The verification process simply requires the University to review supporting documents to verify the information reported on the FAFSA for the parent(s), student, and spouse.

Information that may be verified includes adjusted gross income, federal taxes paid, education credits, the number of individuals in the household, the number of individuals in the household who are enrolled at least half time in college, high school completion status, identity / statement of educational purpose, and other information deemed necessary for review.

If you are selected for verification, you will be notified via email of additional documents that you must submit to complete your financial aid file.

The IRS Data Retrieval Tool allows students and parents to access the IRS tax return information needed to complete the FAFSA. Students and parents may transfer the data directly into their FAFSA if certain criteria are met. MCPHS encourages all students and families to utilize the IRS data retrieval process, which is the preferred method for FAFSA filers to report federal tax information. If the IRS data retrieval process is not used on a FAFSA transaction, then the student and/or parent may need to obtain federal tax return transcripts from the IRS. Students and/or parents may complete online requests for a federal tax return transcript at www.irs.gov. Online requests are considered the quickest approach to obtain a federal tax return transcript. The request may take up to 10 days to fulfill.

MCPHS will not disburse federal, state, and institutional financial aid to a student's account until the student completes the verification process. Failure to complete the verification process will result in cancellation of federal financial aid. The University reserves the right to verify any file that appears to contain discrepant information. In addition to verifying a student's application data, MCPHS is required by federal law to resolve any conflicts of information that become evident as part of the application review process. All discrepancies must be resolved prior to disbursement of Title IV aid to a student's account.

Additional Student Financial Services

Appeal Process

Students and parents may appeal their financial aid award if there is a significant and unforeseen change in circumstances or if there is information that was not provided on the original application materials. For additional details regarding the financial aid appeal process, refer to the 2021-2022 MCPHS Student Financial Services handbook. All appeals must be in writing and must include documentation of the reasons for requesting the reevaluation of the financial aid package as well as complete tax transcripts and W-2s (if necessary) for the student and parent (if the student is a dependent).

Applying Financial Aid to Your Student Account

If all necessary paperwork has been submitted by the student, financial aid will be applied to a student's account after add/drop and after attendance has been verified by the Registrar's office each semester. Failure to submit the necessary paperwork will result in the delay and possible cancellation of the student's financial aid.

Refunds

Students will automatically receive a refund for any excess funds (credit balance) on their student account each semester. Refunds are available as soon as administratively possible following verification of student enrollment and disbursement of financial aid funds. Students should be sure to make arrangements each semester for the purchase of books and payment of rent (if housed off campus), since refunds are not available during the first few weeks of each academic term. It is highly recommended for ease in refund processing that students sign up for direct deposit through *WebAdvisor*.

Late Payment Fees

Students with outstanding student account balances will be charged a late payment fee. To avoid late payment fees, students must ensure that all financial obligations (including tuition, fees, health insurance fees, and housing charges) will be met by the dates specified in the Tuition section of this catalog.

Account Placement Fee

An Account Placement Fee will be applied to any student's account not paid by the scheduled due date and placed with Heartland/ECSI for assistance with the collection efforts on the outstanding balance. This fee is in addition to the Late Payment Fee and cannot be waived.

Students receiving financial aid and/or private alternative loans must ensure that proper documentation is completed and aid and/or loan funds are received by the University on or before the payment due date in order to avoid a late fee.

Students participating in a payment plan must ensure that the payment plan budget for each term will cover all outstanding charges. Payment plan budgets that will not result in a paid-in-full status by the end of the payment term will be assessed a late payment fee.

For students with outstanding balances, the University reserves the right to refuse

- to release official transcripts,
- to release the diploma certifying graduation,
- to complete board examination certification, or
- to register the student for any other coursework
- to access campus wide systems such as Blackboard, WebAdvisor and University E-mail
- to view final grades

Students wishing to appeal late payment fees are required to do the following:

- Pay the student account balance due in full (less the late payment fee).
- Submit the following in writing to the Office of Student Financial Services:
 - Student name
 - Student ID number
 - The reason(s) or documentation that contributed to the circumstances of the late payment fee

The student will be notified of the decision concerning the appeal of a late payment fee.

Student Account Statements

Student account statements are sent electronically on a monthly basis to students with a balance due. Statements include all recent account activity, including charges, payments, disbursements of financial aid and loan funds, and account adjustments. Balances due must be paid by the payment due date to avoid late payment fees. Students have the ability to view real-time charges and updates through the Student Account Center as well as grant shared access to their account.

The University accepts electronic funds transfer, MasterCard, Discover, Visa, and American Express payments via the Student Account Center. Credit and Debit card payments are subject to a service fee equal to 2.75% of the payment amount (minimum \$1.00 fee). The service fee will be charged and retained by the online payment provider. Service fee percentage is current as of June 2021 and is subject to change. Alternative methods of payment include wire transfers and check payments.

Work-Study

Students working in a Federal Work-Study Program position are paid through a weekly paycheck based on hours actually worked. These funds are not credited to the student's account.

Withdrawal and Approved Leave of Absence from the University

Students withdrawing or taking a leave of absence from the University who have been determined to be eligible for federal financial aid are subject to certain provisions surrounding the calculation of their federal aid eligibility. A federally determined formula is used to calculate the amount of federal aid a student is eligible to receive based on the portion of the semester completed before the withdrawal. If a student received more assistance than was earned, the unearned funds must be returned to the Department of Education.

The amount of aid a student is eligible to receive is based on the percentage of the semester that was completed prior to the initiation of the withdrawal process. For example, if 40% of the semester has passed when the withdrawal process

is initiated, then 40% of the federal aid originally scheduled for disbursement has been earned. Once more than 60% of the semester has been completed, a student is considered to have earned 100% of the federal aid they were eligible to receive.

If it is determined that a student received more federal aid than was earned, MCPHS will return the unearned funds based on a formula comparing institutional charges with the unearned percentage of funds. If MCPHS must return a portion of the funds, the removal of those funds from the student's account will create a balance due, which the student will be required to pay.

To find out how a withdrawal during the first 60% of the semester may affect a financial aid award, students should make an appointment to discuss the situation with their Student Financial Services representative.

For additional information, please review the University Withdrawal, Leave of Absence and Refund under the Tuition, Room and Board, Fees section of the catalog.

Academic Policies and Procedures

General University policies and procedures are stated below. Students should note that within individual programs and schools there might be additional requirements or variations of these policies. The ultimate responsibility for complying with academic policies and fulfilling graduation requirements rests with the individual student.

Academic Calendar

The academic calendar is a live document available at <https://www.mcphs.edu/academics/academic-support-and-resources/registrar>. Students are required to review details of the calendar during the web check-in process at the start of each semester. Changes to the published academic calendar are communicated to students via an email sent from the Registrar.

Student Code of Conduct and Community Standards System

MCPHS University expects its students to act in a mature and responsible manner. The goal of the Community Standards System is to support the educational mission of the University by ensuring an orderly University environment conducive to learning and teaching. The Community Standards System prioritizes acceptance, integrity, equity and scholarly work. The Community Standards System is an educational tool with the purposes of holding students accountable for Code of Conduct violations, educating students regarding their behaviors in the MCPHS University community and guiding students towards a greater sense of personal responsibility.

- MCPHS University recognizes that students are entitled to respect, consideration and MCPHS University further recognizes students' rights within the institution to freedom of inquiry and the responsible use of University services and facilities.
- Students at MCPHS University have a responsibility to act in a manner that promotes the wellbeing, respect, safety and security of all members of the University community.
- It is the responsibility of students to know and understand individual department policies as well as University policies published in the Student Handbook.
- The Student Code of Conduct is applicable to any student enrolled in or accepted for an academic program, regardless of the number of credits carried and also applies to any recognized student organization.
- The Student Code of Conduct applies to student conduct that occurs on the MCPHS University campus, in any MCPHS University leased spaces, or at any University sponsored event regardless of location. The Student Code of Conduct applies to student conduct at off-campus locations when the security, integrity or reputation of the University are related to the student's behavior. The Dean of Students or designee will determine on a case-by-case basis when the Student Code of Conduct is applied to off-campus student behavior. Students are expected to comply with the Student Code of Conduct from the time of admission through graduation.
- Students who allegedly violate the Student Code of Conduct or other University regulations become subject to disciplinary review and action through the Community Standards System.
- Conduct that constitutes a violation of the Student Code of Conduct or other University policies may also constitute a violation of federal, state or local law. University disciplinary procedures may be carried out prior to, simultaneously with or following civil or criminal proceedings off-campus at the discretion of the Dean of Students, or designee. University disciplinary proceedings will not be subject to challenge on the ground that civil or criminal charges involving the same incident have been dismissed, reduced or are pending. When a student has been charged with a civil or criminal violation(s) of law, MCPHS University will neither request nor agree to special consideration for the student solely because of their status as a student.
- The Student Code of Conduct and Community Standards System are published in the Student Handbook in order to give students general notice of prohibited conduct. The Student Code of Conduct should be read broadly and is not designed to define misconduct in exhaustive terms.
- The Student Code of Conduct and Community Standards System are not to be regarded as contracts between students and MCPHS University. MCPHS University reserves the right to amend any provision of the Student Code of Conduct and Community Standards System at any time. MCPHS University will publish amendments in relevant campus publications.
- Any conduct which may have been influenced by a student's mental state or the use of alcohol or other drugs shall not in any way limit the responsibility of the student for their actions.
- A "disciplinary hold" may be placed on a student's academic record at the University prior to a disciplinary hearing. Students with a disciplinary hold may not be permitted to register, request transcripts, receive a diploma, add or drop courses, or participate in other University activities without permission from the Dean of Students or designee. A charged student may not take a leave of absence or withdraw from the University before the resolution of the charge(s), unless they have been granted permission by the Dean of Students or designee. In such circumstances,

the student's readmission will be contingent upon the resolution of the charge through the Community Standards system.

- A business day is defined as a day when MCPHS University administrative offices are open.
- The term "complainant" means any person who submits a complaint alleging that a student violated this Code of Conduct.
- The term "respondent" means the accused student.

Academic Honesty

The University presumes that students will assume personal responsibility and maintain personal integrity in all aspects of their education. Responsibility for academic integrity is expected of all students whether in-person and/or through a remote learning environment. Dishonest actions in the execution of an examination, report, academic assignment, and/or academic coursework requirement, including clinical rotations, constitute violations of the MCPHS Academic Honesty Policy. Such violations are subject to specific academic sanctions, as well as to disciplinary sanctions (i.e., disciplinary warning, probation, deferred suspension, suspension, and/or expulsion).

Academic Honesty and Student Discipline Procedures

Academic violations or offenses include the following:

- 1.01 Receiving assistance, or attempting to receive assistance, not authorized by an instructor in the preparation of any assignment, laboratory exercise, report, or examination submitted as a requirement for an academic course or rotation.
- 1.02 Knowingly giving unauthorized assistance, or attempting to give unauthorized assistance, to another student in the preparation of any assignment, laboratory exercise, report, or examination submitted as a requirement for an academic course or rotation.
- 1.03 Plagiarism: Submitting another person's work (including words, images, and ideas) as one's own without the proper acknowledgment of source, or use of the words or ideas of another without crediting the source of those words or ideas.
Also, submitting the same work for assignments in more than one class (copying from oneself) without permission from the instructor and/or appropriate citation, in the same semester or subsequent semesters.
- 1.04 Engaging or attempting to engage another person (student or non-student) to take one's own examination or taking or offering to take another students' exam.
- 1.05 Selling, giving, lending, or otherwise furnishing any material that can be shown to contain the questions or answers to any examination scheduled to be given at any subsequent date in any course of study offered by the University.
- 1.06 Taking, or attempting to take, steal, or otherwise procure in any unauthorized manner any material pertaining to the conduct of a class, including examinations.
- 1.07 Falsifying or presenting fictional patient information as real to fulfill requirements for work assigned by individual faculty members or clinical preceptors.
- 1.08 Signing in another student or requesting to be signed in by another student on a course attendance sheet; or falsely recording another student's attendance (as with the use of "clicker"). Signing in to an assessment for another student or providing your username and password to another individual is also prohibited.
- 1.09 Altering, or attempting to alter, grades or information on any assignment, laboratory exercise, report, exam, or previously completed examination as a requirement for an academic course or rotation.

Implementation of the Academic Honesty Policy

1. The Dean of Students or designee will review the Academic Honesty Policy, issues of dishonesty, and consequences of violating the Academic Honesty Policy during new student orientation.
2. The Academic Honesty Policy will be provided by the Office of Student Affairs to all members of the MCPHS community online through the MCPHS Student Handbook. All entering MCPHS students are expected to acknowledge they have read the Academic Honesty Policy via an online process coordinated by the Office of Student Affairs. Refusal to do so may result in more severe sanctions should a student be found responsible for an academic honesty violation.
3. In specific testing and/or evaluation situations, students may be required to present their MCPHS ID cards to verify identity, including in situations where remote proctoring tools are used.
4. Each instructor is responsible for informing students of the standards of behavior expected of students in the classroom, laboratory, and clinical site and for consistently enforcing such standards.
5. Faculty may require that students sign an academic honesty statement for exam and written graded assignments. This statement may be defined by each School or Program for specific requirements for in-person or remote assessment methods. The statement will read as follows:

Academic Honesty Statement

I pledge that I have neither given nor received unauthorized aid, and will not give or receive unauthorized aid on any examination, paper and/or assignment.

Student Name (printed) _____

Student Signature: _____ ID Number: _____

Plagiarism Prevention Service

Students are expected to abide by the University's Academic Honesty Policy. Plagiarism (see Offense 1.03 above) is considered a violation of this policy. In order to deter plagiarism and ensure appropriate use of resources in student research and learning, the University subscribes to a plagiarism prevention service. Faculty may require students to submit their written work electronically through this plagiarism prevention service in order to verify that when ideas of others are used they are cited appropriately. The course syllabus identifies student work that must be submitted electronically for such review.

Academic Honesty and Exams

The Academic Deans/Program Directors are responsible for the proper conduct of examinations in their schools/programs and will assign faculty and graduate assistants to serve as proctors for examinations. Support staff, under the supervision of the Academic Deans/Program Directors, are responsible for maintaining confidentiality in the production and reproduction of examinations.

Instructors are expected to assist in the promotion of academic honesty through the following practices:

- Access to and use of "recycled" exams should be limited.
- Students will be required to leave all unnecessary materials (e.g., backpacks, notebooks, textbooks, calculators, PDAs, cell phones, etc.) away from their seat assignment. Only required or approved materials will be allowed at the seat assignment. This requirement also applies to remote exams as implemented by the respective School or Program.
- All exams are to be proctored whether in person or virtually by remote proctoring services, unless otherwise specified.
- In specific evaluation situations, students may be asked to show instructors/proctors materials being used during the exam (PDAs, cell phones, etc.) to ensure proper use of the allowed material and adherence to the honesty policy.

Instructors are encouraged to utilize the following exam seating practices whenever possible:

- Students entering an exam room will be randomly seated.
- Seating assignments will be spaced throughout the exam room, allowing for adequate spaces between students.
- Additional requirements for integrity during remote exams will be specified by remote proctoring software and/or by School/ Program and course instructor.

The instructor should follow the University Policy on Academic Honesty when giving examinations and ensure that proctors are present at all examinations in compliance with this policy. At least one (1) course coordinator for each course should be present during an examination to answer questions or to clarify issues that may arise. Exceptions to this rule must be approved by the Academic Dean/Program Director.

Students are expected to report violations of the Academic Honesty Policy to the instructor and/or the department/division chair or program director of the academic department for further investigation.

Additional policies for Academic Honesty and Integrity in a remote learning environment may be further defined by each School or Program.

Student Discipline Procedures for Academic Honesty Policy Violations

Preliminary procedure: The University maintains a policy of open communication among all members of the University community so that any misunderstanding can be minimized and any conflicts can be expeditiously resolved between the parties involved. Hence, the first step in attempting to resolve an alleged student violation shall ordinarily be a meeting between the faculty member and the student.

The faculty member will schedule a meeting with the student to attempt to come to a resolution. The meeting should be scheduled within seven (7) business days of the faculty member's knowledge of the alleged academic dishonesty incident.

The faculty member will give the student a copy of the MCPHS Academic Honesty Policy and Student Discipline Procedures and offer the Office of Student Affairs as a resource to discuss student rights and responsibilities.

The faculty member will provide the student with the information the faculty member has regarding the alleged incident and will provide the accused student the opportunity to respond to the presented information.

After listening to the student's response, the faculty member may do one of the following:

Determine academic dishonesty did not occur and not pursue the incident further.

OR

Determine academic dishonesty did occur and discuss the academic sanction the faculty member will assign (e.g., repeat of the assignment, grade reduction, failure for the assignment or exam, failure for the course). If consequences regarding academic dishonesty are listed in the course syllabus, faculty sanctions must follow information as indicated in the syllabus.

The faculty member will provide the student with the option to meet with a staff member in the Office of Student Affairs to review the student's rights and responsibilities prior to the faculty member's finalizing their decision.

If the student accepts the faculty-assigned consequence, the case is closed provided the student has no prior offenses of the academic honesty policy or the violation is so severe that a hearing is deemed necessary by the Office of Student Affairs. *NOTE: There is no option for appeal in a closed case.*

Parties (faculty and student) unable to agree shall appeal the case to the academic school dean/program director (or designee). The academic dean/program director (or designee) can decide to meet individually with the student and faculty member or to conduct a team meeting with the student and faculty member, to be scheduled within seven business days of the initial faculty/student meeting. The academic dean (or designee) will meet with the involved parties and review the case. Subsequent to case review, the academic dean/program director (or designee) may do one of the following:

Determine academic dishonesty did not occur and not pursue the incident further.

OR

Determine academic dishonesty did occur and discuss the academic sanction they will assign (i.e., repeat of the assignment, grade reduction, failure for the assignment or exam, failure for the course). If consequences regarding academic dishonesty are listed in the course syllabus, academic sanctions must follow information as indicated in the syllabus.

Appellate decisions should be provided to the student within five (5) business days following the final meeting. Appellate decisions are final.

Students should be advised that, regardless of the academic resolution, all academic dishonesty violations will be reported to and recorded with the Office of Student Affairs. When reporting an incident to the Office of Student Affairs, subsequent to a student's accepting responsibility in discussion with the course faculty member or academic dean/program director (or designee), the Dean of Students (or designee) will send a letter to the student, faculty member, and academic dean/program director outlining the decisions reached among the involved parties (e.g., loss of points, change of grade, failure of exam, etc.), along with notification of a student conduct sanction, the minimum being disciplinary warning. Should the Dean of Students (or designee), determine that further action is required, based upon the disciplinary history of the student or severity of the violation, then the matter will be processed as outlined in the student discipline system in a hearing, as appropriate.

All cases involving academic dishonesty will be recorded with the Office of Student Affairs, regardless of the resolution process utilized. Faculty and academic deans/program directors (or designee) report, consult, and work collaboratively with the Office of Student Affairs regarding each alleged academic dishonesty incident. Complex alleged academic dishonesty incidents that require extensive fact finding or involve a conflict of interest (i.e., the academic dean is the instructor for the course in which academic dishonesty is alleged) may be referred by the faculty member or academic dean/program director (or designee) immediately to the Office of Student Affairs for review and disciplinary procedures as provided in the Community Standards system.

NOTE: A student may continue attending class during the resolution process for an academic dishonesty incident. When a final decision is made that a student has failed a course due to academic dishonesty and no appeal

option exists, the student must discontinue attending the class in which the academic dishonesty incident occurred.

Sanctions for Academic Dishonesty

In determining a sanction, the responsible student's present demeanor and past disciplinary history, the nature of the offense, the severity of any resulting damage, injury or harm, and other factors may be considered. Students whose behavior is contrary to the Code of Conduct are subject to the maximum sanction of dismissal from the University or any lesser sanction for any act of misconduct. Academic dishonesty sanctions include, but are not limited to the following:

- Faculty and the academic dean/program director (or designee) may assign the sanction of repeating an assignment, receiving a score of zero on an exam/assignment, receiving a lowered assignment/exam/course grade, or failing the course.
- The Dean of Students (or designee) may assign the sanction of warning, disciplinary probation, deferred suspension, suspension, or expulsion in accordance with the University Academic Honesty Policy and the University Community Standards System.
- The Dean of Students (or designee) may also assign educational sanction(s) related to academic honesty. The Dean of Students (or designee) communicates academic honesty offenses, academic sanctions, and disciplinary sanctions to the student in writing subsequent to a case's being closed.

Students are subject to academic sanctions from College of the Fenway faculty should they commit academic violations while taking a COF course, and such cases are referred to the Office of Student Affairs. Such offenses are addressed under the MCPHS University Academic Honesty Policy and Community Standards System.

Student Code of Conduct Violations

The following conduct shall constitute violations of the Student Code of Conduct:

2.0 Personal Conduct

- 2.01 Obstruction or disruption of teaching, administration, disciplinary system or other University activities or unauthorized activities.
- 2.02 Conduct, regardless of where it occurs, that is in violation of federal, state and/or local law or University policies that brings into question ones' suitability as a member of the University community.
- 2.03 Theft, attempted theft, wrongful utilization of goods or services, possession of stolen property or University property or property of any member of the University community or outside individual/agency.
- 2.04 Damaging, destroying or defacing, or attempting to damage, destroy, or deface University property, property related to activities of the University, property of any member of the University community, property of outside individual/agency, to include affiliated clinical training sites.
- 2.05 Acting in violation of the Protection from Discrimination and Harassment Policy
- 2.06 Acting in violation of the Protection from Sexual Harassment (Title IX) Policy
- 2.07 Exhibiting conduct which is lewd, indecent, or obscene, or which is patently offensive to an individual, academic community or clinical practice setting.
- 2.08 Disrupting the academic and/or clinical pursuits of fellow students, faculty, proctors, or clinical preceptors, or infringing upon the privacy, rights, or privileges of other persons.
- 2.09 Conveying confidential patient information outside the confidential space of the preceptor's practice setting without authorization by an individual faculty member or clinical preceptor.
- 2.10 Failure to abide by the Solicitation Policy.
- 2.11 Failure to abide by the Posting policy; including unauthorized posting and/or distribution of flyers, bulletins or posters (improperly posted and/or posted without approval).
- 2.12 Failure to abide by the Gambling Policy.
- 2.13 Failure to abide by the Good Neighbor Policy.
- 2.14 Failure to abide by the Electronic Communications Policy and/or the MCPHS Email Policy.
- 2.15 Failure to adhere to University Guest policies.
- 2.16 Failure to register an event or to abide by an event plan as documented in an Event Registration Form.
- 2.17 Failure to abide by the End of the Semester Event policy.
- 2.18 Failure to abide by the Parking Policy.
- 2.19 Failure to follow University policies and/or guidelines with respect to health and safety.

3.0 Physical Safety and Environmental Health

- 3.01 Physical assault or abuse of another person
- 3.02 Verbal abuse, threats, intimidation, harassment, or coercion, including, but not limited to, any conduct that threatens or endangers the emotional or physical health or safety of another person.

- 3.03 Possession, storage, or discharging firearms, including explosives, fireworks, knives, or other weapons of any nature or description as outlined in the Massachusetts Criminal Law, Section 269, paragraph 10 (i.e., bows, arrows, slingshots, airguns, martial arts devices, etc.), or other dangerous items or substances.
- 3.04 Creating a fire hazard, bomb or a dangerous situation which endangers others including false reports of fire or bombs, failing to evacuate, as well as tampering with, damaging or removing fire safety equipment.
- 3.05 Failure to abide by the Hazing Policy.
- 3.06 Trespassing, unauthorized entry into any University building, structure, or facility related to University activities, or attempt to do the same.
- 3.07 Using, making or causing to be made any key or keys for any building, laboratory facility or room of the University, or room on premises related to University activities unless authorized by an administrator in charge; or attempting to do same.
- 3.08 Failure to abide by the Smoking Policy
- 3.09 Engaging in sports or sporting activities in locations where such activity is not permitted.

4.0 *Personal Identification and Representation*

- 4.01 Falsification of one's identity or that of another.
- 4.02 Failure to abide by the Identification Policy which includes failure to wear and/or show student identification, and/or verbally state one's identity upon request to a properly identified official or member of the MCPHS University staff (including RAs, Food Service, Bookstore and Security staff).
- 4.03 Misrepresenting oneself or another as a University official or campus organization.
- 4.04 Altering, transferring, forging, tampering with or falsifying any University or affiliated clinical practice site record or document or knowingly submitting false information for incorporation in such records.
- 4.05 Failure to comply with a disciplinary action or cooperate, meet with, or respond to a reasonable request of a University official (including student employees while performing the duties of their job).
- 4.06 Lying or falsification within the process of the Student Discipline System.
- 4.07 Unauthorized use of the University name.

5.0 *Residence Life Policies, including*

- 5.01 Possession of prohibited items in the residence halls as set forth in the Residence Hall Agreement/Contract.
- 5.02 Failure to maintain community health and living standards as set forth in the Residence Hall Agreement/Contract.
- 5.03 Failure to abide by the University policy prohibiting animals in the residence halls.
- 5.04 Failure to adhere to the Residential Guest Policy.
- 5.05 Failure to abide by Residence Hall "Courtesy Hours" or "Quiet Hours" policies.
- 5.06 Failure to abide by the Letting for Value policy outlined in the Residence Hall Agreement/Contract.

6.0 *Alcohol and Drug Use Policies*

- 6.01 Being in the presence of alcohol in any Boston owned/leased residence hall regardless of age and/or being in the presence of alcohol at a University function where alcohol has not been authorized.
- 6.02 Use or possession of alcohol while under the age of 21 and/or use or possession of alcohol while in a Boston owned/leased residence hall regardless of age and/or being in the presence of alcohol at a University function where alcohol has not been authorized.
- 6.03 Distribution of alcohol to minors.
- 6.04 Being in the presence of illegal drugs, marijuana and/or synthetic marijuana.
- 6.05 Use and/or possession of illegal drugs or marijuana and/or synthetic marijuana.
- 6.06 Manufacturing and/or distribution of illegal drugs, marijuana and/or synthetic marijuana. or medication prescribed to another.
- 6.07 Being under the influence of illegal drugs, marijuana and/or synthetic marijuana, or medications prescribed to another.
- 6.08 Possession of alcohol paraphernalia.
- 6.09 Possession of drug paraphernalia.
- 6.10 Sale and/or transfer of one's own prescribed medication to another or the possession, use, sale and/or transfer of another's prescribed medication.
- 6.11 Public Intoxication, regardless of age, of any student or guest of a student.

Community Standards Systems

Matters Before the Community Standards System

Matters brought before the Community Standards System for review and possible action may take on a variety of forms; including but not limited to written complaints, oral complaints, grievances, referrals from outside individuals/agencies

(e.g., Police Department), etc. Any member of the MCPHS University Community or outside individual/agency may submit a written complaint against a currently enrolled student.

All matters/complaints will be referred to the Dean of Students (or designee) who may take one or more of the following steps:

- Dismiss the matter/complaint
- Initiate an Investigation
- Enter into Informal Resolution
- Schedule an Administrative Conference
- Schedule a Level I Hearing
- Schedule a Level II Hearing
- Impose interim restrictions

Dismiss the Matter/Complaint

If, after investigation of a complaint or alleged violation of the Student Code of Conduct, the Dean of Students or designee determines that the matter does not involve offenses in the Student Code of Conduct or the complaint is not accompanied by inadequate information, then the matter or complaint will be dismissed from the Community Standards System.

Initiate an Investigation

The complaint/incident report will be reviewed to determine if it should proceed through the process. The party named in the complaint will be notified. Information, in addition to that provided in the complaint/incident report, may be sought through a preliminary investigation. The investigation may include, but will not be limited to:

- interviewing the complainant(s), responding party(ies), and witness(es),
- gathering documentary or other information from the party(ies) and witness(es),
- gathering relevant documents and/or other information which may be available to the University.

The information gathered during the investigation will be provided to the hearing officer(s).

Alleged violations of the Protection from Discrimination and Harassment Policy will be investigated in accordance with that policy and referred to the Dean of Students (or designee) for informal resolution, administrative conference, and/or hearing under this process, as outlined below.

Alleged violations of the Protection from Sexual Harassment Policy will be investigated in accordance with that policy. Those allegations that are dismissed from the Title IX Grievance Process under the mandatory dismissal provisions will be investigated in accordance with that policy and referred to the Dean of Students (or designee) for informal resolution, administrative conference, and/or hearing under this process, as outlined below.

Informal Resolution

The Informal Resolution Procedure is a voluntary and remedy-driven pathway to a complaint resolution that is acceptable to the complainant, responding party, and the University without a full University investigation and without official findings of fact.

Schedule an Administrative Conference

For a student who accepts responsibility for offenses they committed, such responsible student may first be referred to an Administrative Conference. An Administrative Conference is a discussion between the responsible student and the Dean of Students (or designee) in which the student affirms their responsibility for the charged offenses. The Dean of Students (or designee) will assign sanctions for the offenses. If the student accepts the assigned sanctions, they will sign an Administrative Conference Document indicating acceptance of responsibility for the charged offenses and acceptance of the sanctions as assigned and detailed in the document. By accepting responsibility and the assigned sanctions, the student waives their right to appeal and the Administrative Conference Document is the final decision regarding the case. If the student no longer accepts responsibility for the offenses as charged or does not agree to the sanctions as assigned by the Dean of Students (or designee), the case will be assigned to an either a Level 1 or Level II Hearing, depending on the nature of the charges.

Schedule a Level I Hearing

Incidents or complaints referred to a Level I Hearing do not involve suspension or expulsion as possible sanctions. For more detailed information regarding hearing sanctions, please go to the Sanctions section.

Schedule a Level II Hearing

Incidents or complaints referred to a Level II Hearing involve the possible sanctions of suspension or expulsion in addition to the possible sanctions for a Level I Hearing. For more detailed information regarding hearing sanctions, please go to the Sanctions section.

Impose Interim Restrictions

1. The Dean of Students (or designee) may impose immediate restrictions upon a student with pending disciplinary action without prior notice whenever there are sufficient facts to show that such student's continued presence on the campus endangers the physical safety or well-being of others or themselves or disrupts the educational process of the University.
2. Interim Restrictions may include, but are not limited to suspension from class/University and/or campus housing, limitation of access to designated housing facilities and/or campus facilities by time and location, restriction of communication with named individuals within the University community and/or the requirement to secure advanced authorization to engage in a specified activity. Interim Restrictions may also include the restriction to be present on campus for class attendance only.
3. The Dean of Students (or designee) will communicate with a student directly (in a meeting, by telephone, or by a virtual platform) so that the student is able to present their own version of the facts to the Dean (or designee). The Dean (or designee) will make a final Interim Restrictions decision based upon campus and/or student health and safety and/or educational disruption concerns and this Interim Restrictions decision will be final.
4. Violations of Interim Restrictions may result in suspension or dismissal from MCPHS University.

Level I Disciplinary Hearings

1. The Level I disciplinary hearing is an informal meeting chaired by a hearing officer. It is an opportunity for a student to provide relevant case information to the hearing officer. The objective is to discuss the charges and to assess a student's responsibility for allegedly violating the Student Code of Conduct and to determine sanctions for responsibility as appropriate.
2. Level I Hearings will be conducted as soon as possible after an incident or complaint has been reported. Delays in the scheduling of Level I hearings may occur for the following reasons:
 - a. The hearing officer and student agree to meet later.
 - b. A later hearing date is necessitated by a large number of students involved in a case.
 - c. There is an ongoing investigation regarding the case.
 - d. Charged students may request one postponement of the Level I hearing to be granted at the discretion of the hearing officer.
3. When multiple parties are involved in the same incident, the Dean of Students, or designee will decide whether the cases will be heard together or separately.
4. Level I Hearings are closed to the public and confidential in nature.
5. Any person, including the charged student, who disrupts a Level I Hearing or who fails to adhere to the rulings of the hearing officer, may be excluded from the Level I Hearing.
6. The decision of the Level I Hearing officer will be made on the basis of whether it is more likely than not the charged student violated the Student Code of Conduct.
7. Level I Hearings may be recessed at any time. The charged student must receive written notice of the date and time the hearing will be reconvened.
8. Any new information brought forth in a Level I Hearing which allegedly violates the Code of Conduct may result in future charges imposed on any involved student.
9. Failure to appear for the Level I Hearing will result in the hearing being conducted in the charged student's absence. The charged student may provide the names of witnesses (character witnesses are not permitted to attend hearings but may submit written statements) and may request additional information about the disciplinary process.
10. Any new information brought forth in a Level II Hearing which allegedly violates the Code of Conduct may result in future charges imposed on any involved student.

Rights of All Parties in Level I Disciplinary Hearings

1. The respondent will be entitled to:
 - a. Written notice of charges, the name of the person(s) filing the complaint, and the time and place of the Level I Hearing.
 - b. The opportunity to present their case.
 - c. The respondent may provide the names of witnesses and may request additional information about the disciplinary process. The names of witnesses must be submitted to the hearing officer two (2) business days prior to the hearing. Character witnesses are not permitted to attend hearings but may submit written statements.
 - d. Not answer any questions or make any statements during a Level I Hearing. Such silence will not be used against the charged student, however, the outcome of the Level I Hearing will be based upon the information (or lack thereof) presented during the Level I Hearing.
 - e. Request a hearing advisor who is a member of MCPHS University community. (See Hearing Advisor Section)

- f. The opportunity to appeal the decision within five (5) business days (see Appeals Section).
2. The complainant will be entitled to:
 - a. Notice of the time and place of the Level I Hearing and the opportunity to testify.
 - b. Request a hearing advisor who is a member of MCPHS University community. (See Hearing Advisor Section)
 - c. Submit an impact statement to explain the emotional, physical, financial, educational, and/or other impact(s) the incident has had on their life.

Level II Disciplinary Hearings

1. Level II Hearings are formal hearings to assess a student's responsibility for allegedly violating the Student Code of Conduct and to assess sanctions for responsibility as appropriate. Incidents or complaints referred to a Level II Hearing involve the possible sanctions of suspension or expulsion in addition to the possible sanctions for a Level I Hearing.
2. In Level II Hearings, two trained University staff or faculty members will serve as the Hearing Officers. The Level II hearing will be chaired by a Student Affairs staff member who will administer the hearing.
3. Level II Hearings will be conducted as soon as possible after an incident or complaint has been reported. Delays in the scheduling of Level II Hearings may occur for the following reasons:
 - a. The hearing officer and student agree to meet later.
 - b. A later hearing date is necessitated by a large number of students involved in a case.
 - c. There is an ongoing investigation regarding the case.
 - d. Charged students may request one postponement of the scheduled Level II Hearing date to be granted at the discretion of the hearing officer.
4. When multiple parties are involved in the same incident, the Dean of Students, or designee will decide whether the cases will be heard together or separately.
5. Level II Hearings are closed to the public and confidential in nature.
6. Only evidence introduced at the Level II Hearing will be considered in determining a charged student's responsibility.
7. The decision of the Level II Hearing officer will be made on the basis of whether it is more likely than not that the charged student violated the Student Code of Conduct.
8. Any person, including the charged student, who disrupts a Level II Hearing or who fails to adhere to the rulings of the hearing officer, may be excluded from the Level II Hearing.
9. Level II Hearings may be recessed at any time provided all parties are notified of the reason for the recess and the scheduled date that the hearing will resume.
10. Any new information brought forth in a Level II Hearing which allegedly violates the Code of Conduct may result in future charges imposed on any involved student.

Rights of All Parties in Level II Disciplinary Hearings

1. The respondent will be entitled to:
 - a. Written notice of charges, the name of the person(s) filing the complaint, a copy of the complaint (if available), the time and place of the Level II Hearing, and the names of all witnesses who will testify.
 - b. The opportunity to present their case, question the complainant and witnesses (if available), present witnesses on their behalf.
 - c. The opportunity to review the information being presented at the hearing two (2) business days prior to the hearing. All information reviewed for the hearing and presented at the hearing is confidential and may not be disseminated by a party or witness. Copies of the materials can be provided upon a party's request.
 - d. Not answer any questions or make any statements during a Level II Hearing. Such silence will not be used against the respondent, however, the outcome of the Level II Hearing will be based upon the information (or lack thereof) presented during the hearing.
 - e. Request a hearing advisor to provide support during the hearing process (see Hearing Advisor section).
 - f. The opportunity to appeal the decision within five (5) business days (see Appeals Section).
 - g. Failure to appear for the Level II Hearing will result in the hearing being conducted in the respondent's absence. If the respondent does not appear for the Level II Hearing they lose the right to appeal.
 - h. The respondent may provide the names of witnesses and may request additional information about the disciplinary process. The names of witnesses must be submitted to the hearing officer two (2) business days prior to the hearing. Character witnesses are not permitted to attend hearings but may submit written statements.
2. The complainant(s) will be entitled to:
 - a. Notice of the time and place of the Level II Hearing and the opportunity to testify.
 - b. Request a hearing advisor to provide support during the hearing process (see Hearing Advisor section).
3. Alleged victims of violence (including, but not limited to, sexual assault, domestic violence, dating violence, and stalking) will be entitled to:

- a. Notice of the time and place of the Level II Hearing and the opportunity to testify;
- b. Submit a victim impact statement to explain the emotional, physical, financial, educational and/or other impact(s) the incident has had on the alleged victim's life. This statement may be read into the disciplinary hearing record.
- c. Request a hearing advisor to provide support during the hearing process (see Hearing Advisor section).
- d. The opportunity to review the information being presented at the hearing two (2) business days prior to the hearing. All information reviewed for the hearing and presented at the hearing is confidential and may not be disseminated by a party or witness. Copies of the materials can be provided upon a party's request.
- e. Notice of the decision.
- f. Opportunity to appeal the decision.

Additional Provisions in Cases of Alleged Sexual Assault, Sexual Harassment, Domestic Violence, Dating Violence, and Stalking

1. The Complainant(s) and Respondent(s) will have the opportunity to be present (either in person or virtually) throughout the hearing, including when the Hearing Officer questions the other party or witnesses. If the parties are not comfortable being in the same room together, appropriate arrangements will be made. At no time will a party be permitted to question another party or witness.
2. The Complainant and Respondent will have the opportunity to be accompanied by an advisor of choice, who may be an attorney, at any meeting, interview, or hearing relating to the complaint. The advisor must follow the guidelines listed below in the hearing advisor. If an advisor does not follow the guidelines they will be asked to leave the hearing.
3. Neither the Complainant nor the Respondent will be permitted to question the other party or the witnesses. All questions will be asked by the hearing officer.
4. If neither party submits a written appeal within the prescribed period, both parties will be provided with written notification that the Hearing Officer's decision is final.
5. Complainant has a right to be informed of the sanctions.
6. The hearing and appeal will be conducted by individuals who receive annual training on the issues related to dating violence, domestic violence, sexual assault, and stalking and on how to conduct an investigation and hearing process that protects the safety of victims and promotes accountability.
7. Both the Complainant and the Respondent have the right to have a fair and impartial investigation, determination and appeal.

Sanctions

1. In determining a sanction, the responsible student's present demeanor and past disciplinary history/prior violations, nature and severity of the offense, the severity of any damage, injury or harm resulting and other factors may be considered.
2. Failure to fulfill sanctions may result in an administrative hold on the student's account.
3. The hearing officer may impose any one or more of the following sanctions:
 - a. Warning. An official written notice that the behavior has been inappropriate. This notice is considered part of a student's disciplinary record in any future disciplinary action.
 - b. Fine. A fine imposed for alcohol and/or other drug violations, which will be used towards alcohol and/or other drug education and alternative programming or for failure to attend mandatory meetings, or other offenses.
 - c. Restitution. Financial compensation for damages or offenses. May not exceed three (3) times the value.
 - d. University/Educational Community Service. Assignment of an appropriate project or attendance at an educational workshop that will benefit the University community, responsible student or others.
 - e. Referral. A student may be referred to Counseling Services, CASE, Health Services or other appropriate offices or local agencies (e.g., Law Enforcement Agencies, Licensure Boards) when deemed appropriate by the Dean of Students (or designee).
 - f. Restriction. Denial of access to any campus facility, activity, class or program, or denial of student privileges.
 - g. Disciplinary Probation. A period of time during which a student's or organization's behavior is subject to close examination. Students are prohibited during this time from holding an elected or appointed office in any recognized student organization.
 - h. Housing Probation. A period of time during which a student is subject to close examination. A student's discipline standing will also affect their current Housing status and ability to enter the Returning Student Housing Selection process.
 - i. Housing Relocation. Termination of a student's residence hall assignment and assignment to a new housing assignment in a different community.
 - j. Deferred Loss of Residence. A delayed removal from University operated residence halls for a designated period of time. Any proven offense during this period may result in immediate loss of residence.
 - k. Loss of Residence. Removal from the residence halls.
 - l. Deferred Suspension. A delayed removal from class/the University. Any proven violation during this period may result in immediate suspension for a specific period of time.

- m. Suspension*. Removal from class/the University for a specified period of time. Suspended students must remove themselves from the campus totally. Students suspended from the University may not attend classes or participate in university-sponsored programs during their suspensions. The expiration of the suspension period is no guarantee of re-admittance to the University.
- n. Deferred Loss of Recognition. A delayed removal of recognition as a recognized student organization. Any proven violation during this period will result in immediate loss of recognition for a specified period of time.
- o. Loss of Recognition. During this time, a recognized student organization may not associate itself with the University by using the University name, facilities, and/or other rights and privileges of recognized student organizations. The expiration of the loss of recognition period is no guarantee of re-recognition.
- p. Expulsion*. Permanent removal from the University.
- q. Other sanctions. Other sanctions may be imposed instead of or in addition to those specified above.

**These sanctions may be imposed only as a result of an Administrative Conference or a Level II Hearing.*

Prescribed Sanctions

Sanctions for Alcohol Violations

The following minimum sanctions have been developed to educate students and ensure an environment that supports the academic mission of the University. Violations will be viewed as cumulative over the course of a student's enrollment at the University.

The University's response to recognized student organizations and/or individual students found in violation of the alcohol policy will result in the following minimum sanctions:

First Offense: \$100.00 payment to the Student Education Fund and an Alcohol Education assignment.

Second Offense: \$200.00 payment to the Student Education Fund for each person involved and one of the sanctions below:

- a. 15 hours of educational/University service, together with an assigned reflection paper.
- b. Alcohol educational assignment.
- c. One mandated counseling session with the MCPHS Counseling Services office or with an appropriately credentialed off-campus health provider of the student's choice for an alcohol use assessment. If a student seeks mandated counseling from an off-campus provider, the student does so at their own expense.

Third Offense: \$300.00 payment to the Student Education Fund and one of the sanctions below:

- a. 30 hours of educational/University service, together with an assigned reflection paper.
- b. Alcohol education assignment.
- c. Three mandated counseling sessions with the MCPHS Counseling Services office or with an appropriately credentialed off-campus health provider of the student's choice for an alcohol use assessment. If a student seeks mandated counseling from an off-campus provider, the student does so at their own expense.

Additionally, students may be subject to a hearing resulting in loss of residence (housing) for the current and subsequent years. Three alcohol violations by a student will automatically require a review of housing privileges for that student.

"Trophy bottles" or empty alcohol containers that are for show are not allowed in the residence hall. The presence of trophy bottles constitutes as an alcohol violation and will result in a \$50.00 fine.

Sanctions for Recognized Student Organizations

The University's response to recognized student organizations found in violation of the alcohol policy will result in any of the following minimum sanctions:

Deferred Loss of Recognition

A deferred loss of recognition as a recognized student organization. Any further violation during this period of deferred loss will result in immediate loss of recognition for a specified period of time.

Loss of Recognition

During this period of time, a recognized student organization may not associate itself with the University by using the University name, facilities, funds, and/or other rights and privileges of recognized student organizations. The expiration of the loss of recognition period is no guarantee of re-recognition. A student organization desiring to gain re-recognition, must submit the required written request (to become a recognized student organization) as outlined in the Student Handbook.

Educational/University Service

Recognized student organizations will be assigned an appropriate project or attendance at an alcohol education workshop.

Other Sanctions

If violations occur, individual students and sponsoring organizations may face civil prosecution, which can result in fines and/or imprisonment and will be subject to the Student Discipline System. The University may impose additional sanctions as appropriate including notification to National Chapters of Fraternities.

Sanctions for Smoking Violations

First Offense: \$150.00 fine and Written Warning – payment made to Student Education Fund

Second Offense: \$250.00 fine and Disciplinary Probation – payment made to the Student Education Fund

Third Offense: Level II Disciplinary Hearing with full range of sanctions available.

Hearing Advisors

The complaining and responding parties can have an advisor present at a hearing. A list of faculty/staff hearing advisors who have offered to serve in this role is available from the Office of Student Affairs. A party may also ask another member of the MCPHS University community to serve as a hearing advisor. No faculty or staff is required to accept a request from a party to serve as a hearing advisor. The hearing advisor may assist the party before the hearing in preparing a statement, reviewing the process, and seeking answers to any questions that the party may have. Attorneys or parents/guardians are not permitted to be hearing advisors. Hearing advisors are present for support only and are not permitted to ask or answer questions, present evidence, or make any statements during the hearing. The University does not warrant the competency or ability of any volunteer hearing advisor.

Appeals

1. Students wishing to appeal a decision must do so in writing, via an on-line link, within five (5) business days of receiving notice of the results of the hearing.
2. All requests for an appeal are to be submitted to the Dean of Students, or designee.
3. Appeals for all Level I Hearings will be forwarded to the appropriate appellate officer (the Dean of Students, Associate Dean of Students, Assistant Dean of Students, or Director of Residence Life) in a hierarchical manner. Appeals for Level II Hearings will be forwarded to the appropriate appellate officer (the Vice President of Academic Affairs/Provost or designee or Dean of Students) in a hierarchical manner.
4. Appeals will be considered based on the following criteria:
 - a. Procedural error (this means the process was not followed as stated in the Student Handbook).
 - b. Finding is not supported by the evidence.
 - c. The sanction is excessive or inappropriate.
5. The appellate officer will review the information from the previous hearing.
6. The appellate officer may determine that:
 - a. There are no grounds for the appeal, thus upholding the decision.
 - b. That the sanction is excessive, inappropriate, or inadequate and alter it accordingly.
 - c. Return it to the prior level for further appropriate proceedings.
 - d. Conduct another hearing and render a decision that upholds the previous decision, modifies the decision or dismisses the case.
7. Should an appellate officer determine that conducting a hearing is appropriate, a formal appeal hearing will be conducted following the same system as set forth for disciplinary hearings.
8. Parties who do not attend their hearing lose the right to appeal and the decision is final.
9. A party is allowed only one appeal.

Attendance and Academic Status Policies

Attendance

The University expects students to meet attendance requirements in all courses in order to qualify for credit. Attendance requirements may vary depending on the instructor, and these should be clearly stated in the syllabus available to each student during the first week of the course.

The Documented/Emergency Absence Policy (below) is intended for students who experience an unforeseen circumstance. The Documented/Emergency Absence Policy is not intended to be used as the standard attendance policy in a course syllabus.

Faculty should refer students to the Documented/Emergency Absence Policy for absences that fall under the scope of the Policy. It is not intended for every absence. Faculty who are already working with a student on their absences do not need further approval from the Dean of Students.

Faculty are notified of an approved absence within 5-7 business days to the faculty member's MCPHS email account. Lists of absences throughout the duration of the semester are not provided. If faculty have questions about the Documented/Emergency Absence Policy or questions about the approval process, they can contact the Dean of Students/Student Affairs Office on their home campus.

Documented/Emergency Absence Policy

Absences from coursework can be detrimental to students' academic progress. In an effort to support students in certain circumstances, a Documented/Emergency Absence may be granted as a reasonable allowance; however, a Documented/Emergency Absence does not always excuse a student from making up academic work nor does it guarantee that missed work/clinical hours can be made up.

Each course syllabus and academic program's policy and procedure manual should outline students' responsibilities related to absences. Students are expected to abide by these instructions; students who fail to do so may be ineligible to receive a Documented/Emergency Absence approval, regardless of reason.

The Documented/Emergency Absence Policy is not intended for students who miss class due to poor time management, acute illnesses, or social events etc.. The Documented/Emergency Absence Policy is also not meant to serve as a standard absence policy in a faculty member's syllabus.

Documented/Emergency Absences are not granted for the following (please note this is not an inclusive list):

- Plane reservations/Travel (at any time)
- Weather conditions
- Transportation/commuter issues
- Poor time management
- Social Events (weddings, birthday parties, reunions, etc.)
- Connectivity issues
- Failure to be within COVID-19 Testing Compliance
- Inconclusive COVID-19 Test results

If students, staff or faculty have questions about the Documented/Emergency Absence Policy please contact:
Dean of Students/Student Affairs for all campuses: Student_affairs@mcphs.edu or call 617.732.2929

Procedure for submitting a Documented/Emergency Absence Request

The procedure for seeking a Documented/Emergency Absence and consideration for making up exams, coursework, clinical/rotation hours, or any other academic work for credit is outlined below. Email submissions to the Dean of Students are not accepted.

1. Submitting Documented/Emergency Absence Request Form

Students must submit a completed Documented/Emergency Absence Request Form with valid documentation per campus within five days from the date of absence.

Worcester: <https://tinyurl.com/mcphs-worcester>

Boston: <https://mcphsreslife.wufoo.com/forms/w1ewjh3k09bi7tm/>

Manchester: <https://tinyurl.com/mcphs-manchester>

Students are required to complete the Documented/Emergency Absence form in its entirety. Failure to complete the form accordingly, listing faculty, course number and other information requested on the form will result in an automatic denied request.

Students with three or more Documented/Emergency Absences in one semester in a single course may be required to meet with the Dean of Students or designee on their respective campus. Students who submit requests due to hospitalizations and/or missed more than five consecutive days of coursework will be contacted to meet with a member of our team.

Supporting Documentation Guidance

When submitting an online request students are expected to provide supporting documentation. A general guide of examples of supporting documentation is provided below. Students should submit their request with the supporting documentation. Sending follow up emails with documentation may result in a denied request. Providing photos of events does not constitute as supporting documentation. Questions about documentation can be directed to the Office of Student Affairs.

Bereavement/Death of a family member	A copy of obituary or link to obituary, prayer card
Religious Observance	See religious observance below
Medical Reason	Signed and dated documentation on official letterhead from a healthcare provider. If the student requires recovery time these dates should be included.
Immutable Appointment	Jury duty card, court document, career day agenda etc.
COVID-19 isolation/quarantine	Copy of test results and/or healthcare provider letter stating clear date

*Religious observance:

Any student in an educational or vocational training institution ... who is unable, because of their religious beliefs, to attend classes or to participate in any examination, study or work requirement on a particular day shall be excused from any such examination or study or work requirement, and shall be provided with an opportunity to make up such examination, study or work requirement which they may have missed because of such absence on any particular day; provided, however, that such make-up examination or work shall not create an unreasonable burden upon such school. No fees of any kind shall be charged by the institution for making available to the said student such opportunity. No adverse or prejudicial effects shall result to any student because of their availing themselves of the provisions of this section.

2. Notification from the Dean of Students/Student Affairs Office

The Office of Student Affairs will notify the faculty and student within 5-7 business days via MCPHS email of the decision on the request.

3. Missed Work and Make-Up Process

Once a Documented/Emergency Absence has been approved, it is the responsibility of the student to contact the instructor within 24 hours to arrange make-up coursework. Course instructors will be asked to make reasonable arrangements (consistent with the syllabus) to assist the student in completing requirements of the missed coursework or exam. The following information is imperative to making up missed work and/or exam(s):

While a student may be granted a Documented/Emergency Absence, some absences may not justify make-up work because faculty may not be able to replicate the experience. In such cases, this policy should be in the syllabus and the determination made by the school dean in collaboration with the instructor.

Special Considerations Related to COVID-19

Given the ongoing concern regarding the novel coronavirus (SARS-CoV-2/COVID-19) outbreak, the Centers for Disease Control and Prevention (CDC) and the Massachusetts and New Hampshire Department of Public Health (DPH) have provided guidance on precautionary measures.

MCPHS is implementing revisions to this policy to provide the flexibility needed concerning absences for students who are either symptomatic, required to isolate or required to quarantine.

Students who are symptomatic for <u>one</u> day	Must update their daily symptoms in the CoVerified App, must alert the COVID-19 Team and work with their faculty on their absence.
---	--

	<i>Documented/Emergency Absence submissions for one day of symptoms are not accepted, students must work with their faculty</i>
Students who are symptomatic for more than <u>one</u> school day	Must update their daily symptoms in the CoVerified App, must alert the COVID-19 Team and outreach to a healthcare provider
Students who test positive or are considered a "close contact"	Must alert the COVID-19 Team and follow the guidance outlined by the COVID-19 Team

Please note it is essential that students follow the most current CDC and DPH guidelines. Students should practice CDC and DPH precautionary measures and seek consultation and instructions from a medical provider if:

- they are experiencing a fever and symptoms of respiratory illness (e.g., cough, difficulty breathing) and
- who have either traveled to a country/region as specified with risk by the CDC or
- have had close contact with someone who is sick and being evaluated for COVID-19 or who has received a laboratory confirmed COVID-19 diagnosis.

Documented/Emergency Absence for Students in Service

MCPHS University recognizes the important contributions made by U.S. Armed Forces status consisting of Active Duty, U.S. Military, Veteran, Armed Forces, U.S. Reserves or National Guard, The Reserve Officer Training Corps (ROTC) and military students in service to their home country. The University understands that students may be called into active military service for periods or be required to be absent from class for shorter durations to fulfill military obligations. Military students may have required military activities which cause a student to be absent from class for a short period. Once the student is aware of call to duty, the student must discuss their circumstances with the Dean of Students Office (DOS) and their faculty. Dean of Students/Student Affairs: Student_affairs@mcphs.edu or call 617.732.2929

Examples of Active-Duty Military Absence include but are not limited to:

- Individual or unit calls to active duty for deployment
- Natural disaster response
- Receipt of military permanent change of station orders
- Funeral honor guard details
- Periodic training/drill obligations
- ROTC field training exercises

1. Documentation

Students must provide maximum advance notice of absences and provide copies of their official military documentation such as:

- Paper or electronic Orders
- Leave and Earning Statement
- a unit's Memorandum

It is the responsibility of the student to notify the DOS and their faculty as soon as possible. The DOS will work with the student, faculty and other student serving offices to best support the student. Please note, if a student is fulfilling military obligations for a country other than the United States, the Center for International Studies (CIS) may be notified.

2. Faculty Notification/Communication

It is the responsibility of the student to request the opportunity to complete missed work and to complete coursework according to the terms mutually agreed upon between the instructor and the student. The instructor may award an Incomplete (I) Grade if the excused absence is near the end of the class and the student has completed all but a small portion of the coursework in accordance with the Incomplete Grade Policy.

Clinical/Rotations

Students must contact their preceptor and clinical coordinator if their absence(s) will impact their clinical rotations. Notification to clinical preceptors and clinical coordinators must comply with expectations outlined in clinical rotation syllabi and program handbooks.

Military Families

Student Affairs stands ready to support spouses or dependent children of military members or service members of the armed forces who are students. Please contact the DOS for further support.

Instructor Absence

If a faculty member is unable to conduct classes as scheduled, every effort will be made to offer substitute instruction for

the students. Planned absences due to professional commitments should be approved by the school dean well in advance so that suitable coverage or alternative assignments may be arranged. The school dean should be informed as soon as possible of any unplanned absences due to illness or personal emergency so that students can be notified in a timely manner. Classes can be canceled only with the approval of the school dean or, in the absence of the school dean, the Vice President for Academic Affairs.

Admission to Classes

No student will be admitted to a scheduled class unless

- the student's name is on the instructor's class roster, and
- the student's account is in order.

Attendance

The University expects students to meet attendance requirements in all courses in order to qualify for credit. Attendance requirements may vary depending on the instructor, and these should be clearly stated in the syllabus available to each student during the first week of the course. Generally, students are expected to attend all classes unless they have a valid excuse. (See Documented Student Absence Request Policy and Procedure).

Student Conduct / Community Standards

An instructor shall have the right to require a student who is disruptive during a class, laboratory, or experiential rotation to leave for the remainder of the session and shall report the incident to the Student Affairs office on their campus for further appropriate action in accordance with the Student Code of Conduct. Public Safety may also be notified.

Instructional Periods

Faculty members are expected not to continue any class beyond the scheduled ending time. Unless students have been informed that the faculty member will be late, class is canceled if a faculty member has not arrived within 10 minutes of the scheduled starting time of a class.

Online and Distance Education

The majority of courses at MCPHS are conducted in physical classrooms and labs. However, in addition to programs offered entirely online or in an executive or hybrid format, some required and elective courses may be delivered online and/or through distance education. In participating in online or distance education courses, students learn in different ways and must manage a technologically mediated environment. This learning will be of value both in the completion of degree requirements and in the workplace. Increasingly, workplaces utilize technology for training and work.

Minimum Class Size

By noon on the Friday of the first week of classes, the school dean will make the following decision regarding offering a class, based on enrollment:

- Required courses will be offered unless offered more than once in a calendar year. If five or fewer students register for a required course that is offered more than once in a calendar year, the course may be canceled (programmatic requirements considered).
- Elective courses will be offered provided there is a minimum of eight students enrolled.

Registration

It is the responsibility of the instructor to ensure that only properly registered students are allowed to attend class. If a student's name does not appear on the class roster in WebAdvisor after the add/drop period, that student shall not be allowed to attend, participate in, or take or receive exams until the instructor is notified by the Office of the Registrar that the student is officially registered.

Course Policies

Academic Honesty (See *Academic Honesty Policy under University Policies & Procedures section of the University Catalog*).

Credit Hour Policy

The credit hour policy applies to all courses at all levels (graduate, professional and undergraduate) that award academic credit regardless of the mode of delivery including, but not limited to, self-paced, online, hybrid, lecture, research, clinical and laboratory. Academic units are responsible for ensuring that credit hours are awarded only for work that meets the requirements outlined in this policy.

A lecture period of 50 minutes per week or laboratory work of 110 to 220 minutes per week, extending over one semester, constitutes one academic credit hour. For each hour of lecture, students are expected to spend a minimum of two hours outside of class preparing for the course. For research, clinical/experiential rotations and service-learning activities, actual hours may vary by program, but such activities must include an amount of work that is at least equivalent to lecture and laboratory courses.

Assessment

All materials, in whatever format, submitted by students for evaluation in MCPHS courses may be used by MCPHS for program or institutional assessment. To the extent possible, individual identification will be removed from these materials before they are used for assessment purposes.

Colleges of the Fenway

A Colleges of the Fenway (COF) student enrolled in an MCPHS course through COF cross-registration must notify the course instructor and provide them with an email address to ensure that course information is received in a timely manner. The student also should consult with the instructor regarding access to online applications that might be used in the course.

Disabilities

Students with documented disabilities who wish to request accommodations under Section 504 of the Rehabilitation Act and the Americans with Disabilities Act (ADA) should contact the Office of Student Access and Accommodations at 617.879.5995 and/or OSAA@mcphs.edu to discuss the accommodations process.

Writing-Intensive Courses (for all HUM courses and others designated as writing intensive)

The MCPHS faculty believes that learning in all disciplines is an integrative process, a synthesis of critical reading, thinking, and writing. Students not only must learn to write but also must write to learn. Consequently, writing-intensive courses require students to write 15 to 20 pages in two or more assignments that may take various forms as determined by the course instructor. In addition, instructors dedicate class time to the teaching of writing in their specific disciplines, provide feedback on assignments, and allow revision of at least one assignment.

Writing Proficiency Requirement (Boston only)

MCPHS–Boston students in all baccalaureate and first professional degree programs are expected to meet the University's standards for writing proficiency, which include the general standards for writing competency as delineated in the University's writing proficiency rubric, and specific applications of those standards by faculty in disciplines across the University curricula.

Students who do not perform at a satisfactory level of writing proficiency may be referred to the Writing Center and may be required to demonstrate writing improvement to receive full course credit. (For details, see the Writing Proficiency Requirement—Boston section of this catalog.) The writing proficiency rubric is available on the Writing Center Web page at <https://my.mcphs.edu>.

Transfer Policy (Boston)

MCPHS does not award transfer credit for remedial or developmental skills courses or other courses that are taught at levels below the first-year level at MCPHS. This includes English courses on sentence and paragraph structure or similar content courses below the level of LIB 111 (Expository Writing I), mathematics courses in arithmetic or algebra if below the level of MAT 141 (Algebra and Trigonometry), and biology and chemistry courses below the level of the MCPHS first-year courses required for the program to which the student seeks entrance.

Transfer courses will not be accepted as fulfillment of the core curriculum requirements in the liberal arts distribution areas if they are taught in the first year of a University curriculum. Liberal arts courses acceptable for transfer credit must have prerequisite requirements and must be taken during the student's second or subsequent year in a University curriculum.

Transfer Credits Post Matriculation

Once a student has matriculated at the University, no courses taken outside of MCPHS will be accepted for transfer credit. (NOTE: COF courses are allowed for Boston students.) Exceptions to this policy may be granted in instances involving delay of graduation or extreme hardship.

Prior to taking a course for transfer credit at another institution, students must submit a Petition to Transfer Credit form to the Center for Academic Success and Enrichment, which approves or denies the petition. Notification of the decision will be distributed to (1) the student, (2) the program director, (3) the school dean, (4) the Office of the Registrar, and (5) others as appropriate. The student is responsible for requesting that official transcripts be sent to the Office of the Registrar, which will verify the credit and post a grade of TR in the student's transcript. Official transcripts must be received no later than the add/drop deadline of the subsequent semester. These petitions are reviewed on a case-by-case basis and may take up to two weeks to receive official notification. Students are advised not to enroll in or make payments for non-MCPHS courses without official University approval.

Minimum Transfer Grade

The minimum grade for receiving transfer credit is C (2.0). This may vary for some academic programs, please check the good standing chart under Course Policies section for minimum grade requirements.

Studio Art and Performance Courses (Boston)

A maximum of one studio art or performance course may be taken for credit at another institution, including the Colleges of the Fenway. Studio art courses may be accepted for general elective credit only, not for liberal arts distribution credit.

Credit by Examination

Credit by examination is available to students whose previous coursework in a subject area does not meet transfer credit criteria or who feel they have achieved competency in a subject through work or life experience. Credit by examination is available to new students only during the student's first semester of matriculation at the University, no later than the add/drop deadline of the term of entry.

Competency may be demonstrated through one of the following means: (1) College Level Examination Program (CLEP), (2) Advanced Placement (AP) examination, or (3) International Baccalaureate (IB) examination.

The College Board administers CLEP and AP examinations. A passing score on the CLEP examination in English Composition with Essay will be accepted as credit for Expository Writing I. A passing score on the CLEP examination in Freshman College Composition with Essay will be accepted as credit for Expository Writing II. CLEP credit will be awarded only after the Admission Office has received official scores directly from the College Board. In the case of AP examinations, credit will be awarded for a score of 4.0 or higher.

No AP credit will be awarded for CHE 131 Chemical Principles I, CHE 132 Chemical Principles II, CHE 110 Basic Chemistry I, or CHE 210 Basic Chemistry II. No AP credit will be awarded to students in the Premedical Health Studies program for BIO 151 Biology I or BIO 152 Biology II.

AP and IB exceptions: Chemistry AP scores of 4 or better will be accepted as transfer credit for CHE 131 and CHE 132 for students who matriculate at MCPHS with existing college credit for organic chemistry. Transfer students accepted into the professional phase of an MCPHS degree program will receive transfer credit for IB courses accepted by a previous college. In both of these instances, official AP and/or IB exam documentation must be provided to MCPHS no later than the add/drop deadline of the term of entry.

Students who complete IB courses must provide high school transcripts and/or IB reports that document the course, examination level, and exam score. Students must achieve a score of 5 or better on an HL (high-level) IB exam. Transfer credits are limited to exams for English, language, or the arts.

Students are responsible for scheduling CLEP/AP examinations through the College Board. Results/scores of the examination(s) should be sent (by the school dean if applicable) to the Admission Office. If the student achieves an acceptable score on the examination(s), then notification will be sent to (1) the student, (2) the program director, (3) the school dean, (4) the Office of the Registrar, (5) the Academic Advising Center / advisor, and (6) others as appropriate. Credit earned by examination will not be counted toward the residency requirement.

Clinical Rotations and Background Screenings

For some MCPHS programs, placements in clinical rotations at healthcare providers are a required part of the MCPHS curriculum. Some of those healthcare providers require background screenings, and a conviction for a criminal offense might present an issue. It is possible that certain types of criminal convictions, whether prior to being a student at MCPHS or while attending MCPHS, could preclude a student from being able to complete a required clinical rotation. For more information, please contact the MCPHS Chief Compliance Officer.

Cross-Registration (Boston)

Cross-registration provides full-time undergraduates of the Colleges of the Fenway with the opportunity to take up to two courses per semester (fall and spring semesters) at any of the five Colleges of the Fenway institutions at no additional charge, so long as the credit load does not exceed 18 semester hours. This opportunity provides students with the advantages of a small college but exposes them to resources similar to those of a large university. Cross-registration enables students to broaden their intellectual and social capacities, and it introduces them to faculty, research, colleagues, and curricula they would not otherwise have experienced.

Courses are open to cross-registration on a seat-available basis. Each school's home students have the first option to register for courses that have been developed through joint efforts of faculty across the schools, and the goal of these courses is to attract a mix of students. A searchable database of all courses open for cross-registration may be found at www.colleges-fenway.org. Detailed information about cross-registration and associated processes and policies is highlighted on the Colleges of the Fenway website (www.colleges-fenway.org).

Dean's List

The dean's list recognizes full-time students seeking a bachelor's degree or Doctor of Pharmacy who have completed the required full-time semester hours of credit and earn a minimum 3.50 semester GPA. Courses that are taken pass/fail do not count toward the full-time status. Doctor of Pharmacy students in Boston, Worcester, and Manchester who are completing clinical rotations are not eligible for the dean's list. Doctor of Pharmacy students in the Worcester and Manchester programs during the six-week fall semester of Year II are eligible for the dean's list. Incomplete grades that remain beyond the first three weeks of the subsequent semester render a student ineligible for the dean's list in that term. Dean's list is not awarded to students in graduate programs (i.e., MPAS, MANP, MSN, MSDH, MS, DPT, OD, and PhD). The dean's list is published approximately one month into the following semester by the Registrar's Office.

Add/Drop Procedures

Any registered student who wishes to adjust his or her class schedule during the designated add/drop period can make adjustments online via WebAdvisor, with the exception of students in the School of Professional Studies who can make such adjustments via Elevate. Students cross-registered for Colleges of the Fenway courses must adhere to the add/drop procedures at their home institution. The add/drop period deadline for all programs is specified for each academic term, usually within the first week of classes. Adjustments to tuition and fees, where applicable, are made automatically through the Office of Student Financial Services. Students who wish to withdraw from a course after the designated add/drop period should refer to the Withdrawal from a Course section in Academic Policies and Procedures. No refunds are made if such changes are made after the designated add/drop period. **NOTE: Simply failing to attend classes will not result in the course being dropped from the student's official registration, and students will be held financially accountable and receive a course grade of F.**

Email Policy

All MCPHS students are required to open, utilize, and maintain an MCPHS email account. Official University communications and notices are sent via MCPHS email accounts only. All students are responsible for regularly checking their MCPHS email and for the information contained therein. Only MCPHS accounts will be used in all matters related to academics, student life, and University notifications. The University does not forward MCPHS email to personal email accounts.

All MCPHS community members can register in the MCPHS Emergency Notification System to receive text messages via cell phones and email regarding major campus emergencies and campus closings. Contact helpdesk@mcphs.edu for more information.

Examinations

All tests and examinations, other than final examinations, are scheduled by the instructor. Students who miss a scheduled examination (i.e., classroom examination, lab, or other graded performance) and are granted a documented absence for the missed examination (see Documented Student Absence Request Policy and Procedure) must arrange a make-up exam with the course instructor. The format of the make-up exam may vary from that of the original scheduled exam and is at the discretion of the course instructor. With respect to completion of such examinations, if an acceptable agreement between the student and professor(s) cannot be reached, the school dean will serve as arbitrator.

During the fall and spring semesters for undergraduate and first professional degree students, no course examinations (worth 15% or more of the final course grade) may be scheduled during the week before final examinations. Major written assignments may be due the week before finals if the assignments were semester-long and not assigned within the last four weeks of the semester. Exceptions are granted for laboratory examinations, including practical examinations. Exceptions also may be granted for block-scheduled courses, subject to approval by the Vice President for Academic Affairs (see School of Nursing, Boston, Worcester/Manchester).

NOTE: Final examinations are scheduled by the Office of the Registrar several weeks before the end of the semester. Final examinations must be given only during final exam week. The final exam schedule includes make-up times for examinations canceled due to inclement weather or other unforeseen circumstances (e.g., power outages, fire alarms). Students and faculty are expected to take these dates into account when planning any travel (i.e., they should not purchase nonrefundable tickets to leave before the make-up date).

Posting Examination Grades

Faculty do not use student identification numbers to post exam grades. Quiz, exam, and assignment grades are posted on Blackboard™ via the use of student-specific log-ons and confidential passwords. Please remember that passwords should be kept confidential.

Final Grades

Students may view their final grades online. Final grades are not available to students until all grades have been submitted by all faculty. The Registrar's Office will notify students via email when all grades are posted each term.

Good Academic Standing

To be in good academic standing, a student's cumulative and professional grade point averages (if applicable) must meet the minimums required by the degree program in which they are enrolled. Any student whose cumulative or professional average falls below the minimum after an academic term is considered to be on probation. Professional grade point averages are calculated only after 12 credits have been taken in professional courses (exceptions exist for the Nursing program). Cumulative or professional grade point average minimums are listed in the Good Academic Standing table in this section.

Students who fail to meet the minimum standards required for academic progression will be notified of the decisions by the school's Academic Standing Committee.

In order to maintain good academic standing, students should be aware that the professional curricula of the University are rigorous and demanding. Students who must be engaged in gainful employment should balance school and work responsibilities so as not to compromise their academic success.

Good Academic Standing and Satisfactory Progress for Financial Aid

Student Financial Services disburses financial aid only to students in good academic standing who are making satisfactory progress toward completion of their degrees. Refer to Student Financial Services in this catalog for further details.

Grading Policies

Grade Appeals

A student who wishes to appeal a final grade of a course must do so within two weeks of the grade being posted by the Registrar's Office. The first appeal should be in writing to the instructor, who must make a decision to uphold or change the grade within 3 business days of the appeal. The written appeal should contain the rationale for the appeal. If a mutually acceptable agreement cannot be reached (or the instructor does not respond within 3 business days), the student has 3 business days to appeal in writing to the administrator in charge of the academic unit offering the course (Department Chair, Program Director or designee). The appeal should contain the rationale for the appeal and the result of the appeal to the instructor. The academic unit administrator must decide to uphold or change the grade within 3 business days of the appeal. If this procedure does not successfully resolve the matter (or if the administrator does not rule on the matter in 3 business days), the student has 3 business days to appeal in writing to the chief administrator (School Dean or designee) overseeing the academic unit offering the course. The appeal should contain the rationale for the appeal and the results of the appeals to the instructor and the academic unit administrator. The chief administrator will uphold or change the grade and inform the student within three business days. The decision of the chief administrator is final. Decisions on grade appeals are based solely on objective grade information.

If the grade appeal affects a student's progression status, the grade appeal process must be completed on or before the first day of class/clinical rotation, prior to the start of the next semester. It is the student's responsibility to initiate the grade appeal.

Grade Point Average (GPA)

The total number of quality points (see Grading System section of this catalog), divided by the total number of credit hours taken, yields the grade point average. The grade point average for each semester and cumulatively is calculated to two decimal points. In some degree programs, a professional grade point average also is calculated for each student by dividing the number of professional quality points by the total number of professional credit hours taken.

Grade Reports

At the end of each academic term, students can view their grades online via WebAdvisor. The Office of the Registrar notifies students when grades are posted.

Address Changes

Address change forms are located at the Office of the Registrar. Current students may change their address online via the Student Information Update form available on the Registrar website at <https://my.mcphs.edu/departments/registrar/personal-information-collection>.

Good Academic Standing Chart

Good Academic Standing						
School	Program	Degree	Overall GPA	Prof. GPA	Min. Grade in Prof. Courses	Other
All schools	All first-year students		2.0 (Except PharmD beginning with the Class of 2024)			Beginning with the PharmD Class of 2024: <ul style="list-style-type: none"> • Minimum GPA of 2.0 at the end of year 1 (first preprofessional year) fall semester • Minimum GPA of 2.5 at the end of year 1 (first preprofessional year) spring semester • Minimum of C- in all preprofessional courses

H	Honors course
L	Lab
O	Online course
ST	Selected topics course
T	Travel course

Incomplete Grades

Courses with a grade of Incomplete must be completed within three weeks of the new semester following the academic term (including summer sessions) in which the Incomplete grade was assigned, or the grade automatically becomes an F. The instructor is responsible for notifying the Office of the Registrar regarding any student who has been granted additional time for coursework completion. The instructor also must specify the extended time period, up to one semester. No student may progress to courses for which the course with an Incomplete is a prerequisite until the work is completed and the I grade is changed. Incomplete grades render a student ineligible for the dean's list. No student can graduate with an Incomplete grade in any course necessary for graduation.

Pass/Fail Courses

A maximum of one elective course may be taken on a pass/fail basis at another institution, including the Colleges of the

Fenway. A grade of P or F will appear on the MCPHS transcript for any course taken pass/fail. A pass/fail course will not affect a student's grade point average. However, a failure in such a course may have an impact on progression through the curriculum.

Repeated Courses

Following completion of a course repeated at MCPHS, the earlier grade will be removed from the grade point average, and the more recent grade will be used in the calculation. Both grades remain on the transcript for future reference. If the student repeats a course outside the University (see Courses Taken at Other Colleges after Matriculation), the lower grade is dropped from the grade point average, but a substitute grade is not used in the calculation. Such courses are listed as transfer credit.

Courses may be attempted no more than two times. Grades of F and W are considered attempts for courses in which D or better is the passing grade. For those courses in which the passing grade is higher (e.g., C-, C), grades below the passing grade and W are all considered attempts. Failure to complete any course within these limits will result in dismissal from the degree program or major.

When a curriculum change results in a course moving from one category to another (e.g., from preprofessional to professional), and a student repeats the course in the new category, the GPA will automatically be calculated in the new category. If the student wants the GPA to be calculated in the previous category, they must state the justification for that request via a petition for special academic request. The request is *not* automatically approved, and the repeated course will *not* be counted in both professional and preprofessional categories.

Replacement of F Grades

The Registrar will automatically replace the previous grade when a student repeats a course. Students are encouraged to review their current program evaluation with the Center for Academic Success and Enrichment to determine if there are existing grades that should be replaced. The timely replacement of grades is essential in determining the academic standing of students.

Recalculation of the Grade Point Average

Students who wish to remove courses from their grade point average that are not required for the new program should note their request on the Change of Program form. All grades will remain on the transcript (and program evaluation), with the notation that they are not included in the grade point average. These requests must be approved by the new academic dean.

Students who leave a program not in good academic standing and wish to move to another degree program or be readmitted to their former program must meet the grade point requirements of that YOG and program (see Good Academic Standing). Students who leave the PharmD program not in good standing must complete the new program and meet the grade point average requirement required by the School of Pharmacy–Boston before seeking readmission into the PharmD program.

An additional change of program may result in courses being added back to the GPA.

Academic Progress

The academic standing of each student will be reviewed at the end of each academic semester at each campus, including summer sessions. All students will be reviewed by the school in which they are enrolled. Summer sessions are reviewed to evaluate student academic progress.

Each school has specific academic progress standards (e.g., minimum grade point average requirements, minimum grades for required courses) that must be met in order to progress within the degree program (see Good Academic Standing). Students who fail to meet the minimum standards required for academic progress will be notified of the decision by the school's Academic Standing Committee (ASC).

Academic Warning

At multiple points during each semester, faculty members submit academic warnings via WebAdvisor, which are processed by the Center for Academic Success and Enrichment (CASE) on each campus.

Students who receive academic warnings will be notified by their academic departments/programs by email to their official MCPHS emails and provided additional instructions.

Boston: Each student placed on academic warning will be encouraged to attend academic skill-building workshops and to meet with their Academic Coach in the Center for Academic Success and Enrichment. These actions may be required of students who receive more than one academic warning (as stipulated in a letter from their school dean).

Worcester/Manchester: Each student placed on academic warning will be required (as stipulated in his or her notification letter) to meet with an Academic Counselor in the Center for Academic Success and Enrichment (Worcester/Manchester) and meet with a faculty advisor.

There is no appeal process associated with an academic warning.

Academic Probation

Each student's academic status will be reviewed at the end of each academic semester by the Academic Standing Committee (ASC) for their school, and each student's professional (if applicable) and cumulative grade point averages (GPAs) will be determined. A student with a professional and/or cumulative GPA below the requirement for his or her major shall be placed on academic probation and receive a letter from their Academic Dean or Program Director. This written notice of probationary status also will include a notice that failure to reach the required GPA by the end of the designated academic semester may result in dismissal from the University.

Each student on probation is required to meet with a designated member of the Center for Academic Success and Enrichment (CASE) on their home campus by the end of the second week of the probationary semester to develop and agree to—in writing—an Academic Success Plan (ASP). The ASP may include mandatory study/advising sessions, mandatory class attendance, or other stipulations aimed at encouraging and supporting student success.

Probationary status may remain in effect for up to two consecutive academic terms, defined as two semesters or two clinical clerkships/rotations, depending upon the student's year and/or campus of enrollment. It is expected that students on probation make progress toward good academic standing at the conclusion of each academic term. Failure to demonstrate improvement at the end of the first probationary period may result in dismissal. At the conclusion of the second consecutive academic term, the student must have achieved good academic standing; failure to do so may result in dismissal. Upon completion of each academic term, a student on academic probation will receive a notice of his or her current standing in writing from the school dean.

Individual programs may have specific grade point requirements that students must meet in order to enter the professional years and associated clerkships/rotations of their programs. These program-specific requirements preempt the probation process for the preprofessional years. For information about program-specific requirements for the professional years, students should contact the appropriate school dean and refer to the Good Academic Standing chart. There is no appeals process associated with academic probation.

Academic Dismissal

Each student's academic status will be reviewed at the end of each academic semester by the appropriate Academic Standing Committee (ASC). Each student's professional (if applicable) and cumulative GPAs will be determined. If a student's GPA falls below the level of good academic standing, as defined by the program requirements, for two consecutive academic semesters, the ASC will submit a recommendation for dismissal from the program to the appropriate school dean.

Courses may be attempted no more than two times. Grades of F and W are considered attempts for courses in which D or better is the passing grade. For those courses in which the passing grade is higher (e.g., C-, C), grades below the passing grade and W are all considered attempts. Failure to complete any course within these limits will result in an ASC recommendation for dismissal from the degree program to the school dean.

Individual programs may have specific grade point requirements that students must meet in order to enter the professional years and associated clerkships/rotations of their programs. These program-specific requirements preempt the dismissal process for the preprofessional years, and students failing to meet them may be subject to dismissal. For information about program-specific requirements for the professional years, students should contact the appropriate school dean and refer to the Good Academic Standing chart.

A student recommended for dismissal may be continued by the school dean with or without conditions. If the school dean accepts the dismissal recommendation, the student will receive written notice of dismissal from the school dean. The notice will include procedures for appeal and will direct students to meet with an advisor to discuss a potential change of program. All change of programs must be finalized by the end of the add/drop period for the next enrolled semester. If students do not successfully appeal or meet the change of program deadline they will be administratively withdrawn from the university. Administrative withdrawal letters will include notice of loss of housing, financial aid, and registration. The following offices/individuals will be notified: Center for Academic Success and Enrichment, Dean of Students, Office of the Registrar, Residential Living and Learning, Information Services, Public Safety, Student Financial Services and Immigration Services/International Academic Services (if applicable). Students will be required to turn in their University ID and vacate University residence halls.

A student whose conduct is unsatisfactory may be dismissed from the University at any time. In such a case, tuition and fees paid for the current academic semester will not be refunded.

Reinstatement of Dismissed Students

To be considered for readmission following dismissal by a school dean, the student must petition the Provost's Office, in writing, by the date designated in the Appeals Procedure guidelines that accompany the dismissal letter. The Provost's Office may uphold the dismissal, readmit the student, or readmit the student with conditions. If readmitted, the student's academic performance will be reviewed at the end of one academic semester. If the student has failed to meet the stipulated conditions or, in the absence of stipulated conditions, failed to meet the minimum GPA required for good academic standing in that student's program, the student will be dismissed from the University.

A student who has been dismissed twice is eligible for readmission to *the same degree program* only if (1) the student has been away from the University for a period of 12 months, and (2) the student has demonstrated academic success through coursework taken at another institution. If these conditions are met, the student may apply for readmission to the school dean. Readmission also will depend upon the availability of space in the program.

Auditing Courses—No Credit (Boston)

A student may audit a course with the consent of the instructor. The student must register for the course through the Office of the Registrar prior to the add/drop deadline and pay two-thirds of the tuition. The student does not earn academic credit for audited courses. Students cannot audit courses that are part of their required curriculum.

Change of Program (Boston)

A student requesting a change of program must schedule an appointment with their Academic Coach in the Center for Academic Success and Enrichment (CASE) to discuss the decision to apply for a change of program. Prior to this meeting, the student must have a printed copy (from WebAdvisor) of their most recent program evaluation and a program evaluation for the new program. These audits should be brought to the meeting with the coach.

When a new program has been chosen, the student may be required to schedule an appointment with the director of the program to which they wish to transfer. The student will submit to the program director a request for change of student status form, the program evaluation, and a "what-if" program evaluation, as well as a letter stating the reasons for transfer. All program requirements (available from the school dean's office) must be met. Once accepted, the program director will determine, if applicable, the new year of graduation (YOG). The student, the coach, the program director, and the appropriate school dean must sign the Change of Program form. All written correspondence regarding the decision must be sent to the student, program director, Office of the Registrar, Student Financial Services, CASE, and school dean(s). If students have outstanding coursework taken external to MCPHS, the official transcripts must be received in the Office of the Registrar no later than the add/drop deadline for the term of entry. The student will receive official change of status email from the Office of the Registrar notifying them of requested program change.

In order to register for classes in the new program, the completed and approved request for Change of Program form must be on file in the Office of the Registrar. Once admitted to a new program, a student must adhere to the program and GPA requirements commensurate with his or her new YOG.

Depending on the intended new program, first-year students may change majors only after grades have been reviewed following the fall or spring semester. Students may begin the Change of Program process early, but they must meet with a coach in the CASE to review the Change of Program procedures, petition, and timeline.

If a student moves from the Worcester/Manchester PharmD program to any program in Boston they will receive transfer credit for any courses that would be applied to the degree program, and the secondary degree would begin with a new degree audit. In this case, the residency requirement would be waived. Students cannot transfer from the Worcester or Manchester PharmD program into the Boston PharmD program.

Recalculation of the Grade Point Average

Students who wish to remove courses from their grade point average that are not required for the new program should note their request on the Change of Program form. All grades will remain on the transcript (and program evaluation), with the notation that they are not included in the grade point average. These requests must be approved by the new academic dean.

Students who leave a program not in good academic standing and wish to move to another degree program or be readmitted to their former program must meet the grade point requirements of that YOG and program (see Good Academic Standing). Students who leave the PharmD program not in good standing must complete the new program and meet the grade point average requirement required by the School of Pharmacy—Boston before seeking readmission

into the PharmD program.

An additional change of program may result in courses being added back to the GPA.

Graduation Policies

Eligibility

The University recognizes three graduation dates during the academic year: September 1st and dates specified on the academic calendar for December and May. A formal Commencement ceremony is held once per year for all campuses in May. A December Commencement ceremony is held for degree programs with December completion dates.

In order to be eligible to receive a degree on one of the above official graduation dates, students must complete all degree requirements (including coursework, experiential education, instructional requirements, and financial clearance) by the following deadlines:

<i>May</i>	Last day of spring semester final exam period*
<i>September</i>	Last day of summer 12-week semester
<i>December</i>	Last day of fall semester final exam period*

Students who have completed degree requirements by the last day of the spring semester final exam period, or who earned their degree the previous September or December, are eligible to participate in the formal May Commencement ceremony. Students who will complete all degree requirements by the last day of summer-12 week semester are eligible to participate.

Students are eligible to participate in the Commencement ceremony only as noted above. In the event of incomplete requirements (including outstanding financial balances), the school dean will make a change in the student's date of graduation (via the Change of Year of Graduation form). It is the responsibility of the individual student to ensure that they meet all degree requirements on schedule or risk delay in graduation.

Graduation with Honors

Summa cum laude	3.86–4.00
Magna cum laude	3.70–3.85
Cum laude	3.50–3.69

The determination of honors is based on the graduate's final cumulative grade point average. Only students seeking a bachelor's degree or Doctor of Pharmacy who have completed at least 60 credits at MCPHS, or such number of credits that is applicable for completion of a given degree program, are eligible for honors. Honors designations appear on the student's final grade transcript but not on the diploma.

First honor graduates are recognized during the Commencement ceremony. In order to be considered a first honor graduate, one must be a student in a full-time undergraduate or entry-level program with at least three years of residency (except accelerated and/or fast track degree programs) and must not have earned any graduate or other advanced degree.

Petition to Graduate

Students must file a Petition to Graduate form online. Deadlines for submitting the forms also are posted online. Upon determination of completed requirements, students will be approved for graduation. In the event of incomplete requirements, the school dean will make a change in the student's year of graduation (YOG) via the Program Evaluation Update form. The student will be notified of this change and encouraged to meet with his or her program director and/or the Center for Academic Success and Enrichment (Boston) to ensure satisfactory program completion within the new YOG. All tuition and fees must be paid to the University prior to graduation.

Year of Graduation

Whenever a student falls out of sequence in the curriculum of an academic program, takes a leave of absence, or changes program, a change to year of graduation (YOG) may occur. If requesting to change programs, a student must complete a Change of Program form as part of the request to the school dean. The program director and school dean will review the request for change of YOG as part of the acceptance process. The completed and signed Change of Program form will be distributed to (1) the school dean, (2) the student, (3) the Office of the Registrar, (4) Student Financial Services, (5) the program director, and (6) the Center for Academic Success and Enrichment (Boston, Worcester/Manchester).

Leave of Absence

The University recognizes that there are situations when a student may require a leave of absence (LOA). Such leaves are granted for a maximum of one academic year with the exception of leaves granted for military service. The student must meet to consult with their Academic Dean or designee regarding the reason(s) for considering, and the ramifications of, taking a leave of absence. After the initial meeting with the Academic Dean or designee, the student must return the completed Leave of Absence form within 1 week (or 5 business days) with the required signatures: a) the student, b) Academic Dean or designee, c) Student Financial Services, and d) Immigration Services representative (for international students). The Academic Dean or designee will notify the student within 1 week (or 5 business days) upon receipt of the completed form with the finalized LOA requirements via the student's MCPHS email account. **Students who take a leave after the designated add/drop period will receive course grade(s) of W.** **For information on a Health/Medical Leave of Absence, please see the Health/Medical Leave of Absence section in this catalog.*

Return from Leave of Absence

Students returning from a leave of absence must confirm they are returning to MCPHS University with their Academic Dean or designee prior to the following dates:

- *March 1-for a summer or fall semester return*
- *October 1-for a spring semester return*
- *Online students-30 days prior to the beginning of the semester*

Students on a Leave of Absence are *not* eligible for University Services, with the exception of academic coaching. Students who intend to return from a LOA must also review and adhere to applicable school/program specific policies in addition to the general policy outlined herein. Students who fail to return within the designated time must reapply for admission.

Double Majors (Boston)

Students enrolled in selected BS degree programs (Boston) may declare a double major. Accelerated, degree completion, online, MPAS, Nursing, PharmD, Premedical Health Studies, and Health Sciences programs cannot be used in double majors. In addition, a double major in Public Health and Health Psychology is not available. Students who declare a double major cannot complete a minor.

In order to be eligible for a double major, the student must have a grade point average (GPA) of 3.2 or higher and have completed at least 30 credits. Once students have been approved for a double major, they are required to maintain a minimum GPA of 3.0 for the remainder of their studies.

Students should note that only one degree will be conferred. Due to scheduling conflicts and/or additional course requirements, students may need to take more than 18 credits per semester and/or enroll in summer semester(s) in order to graduate with their class. In cases where courses overlap between majors, general elective credit may need to apply to one of the courses. It is recommended that students check with Student Financial Services to discuss how the additional course requirements might affect their financial aid status. In order to be considered for a double major, candidates should contact their Academic Coach in the Center for Academic Success and Enrichment (Boston) and complete the Application for Double Major form, which requires approval of relevant program directors and deans.

Minors (Boston)

Students who wish to pursue a minor must complete a Declaration of Minor form, which is available in the Center for Academic Success and Enrichment. The Declaration of Minor form must be forwarded to (1) the student, (2) the Center for Academic Success and Enrichment, and (3) the Office of the Registrar.

Requirements for completion of some minors vary for students in the Premedical Health Studies program. These variations are outlined in the Bachelor of Science in Premedical Health Studies section of this catalog.

Registration for Classes

Prior to the start of preregistration for each term, the Registrar's Office will notify students (via MCPHS email) of the registration schedule. The email will indicate if students will be block registered for required courses or if students need to meet with an Academic Advisor before registering for classes. Students who register on time receive an electronic bill from Student Financial Services. Students who miss the registration period are charged a late registration fee. Students who have outstanding balances are not allowed to register or attend classes until all bills are paid in full.

Nonmatriculating Students

Students that have not been formally granted admission to an MCPHS academic program may take credit-bearing courses at either the undergraduate or graduate level as a non-matriculated student in the School of Professional Studies. Students may take courses for professional or personal development, to satisfy prerequisite requirements for

entry to a degree program, or to transfer credits to another institution. Students must meet all prerequisites to enroll in a course.

Course credits earned as a non-matriculated student do not automatically apply toward a degree program at MCPHS University. Students later admitted to an MCPHS academic program may request their non-matriculated coursework be transferred with approval of the appropriate program director or academic dean. In order for coursework to be transferred it must meet one of the following:

- Undergraduate degree program students may transfer a maximum of four undergraduate courses not to exceed 14 credits for courses in which students earned a C or better.
- Masters level degree program students may transfer a maximum of two graduate courses not to exceed 8 credits for courses in which students earned a B or better.
- Doctoral level degree program students may transfer a maximum of three graduate courses not to exceed 12 credits for courses in which students earned a B or better.

In rare instances, exceptions may be granted for students completing prerequisite requirements with approval of the appropriate program director or academic dean.

Visiting Students (Boston)

Visiting students (those enrolled in degree programs at institutions other than members of the Colleges of the Fenway) also may register for classes at the University. Such students must provide documentation of good academic standing from their home institution before completing their registration. Visiting students may register on a seat-available basis and only after the designated period when matriculated students have completed the registration process. Such students may obtain registration materials at the Office of the Registrar. This same policy also applies to students from other MCPHS campuses.

In the case of nonmatriculated and visiting students, it is expected that such students will adhere to the academic requirements as set forth by the instructor(s) and stated in the course syllabus.

Residency Requirement

Students must complete (1) at least half of the required credits for a degree and (2) all professional course requirements in the respective degree program in residence at MCPHS. In special cases, the school dean may allow transfer credit for professional courses provided the student is able to demonstrate competency in the subject. If a program does not have specified professional courses, then half of all credits must be taken in residence. At least one-half of the courses required for a minor must be completed while in residence at MCPHS. "In residence" is defined as being registered for and enrolled in MCPHS courses, whether the courses are delivered using traditional, hybrid, distance delivery, or online methods. Colleges of the Fenway courses are credited as MCPHS courses (including the number of credits). An exception to the residency requirement is granted to those who hold licensure in a discipline and are enrolled in an MCPHS baccalaureate degree completion option. The residency requirement for such students is a minimum of 30 semester credits of MCPHS-approved courses.

Bachelor of Science Completion Policy

In order to graduate with a Bachelor of Science degree at MCPHS University, a student must complete the final 30 credits of their degree program enrolled in MCPHS University courses or through an MCPHS approved articulation agreement.

Transcripts

Copies of official transcripts must be requested in writing and bear the signature of the requesting student. Current students may request transcripts online via WebAdvisor. Transcripts are furnished to designated institutions or authorized agencies only when the student submits a completed transcript authorization form. Transcripts are issued to those students whose financial status with Student Financial Services is clear.

Visiting Classes

A person may visit a class in which they are not officially enrolled only with prior consent of the instructor.

Withdrawal and Leave of Absence Policies

Administrative Withdrawal

Section 1: Administrative Withdrawal

An administrative withdrawal will mean that a student's preregistration or registration, housing, meal plan, and financial aid for the current semester will be canceled. The student will be unable to register or preregister for any subsequent semester until the administrative withdrawal is resolved.

A student may be administratively withdrawn by the University if any of the following conditions apply:

- a. If, after due notice, the student fails to satisfy an overdue financial obligation to the University, consisting of tuition, loans, board, room fees, library charges, or other student charges, including student activities, health insurance, graduation fees, and other such fees as may be established by the University
- b. If the student fails to comply with certain administrative requirements, including, without limitation, the submission of immunization forms, satisfaction of technical standards, or completion of SEVIS registration
- c. If the student fails to attend classes during the first two weeks of the semester
- d. If the student fails to register for the coming semester

Section 2: Effects of Administrative Withdrawal

If a student is administratively withdrawn, their record will indicate the withdrawal date and the reason for administrative withdrawal. All courses for which a student is registered at the time of withdrawal will receive a grade of W until or unless the student is reinstated.

The student shall not be allowed to preregister or register for a future semester. If a student has already preregistered at the time of withdrawal, all preregistration course requests will be canceled.

The student shall receive no further material or notification from the registrar concerning University affairs once administratively withdrawn.

Section 3: Procedures for Implementing Administrative Withdrawal

The registrar will send a letter to a student administratively withdrawn from the University. The administrative withdrawal must be based on one of the grounds set forth in Section 1. Administrative withdrawal notifications are sent to the students via MCPHS email and a hard copy is also mailed to the home address on file.

Section 4: Appeals and Reinstatement

Administrative withdrawal reinstatements must be resolved within two weeks of receipt of the administrative withdrawal notification letter. Appeals must be submitted by the student to the Office of Student Affairs within one week of receiving the notification by completing this online appeal form: <http://tinyurl.com/yxgmjf2n>. The appeal should include a description of the actions the student has taken to resolve the matter and the reasons why the student is entitled to reinstatement

Appeals will be reviewed for reinstatement. The Office of Student Affairs in conjunction with the Academic Dean or Program Director, Student Financial Services and Immigration Services (if applicable) will approve or deny the reinstatement within 1 week after receiving the student appeal letter.

In semesters beyond those from which the student was administratively withdrawn, the student may be required to file a readmission application by the stated deadline for enrollment in the next available semester.

Return from Hospitalization

A student is required to meet with a representative from the Office of Student Affairs before returning to campus following treatment for a health condition that required hospitalization. Hospitalization is determined when a student has been admitted to a hospital and/or a healthcare facility. A student who has been hospitalized cannot to be on campus, return to class, or participate in any University related activity until cleared by the Office of Student Affairs. It is the responsibility of the student to contact the Office of Student Affairs to set up the Return from Hospitalization meeting.

If the health condition that the student was hospitalized for is not related to mental health, a representative from the Office of Student Affairs will meet with the student and review all documentation obtained by the student. The student must obtain and have ready for the return meeting(s) the post-hospitalization discharge summary, along with any other documentation that was given to the student by the facility where the hospitalization occurred. The representative from Student Affairs will make a determination if the student is able to return to campus. The decision of the representative from Student Affairs will be delivered to the student in writing following the meeting.

If the health condition is related to mental health, the student will also be required to meet with a representative from Counseling Services. The Office of Student Affairs will coordinate with Counseling Services to schedule the return meetings. The student must obtain and have ready for the return meeting(s) the post-hospitalization discharge summary, along with any other documentation that was given to the student by the facility where the hospitalization occurred. A representative from Counseling Services will meet with the student and review the documentation obtained by the student from the facility where the hospitalization occurred. After this meeting, the representative from Counseling Services will make a recommendation to the Office of Student Affairs on whether or not the student is able to return to class. A representative from the Office of Student Affairs will then meet with the student, and based on the outcome of the meeting and the recommendation from Counseling Services, the representative from Student Affairs will make a determination if the student is able to return to campus. The decision of the representative from Student Affairs will be delivered to the student in writing following the meeting.

Health/Medical Leave of Absence

A Health/Medical Leave of Absence may be appropriate when a student's current physical or behavioral health condition precludes successful complete of their educational program. In addition to following the steps outlined for a general Leave of Absence, a student seeking a Health/Medical Leave of Absence must submit medical documentation from the student's medical provider to the Office of Student Affairs. This documentation must indicate the medical reasons the student is unable to attend classes for the requested time period. In conjunction with submitting this documentation, the student must meet with representatives from Student Affairs on their respective campus and complete appropriate paperwork. At least one full academic semester must have passed before returning to the University under a Health/Medical Leave of Absence.

Return from Health/Medical Leave of Absence

In addition to the general Leave of Absence steps for returning to the University, a student will provide to the Office of Student Affairs, on their respective campus, documentation from the student's medical provider that indicates the student's readiness to return to class, that includes:

- a diagnosis of the condition that led to the student's leave;
- the student's length and course of treatment;
- the student's current medical health status;
- recommendations necessary for ongoing care;
- recommendation that student can safely return to classes with either full-time status or a reduced course load;
- any noted restrictions including those related to technical requirements of the student's academic program.

A student will also need to meet with a representative from the Office of Student Affairs to finalize the Return process.

Involuntary Health/Medical Leave of Absence

The Dean of Students or designee may issue an involuntary health withdrawal, whether or not the student's behavior violates the Student Code of Conduct.

An involuntary health leave of absence must involve a strong likelihood of

- a. serious risk of physical harm to the student themselves, manifested by evidence of threats of suicide or attempts at suicide or other serious bodily harm;
- b. serious risk of physical harm to other persons in the community, including an infectious condition or evidence of homicidal or other violent behavior; and/or
- c. reasonable risk of physical impairment or injury to the student themselves because of impaired judgment that would not allow the student to live independently or protect them in the community or not allow the student to perform the essential functions of an educational program without requiring substantial modification of the program.

Process for Involuntary Leave of Absence

Report and Initial Meeting

Upon receiving a report documenting the behavior(s) that indicate why a student should be put on involuntary health leave, the Dean of Students or designee will meet with the student regarding the report.

Suspension Pending Determination

The student may be suspended immediately from the University or University residence hall pending the determination of the involuntary health leave of absence when, on the basis of the information available, the University reasonably believes that the student's continued presence on campus endangers the physical safety or well-being of themselves or others or seriously disrupts the educational process of the University. Either before suspension or as promptly as is feasible, the student will be given the opportunity to be heard and present evidence as to why they should not be immediately suspended.

Evaluation

The Dean of Students or designee may inform the student orally or in writing that they must participate in a medical or mental health evaluation conducted by one of the following:

- a. MCPHS Executive Director of Counseling Services or designee (in the case of psychological disorder)
- b. An independent evaluator (licensed social worker, licensed mental health counselor, licensed psychologist [including psychiatrist], or licensed medical doctor) selected by the student at the student's expense

The student must sign a release of information form authorizing the evaluator to consult with MCPHS staff regarding the evaluation.

The evaluation must be completed within 24 hours of the date of written or verbal notice or as soon as reasonable, as determined by the Dean of Students or designee. The Dean of Students or designee may grant an extension for completion.

If the student fails to complete or refuses to participate in an evaluation when referred, they may be issued an involuntary health leave of absence.

Determination

Upon completion of the evaluation, the MCPHS staff member who conducts or consults in the evaluation will make a recommendation to the Dean of Students or designee. An opportunity must be provided for the student to discuss the recommendations with the MCPHS staff member who conducted or consulted in the evaluation and with the Dean of Students or designee.

The student will be given the opportunity to be heard and present evidence as to why they should not be issued an involuntary health leave of absence. The Dean of Students or designee will make a determination and inform the student in writing.

Effective Date

Once the involuntary health leave of absence is issued, the terms of the leave become effective immediately. A student's record will indicate the leave date and the reason for involuntary health leave. All courses for which a student is registered at the time of leave will receive a grade of W, and the refund policy as outlined in the University catalog will be followed. Requests for special consideration regarding the refund policy (e.g., leave date beyond the refund date) may be made to the Dean of Students.

The safety of the student while on campus must be assured. Advance notice of an involuntary health leave is recommended only when the safety of the student while on campus is assured. In the case of emergencies, no advance notice may be possible.

Appeal

A student who has been issued an involuntary health leave of absence may appeal the decision to the Vice President for Academic Affairs in writing within five business days of receiving the decision. The student's reasons for the appeal and the desired resolution must be indicated in the letter. The Vice President for Academic Affairs will consider the case within five business days of the request for an appeal. The decision of the Vice President for Academic Affairs is final and will be communicated to the student in writing.

Return after Leave of Absence

In order to remove the conditions of the leave of absence, the student must present medical documentation that the behavior no longer precludes successful completion of an educational program. The student also must participate in an evaluation conducted by University staff, by an established deadline, and write a letter to the Dean of Students or designee detailing the student's readiness to return to the University. In most cases, at least one academic semester must have passed before readmission under an involuntary health leave may be considered.

Deviations from Established Policies

Reasonable deviations from this policy will not invalidate a decision or proceeding unless significant prejudice to a student may result.

Withdrawal from a Course

Students may withdraw from a course through the end of the 10th week of the fall or spring semester; in the summer session, withdrawal must be by the end of the 3rd week. No refunds are given after the end of the official add/drop period. After the official add/drop period, students who choose to withdraw receive a grade of W for the course. The withdrawal slip must be signed by the student's academic coach. Every registered student who remains in a course is given a grade. Simply failing to attend classes does not constitute course withdrawal.

Students taking self-paced prerequisite courses in the School of Professional Studies may request to be withdrawn through the end of the 16th week. Once a final grade is given, a withdrawal will not be considered. Withdrawal requests must be submitted in the Student Gateway or by emailing professionalstudies@mcphs.edu. If the withdrawal is approved, students will be withdrawn from their course and receive a W on their transcript. No refunds will be given.

University Withdrawal

A student must complete an exit interview prior to withdrawing from the University. Boston and Worcester students must meet with a CASE representative; Manchester students must meet with a Student Affairs representative; and Online students must meet with their program director. The Withdrawal process includes an exit interview with a designated representative, the completion of a Withdrawal form, and acquiring signatures from Student Financial Services and Immigration Services (if applicable). Failure to complete the withdrawal process results in automatic failure in all courses in which the student is currently enrolled and forfeiture of any prorated tuition refund. Withdrawn students are not eligible for University services.

General Education Requirements

Preprofessional, general education and liberal arts distribution requirements for all baccalaureate and first professional degree programs are summarized below. Course sequences for the preprofessional and professional curriculum in a particular degree program may be found in the specific sections pertaining to each of the University's schools and divisions.

Placement in Mathematics Courses

Students are placed in mathematics courses based on their math placement exam scores, SAT or ACT scores, and degree program requirements. Any changes in assigned mathematics courses must be discussed with and approved by the coordinator of mathematics, an Associate Dean or the Dean in the School of Arts and Sciences before the end of the add/drop period at the beginning of the fall semester.

Oral Proficiency Requirement—Boston

All students who enter the University in any bachelor of science, bachelor of arts or first professional degree program must, as a requirement for graduation, demonstrate oral proficiency. In order to satisfy this requirement, students must meet the MCPHS Oral Proficiency Minimum Threshold as determined by oral communication faculty. Incoming students whose skills do not meet University standards must take LIB 253 Fundamentals of Oral Communication in Healthcare within the first year of matriculation. Placement is determined by an evaluation of their skills, using the oral proficiency rubric. Successful completion of LIB 253 Fundamentals of Oral Communication in Healthcare satisfies the oral proficiency requirement. This course carries general elective credit (but not humanities credit).

OPE Exemption

Students are exempt from the OPE requirement only if they are matriculated in a program that requires a baccalaureate degree as a condition of admission, or if they are in a certificate program.

Writing Proficiency Requirement—Boston

Students who enter the University without credit for LIB 111 (primarily first-year students) will be placed in a skills-building course, LIB 110 (Introduction to Academic Reading and Writing) or in LIB 111 (Expository Writing I). To meet the writing proficiency (WP) requirement, these students must complete either the LIB 110, LIB 111, LIB 112 sequence or the LIB 111, LIB 112 sequence, and they must continue to meet WP standards as these are monitored across the curriculum. Students placed in LIB 110 will earn general elective credit.

All students who have entered the University in any bachelor of science, bachelor of arts or first professional degree program *and* have credit for LIB 111 and LIB 112 (primarily transfer students) must meet WP standards as these are monitored across the curriculum.

To ensure all students achieve and maintain WP, the School of Arts and Sciences has developed guidelines for writing-intensive (WI) courses and a system for WP referrals. In addition, faculty are encouraged to incorporate writing emphases in their classes wherever possible.

In the School of Arts and Sciences, LIB 110, LIB 111, LIB 112, and all HUM courses are designated as WI. Faculty in other disciplines may offer WI courses if they meet the following criteria:

- The amount of required writing should be significant, approximately 3,750–5,000 words (15–20 pages) of graded writing. The total words/pages should be divided among two or more assignments, and at least one assignment should include a draft that students revise with instructor feedback. A single term paper / project is an option, but the project should include several smaller assignments (e.g., a project proposal, followed by a literature review or annotated bibliography, a completed draft, and a revised final project).
- Faculty should devote class time to instruction on writing practices in their disciplines (e.g., abstracts, writing style, citation conventions, and formats) and on strategies for successful completion of assignments; they should provide detailed writing assignment instructions and evaluation criteria.
- Faculty teaching WI courses should set aside a portion of the course grade (minimum of 40%) to be based on writing assignments (this is not grading for writing skills per se but for writing assignments that include demonstration of content learning).
- WI courses should have enrollments capped at 30 or fewer students.
- WI course faculty across the curriculum should employ shared proficiency and grading rubrics when assessing students' WP or evaluating writing assignments.

To continually reinforce WP standards, faculty across the curriculum use a shared WP rubric to identify students who appear to need additional skills development to meet WP standards. These students are referred to the University Writing Center, where the staff makes proficiency determinations. Based on individual situations, students may be assigned to writing tutors or workshops to address specific writing problems. Failure to complete an assigned workshop or activity could result in a grading penalty or an incomplete grade in the referring course (based on syllabus requirements).

The intent of the WP referral system is to integrate writing expectations, instruction, and development in disciplinary/professional contexts that build on foundations established in the general education curriculum.

Information Literacy Requirements—Boston

As a requirement for graduation, all undergraduate, preprofessional, and transfer students must demonstrate proficiency in information literacy by passing a series of three non-credit online courses - INF 110: Introduction to Research Essentials, INF 220: Intermediate Research Skills, and INF 330: Advanced Research Skills. INF 110 must be completed during the student's first year at MCPHS; most students will complete this course as a required part of Introduction to the Major. INF 220 is taken during either the second or third year, depending upon the student's major. INF 330 is taken during the required capstone, research methods, or other upper level course appropriate for each program.

Exemptions from General Education Requirements—Boston

Students enrolled in a certificate program or in a degree program for which a baccalaureate degree is an admission requirement are exempted from the core curriculum, oral and writing proficiency, and library module requirements. Students in the 30-month Physician Assistant Studies program (Boston) are an exception in that they are required to complete the library module requirement though they are exempt from the core curriculum and oral and writing proficiency requirements.

Exemptions from General Education Requirements—Worcester/Manchester

Students enrolled in degree programs on the Worcester and Manchester campuses are exempt from general education requirements, provided they have completed a baccalaureate degree at an accredited institution of higher education in the United States. (Applicants must still fulfill all prerequisite courses required for admission to their degree program.)

Medical Terminology Requirement

Competency in medical terminology is required of students in certain degree programs. Students usually meet this competency within their programs. A medical terminology course taken off campus is not awarded general elective credit in any program. All School of Medical Imaging and Therapeutics students in accelerated baccalaureate programs are required to pass (with a grade of C+ or higher) RSC 250 Elements of Clinical Care for the Radiologic Sciences prior to progressing into their first clinical internship course (NMT 330C or MRI 402 or RAD 201C or RTT 325C).

Students who are unsuccessful in their first attempt to pass RSC 250 may be delayed in progression in their curriculum while repeating the course. Note that students are allowed only two attempts to successfully complete a course. Failure to successfully achieve a grade of C+ or higher in the second attempt of RSC 250, therefore, will result in dismissal from the School of Medical Imaging and Therapeutics program.

Medical terminology is a prerequisite for admission to all fast track School of Medical Imaging and Therapeutics programs excluding MRI. Students may take this course online through the School of Professional Studies.

Introduction to the Major

All students entering the University as first-year students (including first year transfer students) must take a 1-semester-hour Introduction to the Major (ITM) during the fall semester. The seminar is designed to ease the transition from high school to college by orienting students to MCPHS resources, career opportunities, and the academic skills needed for classroom success.

Arts and Sciences Core Curriculum

The Core Curriculum consists of 40 semester hours (s.h.) in 6 different academic domains; Behavioral Sciences, Communication, Humanities, Natural Sciences, Numeracy, Social Sciences. Each academic domain consists of 2 categories of courses (e.g., Composition, Ethics, Statistics). Students are required to pass one course in each of the 12 categories, with the exception of Composition, which requires two courses. All students in baccalaureate and first professional degree programs are required to complete the Core Curriculum. Many degree programs specify which courses must be taken in specific disciplines.

Behavioral Sciences

Introduction to Behavioral Sciences (1 course, 3 s.h.)

LIB.120 Introduction to Psychology

Behavioral Sciences Elective (1 course, 3 s.h.)

BEH.XXX Behavioral Sciences

Communication

Composition (2 courses, 6 s.h.)

LIB.111 Expository Writing I

AND

LIB.112 Expository Writing II

Communication Studies (1 course, 3 s.h.)

LIB.220 Introduction to Interpersonal

Communication for Health Professionals

LIB.252 Introduction to Speech

Humanities

Ethics (1 course, 3 s.h.)

LIB.512 Healthcare Ethics

Humanities elective (1 course, 3 s.h.)

HUM.XXX Humanities

Natural Sciences

Life Sciences (1 course, 3 s.h.)

BIO.105 Concepts in Biology

BIO.110 Anatomy and Physiology I

BIO.151 Cell and Molecular Biology

Chemistry, with lab (1 course, 4 s.h.)

CHE.110/L Basic Chemistry I, with lab

CHE.113/L Chemistry and Society, with lab

CHE.131/L Chemical Principles I, with lab

Numeracy

Mathematics (1 course, 3 s.h.)

MAT.141 Algebra and Trigonometry

MAT.142 Mathematics for Nurses

MAT.143 Foundations of Algebra and Trigonometry

MAT.144 Business Mathematics and

Computer Applications

MAT.150 Precalculus

MAT.151 Calculus I

MAT.171 Calculus I (Advanced)

Statistics (1 course, 3 s.h.)

MAT.261 Statistics

Social Sciences

Introduction to Social Sciences (1 course, 3 s.h.)

LIB.133 American Culture, Identity
and Public Life

Social Sciences Elective (1 course, 3 s.h.)

SSC.XXX Social Sciences

On successful completion of the Core Curriculum, students will be able to demonstrate understanding of the *Discipline-Specific Content and Skills* for each discipline in the Core. This content and skill set is necessary for academic work in more advanced courses.

The Core Curriculum also promotes the development of broadly-applicable *Core Skills*, each of which is emphasized in multiple different contexts within the Core. *Core Skills* are foundational to all curricula; they are essential for academic and professional growth and success, regardless of field or discipline. On successful completion of the Core Curriculum, students will have **foundational** proficiency in these *Core Skills*; they will be able to:

Apply critical thinking skills and core knowledge;

Utilize problem-solving and reasoning skills;

Demonstrate effective communication skills;

Demonstrate information and data literacy skills;

Demonstrate effective numeracy skills;

Demonstrate global perspectives and cultural competency;

Demonstrate personal, interpersonal, and self-regulatory skills.

Minor Requirements

For those who desire further study in specialty areas, minors are available in American Studies, Biology, Business,

Chemistry, Gerontology, Health Humanities, Health Psychology, Nutrition, Performing Arts, Premedical Studies, Public Health, Women's and Gender Studies and Sustainability.

Students complete at least three (3) courses that are only applied to one minor; these courses may not be used to fulfill requirements for the major or another minor. Students declare minors by completing a Declaration of Minor form, and they must fulfill the minor requirements defined for their program, if different from below.

Requirements for completion of some minors vary for students in the Premedical Health Studies degree program. These students declare minors by completing a Declaration of Minor form, and they must fulfill the minor requirements defined for their program.

American Studies

Co-Coordinators: Dr. Martha Gardner and Dr. Kristen Petersen

The American Studies minor is designed to offer students an opportunity to coordinate liberal arts electives in several disciplines—behavioral sciences, literature, history, social and political sciences, and public health in the United States—to form a coherent body of knowledge in the study of American culture.

Required Courses

COURSE	TITLE	SEMESTER HOURS
LIB 530	Undergraduate Research Project (following completion of at least 12 semester hours in the minor)	3
SSC 430	The Fifties: Introduction to American Studies or	
SSC 431	The Sixties: Introduction to American Studies	3
TOTAL		6

Elective Courses

Three courses selected from the following list for a total of 9 semester hours:

COURSE	TITLE	SEMESTER HOURS
HUM 252	The Short Story	3
HUM 291	Introduction to Film	3
HUM 353	Literary Boston in the 19 th Century	3
HUM 357O	Immigrant Literature	3
HUM 458	Modern American Writers	3
PBH 435	Public Policy and Public Health	3
SSC 230	Cultural Anthropology	3
SSC 340	Survey of Modern American History	3
SSC 345	Immigrant Experience	3
SSC 353	Shattering the Glass Slipper: The Evolution of the Fairy Tale Heroine in American Culture	3
SSC 365	The Politics of Food	3
SSC 420	20 th Century Pop Music and Culture	3
SSC 430*	The Fifties: Introduction to American Studies	3
SSC 431*	The Sixties: Introduction to American Studies	3
SSC 440	Women in History	3
SSC 444	Cigarettes in American Culture	3
SSC 445O	The Irish in America	3
SSC 464	Social Justice Movements in the U.S.	3
SSC 495	Evolution of the Health Professions	3
TOTAL semester hours for minor		15

*If not taken for the required course

**Students may petition the minor coordinators to have HUM 450 and SSC 475 Selected Topic courses accepted to fulfill elective requirements.

Biology

Coordinator: Dr. Crystal Ellis

The Biology minor is designed to offer students an opportunity for additional and advanced-level study in the biological

sciences. The minor will prepare students for postgraduate study in biological and medical sciences.

Required Courses

Four advanced-level courses from the following list that are not required for the student's degree (or, for Premedical Health Studies majors, fulfill an advanced Biology elective):

COURSE	TITLE	SEMESTER HOURS
BEH 341	Biological Psychology	3
BIO 260	Molecular Biology	3
BIO 321	Nutrition Science	3
BIO 332	Genetics	3
BIO 345	Exercise Physiology	4
BIO 346	Applied Concepts in Public Health	3
BIO 405	Plagues of the Past, Present, and Future	3
BIO 430	Molecular Biology of Cancer	3
BIO 434	Immunology	3
BIO 440	Cell Biology	3
BIO 445	Applied Human Physiology	4
BIO 465	Medical Parasitology	3
BIO 455	Advanced Microbiology (with lab)	4
PBH 335	Human Sexuality	3
PBH 340	Environment and Public Health	3
PSB 328	Physiology/Pathophysiology I or BIO 351 Advanced Anatomy & Physiology I	4
PSB 329	Physiology/Pathophysiology II or BIO 352 Advanced Anatomy & Physiology II	4
PSB 440	Molecular Biotechnology	3
TOTAL		12–15

Chemistry

Coordinator: Dr. Songwen Xie

The Chemistry minor is designed to offer students an opportunity for additional and advanced-level study in the chemical sciences.

Required Courses

COURSE	TITLE	SEMESTER HOURS
CHE 234L	Organic Chemistry II Laboratory	1
CHE 314	Analytical Chemistry (with lab)	4
CHE 717	Instrumental Analysis (with lab) or	
CHE 340	Inorganic Chemistry (with lab)	4
PHY 272L	Foundations of Physics I Laboratory	1
PHY 274	Foundations of Physics II	3
PHY 274	Foundations of Physics II Lab	1
TOTAL		14

Gerontology

Coordinator: Dr. Devan Hawkins

The Gerontology minor seeks to (1) encourage students to develop an understanding of the complex meaning of aging, (2) provide students with a foundational understanding of the impact that an increasingly aging population will have on society, particularly the healthcare system, and (3) prepare students for clinical fields that involve care for older adults.

Required Courses

COURSE	TITLE	SEMESTER HOURS
PBH 375	Survey of Gerontology	3
BIO XXX	Physiology of Aging	3

SSC/HUM/BEH/PBH 532/530	
Directed Study or Undergraduate Research	3

TOTAL 9

Elective Courses

Six credits from the following courses:

COURSE	TITLE	SEMESTER HOURS
PBH XXX	Aging, Place & Health	3
PBH XXX	Disability & Health	3
PBH XXX	Social Services & Health Care Policy	3
BEH XXX	Aging & Adult Development	3
BEH 254	Death & Dying	3
BEH 352	Human Development through the Life Cycle	3
BEH 344	Integrative Therapies & Mental Health in Aging	3
PPB 534	Clinical Care for the Aging Patient	3
TOTAL		15

Health Humanities

Coordinator: Dr. Martha Gardner

The Health Humanities minor provides a coordinated curriculum of study that emphasizes the relevance of humanistic perspectives to illness experiences and the healthcare professions. Students must earn a minimum of 15 semester hours.

Required Courses

COURSE	TITLE	SEMESTER HOURS
HUM 345	Healthcare Humanities	3
HUM 456	Narrative and Medicine	3
Total		6

Elective Courses

Three courses from the following lists, including at least one HUM and one SSC course:

Humanities

COURSE	TITLE	SEMESTER HOURS
HUM 355	Science, Technology, and Values	3
HUM 452	Women Writers	3

Social Sciences

COURSE	TITLE	SEMESTER HOURS
SSC 432	Medical Anthropology (requires Cultural Anthropology prerequisite)	3
SSC 444	Cigarettes in American Culture	3
SSC 495	Evolution of the Health Professions	3

Behavioral Sciences

COURSE	TITLE	SEMESTER HOURS
BEH 254	Death and Dying	3
BEH 260	Lifestyle Medicine	3
BEH 405	Mind/Body Medicine	3
BEH 454	Stress and Illness	3

Health Psychology

Coordinator: Dr. Stacie Spencer

The Health Psychology minor is designed to offer students a solid foundation in the theories, approaches, and methods

of psychology as they relate to real-world issues, including health and well-being. Students must earn a minimum of 15 semester hours.

Required Courses

COURSE	TITLE	SEMESTER HOURS
BEH 250	Health Psychology	3
BEH 451	Research Methods in Health and Behavior	3
TOTAL		6

Elective Courses

Three additional BEH courses with at least one basic (traditional areas not directly associated with health issues) and one applied (courses that have a specific health-related focus) course. Lists of basic and applied courses may be found on the MCPHS website and at the Center for Academic Success and Enrichment, and will be provided to students when they are accepted into the minor.

Nutrition

Coordinator: Dr. Mary Potorti

As good nutrition is a foundation of health, MCPHS students may minor in Nutrition. This minor course of study will support all undergraduate programs at MCPHS as an enriching educational experience to study nutrition from a biopsychosocial perspective. It is interdisciplinary by design. It will provide a foundation in nutrition, especially for students who desire more knowledge in the field before deciding whether to further pursue nutrition through graduate study and/or professional development.

The minor will comprise 15 semester hours; 9 semester hours are from required courses, and 6 are from electives.

Required Courses

COURSE	TITLE	SEMESTER HOURS
BEH 353	Nutrition and Health	3
BIO 321	Nutrition Science	3
SSC 356	The Politics of Food	3
TOTAL		9

Elective Courses

Two courses selected from the following list for a total of 6 semester hours:

COURSE	TITLE	SEMESTER HOURS
BEH 260	Lifestyle Medicine	3
BIO 470	Biology of Obesity	3
HSC 301	Health Promotion	3
HSC 315	Planning Health Education and Promotion Programs	3
PBH 230	Peer Health Education	3
PBH 250	Introduction to Public Health	3
PBH 350	Global Health	3
PBH 432	Epidemiology of Chronic Diseases	3
LIB 530	Undergraduate Research	3
LIB 532	Directed Study	3

Students may also petition to apply credit from nutrition courses completed through the Colleges of the Fenway toward elective credits in this minor course of study.

Performing Arts (Colleges of the Fenway)

Coordinator: Dr. A. David Lewis

The Colleges of the Fenway minor in Performing Arts integrates performing experiences with classroom study of the performing arts: dance, music, theater, and performance art. The minor includes study, observation, and practice of the performing arts. It consists of Introduction to Performing Arts; three discipline-specific courses (dance, music, and theater); and one upper-level course, as well as three semesters of an approved performance ensemble.

Requirements

- A. Four academic courses as follows:
Introduction to the Performing Arts
Three courses, one each in music, dance, and theater
- B. One upper-level elective course
- C. Three semesters of participation in an approved co-curricular (noncredit) performing arts activity from the following:
COF Orchestra
COF Chorus
COF Dance Project
COF Theater Project
Emmanuel Theater Guild
Simmons Chorale

Information on available performing arts courses, the performance ensembles, and completion of the minor is available from Dr. Virginia Briggs, MCPHS advisor for the Minor in Performing Arts, in the School of Arts and Sciences; and Raymond Fahrner, Director, Office of Performing Arts, Colleges of the Fenway (tel.: 617.521.2075).

Premedical

Coordinator: Dr. Jennifer Wade

MCPHS offers a solid preparation for entrance into medical, dental, optometry, podiatry, or veterinary schools. Majors in Chemistry and Pharmacology/Toxicology follow a curriculum that meets or exceeds the minimum requirements of most medical schools. Majors in Medical and Molecular Biology, Pharmaceutical Sciences, Pharmacy, and Public Health may choose electives that also fulfill premedical requirements. Majors in Health Psychology who would like to fulfill premedical requirements do so through the BS Health Psychology with Premedical (MD) Track and are not eligible for the Premedical minor.

Medical schools vary in their recommendations beyond the minimum requirements. Students who choose the Premedical minor may tailor their preparation for specific medical schools by selecting appropriate electives. Opportunities also are available for excellent students to do research in a laboratory or clinical setting, thereby improving their skills and increasing the chance of admission to a medical school.

The Premedical minor is *not* appropriate for students who wish to pursue professional study in the Physician Assistant, Physical Therapy, or Occupational Therapy fields.

Required Courses

COURSE	TITLE	SEMESTER HOURS
BIO 151	Biology I: Cellular and Molecular Biology	3
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
BIO 255	Medical Microbiology	3
BIO 255L	Medical Microbiology Laboratory	1
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
CHE 132	Chemical Principles II	3
CHE 132L	Chemical Principles II Laboratory	1
CHE 231	Organic Chemistry I	3
CHE 231L	Organic Chemistry I Laboratory	1
CHE 232	Organic Chemistry II	3
CHE 234L	Organic Chemistry II Laboratory	1
MAT 151*	Calculus I	3
MAT 152*	Calculus II	3
PHY 270*	Foundations of Physics I	3
PHY 272L*	Foundations of Physics I Laboratory	1
PHY 274*	Foundations of Physics II	3
PHY 274L	Foundations of Physics II Laboratory	1
BIO 360**	Cellular Biochemistry or PSB331/332 Biochemistry I and II	4 or 6

* MAT 171 and 172 and PHY 280 and 284 may be substituted for these courses.

** Students may complete BIO 360 Cellular Biochemistry (4) in place of PSB 331/332.

Elective Courses

In addition to required courses, students seeking to earn a Premedical minor must complete three electives from the following list. The three electives must have three different prefixes.

COURSE	TITLE	SEMESTER HOURS
BEH 250	Health Psychology	3
BEH 260	Lifestyle Medicine	3
BEH 341	Biological Psychology	3
BEH 352	Human Development through the Life Cycle	3
BEH 405	Mind/Body Medicine	3
BEH 454	Stress and Illness	3
BEH 457	Drugs and Behavior	3
BIO 260	Molecular Biology	3
BIO 332	Genetics	3
BIO 430	Molecular Biology of Cancer	3
BIO 440	Cell Biology	3
BIO 434	Immunology	3
HUM 345	Healthcare Humanities	3
HUM 355	Science, Technology, and Values	3
HUM 452	Women Writers	3
HUM 456	Narrative and Medicine	3
PBH 330	Introduction to Epidemiology	3
PBH 335	Human Sexuality	3
PBH 435	Public Policy and Public Health	3
PPB 538	Global Infectious Diseases	3
PSB 412	Patients' Rights and Professionals' Liabilities	3
SSC 432	Medical Anthropology	3
SSC 444	Cigarettes in American Culture	3
SSC 495	Evolution of the Health Professions	3

Public Health

Coordinator: Dr. Keri J. Griffin

The Public Health minor provides a coherent curriculum in the foundational areas of public health: the population health perspective, biostatistics, and epidemiology. Students choose additional studies in public health areas of their interest (e.g., health promotion, community health, medical anthropology, health policy, or environmental health). The minor provides a complementary area of study for majors in Health Psychology, Medical and Molecular Biology, and Premedical Health Studies. It is available to other programs with general elective options.

Required Courses

COURSE	TITLE	SEMESTER HOURS
MAT 461	Biostatistics	3
PBH 250	Introduction to Public Health	3
PBH 330	Introduction to Epidemiology	3
TOTAL		9

Elective Courses

Two electives from the following list:

COURSE	TITLE	SEMESTER HOURS
PBH 260	Public Health Research Methods	3
PBH 335	Global Health	3
PBH 340	Environment and Public Health	3

PBH 335	Human Sexuality	3
PBH 420	Community Health	3
PBH 435	Public Policy and Public Health	3
PBH 380	Aging, Place, and Health	3
	Chronic Disease Epidemiology	3
	Field Epidemiology	3
PBH 360	Health Data Collection and Management	3
PBH 430	Infectious Disease Epidemiology	3
PBH 440	Introduction to SAS Programming	3
PBH 377O	Introduction to Maternal and Child Health	3
	Occupational Health	3
PBH 310O	Public Health Surveillance	3
PBH 375	Survey of Gerontology	3
PSB 377	Healthcare Management	3
SSC 230	Cultural Anthropology	3
SSC 444	Cigarettes in American Culture	3
SSC 464	Social Justice Movements in the US	3

Sustainability (Colleges of the Fenway)

Coordinator: Dr. Lana Dvorkin Camiel

The Colleges of the Fenway minor in Sustainability encourages students outside of environmental science itself to explore the connections of their career-directed studies to the linked issues of the natural world, finite resources and social justice. The minor is purposely designed for breadth of coverage with the intent for the student to explore various dimensions of sustainability that will inform their view of their major. The selection of specific courses within the minor is meant to be undertaken in consultation with the student's major advisor or another faculty member with an interest in issues of sustainability.

Requirements

A. One academic course (taken twice) as follows:

ENVI 201 Environmental Forum (taken twice), 3 semester hours

B. A total of 16 to 20 credits (depending on the college and credits), are required for the minor, with students taking four courses from at least two of the following groups:

Environmental Technology and Science

MCPHS:	HSC 301O	Health Promotion
	PPB 540E	Complementary and Alternative Medicine
	PPB 535	Herbal Supplements
	CHE 435	Green Chemistry
	BEH 454	Stress and Illness
WIT:	ARC 550	Urban Studies
	ARCH 482	Site Planning and Landscape
	ARCH 528	Environmental Systems
	ENVM 580	Energy Resources and Conservation
	ENVM 280	Environmental Ecology
	CHEM 400	Environmental Chemistry
	CHEM 550	Environmental Chemistry
	CIVT 350	Environmental Topics Design/Construction
	CCEV 417	Design for the Environment
	CIVT 600	Environmental Design and Construction
	CCEV 215	Water Resources Design/Management
	CCEV 350	Env Topics in Design Construction Ind
	CCEV 420	Sustainability in Built Environment
	MECH 540	Energy Analysis/CoGen Build Facilities
Simmons:	BIOL 104	Introduction to Environmental Science
	BIOL 245	Ecology
	CHEM 109	Chemistry and Consumption
	CHEM 227	Energy and Global Warming
	HON 308	Sustainability and Global Warming
	PHYS105	Science and Technology in the Everyday World
Emmanuel:	BIOL1112	Biology and Society
	BIOL 1211	Emerging Infectious Diseases
	BIOL 2105	Plant Biology
	BIOL 2107	Ecology
	BIOL 2151	Marine Biology
	CHEM 1104	Chemistry of Everyday Life
	CHEM 1111	Chemistry: World of Choices
	CHEM 1112	Chemistry: World of Choices
	CHEM 2113	Chemistry of Boston Waterways
	PHYS 1121	Energy and the Environment
	PHYS 1222	Energy and the Environment
MassArt:	EDAD 202	Methods and Materials
	EDAD 312	Net Zero House
	EDAD 302	Sustainable Architecture
	LAMS 320	Environmental Science

Political Policy/Economics

MCPHS:	PBH 435	Public Policy and Public Health
	SSC 495	Evolution of the Health Professions
Simmons:	ECON 247	Environmental Economics
	ECON 239	Government Regulation of Industry
	POLS 239	American Public Policy
	POLS 245M	Politics of Newly Industrialized States
Emmanuel:	ECON 2112	Politics of International Economic Relations
	ECON 3103	International Economy
	ECON 3109	Emerging Economies

	ECON 3113	Economics of Health Care
	ECON 3115	Economics and the Environment
	POLS 2203	Political Socialization
	POLS 3303	Street Democracy
	POLS 3305	Women in Global Politics
MassArt:	LASS 299	Global Black Studies
	LASS 357	Civil Liberties
Social Equity		
MCPHS:	NUR 702	Human Diversity, Social, and Policy Issues
	PPB 538	Global Infectious Diseases
	SSC 230	Cultural Anthropology
	SSC 240	Social Science Problems
	SSC 345	Immigrant Experiences
	SSC 432	Medical Anthropology
Simmons:	HIST 205	Global Environmental History
	MGMT 224	Socially Minded Leadership
	SJ 220	Working for Social Issues
	SOCI 241	Health Illness and Society
	SOCI	International Health
Emmanuel:	ART 2202	Art History
	ART 2204	From Globalization to Transnationalism
	PHIL 1115	Recent Moral Issues
	PHIL 1201	Global Ethics
	PHIL 3201	Race, Ethnicity and Ethics
	SOC 1111	Introduction to Sociology
	SOC 2105	Race, Ethnicity and Group Relations
	SOC 2107	The Urban World
	SOC 2127	Social Class, and Inequity
	SOC 2129	Cultural Geography
	THRS 2108	Religion and the Environment
	THRS 2301	Healthcare: Social Justice and Economics
	THRS 3133	Social Justice and Religious Traditions
MassArt:	HART 375	Landscape: Space and Place
	HART 404	Protecting Cultural Heritage

Women's and Gender Studies

Coordinator: Dr. Kristen Petersen

The interdisciplinary Women's and Gender Studies minor presents students with an understanding of gender across disciplines, maximizing the School's strengths in the social sciences, health and behavioral sciences, public health, biology, and the humanities. Women and men experience the world differently because socially constructed gender roles determine their spheres of influence, expectations for behavior, and health issues. Since MCPHS students are trained for occupations in healthcare fields, an understanding of the influence of gender in women's and men's lives is particularly relevant to their education.

Required Courses

COURSE	TITLE	SEMESTER HOURS
SSC 349	Introduction to Women's and Gender Studies	3

Two of the Following Courses

BEH 356	Gender Roles	3
PBH 335	Human Sexuality	3
SSC 230	Cultural Anthropology	3
SSC 440	Women in History	3

Two of the Following Elective Courses

BEH 351	Social Psychology	3
BEH 352	Human Development through the Life Cycle	3
BEH 458	Child and Adolescent Development	3
BIO 532	Directed Study	3
HUM 357	Immigrant Literature	3
HUM 458	Modern American Writers	3
LIB 532	Directed Study	3
PBH 435	Public Policy and Public Health	3
PBH 450J	Women and Public Health	3
PBH 805	Maternal and Child Health	3
SSC 353	Shattering the Glass Slipper: Evolution of Fairy Tale Heroine in American Culture	3
SSC 432	Medical Anthropology	3
SSC 440	Women in History	3
SSC 464	Social Justice Movements in the US	3
SSC 495	Evolution of the Health Professions	3

TOTAL		15
-------	--	----

*These courses may also be used to fulfill Elective course requirements.

**Students may petition the Minor Coordinator to have HUM 450 and SSC 475 Selected Topics courses accepted to fulfill elective requirements

MCPHS University–Boston

School of Arts and Sciences

More information specific to the Boston campus may be found in the following sections: Facilities, Interinstitutional Cooperation, and Student Services.

Delia Castro Anderson, PhD, Professor of Biology, Associate Provost for Undergraduate Education and Dean

Kate Bresonis, PhD, Assistant Professor of English and Associate Dean

Joe DeMasi, PhD, Professor of Biology and Chair of the Department of Mathematics and Natural Sciences

Keri Griffin, PhD, Associate Professor of Public Health and Chair of the Department of Humanities, Behavioral, and Social Sciences

J. Alex Trayford, MA, MPhil, Assistant Dean of Pre-Health Professions Advising

Marc Piquette, PhD, Chemistry Instrumentation Specialist

Professors Anderson, Bodwell, Chang, Dacey (Emerita), DeMasi, Farkas, Gorman, Hart, Harvan, Ho, Kentner, Luca, Rainchuso, Richman, Spencer; Tebbe-Grossman (Emerita); Associate Professors Barden, Briggs, L. Foye (Emerita), Gardner, Griffin, Kelley, Nelson, Petersen, Tanner (Emeritus), Xie; Assistant Professors Bresonis, Broadbelt, Levy, Chase, Ellis, Gaines, Gochen, Gordon, Heising, Horowitz-Willis, Kale, Potorti, Ranade, Ruelens, Shifley, Tallon, Wade, Young; Instructors Bouchard, Casteel, Cole-French, Cross, Davis, DePierro, Gleeson, Greene, Grandy, Habershaw, Hawkins, Jana, Johnson, Lacina, Lewis, Macy, Poulos, Peden, Schneider, Stokes, Van Dellen

Degree Programs

- Bachelor of Arts in Health Humanities
- Bachelor of Science in Chemistry
- Bachelor of Science in Chemistry / Master of Science in Pharmaceutical Chemistry
- Bachelor of Science in Health Psychology
- Bachelor of Science in Health Sciences
- Bachelor of Science in Health Sciences Completion*
- Bachelor of Science in Medical and Molecular Biology
- Bachelor of Science in Premedical Health Studies
- Bachelor of Science in Public Health
- Bachelor of Science in Public Health/ Master of Public Health*
- Master of Health Sciences
- Master of Public Health*
- Doctor of Health Sciences
- Graduate Certificate in Public Health
- Undergraduate Academic Bridge Program

* Boston and Online programs

Technical Standards for the School of Arts and Sciences*

The School of Arts and Sciences has specified the following nonacademic criteria (“technical standards”), which all students are expected to meet, with or without reasonable accommodation, in order to participate in the educational programs of the school.

Observation

Students must be able to carry out procedures involved in the learning process that are fundamental to the courses offered at the University. Students are expected to actively participate in all demonstrations / laboratory exercises in the basic sciences, and to learn and function in a wide variety of didactic settings in science, humanities, and social and behavioral sciences courses. Such observation and information acquisition requires the functional use of visual, auditory, and somatic sensation. Students must have sufficient vision to be able to observe demonstrations, experiments, and laboratory exercises in the sciences, including computer-assisted instruction. They must be able to view images via a microscope.

Communication

Students must be able to communicate effectively in English with faculty, students, administrators, and peers in settings where communication is typically oral or written. They should be able to speak, hear, and observe in order to be effectively involved in the didactic learning process. They are expected to acquire, assimilate, interpret, integrate, and apply information from direct observation, oral communication, written messages, films, slides, microscopes, and other media.

Motor and Sensory

Students must possess sufficient motor function, fine motor skills, and sensory skills to perform the requirements identified in their respective professional career track. They should possess sufficient motor function to execute the necessary movements to participate in the laboratory portion of the science courses. Such actions require coordination of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision.

* These technical standards were adapted from *Report of the Special Advisory Panel on Technical Standards for Medical School Admission*, American Association of Medical Colleges, 2008.

Bachelor of Arts in Health Humanities

An undergraduate major in Health Humanities. There is a growing recognition of the value of interdisciplinary humanities study as preparation for advanced graduate work and professional practice. With a focus on the study of creativity, cultural expression, and key concepts organizing human experience, a degree in Health Humanities fosters

- imagination
- empathy
- critical thinking

Health Humanities study, practiced through the skills of reading, writing, research, and artistic expression

- promotes self-awareness;
- brings critical perspective to the discourses of illness and wellness; and
- bridges gaps in communication and understanding amongst professional and lay audiences.

Drawing from existing resources, courses, and expertise, MCPHS University offers a degree program combining study of health with the humanities, construed broadly to include literature, philosophy, the arts, history, anthropology, and sociology. Our baccalaureate degree program in Health Humanities will provide students with a rigorous program that will prepare them for further study and careers in health care, public health and policy, law, education, journalism, and related fields.

Students will satisfy their general education requirements. The Health Humanities Major will consist of 12 required classes - 5 program requirements and 7 program electives. Students can take additional program requirements to satisfy their elective requirements if there is no significant replication of course material from previously taken program requirement classes as agreed to by the Program Director.

The program requirements are the following (one each):

- Introduction to health humanities
- A course on global health issues
- A course on anthropology, sociology, and history of health
- A course on narrative and health/medicine
- A capstone seminar

Majors can also enroll in a Directed Study course with a suitable curriculum, if a particular required course is unavailable.

The Health Humanities major has elective openings that permit completion of minors.

Curriculum: Bachelor of Arts in Health Humanities

Year I-fall

COURSE	TITLE	SEMESTER HOURS
LIB 111	Expository Writing I	3
BIO 105	Concepts in Biology	3
PBH 250	Introduction to Public Health	3
ITM 101	Introduction to the Major	1
CHE 113	Chemistry and Society (w/lab) OR	
CHE 110	Basic Chemistry I	3
CHE 110L	Basic Chemistry I Laboratory	1
TOTAL		14

Year I-spring

COURSE	TITLE	SEMESTER HOURS
LIB 112	Expository Writing II	3
MAT 1XX	Math Course (any 100 level)	3
LIB 133	American Culture, Identity, and Public Life	3
LIB 120	Introduction to Psychology	3
MAT 261	Statistics	3
TOTAL		15

Year II-fall

COURSE	TITLE	SEMESTER HOURS
HUM 230	Introduction to Health Humanities	3
LIB 220	Introduction to Interpersonal Communication for Health Professionals	3
	Program Requirement	3
	Humanities Elective	3
	General Elective	3
TOTAL		15

Year II-spring

TOTAL		15

Year IV-spring

COURSE	TITLE	SEMESTER HOURS
HUM 480	Health Humanities Capstone	3
	Program Elective	3
	Program Elective	3
	General Elective	3
	General Elective	3
TOTAL		15

Total number of credits to complete degree requirements: 122 semester hours

*Incoming students who are interested in adding a specialization (e.g., a pre-med minor) should speak to the program's director to make the appropriate changes to the curriculum map.

*Program requirements include one course on global health issues, one course on anthropology, sociology, and history of health, one course on narrative and health/medicine. Students are encouraged to discuss the optimal ordering of the classes with the Program Director.

Available Courses for the Major

Courses that satisfy the Introduction to Health Humanities component:

MCPHS University
HUM 230 Introduction to Health Humanities

Courses that satisfy the Global Health component:

MCPHS University
PBH 350 Global Health

Simmons University
CHEM 221 Cultural Ecology and Sustainability (a travel course to Iceland)
SOC 245 Global Health
WGST 200 Women, Nation, Culture

Courses that satisfy the Anthropology, Sociology, and History of Health component:

MCPHS University
SSC 230 Cultural Anthropology
SSC 356 Politics of Food
SSC 432 Medical Anthropology
SSC 495 Evolution of the Health Professions
SSC 444 Cigarettes in American Culture
SSC 349 Introduction to Women's and Gender Studies
SSC 354 The Family in Society

Simmons University
AST/SOCI/WGST 232 Race, Gender and Health
SOC 241 Health, Illness and Society
SOC 275 Birth and Death

SOCI 249	Inequalities
SOCI 345	Health Systems and Policy
SOC 2200	Drug and Society

Courses that satisfy the Narrative and Health/Medicine component:

MCPHS University	
HUM 3400	Cancer and Comic Books
HUM 3750	Modern Novels of the Afterlife
HUM 444	Creative Writing
HUM 450.AJO	Graphic Medicine
HUM 456	Narrative and Medicine (Narrative)

Wentworth Institute of Technology	
ETHS 3800-01	Literature and Madness
HUMN3800 (Special Topics)	Illness and Metaphor

Courses that satisfy the Program Elective component (7 total):

MCPHS University	
BEH 250	Health Psychology
BEH 254	Death and Dying
BEH 260	Lifestyle Medicine
BEH 340	Psychology of Aggression
BEH 345	Myths and Misconception in Psychology
BEH 350	Abnormal Psychology
BEH 351	Social Psychology
BEH 352	Human Development through the Life Cycle
BEH 356	Gender Roles
BEH 357	Positive Psychology
BEH 358	Theories of Personalities
BEH 454	Stress and Illness
BEH 458	Child and Adolescent Development
HUM 355	Science, Technology and Values
PBH 335	Human Sexuality
PBH 450D	Public Health Perspectives on Trauma
PBH 430	Infectious Disease Epidemiology
PBH 432	Chronic Disease Epidemiology

Emmanuel College	
POLSC 2801	Food Policy and Social Justice
PHIL 3110	Philosophy of Psychiatry
HONOR 2503	Ethics and Mental Health
ECON 3113	Economics of Health Care

Simmons University	
PHIL 139	Environmental Ethics
PSYC 239	Psychology of Aging
PSYC 237N	Life Span Development
SW 251	Human Behavior in the Social Environment

Wentworth Institute of Technology	
PHIL 3800	Designing the Good Life
HUMN 3800 (Special Topics)	Greek and Roman Elements of Medical Terminology
PSYC 4160	Sports Psychology

Bachelor of Science in Chemistry

The Bachelor of Science in Chemistry program is an undergraduate degree that prepares students for a number of employment and postgraduate study opportunities. These include entry-level laboratory positions; postgraduate certificate studies leading to careers in chemical, pharmaceutical, and biotech industry; graduate studies in chemistry and biochemistry leading to careers in research, industry, and education; and medical and professional schools' applications.

The curriculum design provides a broad foundation in chemistry. Major requirements in chemistry include organic chemistry, analytical chemistry, physical chemistry, inorganic chemistry, biochemistry, and stereochemistry. Additionally, this program design takes advantage of the university's strengths in the pharmaceutical sciences. Students will obtain experience in biotechnology techniques and will learn the principles of drug design and mechanism of action. In the fourth year, a pharmaceutical chemistry course will provide a synthetic capstone experience. Students will also be encouraged to participate in undergraduate research opportunities at the university or in research laboratories in the local area.

To remain in good academic standing in the Bachelor of Science in Chemistry program, students must maintain a cumulative 2.0 grade point average (GPA). To meet the residency requirement for the BS, students must complete at

least 64 semester hours at the University.

Curriculum: Bachelor of Science in Chemistry

Year I—fall

PSB 802	Chemistry of Macromolecules	3
PSB 815	Drug Metabolism	3
PSB 820	Advanced Medicinal Chemistry I	3
PSB 851	Bio-organic Chemistry	2

Bachelor of Science in Chemistry/ Master of Science in Pharmaceutical Chemistry

The Bachelor of Science in Chemistry / Master of Science in Pharmaceutical Chemistry program is designed for students who are interested in a career in chemistry. It allows students to obtain a bachelor's degree and a master's degree in five years instead of the six to seven years that it would take to complete two degrees separately. The curriculum design provides a broad foundation in chemistry. Major requirement includes organic chemistry, analytical chemistry, physical chemistry, inorganic chemistry, biochemistry, stereochemistry, pharmaceutical chemistry, and heterocyclic chemistry at the graduate level. Additionally, this program is designed to take advantage of the University's strengths in the pharmaceutical sciences. Students will obtain experience in biotechnology techniques and will learn the principles of drug design and mechanism of action.

To remain in good academic standing in the Bachelor of Science in Chemistry program, students must maintain a cumulative 2.0 grade point average (GPA). To progress into the Master of Science program, students must apply at the end of their third year, successfully complete an interview, and have an overall GPA of at least 3.0, as well as a 3.0 or better GPA in all BIO, CHE, MAT, and PHY courses. Students must maintain a 3.0 GPA and get a B or better grade in each graduate level course to remain in good academic standing in the MS program. To meet the residency requirement for the BS, students must complete at least 64 semester hours at the University. All fourth- and fifth-year requirements for the MS degree must be completed at the University.

The BS/MS includes both a research project and an internship, ensuring that graduates will be prepared to work in chemical, pharmaceutical, and biotech industry, or pursue a PhD in chemistry or biochemistry. Students must be enrolled for two summers in order to complete the research project. There are two options to complete the research requirement, the lab-based research and the literature-based research. MS students have the opportunity to be teaching assistants. Students should understand that being a TA takes time from conducting research. If a student chooses to teach, it is not guaranteed that he/she can graduate on time. Students in the sixth year and beyond should register for CHE 895 Graduate Study Extension (0 Cr) for fall and spring semesters. Students have at most five years to complete the MS program, starting from the fall of their fourth year when they are admitted to the MS program.

Year II—spring

COURSE	TITLE	SEMESTER HOURS
CHE 232	Organic Chemistry II	3
CHE 234L	Organic Chemistry II Laboratory	1
CHE 314	Analytical Chemistry (with lab)	4
INF 210	Survey of Literature of Chemistry	1
LIB 252	Introduction to Speech	3
PHY 284	Physics II	3
PHY 284L	Physics II Laboratory	1
TOTAL		16

Year III—fall

COURSE	TITLE	SEMESTER HOURS
CHE 317	Instrumental Analysis (with lab)	4
CHE 365	Thermodynamics and Kinetics (with lab)	4
LIB 512	Healthcare Ethics	3
BIO 360	Cellular Biochemistry	4
TOTAL		15

Year III—spring

COURSE	TITLE	SEMESTER HOURS
CHE 340	Inorganic Chemistry (with lab)	4
CHE 367	Quantum Mechanics and Molecular Structure	3
CHE 367L	Quantum Mechanics and Molecular Structure Laboratory	1
CHE 333L	Introductory Biochemistry Laboratory	1
CHE 755	Stereochemistry	3
	Distribution Elective	3
TOTAL		15

Curriculum: Master of Science in Pharmaceutical Chemistry

G1—fall

COURSE	TITLE	SEMESTER HOURS
CHE 731	Advanced Organic Chemistry	4
CHE 714	Spectroscopic Analysis (with lab)	3
PSB 346	Physico-chemical Properties of Drug Molecules	3
	Distribution Elective	3
	Advanced Course	3
TOTAL		16

G1—spring

COURSE	TITLE	SEMESTER HOURS
CHE 445L	Experimental Methods in Chemistry	3
CHE 450	Pharmaceutical Chemistry I	3
CHE 710	Seminar	1
CHE 880	Research or	
CHE 885	Literature Based Research	3
	Advanced Courses	4-6
TOTAL		14-16

G1—summer*

COURSE	TITLE	SEMESTER HOURS
CHE 880	Research or	
CHE 885	Literature Based Research	3

G2—fall

COURSE	TITLE	SEMESTER HOURS
CHE 711	Seminar	1
CHE 751	Pharmaceutical Chemistry II (with lab)	4
CHE 810	Heterocyclic Chemistry	2
CHE 880	Research or	
CHE 885	Literature Based Research	3
TOTAL		10

G2—spring*

COURSE	TITLE	SEMESTER HOURS
CHE825	Internship	9

G2—summer*

COURSE	TITLE	SEMESTER HOURS
CHE 880	Research or	
CHE 885	Literature Based Research	3

*CHE 825 internship could be taken in either of the three semesters, G1—summer, G2—spring, or G2—summer. Research will be taken in the other two semesters.

Total credits to complete BS/MS degree requirements: 150 semester hours

Advanced CHE/BIO/PSB Courses

*At least one of the three Advanced Courses must be a CHE course from this list.

COURSE	TITLE	SEMESTER HOURS
BIO 332	Genetics	3
BIO 430	Molecular Biology of Cancer	3
BIO 434	Immunology	3

BIO 440	Cell Biology	3
BIO 470	The Biology of Obesity	3
CHE 435	Green Chemistry (with lab)	3
CHE 437	Computational Methods in Chemistry	3
CHE 470	Characterization of Solids	3
CHE 530	Undergraduate Research Project	2
PSB 460	Principles of Toxicology I	3
PSB 461	Principles of Toxicology II	3
PSB 802	Chemistry of Macromolecules	3
PSB 815	Drug Metabolism	3
PSB 820	Advanced Medicinal Chemistry I	3
PSB 851	Bio-organic Chemistry	2

Bachelor of Science in Health Psychology

The role of behavioral factors in health promotion, disease prevention, treatment of illness, and health policy has become one of the most interesting and fast-developing topics in the arena of healthcare. In response to this phenomenon, the four-year Bachelor of Science in Health Psychology program was developed.

The Health Psychology major allows students the flexibility to prepare for bachelor-level careers across a variety of health-related and other occupational areas, or for further study in psychology, occupational therapy, physical therapy, public health, social work, medicine, and other professions. Through a three-course seminar series, students in the Health Psychology program explore career options; identify occupations that best fit their values, skills, and interests; and learn how to market themselves to potential employers and graduate admission committees.

One of only a few in the country, the MCPHS Health Psychology major produces graduates with a range of knowledge in psychology, a strong preparation in the basic sciences and liberal arts, and an informed sense of healthcare issues from other fields such as sociology, law, ethics, literature, history, and healthcare administration. Students receive training in research methods and statistics. In their senior year, Health Psychology majors engage in individually tailored field placements in settings that allow students to apply their knowledge and receive practical experience.

Health Psychology majors have the option of choosing one of several minors. These minors develop depth of knowledge in a focal area that complements the interdisciplinary design of the degree program.

To remain in good academic standing, students must maintain a cumulative 2.0 grade point average (GPA). To meet the residency requirement for the Bachelor of Science in Health Psychology degree, students must complete at least 62 semester hours at the University.

Curriculum: Bachelor of Science in Health Psychology

Year I—fall

COURSE	TITLE	SEMESTER HOURS
BIO 151*	Biology I: Cell and Molecular Biology	3
ITM 101	Introduction to the Major	1
LIB 111	Expository Writing I	3
LIB 120	Introduction to Psychology	3
MAT	Math course determined by placement	3
TOTAL		13

** After consultation with the program director, students may substitute BIO 110 and 210 (Anatomy and Physiology I and II) for BIO 151 and 152.*

Year I—spring

COURSE	TITLE	SEMESTER HOURS
BEH 250	Health Psychology	3
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
LIB 112	Expository Writing II	3
LIB 133	American Culture, Identity, and Public Life	3

MAT 197	Computer Applications	3
TOTAL		16

Year II—fall

COURSE	TITLE	SEMESTER HOURS
CHE 110	Basic Chemistry I	3
CHE 110L	Basic Chemistry I Laboratory OR	1
	CHE 113 OR	4
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
MAT 261	Statistics	3
PBH 250	Introduction to Public Health	3
	Two Additional Required Courses*	6
TOTAL		16

Year II—spring

COURSE	TITLE	SEMESTER HOURS
BEH 101	Health Psychology Seminar I	1
BEH 451	Research Methods in Health and Behavior	3
LIB 220	Introduction to Interpersonal Communication for Health Professionals	3
MAT 461	Biostatistics	3
	Two Additional Required Courses*	6
TOTAL		16

Year III—fall

COURSE	TITLE	SEMESTER HOURS
BEH 456	Applications of Research Methods	3
LIB 512	Healthcare Ethics	3
	Three Additional Required Courses*	9
TOTAL		15

Year III—spring

COURSE	TITLE	SEMESTER HOURS
BEH 102	Health Psychology Seminar II	1
PSB 412	Medical Patients' Rights and Professionals' Liabilities	3
	Four Additional Required Courses*	12
TOTAL		16

Year IV—fall

COURSE	TITLE	SEMESTER HOURS
BEH 103	Health Psychology Seminar III	1
LIB 590	Health Psychology Field Placement I	3
	Four Additional Required Courses*	12
TOTAL		16

Year IV—spring

COURSE	TITLE	SEMESTER HOURS
LIB 592	Health Psychology Capstone Seminar	3
	Three Additional Required Courses*	9
TOTAL		12

Total credits to complete Bachelor of Science degree requirements: 120 semester hours

***Additional Required Course**

BEH 260 Lifestyle Medicine

BEH 341 Biological Psychology

BEH 350 Abnormal Psychology
 BEH 352 Human Development
 Two Health-Specific BEH Courses**
 Two HUM Elective Courses
 Two SSC Elective Courses
 Eight General Elective Courses

****Health-Specific BEH Courses**

BEH 254 Death and Dying
 BEH 353 Nutrition and Health
 BEH 344 Integrative Therapies and Mental Health in Aging
 BEH 405 Mind/Body Medicine
 BEH 454 Stress and Illness
 BEH 457 Drugs and Behavior

Bachelor of Science in Health Psychology, Occupational Therapy Pathway

Year I-fall

COURSE	TITLE	SEMESTER HOURS
ITM 101	Introduction to the Major	1
LIB 111	Expository Writing	3
LIB 120	Introduction to Psychology	3
MAT	Math course Determined by Placement	3
MAT 197	Computer Applications	3
TOTAL		13

Year I-spring

COURSE	TITLE	SEMESTER HOURS

Total Undergraduate Credits: 92

Additional Required Courses

- BEH 260 Lifestyle Medicine
- BEH 341 Biological Psychology
- BEH 350 Abnormal Psychology
- BEH 458 Child and Adolescent Development (required for MSOT pathway students only)
- Health-Specific BEH Course**
- HUM Elective Course
- SSC Elective Course

Health-Specific BEH Courses**

- BEH 254 Death and Dying
- BEH 353 Nutrition and Health
- BEH 344 Integrative Therapies & Mental Health in Aging
- BEH 405 Mind/Body Medicine
- BEH 454 Stress and Illness
- BEH 457 Drugs and Behavior

BSHP/MSOT Pathway students who do not transition to the MSOT program in Year 4 are required to complete the following undergraduate coursework:

- A second Health-Specific BEH
- A second HUM Elective Course
- A second SSC Elective Course
- Seven General Electives

Occupational Therapy Year I – fall

COURSE	TITLE	SEMESTER HOURS
OTH 500	Contemporary Theory in Occupational Therapy Practice	3
OTH 505	Clinical Reasoning in Occupational Therapy	3
OTH 510	Practice Engagement: Mental Health	3
OTH 511	Practice Engagement: Therapeutic Groups	3
OTH 520	Scholarship in Practice: Evidence-Based Practice	3

TOTAL	15
--------------	-----------

Occupational Therapy Year I—spring

COURSE	TITLE	SEMESTER HOURS
OTH 525	Practice Engagement: Environments and Technology (with lab)	4
OTH 530	Motor Performance Across the Lifespan (with lab)	4
OTH 535	Scholarship in Practice: Methodologies	3
OTH 540	Practice Engagement: Assessment Fundamentals Across the Lifespan	3
OTH 565	Apprenticeship: Community Mental Health (Level I)	3
TOTAL		17

Bachelor of Science in Health Psychology, Physical Therapy Pathway*Year I—fall*

COURSE	TITLE	SEMESTER HOURS
BIO 151/150L	Biology I: Cell and Molecular Biology (with lab)	4
ITM 101	Introduction to the Major	1
LIB 111	Expository Writing I	3
LIB 120	Introduction to Psychology	3
MAT 151	Calculus I	3
TOTAL		14

Year I—spring

COURSE	TITLE	SEMESTER HOURS
BEH 101	Health Psychology Seminar I	1
BEH 250	Health Psychology	3
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
LIB 112	Expository Writing II	3
LIB 133	American Culture, Identity, and Public Life	3
MAT 152	Calculus II	3
TOTAL		17

Year II—fall

COURSE	TITLE	SEMESTER HOURS
CHE 110	Basic Chemistry I	3
CHE 110L	Basic Chemistry I Laboratory	1
MAT 261	Statistics	3
	Three Additional Required Courses*	9
TOTAL		16

Year II—spring

COURSE	TITLE	SEMESTER HOURS
BEH 102	Health Psychology Seminar II	1
BEH 451	Research Methods in Health and Behavior	3
CHE 210	Basic Chemistry II	3
CHE 210L	Basic Chemistry II Laboratory	1
LIB 220	Introduction to Interpersonal Communication for Health Professionals	3
	Two Additional Required Courses*	6
TOTAL		17

Year III—fall

COURSE	TITLE	SEMESTER HOURS
BEH 103	Health Psychology Seminar III	1
BIO 351	Advanced Anatomy and Physiology I (with lab)	4
LIB 512	Healthcare Ethics	3

LIB 590	Health Psychology Field Placement I	3
PHY 270/272L	Foundations of Physics I (with lab)	4
	One Additional Required Course*	3
TOTAL		18

Year III—spring

COURSE	TITLE	SEMESTER HOURS
BIO 345O/345OL	Exercise Physiology (with lab)	4
BIO 352/352L	Advanced Anatomy and Physiology II (with lab)	4
PHY 274	Foundations of Physics II	3
PHY 274L	Foundations of Physics II Laboratory	1
	One Additional Required Course*	3
TOTAL		15

Additional Required Courses*

BEH 260 Lifestyle Medicine
 BEH 341 Biological Psychology
 BEH 350 Abnormal Psychology
 BEH 352 Human Development Through Life Cycle
 Health-Specific BEH Course
 HUM Elective
 SSC Elective

Health-Specific BEH Courses**

BEH 254 Death and Dying
 BEH 353 Nutrition and Health
 BEH 344 Integrative Therapies & Mental Health in Aging
 BEH 405 Mind/Body Medicine
 BEH 454 Stress and Illness
 BEH 457 Drugs and Behavior

BSHP/DPT Pathway students who do not transition to the DPT program in Year 4 are required to complete the following undergraduate coursework:

A second Health-Specific BEH
 A second HUM Elective Course
 A second SSC Elective Course
 BEH 456 Applications of Research Methods
 LIB 592 Health Psychology Capstone
 MAT 461 Biostatistics
 PBH 250 Introduction to Public Health
 PSB 412 Medical Patients' Rights and Professionals' Liabilities

Doctor of Physical Therapy Pathway Year I-fall

COURSE	TITLE	SEMESTER HOURS
PTH 501	PT as a Profession	2
PTH 510	Foundations of PT Management I (with lab)	3
PTH 520	Clinical Medicine and Pathology I	3
PTH 530	Clinical Human Anatomy I (with lab)	6
PTH 552	PT in the Acute Care Environment (with lab)	2
PTH 570	Integrated Clinical Education I	2
TOTAL		18

Doctor of Physical Therapy Pathway Year I-spring

COURSE	TITLE	SEMESTER HOURS
PTH 515	Foundations of PT Management II (with lab)	3
PTH 525	Clinical Medicine and Pathology II	2

PTH 540	Evidence for PT Practice I	2
PTH 558	Clinical Kinesiology (with lab)	3
PTH 560	Standardized Measurement in PT Practice (with lab)	2
PTH 652	Neuroscience (with lab)	4
PTH 575	Integrated Clinical Education II	2
<hr/>

 BEH 344 Integrative Therapies & Mental Health in Aging
 BEH 405 Mind/Body Medicine
 BEH 454 Stress and Illness
 BEH 457 Drugs and Behavior

Bachelor of Science in Health Sciences

The mission of the entry-level Bachelor of Science in Health Sciences (BSHS) 4-year program is to provide a strong foundation of general education, health sciences, and core competence for a range of non-clinical and clinical health careers.

The goals of the entry-level BSHS 4-year program are to provide:

- an opportunity for students to earn a BS in Health Sciences, with a broad foundational knowledge base in math and the basic biological, chemical, social, and behavioral health sciences;
- opportunities for the development and demonstration of interpersonal, oral and written communications, critical thinking, information literacy, and research design skills;
- a comprehensive general education that includes an understanding of healthcare delivery, healthcare ethics, and interpersonal communications in healthcare;
- a broad introduction to applied health sciences in health wellness and promotion, health systems navigation, leadership and teamwork, health and safety, health equity, public health and policy, and health services research;
- curricular and experiential opportunities for students to explore the wide range of clinical and non-clinical career options in the healthcare industry; and
- individualized academic advising and career mentoring for students who are undecided about their preferred health sciences career pathway; for students who are interested in career in health promotion and certification eligibility as Health Education Specialists; and for students who are interested in preparing for admissions to post-baccalaureate programs of study in healthcare professions.

NOTE: Students are admitted to the Bachelor of Science in Health Sciences – General Concentration. Students may decide to remain in the General Concentration or select and declare the Bachelor of Science in Health Sciences - Health Education and Promotion Concentration to pursue the Health Education Specialist certification eligibility.

Curriculum: Bachelor of Science in Health Sciences (General Concentration)

NOTE: Entry-level students must complete the following courses at MCPHS, or receive transfer credit for equivalent courses (higher-level science and mathematics courses may be substituted with approval of the program director)

Year I—fall

COURSE	TITLE	SEMESTER HOURS
BIO110/L	Anatomy & Physiology I (with lab)	4
CHE 110	Basic Chemistry I	3
CHE 110L	Basic Chemistry I Laboratory	1
ITM 101	Introduction to the Major	1
LIB 111	Expository Writing I	3
LIB 210	Introduction to Psychology	3

COURSE	TITLE	SEMESTER HOURS
OTH 525	Practice Engagement: Environments and Technology (with lab)	4
OTH 530	Motor Performance across the Lifespan (with lab)	4

OTH 535	Scholarship in Practice: Methodologies	3
OTH 540	Practice Engagement: Assessment Fundamentals across the Lifespan	3
OTH 565	Apprenticeship: Community Mental Health (Level I)	3
<hr/>		
TOTAL		17

NOTE: Upon completion of the 122 credits for BSHS, the Bachelor of Science in Health Sciences degree is conferred. Students then continue with successful completion of the MSOT requirements for conferral of the Master's degree,

Bachelor of Science in Health Sciences/BSN (Postbaccalaureate) Dual Degree

The Bachelor of Science in Health Sciences (BSHS)/BSN (Postbaccalaureate) Dual Degree program provides a pathway to nursing for students not yet holding a BS degree but interested in joining the BSN (Postbaccalaureate) program. The program will allow students to earn a BSHS while at the same time completing some BSN courses that can then be used in the BSN (Postbaccalaureate) program. The only students who will be considered for this dual degree option are those who can fully complete prerequisites prior to matriculation. Further information may be found in the MCPHS University–Boston: School of Nursing section of the Catalog.

NOTE: Upon completion of the 122 credits for BSHS, the Bachelor of Science in Health Sciences degree is conferred. Students then continue with successful completion of the DPT requirements for conferral of the Doctor of Physical Therapy degree.

Bachelor of Science in Health Sciences Completion, Online

The Health Sciences degree completion option is designed for transfer students with an earned associate degree in an allied health discipline such as dental hygiene, radiography, or respiratory therapy and who possess current registration, certification or licensure.

Prerequisites

- An associate degree in an allied health discipline from a programmatically and/or regionally accredited institution
- Current registration, certification, or licensure in an allied health discipline
- A recommended cumulative GPA of 2.5 or higher

ARTS AND SCIENCES COURSES

Associate degree applicants will have met all or most of the Arts and Sciences general education course requirements. Minimum of 34 credits is required (as listed below). Students may complete missing general education course requirements at MCPHS University.

Life Sciences: one course	3
Chemistry: one course (with lab)	4
Composition (Expository Writing): two courses	6
Mathematics (Math, Physics, Computer Science): one course	3
Statistics: one course	3
Behavioral Sciences (Psychology): one course	3
Social Science (Sociology, History, Political Science): one course	3
Liberal Arts distribution: three courses (Humanities, Social Sciences, Behavioral Sciences)	3
Healthcare Ethics	3
Interpersonal Communication	3

HEALTH SCIENCES TRANSFER (Associate Degree transfer credits)

All students transferring into the MCPHS Online Bachelor of Science in Health Sciences program will receive up to 40 credits from professional coursework completed toward their associate degree in a health science program. These transfer credits are applied toward the required health sciences concentration and elective portion of this program.

HEALTH SCIENCES MAJOR COURSES

COURSE	TITLE	SEMESTER HOURS
HSC 301O	Health Promotion	3
HSC 310O	Health Informatics	3
HSC 320O	Writing for Health Science Professionals	3
HSC 3xxO	Navigating Healthcare Systems	3
HSC 3xxO	Healthcare Leadership & Teamwork	3
HSC 3xxO	Health & Safety	3

HSC 410O	Health Research Methods	3
HSC 470O	Health Sciences Practicum	3
HSC 490O	Health Sciences Capstone	3
HSC 532O	Directed Study	3
TOTAL		36

GENERAL ELECTIVES

Students complete 12 semester hours of online general electives to reach the minimum 122 semester hours required for the degree. Transfer credit is also applicable to fulfill requirements for general electives.

Bachelor of Science in Medical and Molecular Biology

The Bachelor of Science in Medical and Molecular Biology is an undergraduate degree that prepares students for a number of employment and postgraduate study opportunities. These include entry-level laboratory positions; postgraduate certificate studies leading to careers in biotechnology, forensic science, and the clinical laboratory sciences; graduate studies in biology leading to careers in research, industry, and education; and application to medical, dental, optometry, and professional schools.

The curriculum design provides a broad foundation in the sciences and a wide variety of liberal arts courses that are integrated throughout the program. Major requirements in biology include medical microbiology and molecular biology in the second year; and cellular biochemistry, genetics, and six biology electives—two medical biology electives, two molecular and cellular biology electives, and two electives from either list. In the fourth year a science communication course provides a synthetic, capstone experience. In addition, students are encouraged to participate in undergraduate research opportunities at the University or in research/clinical laboratories in the local area.

To remain in good academic standing in the Bachelor of Science in Medical and Molecular Biology program, students must maintain a cumulative 2.0 grade point average (GPA). To meet the residency requirement for the BS in Medical

and Molecular Biology, students must complete at least 63 semester hours at the University.

Curriculum: Bachelor of Science in Medical and Molecular Biology

Year I—fall

Biology Electives. Students must complete six biology electives: two from the Molecular and Cellular Biology Elective list, two from the Medical Biology Elective list, and two more from either list.

Molecular and Cellular Biology Electives

COURSE	TITLE
BIO 335L	Experimental Techniques in Molecular Biology
BIO 405	Plagues of the Past, Present, and Future
BIO 430	Molecular Biology of Cancer
BIO 440	Cell Biology
BIO 434	Immunology
BIO 455	Advanced Microbiology (with lab)
BIO 530	Undergraduate Research Project
PSB 301	Pharmacology for Allied Health Sciences
PSB 460	Toxicology I
PSB 461	Toxicology II
PSB 440	Molecular Biotechnology
	Approved Colleges of the Fenway courses

Medical Biology Electives

COURSE	TITLE
BEH 341	Biological Psychology
BIO 110	Anatomy and Physiology I with Lab
BIO 210	Anatomy and Physiology II
BIO 210L	Anatomy and Physiology II Lab
BIO 321	Nutrition Science
BIO 345	Exercise Physiology
BIO 346	Applied Concepts in Public Health
BIO 445	Applied Human Physiology
BIO 465	Medical Parasitology
BIO 530	Undergraduate Research Project

MAT461	Biostatistics
PBH 340	Environment and Public Health
PSB 328	Physiology/Pathophysiology I
PSB 329	Physiology/Pathophysiology II
	Approved Colleges of the Fenway courses

NOTE: Admission and curriculum requirements for Medical and Molecular Biology students interested in professional degree programs from institutions with which MCPHS has affiliations (see Institutional Agreements) are on the website at www.mcphs.edu.

Bachelor of Science in Premedical Health Studies

The Premedical Health Studies degree is specifically designed for students seeking undergraduate preparation for chiropractic, dental, medical (allopathic or osteopathic), optometry, physician assistant, podiatry, or veterinary school, or who are considering graduate education in nutrition, speech-language pathology, public health, health administration, or other health-oriented programs. The curriculum provides an interdisciplinary health studies major that balances the basic and laboratory sciences with courses in the liberal arts. It prepares exceptionally well-rounded candidates for a diversity of postbaccalaureate degree programs. This program also is designed to allow premedical students to transition into the MCPHS Master of Physician Assistant Studies, or Doctor of Optometry degree programs.

Premedical majors have the option of choosing one of several minors. These minors develop depth of knowledge in a focal area that complements the interdisciplinary design of the degree program. In addition to preparing students for the health professions, each minor provides an alternative postgraduate direction. The Biology and Chemistry minors add upper-division didactic and laboratory experiences that could lead to graduate education in the sciences. The Health Psychology minor provides a basis for graduate study in clinical, counseling, or health psychology. The Health Humanities minor prepares students for a wide range of graduate studies. In each of its manifestations, the BS in Premedical Health Studies is a rigorous educational experience for life in the contemporary world. Graduates who do not pursue advanced studies will find themselves well prepared for a variety of employment options in industry, healthcare, research, and education.

To remain in good academic standing, students must maintain a cumulative 2.0 grade point average (GPA). To meet the residency requirement for the BS in Premedical Health Studies degree, students must complete at least 63 semester hours at the University.

Students who are enrolled in other degree programs within the University and who have attained a minimum GPA of 2.0 without failed or repeated courses are eligible to apply for transfer into the PMHS program. Students should ideally apply following the spring semester of their freshman year.

Bachelor of Science in Premedical Health Studies

NOTE: Students taking additional introductory courses and students pursuing a minor or a designated professional pathway may need to make course substitutions. Students in these circumstances are advised to consult with a CASE advisor and/or program faculty mentors when planning course registration during Years II – IV.

Year I—fall

Premedical Health Studies major with Biology minor:

Students must choose four courses from the following list that are not otherwise required for their degree (i.e., the same courses cannot be used to fulfill both the minor and the advanced biology elective requirement):

- BEH 341 Biological Psychology (3)
- BIO 260 Molecular Biology (3)
- BIO 332 Genetics (3)
- BIO 345 Exercise Physiology (4)
- BIO 346 Applied Concepts in Public Health (3)
- BIO 405 Plagues of the Past, Present, and Future (3)
- BIO 430 Molecular Biology of Cancer (3)
- BIO 455 Advanced Microbiology with lab (4)
- BIO 434 Immunology (3)
- BIO 440 Cell Biology (3)

BIO 465 Medical Parasitology
 PBH 335 Human Sexuality (3)
 PBH 340 Environment and Public Health (3)
 PSB 328 Physiology/Pathophysiology I (4) or BIO 351 Advanced Anatomy & Physiology I with lab (4)
 PSB 329 Physiology/Pathophysiology II (4) or BIO 352 Advanced Anatomy & Physiology II with lab (4)
 If PSB 328/329 and BIO 351/352 are not chosen, BIO445 Applied Human Physiology (4) can be taken
 PSB 440 Molecular Biotechnology (3)

Premedical Health Studies major with Chemistry minor:

Add CHE 314 Analytical Chemistry (4)
 Add INF 210 Survey of the Literature of Chemistry (1)
 Replace General Elective with CHE 340 Inorganic Chemistry (4) or
 Replace General Elective with CHE 717 Instrumental Analysis (4)
 BIO or CHE Advanced Elective (300-level course or higher) (3)

Premedical Health Studies major with Public Health minor:

Students must complete the following:

MAT 461 Biostatistics (3)
 PBH 250 Introduction to Public Health (3)
 PBH 330 Introduction to Epidemiology (3)

Any two of the following courses:

PBH 260 Public Health Research Methods (3)
 PBH 310O Public Health Surveillance (3)
 PBH 335 Human Sexuality (3)
 PBH 340 Environment and Health (3)
 PBH 350 Global Health (3)
 PBH 360O Health Data Collection and Management (3)
 PBH 377O Introduction to Maternal and Child Health (3)
 PBH 420 Community Health (3)
 PBH 430 Infectious Disease Epidemiology (3)
 PBH 435 Public Policy and Public Health (3)
 PBH 440 Introduction to SAS Programming (3)
 PBH 380 Aging, Place, and Health (3)
 PBH 432 Chronic Disease Epidemiology (3)
 PBH 450 Field Epidemiology (3)
 PBH 450 Occupational Health (3)
 PBH 375 Survey of Gerontology (3)
 PSB 377 Healthcare Management (3)
 SSC 230 Cultural Anthropology (3)
 SSC 444 Cigarettes in American Culture (3)
 SSC 464 Social Justice Movements in the US (3)

Any additional minors, not listed above, that a Premedical Health Studies major chooses to pursue will follow the criteria listed in the *Minor Requirements* section of this catalog. The Premedical minor is not available to Premedical Health Studies majors. Additionally, students in the Premedical Health Studies major can complete a *maximum* of two minors.

Bachelor of Science in Premedical Health Studies

Year 1-fall

COURSE	TITLE	SEMESTER HOURS
LIB 111	Expository Writing I	3
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
BIO 151	Biology I	3

MAT 151	Calculus I	3
BIO 150L	Biology I Lab	1
ITM 101	Introduction to the Major	1
TOTAL		15

Year I-spring

COURSE	TITLE	SEMESTER HOURS
LIB 112	Expository Writing II	3
CHE 132	Chemical Principles II	3
CHE 132L	Chemical Principles II Laboratory	1
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
MAT 152	Calculus II	3
	LIB 133 or LIB 120	3
TOTAL		17

If LIB 133 is taken in Year I then:

Year II-fall

COURSE	TITLE	SEMESTER HOURS
CHE 231	Organic Chemistry I	3
CHE 231L	Organic Chemistry I Laboratory	1
LIB 120	Introduction to Psychology	3
LIB 205	Health Professions Orientation	1
TOTAL		8

Year II-spring

COURSE	TITLE	SEMESTER HOURS
CHE 232	Organic Chemistry II	3
CHE 234L	Organic Chemistry II Laboratory	1
TOTAL		4

If LIB 120 is taken in Year I then:

Year II-fall

COURSE	TITLE	SEMESTER HOURS
CHE 231	Organic Chemistry I	3
CHE 231L	Organic Chemistry I Laboratory	1
LIB 133	American Culture, Identity, and Public Life	3
LIB 205	Health Professions Orientation	1
TOTAL		8

Year II-spring

COURSE	TITLE	SEMESTER HOURS
CHE 232	Organic Chemistry II	3
CHE 234L	Organic Chemistry II Laboratory	1

In Year 2, students should complete a minimum of 31 credits (fall and spring combined). In addition to semester-specific courses listed above, this should include the following: LIB 220, MAT 261, BIO 255, one BEH, one SSC, and one HUM elective.

Year III-fall

COURSE	TITLE	SEMESTER HOURS
PHY 270	Foundations of Physics I and	
PHY 272L	Foundations of Physics I Laboratory OR	
PHY 280	Physics I	3
PHY 280L	Physics I Laboratory	1

BIO 360	Cellular Biochemistry	4
---------	-----------------------	---

Year III-spring

COURSE	TITLE	SEMESTER HOURS
PHY 274	Foundations of Physics II	3
PHY 274L	Foundations of Physics II Laboratory OR	1
PHY 284	Physics II	3
PHY 284L	Physics II Laboratory	1

In Year 3, students should complete a minimum of 33 credits (fall and spring combined). In addition to semester-specific courses listed above, this should include the following: LIB 512, two Advanced Biology Electives (ABEs include ANY 300- or 400-level BIO or PBH course), one BEH, one SSC and one Liberal Arts Elective (LAEs include any 3 sh BEH, HUM, SSC, language or communication course).

PHY 280/284 is meant for students who will be taking professional school entrance exams such as the MCAT or OAT.

Year IV-fall

COURSE	TITLE	SEMESTER HOURS
	Humanities (HUM) Elective	4

Year IV-spring

COURSE	TITLE	SEMESTER HOURS
LIB 480	Capstone Seminar	3

The rest of the Year 4 schedule should be filled with General Electives in order to reach the 122 semester hour graduation requirement.

Pre-Physician Assistant (MCPHS) Recommended Pathway (3 years undergraduate/30 months graduate study in Boston or 4 years undergraduate/24 months graduate study in Worcester/Manchester)

Year I-fall

COURSE	TITLE	SEMESTER HOURS
LIB 111	Expository Writing I	3
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
BIO 151	Biology I	3
MAT 151	Calculus I	3
BIO 150L	Biology I Lab	1
ITM 101	Introduction to the Major	1
TOTAL		15

Year I-spring

COURSE	TITLE	SEMESTER HOURS
LIB 112	Expository Writing II	3
CHE 132	Chemical Principles II	3
CHE 132L	Chemical Principles II Laboratory	1
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
MAT 152	Calculus II	3
LIB 133 or LIB 120		3
TOTAL		17

Students should take the summer online course PAS 402. If they miss it this summer, they can take it next.

If LIB 133 is taken in Year I then:

Year II-fall

COURSE	TITLE	SEMESTER HOURS
CHE 231	Organic Chemistry I	3
CHE 231L	Organic Chemistry I Laboratory	1
LIB 120	Introduction to Psychology	3
LIB 205	Health Professions Orientation	1
TOTAL		8

Year II-spring

COURSE	TITLE	SEMESTER HOURS
CHE 232	Organic Chemistry II	3
CHE 234L	Organic Chemistry II Laboratory	1

If LIB 120 is taken in Year I then:

Year II-fall

COURSE	TITLE	SEMESTER HOURS
CHE 231	Organic Chemistry I	3
CHE 231L	Organic Chemistry I Laboratory	1
LIB 133	American Culture, Identity, and Public Life	3
LIB 205	Health Professions Orientation	1
TOTAL		8

Year II-spring

COURSE	TITLE	SEMESTER HOURS
CHE 232/234	Organic Chemistry II (with lab)	4

In Year 2, students should complete a minimum of 31 credits (fall and spring combined). In addition to semester-specific courses listed above, this should include the following: LIB 220, MAT 261, BIO 255, one BEH, one SSC, and one HUM elective.

Accelerated PRE-PA students apply to Boston PA through CASPA during this summer break. They must take and pass both PAS 402 & 403 by the end of this summer in order to apply at this point.

Year III-fall

COURSE	TITLE	SEMESTER HOURS
PHY 270	Foundations of Physics I and	
PHY 272L	Foundations of Physics I Laboratory or	
PHY 280	Physics I	3
PHY 280L	Physics I Laboratory	1
BIO 360	Cellular Biochemistry	4
BIO 351/L	Advanced Anatomy & Physiology I (with lab)	4
TOTAL		12

Year III-spring

COURSE	TITLE	SEMESTER HOURS
PHY 274	Foundations of Physics II	3
PHY 274L	Foundations of Physics II Laboratory OR	1
PHY 284	Physics II	3
PHY 284L	Physics II Laboratory	1
BIO 352/L	Advanced Anatomy & Physiology II (with lab)	4

In Year 3, students should complete a minimum of 32 credits (fall and spring combined). In addition to semester-specific courses listed above, this should include the following: LIB 512, one BEH, one SSC and one Liberal Arts elective (LAEs include any 3 sh BEH, HUM, SSC, language or communication course).

Students Accepted into the Master of Physician Assistant Studies (Boston) Program begin the MPAS curriculum at this point. A pathway change form may need to be completed.

Year IV—fall

COURSE	TITLE	SEMESTER HOURS
PAS 517	Human Physiology and Pathophysiology I	3
PAS 514	Principles of Professional Practice	2
PAS 515	Genetics	1
PAS 516	Introduction to Psychiatry	2
PAS 518	Clinical Pharmacology I	3
PAS 533	Evidence-Based Medicine	2
PAS 534	Introduction to Public Health	2
TOTAL		15

Competencies during the fall semester: library modules and medical terminology

Year IV—spring

COURSE	TITLE	SEMESTER HOURS
PAS 520	Clinical Pharmacology II	3
PAS 524	Gross Anatomy (with lab)	5
PAS 525	Diagnostic Methods	2
PAS 527	Human Physiology and Pathophysiology II	3
PAS 535	Electrocardiography	2
TOTAL		15

Students who plan to complete 4 years of MCPHS undergraduate work continue to year IV of PMHS BS program. Students need to add LIB 205 at this point

Year IV-fall

COURSE	TITLE	SEMESTER HOURS
	Humanities (HUM) Elective	3
LIB 205	Health Professions Orientation	1

Year IV—spring

COURSE	TITLE	SEMESTER HOURS
LIB 480	Capstone Seminar	3

The rest of the Year 4 schedule should be filled with general electives in order to reach the 124 semester hour graduation requirement.

Pre-Optometry (MCPHS-Worcester) Recommended Pathway (3 years undergraduate study/4 years graduate study)

Year I-fall

COURSE	TITLE	SEMESTER HOURS
LIB 111	Expository Writing I	3
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
BIO 151	Biology I	3
MAT 151	Calculus I	3
BIO 150L	Biology I Lab	1
ITM 101	Introduction to the Major	1
TOTAL		15

Year I-spring

COURSE	TITLE	SEMESTER HOURS
LIB 112	Expository Writing II	3
CHE 132	Chemical Principles II	3
CHE 132L	Chemical Principles II Laboratory	1
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
MAT 152	Calculus II	3
LIB 120	Introduction to Psychology	3
TOTAL		17

Year II-fall

Pre-Optometry students are block registered into LIB 120 in Y1-spring & will be block registered into the Physics 280 sequence in Y2. These students do not take CHE 232 lab.

COURSE	TITLE	SEMESTER HOURS
PHY 280	Physics I	3
PHY 280L	Physics I Laboratory	1
CHE 231	Organic Chemistry I	3
CHE 231L	Organic Chemistry I Laboratory	1
LIB 133	American Culture, Identity, and Public Life	3
LIB 205	Health Professions Orientation	1
TOTAL		12

Year II-spring

COURSE	TITLE	SEMESTER HOURS
PHY 284	Physics II	3
PHY 284L	Physics II Laboratory	1
CHE 232	Organic Chemistry II	3

In Year 2, students should complete a minimum of 31 credits (fall and spring combined). In addition to semester-specific courses listed above, this should include the following: LIB 220, one BEH, one SSC, and one HUM elective.

Accelerated pre-optometry students should prepare OptomCAS application for submission in fall of year III. OAT should ideally be taken the summer between year 2 & 3 but no later than end of fall semester year 3.

Year III-fall

Fall Semester

COURSE	TITLE	SEMESTER HOURS
BIO 360	Cellular Biochemistry	4

In Year 3, students should complete a minimum of 32 credits (fall and spring combined). In addition to the semester-specific course listed above, this should include the following: MAT 261, BIO 255, LIB 512, two Advanced Biology Electives (ABEs include ANY 300- or 400-level BIO or PBH course), one BEH, one SSC and one Liberal Arts elective (LAEs include any 3 sh BEH, HUM, SSC, language or communication course).

Accepted Pre-Optometry students would begin their first professional year in the Doctor of Optometry curriculum at this point. A pathway change form may need to be completed.

Year IV—fall

COURSE	TITLE	SEMESTER HOURS
OPT 610	Clinical Anatomy (with lab)	4
OPT 630	Geometrical and Physical Optics (with lab)	5
OPT 650	Optometry Theory and Methods I	2

OPT 650L	Optometry Theory and Methods I Lab	1
OPT 651	Optometry and Health Care	1
OPT 656	Histology and Embryology	3
OPT 721	Visual Development	2
<hr/>		
TOTAL		18

Year IV—spring

COURSE	TITLE	SEMESTER HOURS
OPT 612	Ocular Biochemistry	2
OPT 631	Visual Optics (with lab)	4
OPT 652	Optometry Theory and Methods II	2
OPT.652L	Optometry Theory and Methods II Lab	1
OPT 622	Visual Perception	3
OPT.613	Neuro Anatomy and Physiology	3
OPT 657	Microbiology	1
OPT.709	Systemic Pharmacology I	2
<hr/>		
TOTAL		18

Students who plan to complete 4 years of MCPHS undergraduate work continue to year IV of PMHS BS program. Students need to add LIB 205 at this point. A change of pathway form may be needed to move the student from accelerated pre-OPT to the standard curriculum.

Year IV-fall

COURSE	TITLE	SEMESTER HOURS
	Humanities (HUM) Elective	3

Year IV-spring

COURSE	TITLE	SEMESTER HOURS
LIB 480	Capstone Seminar	3

The rest of the Year 4 schedule should be filled with general electives in order to reach the 125 semester hour graduation requirement.

Pre-Doctor of Osteopathic Medicine (DO) Pathway (3 or 4 years of undergraduate study, 4 years of graduate study – AT Still or Lake Erie College of Osteopathic Medicine)

Students are usually interviewed by LECOM prior to their enrollment and fill out a LECOM EAP application (<http://portal.lecom.edu>) before Feb. 1st (of Year 1 for 3+; Year 2 for 4+). Students interested in AT Still should contact them in year 1 or early in year 2.

Year I-fall

COURSE	TITLE	SEMESTER HOURS
LIB 111	Expository Writing I	3
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
BIO 151	Biology I	3
MAT 151	Calculus I	3
BIO 150L	Biology I Lab	1
ITM 101	Introduction to the Major	1
<hr/>		
TOTAL		15

Year I-spring

COURSE	TITLE	SEMESTER HOURS
--------	-------	----------------

LIB 112	Expository Writing II	3
CHE 132	Chemical Principles II	3
CHE 132L	Chemical Principles II Laboratory	1
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
MAT 152	Calculus II	3
LIB 133 or LIB 120		3
<hr/>		
TOTAL		17

If LIB 133 is taken in Year I then:

Year II-fall

COURSE	TITLE	SEMESTER HOURS
CHE 231	Organic Chemistry I	3
CHE 231L	Organic Chemistry I Laboratory	1
LIB 120	Introduction to Psychology	3
LIB 205	Health Professions Orientation	1
<hr/>		
TOTAL		8

Year II-spring

COURSE	TITLE	SEMESTER HOURS
CHE 232/234	Organic Chemistry II (with lab)	4

If LIB 120 is taken in Year I then:

Year II-fall

COURSE	TITLE	SEMESTER HOURS
CHE 231	Organic Chemistry I	3
CHE 231L	Organic Chemistry I Laboratory	1
LIB 133	American Culture, Identity, and Public Life	3
LIB 205	Health Professions Orientation	1
<hr/>		
TOTAL		8

Year II-spring

COURSE	TITLE	SEMESTER HOURS
CHE 232	Organic Chemistry II	3
CHE 234L	Organic Chemistry II Laboratory	1

In Year 2, students should complete a minimum of 31 credits (fall and spring combined). In addition to semester-specific courses listed above, this should include the following: LIB 220, MAT 261, BIO 255, one BEH, one SSC, and one HUM elective.

Year III-fall

COURSE	TITLE	SEMESTER HOURS
PHY 270	Foundations of Physics I and	
PHY 272L	Foundations of Physics I Laboratory or	
PHY 280	Physics I	3
PHY 280L	Physics I Laboratory	1
BIO 360	Cellular Biochemistry	4
<hr/>		

Year III-spring

COURSE	TITLE	SEMESTER HOURS
PHY 274	Foundations of Physics II	3
PHY 274L	Foundations of Physics II Laboratory or	1
PHY 284	Physics II (with lab)	4
BIO 332	Genetics	3
<hr/>		

In Year 3, students should complete a minimum of 33 credits (fall and spring combined). In addition to semester-specific courses listed above, this should include the following: LIB 512, one Advanced Biology Elective (ABEs include ANY 300- or 400-level BIO or PBH course), one BEH, one SSC and one Liberal Arts elective (LAEs include any 3 sh BEH, HUM, SSC, language or communication course).

PHY280/284 is meant for students who will be taking professional school entrance exams such as the MCAT/OAT.

Accelerated 3+ Pre-DO LECOM students would begin the 1st year of the DO curriculum at this point. They should notify the Registrar after receiving final LECOM confirmation letter & submit LECOM Year 1 transcript after successful completion of med school courses in order to earn enough credits for B.S. degree conferral.

Students who plan to complete 4 years of MCPHS undergraduate work continue to year IV of PMHS BS program. Students need to add LIB 205 at this point. A change of pathway form may be needed.

Year IV-fall

COURSE	TITLE	SEMESTER HOURS
	Humanities (HUM) Elective	3

Year IV-spring

COURSE	TITLE	SEMESTER HOURS
LIB 480	Capstone Seminar	3

The rest of the Year 4 schedule should be filled with general electives in order to reach the 122 semester hour graduation requirement.

Pre-Veterinary Medicine (DVM) Pathway (St. George's University)

Year I-fall

COURSE	TITLE	SEMESTER HOURS
LIB 111	Expository Writing I	3
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
BIO 151	Biology I	3
MAT 151	Calculus I	3
BIO 150L	Biology I Lab	1
ITM 101	Introduction to the Major	1
TOTAL		15

Year I-spring

COURSE	TITLE	SEMESTER HOURS
LIB 112	Expository Writing II	3
CHE 132	Chemical Principles II	3
CHE 132L	Chemical Principles II Laboratory	1
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
MAT 152	Calculus II	3
LIB 133 or LIB 120		3
TOTAL		17

If LIB 133 is taken in Year I then:

Year II-fall

COURSE	TITLE	SEMESTER HOURS
CHE 231	Organic Chemistry I	3
CHE 231L	Organic Chemistry I Laboratory	1
LIB 120	Introduction to Psychology	3
LIB 205	Health Professions Orientation	1
TOTAL		8

Year II-spring

COURSE	TITLE	SEMESTER HOURS
CHE 232	Organic Chemistry II	3
CHE 234L	Organic Chemistry II Laboratory	1

If LIB 120 is taken in Year I then:

Year II-fall

COURSE	TITLE	SEMESTER HOURS
CHE 231	Organic Chemistry I	3
CHE 231L	Organic Chemistry I Laboratory	1
LIB 133	American Culture, Identity, and Public Life	3
LIB 205	Health Professions Orientation	1
TOTAL		8

Year II-spring

COURSE	TITLE	SEMESTER HOURS
CHE 232	Organic Chemistry II	3
CHE 234L	Organic Chemistry II Laboratory	1

In Year 2, students should complete a minimum of 31 credits (fall and spring combined). In addition to semester-specific courses listed above, this should include the following: LIB 220, MAT 261, BIO 255, one BEH, one SSC, and one HUM elective.

Year III-fall

COURSE	TITLE	SEMESTER HOURS
PHY 270	Foundations of Physics I and	
PHY 272L	Foundations of Physics I Laboratory or	
PHY 280	Physics I	3
PHY 280L	Physics I Laboratory	1
BIO 360	Cellular Biochemistry	4

Year III-spring

COURSE	TITLE	SEMESTER HOURS
PHY 274	Foundations of Physics II	3
PHY 274L	Foundations of Physics II Laboratory <i>or</i>	1
PHY 284	Physics II	3
PHY 284L	Physics II Laboratory	1
BIO 332	Genetics	3

In Year 3, students should complete a minimum of 33 credits (fall and spring combined). In addition to semester-specific courses listed above, this should include the following: LIB 512, one Advanced Biology Electives (ABEs include ANY 300- or 400-level BIO or PBH course), one BEH, one SSC and one Liberal Arts Elective (LAEs include any 3 sh BEH, HUM, SSC, language or communication course). PHY280/284 is meant for students who will be taking professional school entrance exams such as the MCAT or OAT.

Year IV-fall

COURSE	TITLE	SEMESTER HOURS
	Humanities (HUM) Elective	3

Year IV-spring

COURSE	TITLE	SEMESTER HOURS
LIB 480	Capstone Seminar	3

The rest of the Year 4 schedule should be filled with general electives in order to reach the 122 semester hour graduation requirement.

Bachelor of Science in Public Health

The Bachelor of Science in Public Health degree program is an applied liberal arts curriculum that prepares students for postgraduate master's (MPH) and doctoral (PhD, DrPH) programs in public health. Students who continue their education in public health at the graduate level typically pursue careers in epidemiology, biostatistics, health promotion, community health, environmental health, biomedical science, or health policy and management. The curriculum prepares students equally well for advanced studies leading to careers in environmental science, public policy, health promotion, healthcare administration, law, and medicine.

The Public Health curriculum builds on general education courses in biology, chemistry, mathematics, and liberal arts as well as required foundational courses in social and behavioral sciences, biostatistics, epidemiology, environmental health, and public policy. In the third and fourth years, students continue with advanced-level courses; select public health electives from the biology, behavioral sciences, and social sciences disciplines; engage in experiential and service learning through a field placement; and design an interdisciplinary project in a senior capstone seminar.

Public Health majors have elective openings that permit completion of a minor in Premedical Health Studies, Biology, Chemistry, Health Humanities, Health Psychology, or Women's and Gender Studies, and they have opportunities for language and international studies through the Colleges of the Fenway, as well as travel courses and study abroad through MCPHS University.

An additional option also exists whereby students may adopt a Pre-Health Law concentration. This concentration combines public health with the study of law and will prepare students to sit for the LSAT examination in preparation for law school to obtain the Master of Laws (L.L.M.) or Juris Doctor (J.D.) degrees.

To remain in good academic standing, students must maintain a cumulative 2.0 grade point average (GPA). To meet the residency requirement for the BS in Public Health, students must complete at least 62 semester hours at the University.

Curriculum: Bachelor of Science in Public Health

Year I—fall

COURSE	TITLE	SEMESTER HOURS
BIO 150L	Biology I Laboratory	1
BIO 151	Biology I: Cell and Molecular Biology	3
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
LIB 111	Expository Writing I	3
MAT 151	Calculus I	3
ITM 101	Introduction to the Major	1
TOTAL		15

Year I—spring

COURSE	TITLE	SEMESTER HOURS
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
CHE 132	Chemical Principles II	3
CHE 132L	Chemical Principles II Laboratory	1
LIB 112	Expository Writing II	3
MAT 152	Calculus II	3
LIB 133	American Culture, Identity, and Public Life	3
TOTAL		17

Year II—fall

COURSE	TITLE	SEMESTER HOURS
HSC 301	Health Promotion	3
LIB 120	Introduction to Psychology	3
MAT 261	Statistics	3
PBH 250	Introduction to Public Health	3
PBH206	Public Health Seminar	1

PBH 260	Public Health Research Methods	3
TOTAL		16

Year II—spring

COURSE	TITLE	SEMESTER HOURS
PBH 340	Environment and Public Health	3
BIO 255	Medical Microbiology	3
BIO 255L	Medical Microbiology Laboratory	1
LIB 512	Healthcare Ethics	3
SSC	SSC Elective from list*	3
	General Elective	3
TOTAL		16

Year III—fall

COURSE	TITLE	SEMESTER HOURS
LIB 220	Introduction to Interpersonal Communication for Health Professionals	3
MAT 461	Biostatistics	3
PBH	Public Health Elective	3
	General Electives	6
TOTAL		15

Year III—spring

COURSE	TITLE	SEMESTER HOURS
PBH 330	Introduction to Epidemiology	3
PBH 360	Health Data Collection and Management	3
SSC	SSC Elective from list*	3
	General Electives	6
TOTAL		15

Year IV—fall

COURSE	TITLE	SEMESTER HOURS
PBH 430	Infectious Disease Epidemiology	3
PBH 440	Introduction to SAS Programming	3
	BEH Elective	3
	HUM Elective	3
	General Elective	3
TOTAL		15

Year IV—spring

COURSE	TITLE	SEMESTER HOURS
PBH 480	Public Health Capstone Seminar	3
PBH 460	Field Placement	3
PBH 435	Public Policy and Public Health	3
PBH 432	Chronic Disease Epidemiology	3
	Public Health Elective	3
TOTAL		15

Total credits to complete degree requirements: 124 semester hours

*Students may select an elective SSC course from these options:

SSC 230	Cultural Anthropology
SSC 345	The Immigrant Experience
SSC 356	The Politics of Food
SSC 444	Cigarettes in American Culture

SSC 464 Social Justice Movements in the US
 SSC 495 Evolution of the Health Professions

Bachelor of Science in Public Health/Pre-Health Law Pathway

Year I—fall

COURSE	TITLE	SEMESTER HOURS
BIO 150L	Biology I Laboratory	1
BIO 151	Biology I: Cell and Molecular Biology	3
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
LIB 111	Expository Writing I	3
MAT 151	Calculus I	3
ITM 101	Introduction to the Major	1
TOTAL		15

Year I—spring

COURSE	TITLE	SEMESTER HOURS
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
CHE 132	Chemical Principles II	3
CHE 132L	Chemical Principles II Laboratory	1
LIB 112	Expository Writing II	3
MAT 152	Calculus II	3
LIB 133	American Culture, Identity, and Public Life	3
TOTAL		17

Year II—fall

COURSE	TITLE	SEMESTER HOURS
HSC 301	Health Promotion	3
LIB 120	Introduction to Psychology	3
PBH 250	Introduction to Public Health	3
PSB 210	Macroeconomics	3
PBH 206	Public Health Seminar	1
PBH 260	Public Health Research Methods	3
TOTAL		16

Year II—spring

COURSE	TITLE	SEMESTER HOURS

Total credits to complete degree requirements: 124 semester hours

Public Health Electives (5 must be chosen from this category, 15 semester hours):

COURSE	TITLE
BEH 250	Health Psychology
BEH 260	Lifestyle Medicine
BEH 454	Stress and Illness
BIO 260	Molecular Biology
BIO 455	Advanced Microbiology (with lab)
BIO 243	Parasitology
PBH 335	Human Sexuality
PBH420	Community Health
PSB 320	Introduction to Healthcare Delivery
SSC 432	Medical Anthropology
SSC 444	Cigarettes in American Culture

Students enrolled in the Public Health major should adopt a Premed minor if they wish to consider medical, dental, or physician assistant school after completing the baccalaureate program.

Substitutions: Year II: Students should substitute Organic Chemistry (CHE 231/231L and CHE 232/234L) for general electives (this adds 2 semester hours to the program). Year III: Students should substitute the Foundations of Physics series (PHY 270/272L and PHY 274/274L) or the Physics I and Physics II series (PHY 280/280L and PHY 284/284L) and Cellular Biochemistry (BIO 360) for general electives (this adds 3 semester hours to the program).

Bachelor of Science in Public Health / Master of Public Health (MPH) Pathway

The five-year Bachelor of Science in Public Health and Master of Public Health (BS/MPH) program at MCPHS is a joint program encompassing the requirements of both degrees. Students will have the opportunity to apply for the program in the fall of their third year at MCPHS. Upon acceptance to the program, students will begin their graduate study in the fall of their fourth year with three graduate-level courses. The total number of credits for both degrees is 150 semester hours, 123 being completed to award the BS after the fourth year and 27 in the fifth year to award the MPH. Of the 123 credits in the BS, 15 semester hours in the fourth year are 700-level MPH courses that count toward the 42 semester hours required for the MPH degree.

Master of Public Health Pathway

The curriculum for Years I, II and III are identical to the BS curriculum above. Students accepted into the MPH program will complete the combined curriculum as follows:

Year IV—fall

COURSE	TITLE	SEMESTER HOURS
PBH 430	Infectious Disease Epidemiology	3
PBH 440	Introduction to SAS Programming	3
PBH 750	Community Health Science and Practice	3

Total credits to complete combined degree requirements: 150 semester hours

Bachelor of Science in Public Health / Master of Acupuncture or Master of Acupuncture and Chinese Herbal Medicine (MAc CHMM) Pathway

The six-year Bachelor of Science in Public Health and Master of Acupuncture or Master of Acupuncture and Chinese Herbal Medicine (MAc CHMM) program is a joint pathway encompassing the marketable skills of research, data analysis, and knowledge of statistical software consistent with the public health discipline that allows students to also complete the requirements for the MAc or MAOM degrees. The knowledge and skills gained through the BS in Public Health program provide an excellent foundation for students to transfer to the New England School of Acupuncture and sets an excellent foundation for a career in acupuncture or herbal medicine. Students will complete their undergraduate degree requirements in years one through three, while earning the prerequisite credits to complete the graduate degree, which comprises years four through six.

Bachelor of Science in Public Health / Master of Science in Occupational Therapy Pathway

The five-year Bachelor of Science in Public Health and Master of Science in Occupational Therapy (MSOT) program at MCPHS University is a joint program encompassing the requirements of both degrees. The knowledge and skills gained through the BS in Public Health program provide an excellent foundation for the MSOT program and for a career in Occupational Therapy. More specifically, the BS in Public Health program provides students with an interdisciplinary education with practical applications. Students will develop skills that can be used to assess need for services and to implement and evaluate services. Students who complete the BS Public Health - MSOT pathway will be prepared to work in a variety of settings, with additional expertise relevant to community agencies and government institutions.

TOTAL		15

* BS in Public Health students are required to complete either BEH 260 Behavioral Health (currently offered during fall and spring semesters) or HSC 3010 Health Promotion (currently offered only during fall semester).

Students must achieve and maintain a cumulative GPA of 3.0 or higher.

Bachelor of Science in Public Health / Doctor of Physical Therapy Pathway

The six-year Bachelor of Science in Public Health and Doctor of Physical Therapy (DPT) program at MCPHS University is a joint program that enables students to complete their bachelor's degree in Public Health while simultaneously completing the prerequisite courses for admission to the Doctor of Physical Therapy program. Contingent upon successful completion of prerequisite courses, attainment of qualifying GPA and GRE scores, students will be eligible to apply to the DPT program. The knowledge and skills gained through the BS in Public Health program provide an excellent foundation for the DPT program and for a career in Physical Therapy. More specifically, the BS in Public Health program provides students with an interdisciplinary education with practical applications. Students will develop skills that can be used to assess need for services and to implement and evaluate services. Students who complete the BS Public Health - DPT pathway will be prepared to work in a variety of settings, with additional expertise relevant to community agencies and government institutions.

PTH 652	Neuroscience (with lab)	4
PTH 575	Integrated Clinical Education II	2
TOTAL		18

School of Arts and Sciences Honors Program

The MCPHS School of Arts and Sciences Honors program is available to qualified students majoring in any of the school's baccalaureate degree programs. The honors program offers:

- the pursuit of discipline-specific interests and a deeper level of inquiry in any Arts & Sciences discipline: Life Sciences, Chemistry, Math, Physics, Humanities, Communication, Ethics, Behavioral Sciences, Public Health or Social Sciences,
- continued development of academic research skills,
- close faculty mentoring on Honors projects,
- extra preparation for further study toward postgraduate education and careers,
- interactions with fellow honors students and faculty advisers, and
- the possibility of fieldtrips to fascinating locales such as Mass General Hospital's Paul S. Russell Museum of Medical History and Innovation, Brandeis' Graybiel Spatial Orientation Laboratory, and many more.

Honors Program Eligibility

A student should formally apply by February 15 at 5:00 pm of the second curriculum year. A student must have a minimum 3.50 grade point average (GPA) and should be based on the Boston campus for years 3 and 4 of his or her degree program. Students who spend their 4th year in a graduate program (e.g., PA, PT, OT) are not eligible. The application must include:

- a brief essay (approximately 250 words) explaining academic interests and goals, how participation in the honors program will further these goals, and how involvement in the honors program will tie into long-term career goals; and
- a recommendation by a faculty member with whom the student has had significant course- or laboratory-related interaction.

The School of Arts and Sciences Honors Program Committee will determine acceptance into the program based on

- a student's academic performance in college courses;
- the strength of a student's application materials, and
- availability of faculty mentors in a student's area of interest.

The Honors Program Committee will provide interested students a list of faculty willing to supervise honors students and a description of their research interests, as well as a list of courses that may be used to fulfill the honors program requirements.

Honors Program Requirements

Students who successfully complete the honors program will earn an honors designation on their transcripts. The honors program requirements must be completed over the course of four semesters under the supervision of a faculty mentor. Conferral of that designation each semester depends on completion of either:

- Two different projects that each take a full year to complete. The student must complete two distinct research projects with two different professors, or two related projects with two different professors. This format allows for exploration of a variety of different topics and for an appreciation of the value of collaboration across disciplines. Successful completion of the project depends on submission of a progress report at the end of each Fall semester, and a final project and the end of each Spring semester
- One single project that takes two full years to complete. This option has the greatest potential for generating publishable work in a specific field. The student must complete a single collaborative project with two different professors or a single project with one professor. This format allows for deep exploration of a single research question. Successful completion of the project depends on submission of progress reports at the conclusion of each Fall semester and the first Spring semester, and a final thesis project at the conclusion of the second Spring semester,

The following criteria also apply:

- Honors projects are completed in addition to regular coursework and do not fulfill any major or minor requirements for graduation.
- Projects may be conducted within any discipline and are not meant to duplicate, replace, or extend work done in capstone courses.
- The student must have a minimum 3.50 GPA at the time of graduation.

Additional program information is available from the Office of the Dean of Arts and Sciences.

Undergraduate Academic Bridge Program (Boston)

Director: Sunnia Ko Davis

ESL Instructors & Faculty Associates Cole-French, Gleeson, Greene

The Academic Bridge program, offered on the Boston campus, provides a full-time, structured transition-to-university curriculum in which students take content courses while strengthening their academic English and study skills through classes taught by ESL faculty. While enrolled in the Academic Bridge, students who are conditionally accepted into undergraduate degree programs develop foundational knowledge in the health sciences as they achieve an academic level of English proficiency. Among the skills developed are critical reading of academic course materials, genre-specific writing, note taking, test taking, study strategies, and giving oral presentations. Students are also introduced to program resources, University policies, the Center for Academic Success and Enrichment resources, professional practices, and co-curricular opportunities.

Assessment of English language involves both standardized and alternative approaches to evaluating students' proficiency levels. Upon entering the program, students' language skills are assessed through the MCPHS English Proficiency Exam. In addition to individual class assessments based on performance outcomes, at the end of each semester students again take the MCPHS English Proficiency Exam.

To progress from the Bridge Program, students must earn:

1. Grade of C or above in all Bridge courses (ELA 041/ELA 042/ELA 043, ELA 055, ELA 065); AND
2. Score of 57 or above on the English Proficiency Exam, OR
 - a. Successful completion (Grade of C or above) of ELA 070 LIB 111 Language Lab AND, if necessary, ELA 071 LIB 112 Language Lab.

Academic Bridge Program Curriculum

The curriculum for students accepted in the Academic Bridge Program typically includes the courses below. Curriculum may vary depending on a student's intended major and the semester.

Year I—fall

COURSE	TITLE	SEMESTER HOURS
ELA 041	Academic Bridge to Biology I or	3
ELA 042	Academic Bridge to Anatomy and Physiology I	3
ELA 055	Academic Writing	3
ELA 065	Academic Listening and Speaking	3
BIO 110	Anatomy and Physiology I or	3
BIO 151	Biology I: Cell and Molecular Biology	3
MAT	Math course determined by placement	3
ITM 101	Introduction to the Major	1
TOTAL		16

Year I—spring

COURSE	TITLE.	SEMESTER HOURS
ELA 070	LIB.111 Language Lab	1
BIO 210	Anatomy and Physiology II or	3
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
LIB 111	Expository Writing I	3
LIB 120	Introduction to Psychology	3
MAT	Math course determined by placement	3
TOTAL		17-18

MCPHS University–Boston

School of Arts and Sciences

Graduate Programs

Member Professors: Anderson, Boyd, Farkas, Hart, Harvan, Richman; Associate Professors: Barden, Briggs, Griffin, Kelley, McCord, Xie; Assistant Professors: Bresonis, Heising, Horwitz-Willis, Levy, Shifley, Spooner, Tallon; Instructors: Poulos, Young

Associate Members: Heick, Johnson, Lee, Morazzini, Neumeyer, Nicholson, O'Shea, Pawlyshyn, Rhodes, Shoemaker, Sromek

Degree Programs

- Master of Health Science (MHS)
- Master of Science (MS) in Pharmaceutical Chemistry
- Master of Public Health (MPH)

Doctor of Health Sciences (DHS)

The Arts and Sciences graduate programs are committed to providing leadership, advocacy, and administrative support to enhance the academic and scholarly achievements of our graduate students. These programs promote, enhance, monitor, and support graduate studies by providing effective communication with students from their initial inquiries to the finalization of dissertations and theses. The Arts and Sciences Graduate Council comprises graduate faculty members who are committed educators; they assist in the development and implementation of policies that ensure high standards of excellence in graduate education at MCPHS University. Through our graduate programs, the University provides students with opportunities and preparation for leadership in a growing interdependent healthcare learning community.

Research

The School of Arts and Sciences faculty members provide the academic expertise to support the research initiatives of master and doctoral candidates by promoting high-quality research training and supervision through clear communication and procedures. The advanced degree is awarded after completion of the approved program, which includes a written thesis or dissertation based on the student's research. This research must be an original work of a quality that merits publication following critical peer review.

Programs of Study

Master of Health Sciences (MHS), Online

Director: A. David Lewis

The Master of Health Sciences (MHS) degree is designed to prepare and advance educational leaders and scholars who will promote excellence in teaching and learning, translate theory and novel strategies to the learning environment; expand the evidence base in health professions education; and link education, research, and practice in transforming systems of healthcare. This is a 30-credit program that may be completed in approximately three years. The program's flexible format meets the needs of working professionals by offering required and elective courses online.

Admission Requirements

To qualify for admission, prospective applicants should have experience as health professionals. Admission decisions are based on the following:

An earned bachelor's degree from an accredited college or university

Proof of credentials as a health professional or experience/current employment in a healthcare setting

A minimum TOEFL (Test of English as a Foreign Language) score of 90 (Internet-based), 213 (computer-based) or 550 (written) for all candidates for whom English is not the primary language

Curriculum: Master of Health Sciences (MHS)

Health Sciences Required Courses

COURSE	TITLE	SEMESTER HOURS
HSC 710	Health Professions Education Across the Higher Education Spectrum	3
HSC 715	Educator Competencies	3
HSC 718	Qualities & Characteristics of Leadership	3
HSC 782	Principles and Theories of Teaching and Learning	3
HSC 784	Curriculum and Course Design	3
HSC 786	Assessment and Evaluation of Teaching and Learning	3
HSC 805	Literature Reviews and Focused Research	3
HSC 849	Building an Evidence-Based Practice	3
HSC 732	Independent Study: Graduate Health Sciences	3
HSC XXX	Health Sciences Elective Course (graduate level)	3
TOTAL		30

Total credits to complete degree requirements: 30 semester hours

Master of Science in Pharmaceutical Chemistry (Boston)

Director: Dr. Songwen Xie

The University offers the Bachelor of Science in Chemistry / Master of Science in Pharmaceutical Chemistry for students who are interested in a career in chemistry. It allows students to obtain a master's degree in five years instead of the six to seven years that it would take to complete two degrees separately. Additionally, this program is designed to take advantage of the University's strengths in the pharmaceutical sciences. Students obtain experience in biotechnology techniques and learn the principles of drug design and mechanisms of action. The Bachelor of Science/Master of Science program includes both a research project and an internship, ensuring that graduates will be prepared to work in industry or pursue a PhD. There are two options to complete the research requirement, the lab-based research and the literature-based research. MS students have the opportunity to be teaching assistants. Students should understand that being a TA takes time from conducting research. If a student chooses to teach, it is not guaranteed that they can graduate on time. Students in the sixth year should register for CHE 895 Graduate Study Extension (0 Cr) for fall and spring semesters.

Curriculum: Master of Science in Pharmaceutical Chemistry

Graduate Year I—fall

COURSE	TITLE	SEMESTER HOURS
CHE 731	Advanced Organic Chemistry	4
CHE 714	Spectroscopic Analysis (with lab)	3
PSB 346	Physico-chemical Properties of Drug Molecules	3

Master of Public Health (MPH), (Boston and Online)

Director: Dr. Carly Levy

The Master of Public Health (MPH) degree at MCPHS is a 42-semester-hour program, offered online or face-to-face on the Boston campus. The degree encompasses the foundational competencies as required by the Council on Education for Public Health. Community Health is the concentration that is offered. Community Health is defined as a multi-sector and multi-disciplinary collaborative enterprise that uses public health science, evidence-based strategies, and other approaches to engage and work with communities, in a culturally appropriate manner, to optimize health and quality of life. MPH candidates are required to complete a 120-hour practice requirement in a public health setting of their choice. In addition, students must register for a one-credit seminar as a prerequisite for the culminating experience of their degree program at MCPHS University. Opportunities for community service and outreach are made available to students. The program presents opportunities for workforce development and career progression that include networking events, career counseling, and social networking.

Curriculum: Master of Public Health (MPH)

Total credits to complete degree requirements: 42 semester hours

*PBH 899 Culminating Experience Extension is a 0-credit course only taken when necessary.

Admission Requirement

Applicants are encouraged to apply before the program priority filing date to receive maximum consideration for admission. The Admission Office will continue to review applications until all available seats in the program have been filled.

Once the application is received, the Admission Office will notify the applicant of any missing items that are required for the application to be considered complete. Files are reviewed on a rolling basis, and a decision will be made once all application materials are received.

Graduate Certificate, Public Health (Online)

Director: Dr. Carly Levy

The graduate certificate program is open to applicants who desire advanced study in public health and can be applied toward a Master of Public Health upon graduation. Current graduate students earning a master's degree other than public health and wishing to add this graduate certificate should contact the program director.

Admission requirements are more flexible than those of the degree program. A minimum grade of B- in each course is required for award of the certificate.

Graduate Certificate in Public Health (Online)

Select any four of the following six courses (Minimum of 11 semester hours total):

Doctor of Health Sciences (DHS), Online

The MCPHS Doctor of Health Sciences (DHS) is a unique 3-year online program focused on preparing health professionals for the translation of evidence to practice. Through an academic experience uniquely grounded in the principles of evidence-based healthcare, scholarship and interprofessional learning, students are empowered to drive transformational, systemic changes to the health system and address challenges within the workplace.

Mission - The DHS program prepares healthcare clinicians, educators, and leaders to be practicing scholars through an interdisciplinary and interprofessional curriculum that incorporates evidence-based research and scholarship.

Vision - The DHS at MCPHS University is a highly respected doctoral degree program that develops students as visionary leaders in healthcare, health professions and health professions education.

Values - The students and faculty in the DHS program share a distinct focus on scholarship, lifelong learning, reflective practice, transformative and visionary leadership, and ethics and integrity in research.

Upon successful completion of the DHS program, students will be able to:

- Identify, critically evaluate, and disseminate evidence to innovatively address problems of practice and advance health professions.
- Collaboratively lead the pursuit of sustainable, ethical, and equitable healthcare across disciplines and professions.
- Apply quality improvement methodologies and systems thinking to enhance the delivery of healthcare and health education.
- Evaluate applications of technology in the innovation, delivery, and evaluation of best practices in healthcare, health promotion, and education
- Analyze national and global health issues by identifying and critically evaluating relevant data to make recommendations focused on health promotion and disease prevention.
- Apply value-based and patient-centered approaches to resolve complex challenges through population-based health approaches.
- Evaluate contemporary issues in community health, healthcare improvement, and professional practice identifying ethical and equitable challenges in making informed recommendations.
- Describe cultural issues in healthcare delivery and identify culturally sensitive approaches to promote solutions supported by current evidence.
- Demonstrate scholarly writing and professional presentation skills in the dissemination of evidence across professions supporting best practices in healthcare delivery, the promotion of health, and health education.

Doctor of Health Sciences (DHS) Curriculum

This innovative 54-credit program was created to meet the needs of current health professionals, administrators, and educators and contains coursework that is progressive and contemporary with modules addressing Healthcare Trends and Challenges, Population Health, and Quality Improvement. The curriculum was developed for interdisciplinary health professionals to prepare them to work in clinical settings, education institutions, hospital and healthcare administration, global or public health, and research environments. The program is flexible, 100% online, and tailored to allow students to sub-specialize in one of three core concentrations: Health Systems Administration, Educational Leadership, or Global Health.

Evidence-Based Capstone - The program culminates in a capstone Evidence-Based Healthcare project. The capstone project offers students the opportunity to acquire skills and knowledge to advocate for best practices and promotes the translation and utilization of evidence. The Doctor of Health Sciences prepares graduates to take on leadership roles in healthcare administration, education, public health, global health, research, and clinical practice.

Admission Requirements

Prospective applicants should have experience working in a healthcare environment, such as being a credentialed health professional, experienced educator, or a researcher in a health-related field. Admission decisions are based on the following:

- An earned Masters degree or equivalent from a regionally accredited college or university
- Credentials or experience as a health professional or health professions educator preferred
- A minimum TOEFL (Test of English as a Foreign Language) score of 90 (Internet-based), 213 (computer-based) or 550 (written) for all candidates for whom English is not the primary language.
- Transfer credits may be accepted on a limited basis, and only when all of the following criteria have been met: The coursework was completed at a regionally accredited institution at the doctoral level with a grade of B, or better. The syllabus demonstrates significant similarity to a required DHS course and has not been applied to any other credential. Any transfer credit request must be accompanied by an official transcript and will be reviewed by the program coordinator.

MCPHS University-Boston

School of Healthcare Business

Michael Spooner, EdD, MHA; Dean, Assistant Professor

Christina Mullikin, MBA; Assistant Professor of Healthcare Administration; DHA Program Coordinator

James Goss, DHA, MHA; Assistant Professor of Healthcare Administration; BS in Healthcare Management Program Coordinator

Degree and Certificate Programs

- Bachelor of Science in Healthcare Management
- Bachelor of Science in Healthcare Management – Completion
- Master of Business Administration in Healthcare Management
- Master of Science in Clinical Management
- Doctor of Healthcare Administration (DHA)
- Doctor of Science in Physician Assistant Studies (DScPAS)

The School of Healthcare Business was established in March 2018 to provide undergraduate and graduate students with a unique blend of business competencies and healthcare knowledge. There is high demand for professionals who understand healthcare systems and processes. The School offers both undergraduate and graduate programs. These programs provide didactic coursework combined with practical experiences, designed to provide students with skills and capabilities that easily transfer to the workplace.

Bachelor of Science in Healthcare Management

The Bachelor of Science in Healthcare Management on the Boston Campus provides didactic and experiential education to prepare students for a wide range of healthcare business occupations. The four year, 120-credit curriculum prepares students for careers in healthcare business in a variety of settings, including public and private hospitals, pharmaceutical companies, medical device organizations, health maintenance organizations, community health settings, government agencies, and insurance companies. Graduates are also equipped for entry into graduate programs in business, public administration, and health analytics.

The BS in Healthcare Management provides students with a unique blend of business skills and healthcare knowledge and experience. Students are exposed to career-focused opportunities and opportunities to explore potential career paths through instruction, experiential opportunities, and our Executive in Residence. Students are encouraged to gain experience in various healthcare sectors through volunteer experiences, informational interviewing, job shadowing, and experiential opportunities. In this program, students have the option of selecting and declaring any available minor or applying business electives they choose to meet the 15 credits of electives. The approach of selecting a minor or electives creates opportunities for students to pursue their areas of academic interest.

Upon completion of this program, graduates will be able to:

- Apply in-depth knowledge of the healthcare environment, business processes, and the problem-solving strategies necessary to lead and manage the delivery of comprehensive health services to patients, clients, and stakeholders.
- Communicate orally, in writing, or through other mediums to effectively engage and interact with diverse populations, including clients, customers, and colleagues.
- Collaborate effectively as a member of a high performing team bringing complex projects to successful completion.
- Demonstrate knowledge of healthcare informatics, data analysis, and data visualization in informed decision-making, forecasting, and strategic planning.
- Assess the impacts of changes in healthcare technology, health policy, and regulation in the context of healthcare-related organizations.
- Explain core business concepts, constructs, and processes including finance, economics, revenue cycle management, operations management.

- Approach population health and other complex challenges in healthcare delivery with innovative and entrepreneurial solutions.
- Establish positive and productive professional relationships with providers, clients, and colleagues.
- Demonstrate cross-disciplinary and inter-professional leadership that is ethically conscious and reflective of stakeholder values.
- Engage in professional and career development in support of life-long learning, the development of meaningful goals, and personal and professional values.

Total credits required for Completion program: 68-76 semester hours

Master of Business Administration (MBA) in Healthcare Management

The Master of Business Administration (MBA) in Healthcare Management is a 36-48 credit program offered online, and can be completed in as few as 24 months part-time. The MBA curriculum is drawn from change management, value-based approaches, entrepreneurship, informatics, and leadership. The program is designed for those interested in pursuing leadership opportunities in a variety of healthcare-related sectors, including payer and provider organizations, non-profits, and biotechnology and biomedical device organizations. The MBA program empowers the next generation of business leaders to begin building and advancing careers with confidence in their business skills.

Admission requirements

Applicants are encouraged to apply before the application due date for full consideration. Applications are reviewed on a rolling basis until the program capacity has been reached.

- Bachelor's degree
- Minimum undergraduate GPA of 3.0
- Management experience in healthcare or closely aligned field preferred
- Introductory business courses may be waived, transfer credits are not accepted

Graduates of the program will be able to:

- Develop and demonstrate practical approaches to innovation, technology, and entrepreneurial values in healthcare;
- Demonstrate ethical decision-making that is informed by critical thinking and evidence-based approaches;
- Apply analytical skills in evaluation and dissemination of solutions to core challenges in the delivery of healthcare including value, revenue, and health outcomes;
- Demonstrate strategy in aligning and balancing the competing priorities of the health system stakeholders;
- Communicate and disseminate critical information to multiple audiences

Master of Science in Clinical Management

The Master of Science in Clinical Management is a 36-credit program offered online and can be completed in a few as 24 months. Clinical Management can be described as being at the epicenter of healthcare delivery organizations, including hospitals, private practice, and other related settings. Clinical managers are focused on change management, understanding the healthcare environment, leadership of interprofessional and collaborative teams and managing operations across multiple levels of care. The Master of Science in Clinical Management (MSCM) program was designed to develop clinical leadership in this critical area of healthcare management. The program focuses on core concepts in clinical management in to meet the complex demands of the professional healthcare setting, with particular emphasis on the care-path and the patient.

Admission Requirements

Applicants are encouraged to apply before the application due date for full consideration. Applications are reviewed on a rolling basis until the program capacity has been reached.

- Bachelor's degree required
- Undergraduate GPA of 3.0
- Management experience in healthcare or closely aligned field preferred
- Transfer credits are not accepted for this program

Graduates of the program will be able to:

- Develop and apply practical approaches to population-level health, including patient-centered values;
- Demonstrate ethical decision-making informed by data analysis, critical thinking, and evidence-based approaches;
- Apply analytical skills in evaluation and dissemination of solutions to core challenges in the delivery of healthcare including value, revenue, and health outcomes;
- Demonstrate strategy balancing the competing priorities of health system stakeholders including patients, providers, and payers in the clinical environment;
- Communicate and disseminate critical information to multiple audiences;

Provide leadership and guidance for delivery of care that meets the needs of patients, providers, and communities served.

Doctor of Healthcare Administration (DHA)

The DHA program is designed to develop the next generation of leaders with the skills and agility needed to succeed in complex healthcare environments. The DHA curriculum strengthens the financial and analytical foundations of healthcare leaders who are ready to tackle uncertainty and the complex issues in the healthcare administration. The professional competencies identified by the American College of Healthcare Executives and the Healthcare Leadership Alliance are addressed throughout the doctoral core. Students also have opportunities to identify a relevant problem of practice. Students identify, evaluate, and apply evidence to establish, implement, and measure solutions ready for the real world. The methods and skills to address practice-based problems are taught through the Evidence-based Capstone series resulting in a viable project and the experience necessary to advance professional practice.

Mission - The DHA program develops healthcare leaders to become practicing scholars through an interdisciplinary and interprofessional curriculum that incorporates evidence-based research and scholarship focused on the challenges of healthcare.

Vision - The DHA at MCPHS University is a highly respected doctoral degree program that develops students as visionary leaders capable of handling the complex challenges of healthcare.

Values - The students and faculty in the DHA program share a distinct focus on scholarship, lifelong learning, reflective practice, and visionary leadership, and approach challenges in healthcare delivery with the professional ethics and integrity patients and stakeholders demand.

Upon successful completion of the DHA program, graduates will be able to:

- Demonstrate critical thinking and critical analyses through the identification, assessment, and translation of evidence to solutions that address the complex practice-based problems of healthcare;
- Advance professional practice in healthcare through the collection and collation of available data, synthesis of evidence, and demonstration of support for complex decision-making in the evolving healthcare environment;
- Model collaboration, communication and motivational approaches that lead teams and colleagues to perform at the highest levels and achieve shared goals;
- Integrate the principles of quality improvement in leading, innovating, and developing solutions to improve the delivery of healthcare;
- Practice interdisciplinary and interprofessional leadership in pursuit of sustainable change in healthcare delivery and health services organizations;
- Incorporate current technology in developing solutions to healthcare administration and leadership challenges, while maintaining professional ethics and standards;
- Demonstrated knowledge of healthcare finance, accounting, and general business principles in addressing the challenges of healthcare.

Doctor of Healthcare Administration (DHA) Curriculum

This innovative 54-credit program was created to meet the needs of current healthcare administrators and consists of coursework in five distinct areas of study: Healthcare Systems and Environment, Healthcare Leadership, Health Systems Operations and Data Analytics, Healthcare Finance, and the Doctoral Research Core. The curriculum was developed for interdisciplinary health professionals to prepare them to work in clinical settings, and hospital and healthcare administration. The program is flexible and 100% online.

Evidence-Based Capstone - The program culminates in a capstone Evidence-Based Healthcare project. The capstone project offers students the opportunity to acquire skills and knowledge to advocate for best practices and promotes the translation and utilization of evidence.

Admission Requirements

Prospective applicants should have experience working in a healthcare environment, such as being a credentialed health professional, experienced educator, or a researcher in a health-related field. Admission decisions are based on the following:

- An earned masters or doctorate degree from a regionally accredited college or university
- A minimum overall GPA of 3.0 in previous coursework
- Three to five years of healthcare-related work experience preferred
- A minimum TOEFL (Test of English as a Foreign Language) score of 90 (Internet-based), 213 (computer-based) or 550 (written) for all candidates for whom English is not the primary language.
- Transfer credits may be accepted on a limited basis, and only when all of the following criteria have been met: The coursework was completed at a regionally accredited institution at the doctoral level with a grade of B, or better. The syllabus demonstrates significant similarity to a required DHS course and has not been applied to any other credential. Any transfer credit request must be accompanied by an official transcript and will be reviewed by the program coordinator.

HSC 854	EBHC Capstone II: Appraisal of the Evidence	3

Total credits to complete degree requirements: 54 semester hours

Doctor of Science in Physician Assistant Studies (DScPAS) offered online in conjunction with Doctor of Health Sciences (DHS) program

The Doctor of Science in Physician Assistant Studies (DScPAS) program is designed to empower PAs to meet the demands of today’s evolving healthcare field. The flexible DScPAS program allows students an opportunity to build on their Physician Assistant Studies, to focus on advancing careers and the profession while maintaining employment. Students gain the experience, skills, and knowledge they will need to excel in a growing and competitive profession, positioning themselves for greater mobility as leaders of the profession. The DScPAS program prepares students to participate effectively in today’s evolving healthcare workforce by focusing on collaborative practice and emphasizing evidence-based approaches to the challenges of healthcare.

The DScPAS program is offered entirely online, and is designed for practicing PAs. The format of this program allows students to continue working while advancing their education and focusing on a relevant practice-based problem. During the program, students are guided through a capstone project that helps them apply their newly acquired knowledge and skills to address an identified problem of practice. This hands-on research experience allows students to gain insight, and skills they will need to make significant contributions to interprofessional patient care throughout their careers.

Upon successful completion of the Doctor of Science in Physician Assistant Studies program, graduates will be able to:

- Identify, evaluate, and articulate practice-based problems in health professions and education.
- Determine proper research designs required to answer specific questions, explaining common challenges and considerations in the critical evaluation of evidence.
- Synthesize evidence in support of evidence-based solutions to identified problems of practice
- Disseminate evidence-based approaches in addressing practice-based problems and advancing professional practice.
- Apply interdisciplinary and interprofessional leadership by disseminating research findings to pursue sustainable change.
- Demonstrate scholarly writing and professional presentation skills in disseminating evidence in professional focus areas, including health professions education, health administration, or global health.

Admission Requirements

- Master of Physician Assistant Studies degree from a regionally accredited university;
- Minimum GPA: 3.0;
- Work experience as a PA preferred, but not mandatory;
- Proof of state licensure (or equivalent)
- Transfer credits are not accepted

Curriculum: Doctor of Science in Physician Assistant Studies (Online)

The DScPAS curriculum is a new and innovative 24-credit program, designed to better meet the demands of interprofessional and collaborative practice. Students may choose one concentration from the concentrations offered in the Doctor of Health Sciences program to meet their personal and professional goals.

First Semester

COURSE	TITLE	SEMESTER HOURS
HSC 801	Introduction to Doctoral Studies	3
HSC 815	Healthcare Research Methods	3
TOTAL		6

Second Semester

COURSE	TITLE	SEMESTER HOURS

TOTAL		9

Evidence-Based Capstone Project

The DScPAS program culminates in an Evidence-Based Healthcare capstone project. The capstone project offers students the opportunity to acquire skills and knowledge to advocate for best practices and promote the translation and utilization of the evidence. The Doctor of Science in Physician Assistant Studies prepares graduates to take on leadership roles in healthcare administration, education, public health, global health, research, and clinical practice.

The capstone project is designed to permit a student to explore a topic of personal or professional interest. Capstone projects have included:

- Implementing and assessing a ventilator-associated pneumonia prevention protocol. The project outcomes could result in enhanced practice for the entire facility, and by disseminating the outcomes and process, advances the delivery of care, and reductions in harm;
- Evaluating the best practices and leadership required in the implementation of an antibiotic stewardship program in an acute care hospital. Outcomes could include identifying the leadership approaches required to decrease the overall potential for infections by reducing indiscriminate use of antibiotics;
- Reducing central line infections in a surgical intensive care unit through the utilization of the Institute of Healthcare Improvement (IHI) Central Line Bundle. Outcomes could include reducing the potential harm to patients and the costs associated with an intensive care stay for surgical patients;

- Increasing high fidelity communication with emergency medical personnel transporting trauma victims to the emergency room. Outcomes could result in getting, translating, and effectively communicating actionable information to the entire care team faster facilitating the right care right away;
- Establishing and upholding family and person-centered care for adults with multiple comorbidities in a primary care practice. Outcomes could include recognizing and promoting the patient and care partners as the most valuable link in the delivery of safe and efficient care for chronic illnesses;
- Establishing the PA role in an orthopedic specialty clinic for children injured in sport. Outcomes could include improvements in future bone and joint health by helping young athletes to actively and safely engage in sport.

The student's capstone project must be approved by the appropriate members of the DScPAS program faculty.

MCPHS University–Boston

Forsyth School of Dental Hygiene

Forsyth School of Dental Hygiene

Dianne Smallidge, RDH, EdD, Professor and Interim Dean

Christine Dominick, CDA, RDH, MOcEd, Professor and Associate Dean

Linda D. Boyd, RDH, RD, LD, EdD, Professor and Associate Dean, Graduate Studies

Lori Giblin-Scanlon, RDH, DHSc, Associate Professor and Associate Dean for Clinical Studies

Associate Professors Giblin-Scanlon, Jenkins, LaSpina, Perry, Smilyanski; Assistant Professors Adams, Libby, McCarthy, Oh, Smethers;

Degree and Certificate Programs

- Bachelor of Science in Dental Hygiene (Accelerated)
- Bachelor of Science in Predental/Dental Hygiene
- Bachelor of Science in Dental Hygiene (Fast Track)
- Bachelor of Science in Dental Hygiene Completion*
- Dual Bachelor of Science in Health Science/Bachelor of Science in Dental Hygiene
- AS to MS in Dental Hygiene Bridge Program *
- Master of Science in Dental Hygiene*
- Master of Science in Dental Hygiene/ Master of Public Health*
- Graduate Certificate in Health Professions Education*

*Online programs

In July 2002, the Forsyth School of Dental Hygiene (FSDH) became part of MCPHS University. The school was first established in 1916 by the Forsyth brothers as the second dental hygiene program opened in the United States, and today it is the oldest continuously operating dental hygiene program in the country. Students who attend the school, located on the MCPHS Boston or Worcester campus, receive clinical instruction in the state-of-the-art dental hygiene clinics to enhance delivery of high-quality oral healthcare services to the public.

The FSDH is committed to providing excellence through engagement of students in a diverse learning environment, fostering community partnerships, and advancing knowledge through scholarship and lifelong learning. Forsyth's degree programs prepare students to be leaders in their professions with career options in dental hygiene education, business, research, public health, administration, and clinical practice. The school embraces a strong sense of responsibility to patients, the community, and the dental hygiene profession as well as to high standards of healthcare ethics.

MCPHS offers dental hygiene students the opportunity to learn in the Dr. Esther M. Wilkins Forsyth Dental Hygiene Clinic in Boston and the Esther M. Wilkins Forsyth Dental Hygiene Clinic in Worcester. The Boston facility is equipped with 24 operatories and the Worcester facility has 16 operatories both with digital radiologic imaging technology, intraoral cameras, ergonomic patient and operator chairs, digital panoramic technology, electronic records, and a dental materials laboratory with magnification and flat-screen monitors.

The FSDH offers an accelerated Bachelor of Science in Dental Hygiene, a Bachelor of Science in Predental Dental Hygiene, Fast Track Bachelor of Science in Dental Hygiene, a Dual Bachelor of Science in Health Science/Bachelor of Science in Dental Hygiene (Fast Track), a Bachelor of Science Completion in Dental Hygiene, a Master of Science in Dental Hygiene, a bridge program to a Master of Science degree for associate degree–holding dental hygienists, Master of Science in Dental Hygiene/ Master of Public Health, and a Graduate Certificate in Oral Health Professions Education for individuals with an earned baccalaureate degree and work experience in a dental or dental hygiene setting. Each program has unique outcome objectives designed to fulfill the professional objectives or degree requirements associated with the individual academic needs of dental hygiene students.

Clinical Component

The clinical component of the program is supported by evidence-based information delivered in active learning and seminars. The student learns to assess risk for oral diseases and provide preventive services. In addition, considerable time is spent developing proficiency in dental hygiene procedures for patients of all ages, with a focus on building skills that support specialized care for unique populations. Dental radiology is delivered throughout the clinical portion of the program. The student develops skills necessary for exposing, processing, and interpreting both traditional and digital radiographs. Students will participate in community-based clinical rotations that enhance campus learning experiences. The campus learning experiences and rotations may be scheduled weekdays, evenings and Saturdays. Transportation is not provided to these locations; however, public transportation is available to many extramural sites. As a requirement for graduation and licensure examinations, the student must demonstrate competence by achieving a specified level of performance for each clinical skill and by completing specific patient and service assignments. The student is ultimately responsible for obtaining the patients needed to fulfill these requirements. The student must fulfill all course requirements and competencies each semester to advance within the program.

Forsyth School of Dental Hygiene Policies and Professional Requirements

Technical Standards for the Forsyth School of Dental Hygiene

Observation

Candidates and students must have sufficient capacity to observe in the lecture hall, laboratory, and diagnostic and treatment areas of outpatient and inpatient settings. Sensory skills to perform the procedures of the healthcare profession in which students are enrolled are required. In any case where a candidate's or a student's ability to observe or acquire information through sensory modalities is compromised, the candidate or student must demonstrate alternative means and/or abilities to acquire and demonstrate the essential information conveyed in this fashion.

Communication

Candidates and students must be able to communicate effectively in both academic and healthcare settings. Candidates and students must show evidence of effective written and oral communication skills and must be able to communicate with patients in order to elicit and impart information.

Motor

The ability to participate in basic diagnostic and therapeutic maneuvers and procedures is required. Candidates and students must have sufficient motor function to execute movements reasonably required to properly care for all patients and must be able to perform motor functions with or without assistive devices.

Intellectual

Candidates and students must be able to measure, calculate, reason, analyze, and synthesize. Problem solving, one of the critical skills demanded of healthcare professionals, requires all of these intellectual abilities. Candidates and students must be able to read and understand medical literature. In order to complete the specific Health Sciences program, students must be able to demonstrate mastery of these skills and the ability to use them together in a timely fashion in healthcare problem solving and patient care.

Behavioral and Social Attributes

Candidates and students must possess the emotional health and stability required for full utilization of their intellectual abilities, the exercise of good judgment, and the prompt completion of all academic and patient care responsibilities. The development of mature, sensitive, and effective relationships with patients and other members of the healthcare team is essential. The ability to function in the face of uncertainties inherent in clinical practice, flexibility, compassion, integrity, motivation, interpersonal skills, and concern for others are all required.

Students interested in dental hygiene or medical imaging and therapeutics (diagnostic medical sonography, magnetic resonance imaging, nuclear medicine technology, radiation therapy, or radiography) are required to meet technical standards specific to each program. Students should read the technical standards specific to the program they are interested in completing.

Basic Cardiac Life Support

Each student must be certified by an approved Basic Cardiac Life Support for Healthcare Providers course prior to beginning the fall semester of the first clinical year. Certification must remain current throughout the program.

Licensure

The student who successfully completes the academic and clinical components of the Accelerated Bachelor of Science in Dental Hygiene, Pre dental/Bachelor of Science in Dental Hygiene, or Fast Track Bachelor of Science in Dental Hygiene program will be eligible to take licensure examinations. Successful completion of the National Board Dental Hygiene Examination and a state or regional clinical examination are necessary for licensure. MCPHS provides education to students in accordance with the regulations set forth by the Massachusetts Board of Registration in

Dentistry. MCPHS may not be able to provide the education and/or certification necessary for eligibility for licensure in every state jurisdiction. The student is responsible for determining eligibility requirements for dental hygiene licensure in the jurisdiction in which they plan to practice and to obtain any additional education necessary for licensure in that jurisdiction.

Policy for Reentry and Content Validation after Nonprogression or Leave of Absence

Students attempting to return from nonprogression in the professional curriculum or leave of absence must be cleared to return to classes by their Academic Dean and the Office of Student Affairs (if a medical leave of absence).

Students who are not continuously enrolled in the sequence of undergraduate FSDH professional clinical courses for a period of two semesters or more must validate clinical knowledge and skills before they may reenroll in FSDH professional clinical courses. Validation testing will consist of competency testing to assess clinical and radiography skills related to direct patient care. Program faculty will provide guidance as to what competencies, content, and skills the student needs to review prior to testing, but it is the student's responsibility to prepare for the testing. Students must pass validation testing at a minimum competency level of 75% in order to be eligible to reenter the FSDH professional clinical curriculum. Students may also opt to retake DHY 209/209L POC 1/Pre-clinic and DHY230/230L Radiology instead of undergoing validation testing.

A student who is unable to pass the validation testing at the 75% level will be given the option of retaking DHY 209/209L Process of Care I/Pre-clinic and DHY 230/230L Radiology. If a passing grade is obtained through validation testing or successful completion of DHY 209/209L and DHY 230/230L, the student may reenter the FSDH program on a space-available basis. If the student does not pass the validation test and does not reenroll or pass DHY 209/209L and DHY 230/230L, they will be dismissed from the program.

Reentry into the FSDH program is subject to clinical placement availability. (NOTE: There is no guarantee placement will be available at the student's desired time of return.) This policy applies to all undergraduate dental hygiene programs.

Progression into Professional Phase of the Bachelor of Science in Dental Hygiene - Boston

Accelerated BSDH Students: The minimum passing grade of C in Anatomy and Physiology (BIO 110 / BIO 210), Chemistry (CHE 110 / CHE 210), and Microbiology (BIO255) and an overall cumulative grade point average (GPA) of 2.5 are required to progress into the fall of Year II (professional phase) of the program.

Predental BSDH Students: The minimum grade of C in BIO 151, 152, 110, 210, 255 and CHE 131, 132, and an overall cumulative grade point average (GPA) of 3.0 is required to progress into the Fall of Year III (professional phase) of the program.

Students who achieve the minimum passing grade of C in , but do not meet the minimum cumulative GPA for their respective cohort, may enroll in DHY 202 Dental Anatomy and DHY 204 Head and Neck Anatomy in the Year II/III fall semester but may not enroll in other professional courses.

If DHY 202 and 204 are completed with C or better grades and a minimum cumulative and professional GPA of 2.5/3.0 are attained, the student may progress into the remaining Year II/III fall semester professional courses the following fall semester. This will result in a change in the year of graduation.

Students who do not meet the minimum grade and GPA expectations at the end of the first year or after attempting DHY 202 and DHY 204 will be dismissed from the program.

Dismissal from Program

Three grades below C in any combination of DHY courses results in dismissal from the program.

Progression within the Professional Phase of the Bachelor of Science in Dental Hygiene

To progress within the didactic and clinical phase of the Bachelor of Science in Dental Hygiene program, students must achieve a final grade of C or better ($\geq 75\%$). Obtaining a final grade below C in any professional course results in the student's having to repeat the course. Progression through the program will be delayed (i.e., the student will be on nonprogression status) because most professional courses are offered only once per academic year. A dental hygiene student may be placed on nonprogression status only once during his or her tenure in the Forsyth Dental Hygiene program. A student who receives a second nonprogression status in a subsequent semester will be dismissed from the dental hygiene program.

Bachelor of Science in Dental Hygiene (Accelerated)

The student who begins the Accelerated Bachelor of Science in Dental Hygiene program is expected to complete the program in three years. To meet the residency requirement for the BS in Dental Hygiene degree, students must complete at least 60 semester hours at the University.

Curriculum: Bachelor of Science in Dental Hygiene Program (Accelerated)

Year I—fall

COURSE	TITLE	SEMESTER HOURS

LIB 512	Healthcare Ethics	3
DHY345	Practice and Career Management	2
	Distribution Elective	3
TOTAL		16

Total credits to complete degree requirements: 120 semester hours

Dental Hygiene Program Electives

An overall grade point average and a professional grade point average will be calculated for each student in the Dental Hygiene program. Elective courses and those required for admission into the Dental Hygiene program are excluded when calculating the professional grade point average. All course electives, including program electives, count toward the student's cumulative grade point average.

The program elective must be a distinct course from the distribution electives; for example, Abnormal Psychology cannot fulfill the behavioral requirement as well as the program elective requirement. Choose any higher level (300 or 400) BEH, HUM, SSC, PSB, and HSC elective course as the dental hygiene program elective.

Bachelor of Science in Dental Hygiene (Fast Track) Worcester Campus

A student who holds a baccalaureate degree or higher from an accredited college or university and/or completed prerequisite course work may pursue the accelerated 16-month Fast Track Bachelor of Science in Dental Hygiene. The candidate for this program must have completed the prerequisite college courses listed below. Transfer students without a bachelor's degree may be admitted as Fast Track students but must meet all requirements for the accelerated BS in Dental Hygiene described above to achieve the 120 semester hours necessary to earn a first bachelor's degree. An official college/university transcript will be reviewed to determine eligibility for transfer credits. The student in the Fast Track BS program takes courses in dental hygiene theory and practice, and receives clinical instruction in the Esther M. Wilkins Forsyth Dental Hygiene Clinic (Worcester). Upon successful completion of the program, the student becomes eligible for dental hygiene licensure examinations.

Prerequisites for the Fast Track Bachelor of Science program for Students with a Bachelor's Degree include the following:

COURSE	SEMESTER HOURS
Anatomy and Physiology I and II (with labs)	8
Basic Chemistry I and II (with labs)	8
Microbiology (with lab)	4
Statistics	3
Introduction to Psychology	3
Introduction to Sociology	3
Expository Writing I & II	6
LIB 220 Introduction to Interpersonal Communication for Health Professionals	3
TOTAL	38

*Additional Courses for the Fast-Track Bachelor of Science program for Students without a Bachelor's Degree include the following:**

COURSE	SEMESTER HOURS
College Algebra	3
American Culture, Identity, and Public Life (Acceptable substitutions: American History, US History, US Government, Western Civilization)	3
Humanities Elective (Acceptable courses include Literature, Creative Writing, Philosophy, Ethics, Religious Studies, Select Fine Arts, Advanced Level Languages)	3
Behavioral Science Elective (Acceptable courses: any upper level psychology course)	3
Social Science Elective (Acceptable courses include: Cultural Studies, Anthropology, Government, American Studies, Women's and Gender Studies, Ethnic Studies, or an additional History/Political Science course)	3
TOTAL	15

*Students entering without a prior Bachelors degree must also take PSB 320 Introduction to Health Care Delivery during the program's summer term for a total of 16 credits. Additionally, these students will also take the Dental Hygiene Program Elective during the last semester of the program, increasing the semester credits to 17. .

The Dental Hygiene program elective is any higher level (300 or 400) BEH, HUM, SSC, PSB, and HSC elective course.

Curriculum: Bachelor of Science in Dental Hygiene (Fast Track) Worcester Campus

Year I—fall

Total institutional credits to complete degree requirements: 69 semester hours

Students will graduate with a Bachelor of Science in Dental Hygiene following successful credit transfer of any college prerequisites and completion of the required dental hygiene courses listed above.

Bachelor of Science in Predental/Dental Hygiene – Boston Campus

For students interested in applying to dental school upon graduating with a Bachelor of Science in Dental Hygiene. This 10 semester/37-month program includes the higher-level science and math courses required for application to dental school. The first 21 months of the program students will take the higher-level science courses. The last 16 months is the dental hygiene curriculum. Upon successful completion of the program, the student becomes eligible for dental hygiene licensure examinations. The minimum passing grade of C, or higher, in Anatomy and Physiology (BIO 110/110L / BIO 210/210L), Biology I (BIO 151/151L), Biology II (BIO 152/152L), Chemistry (CHE 131/131L / CHE 132/132L), and Microbiology (BIO255/255L) and an overall cumulative grade point average (GPA) of 3.0 are required to progress into the fall of Year III (professional phase) of the program.

To progress within the didactic and clinical phase of the Predental/Dental Hygiene Bachelor of Science program, students must achieve a final grade of C or better ($\geq 75\%$). Obtaining a final grade below C in any professional course results in the student having to repeat the course. Progression through the program will be delayed (i.e., the student will be on nonprogression status) because most professional courses are offered only once per academic year. A dental hygiene student may be placed on nonprogression status only once during his or her tenure in the Forsyth Dental Hygiene program. A student who receives a second nonprogression status in a subsequent semester will be dismissed from the dental hygiene program.

The student who begins the accelerated Predental Dental Hygiene Bachelor of Science program is expected to complete the program in three years (37 months).

Dual Degree Bachelor of Science in Health Sciences/Bachelor of Science in Dental Hygiene

The BSHS/Fast Track BSDH Dual Degree program provides a pathway to dental hygiene for students enrolled in the BSHS Program in Boston who are interested in pursuing the fast track BSDH at the Forsyth School of Dental Hygiene in Boston. The program will allow students to earn a BSHS while at the same time completing some BSDH courses that can then be applied to the fast track BSDH.

Bachelor of Science in Dental Hygiene Completion (Online)

Program Director: Dr. Linda Boyd

This option is open to dental hygienists who hold an Associate Degree or certificate from an accredited dental hygiene program and licensure appropriate for practice in the state or country where the student resides. Upon admission, the student will be awarded credit for prior dental hygiene professional coursework completed in his or her associate degree up to a maximum of 44 semester credits. Students also must complete the MCPHS Arts and Sciences core curriculum requirements (minimum 40 semester credits), dental hygiene professional coursework at MCPHS (minimum 36 semester credits). A total of 120 semester credits are required for the Bachelor of Science in Dental Hygiene.

Prior Degree or Certificate

A maximum of forty-four (44) semester credits will be awarded to a student who is a registered dental hygienist who has completed an associate degree or certificate program in dental hygiene through a regionally accredited educational institution.

Preprofessional Core Curriculum Courses

Prior completion of the required preprofessional courses listed below as well as the general electives is preferred. Courses already completed that meet MCPHS transfer credit policies will be accepted for transfer credit. The remaining requirements beyond those transferred during the admission process must be completed at MCPHS unless approved in advance by the Admission Office or, post-matriculation, by the Center for Academic Success and Enrichment (CASE).

	Dental Hygiene Program Electives	18
<hr/>		
TOTAL		36

Dental Hygiene Program Electives:

The program electives must be distinct courses from the distribution electives; for example, Abnormal Psychology cannot fulfill the behavioral requirement as well as the professional elective requirement.

Choose any higher level (300 or 400) elective courses.

Minimum number of credits to complete Baccalaureate in Dental Hygiene: 120 semester hours

Prior dental hygiene program (44), Arts & Sciences core curriculum (40), required professional component (36).

Admission Requirements

For admission to the program, an applicant must have:

- graduated from a dental hygiene program accredited by the ADA Commission on Dental Accreditation,
- earned a minimum cumulative grade point average (GPA) of 2.5 (on a 4.0 scale) in dental hygiene program courses,
- completed one year of work experience in healthcare (e.g., as a dental assistant, nurse's aide, social worker),
- successfully completed the National Board Dental Hygiene Examination
- obtained a license to practice dental hygiene or eligibility for licensure in at least one jurisdiction in the United States or Canada,
- achieved a minimum score of 79 on the Test of English as a Foreign Language (TOEFL),
- completed the application for admission, and
- current employment in dental hygiene (recommended but not required).

Master of Science in Dental Hygiene (Online)

Program Director Dr. Linda Boyd

The Master of Science degree offered by the Forsyth School of Dental Hygiene is a part-time, 36-credit-hour, postbaccalaureate, online master's degree program culminating in a thesis. The program, specifically designed for practicing dental hygienists, uses computer-assisted distance learning and minimal on-campus class meetings.

The purpose of this program is to prepare qualified dental hygiene professionals for careers and leadership roles in state and community-based public health administration, dental professional education, dental industry marketing and product development, research, and public and private health agencies and organizations.

Program Admission and Degree Requirements

For admission to the Master of Science in Dental Hygiene program, an applicant must have:

- graduated from an accredited dental hygiene program;
- earned a bachelor's degree from an accredited college or university or completed the MCPHS Master of Science Degree Bridge program for associate degree dental hygienists;
- completed one year of work experience in healthcare; *
- achieved a minimum score on the Test of English as a Foreign Language (TOEFL) as detailed in the current MCPHS University *catalog*;
- completed the application for admission to an online program as described in the current MCPHS University *catalog*, and
- attended the on-campus Orientation session.

The Master of Science in Dental Hygiene degree will be conferred upon the dental hygiene graduate student who has mastered the advanced professional knowledge and who:

- successfully completes the 36 semester hours of required courses listed in the program curriculum, including 6 semester hours of thesis study;
- maintains a cumulative grade point average (GPA) of 3.0 for all courses completed at MCPHS;
- presents and successfully defends an approved thesis to the student's Thesis Committee; and
- completes all requirements for the MSDH degree within a period of six years.

The Master's thesis is the final academic experience of the program. Each student will demonstrate attainment of program competencies; apply knowledge, skills, and values acquired in the program to a specific problem or issue; and independently demonstrate mastery and integration of curriculum concepts and methods. The topic, developed with guidance from the student's Thesis Committee, will be related to oral health or dental hygiene education. The student will present the study and results to professional colleagues.

AS to MS in Dental Hygiene Bridge Program (Online)

Program Director Dr. Linda Boyd

The AS to MS in Dental Hygiene Bridge Program is designed to facilitate progression of the dental hygienist with an associate degree to graduate study by providing curriculum content not provided in associate degree programs and awarding credit for general education courses completed.

A dental hygienist accepted into the AS to MS in Dental Hygiene Bridge Program may transfer up to 100 semester credit hours previously earned in a dental hygiene program and prerequisite general education courses. Transfer credit will be given only for those courses in which the student earned at least a C grade (2.0). Six courses (18 credit hours) compose the bridge curriculum, covering baccalaureate dental hygiene competencies and preparing the dental hygienist for graduate-level education. A bachelor's degree will not be awarded upon completion of the bridge curriculum. The student matriculates in the dental hygiene master's degree program following successful completion of the bridge courses and earning an overall grade point average (GPA) of 2.5.

The program will be offered online to allow participation of practicing dental hygienists and current dental hygiene educators.

Admission Requirements

For admission to the program, an applicant must have:

- graduated from an associate degree or certificate in dental hygiene program accredited by the American Dental Association Commission on Dental Accreditation,
- earned a minimum cumulative GPA of 2.5 (on a 4.0 scale) in dental hygiene program courses,
- completed one year of work experience in healthcare,
- successfully completed the National Board Dental Hygiene Examination,
- obtained a license to practice dental hygiene in at least one jurisdiction in the United States or Canada,
- achieved a minimum score on the TOEFL or IELTS as detailed in the current MCPHS *University catalog*,
- completed the application for admission to the online program as described in the current MCPHS *University catalog*;
- current employment in dental hygiene; *and*
- attended all sessions of the on-campus Orientation prior to the beginning of the first program semester.

Curriculum: AS to MS Dental Hygiene Bridge

Up to 100 semester credit hours in general education and dental hygiene education courses may be transferred; a minimum grade of C is required for transfer credit.

Master of Science in Dental Hygiene / Master of Public Health (Online)

Program Director Linda Boyd/Carly Levy

The Master of Science in Dental Hygiene and Master of Public Health (MSDH/MPH) program at MCPHS University is a joint program encompassing the requirements of both degrees. Students in the Public Health concentration will have the opportunity to apply to the program in their second year of study in the Master of Science in Dental Hygiene program at MCPHS Online and the Forsyth School of Dental Hygiene. Upon acceptance to the joint program, students may begin their graduate study in the MPH program in the summer after their second year, attending the five-day face-to-face preparatory seminar for the culminating experience course. Students must defend their thesis in the Master of Science in Dental Hygiene prior to taking additional courses in the MPH curriculum. Students will finish their MPH in three semesters following the conferral of the Master of Science degree.

- *DHY 835 (3sh) satisfies the PBH 890 (2sh) requirement*
- *DHY 827 (3sh) satisfies one of the PBH Elective (3sh) requirement*

Total: 23 semester hours of MPH coursework

Graduate Certificate in Health Professions Education (Online)

As an oral health professions educator, you have can help shape the future direction of oral health care as a leader and teacher. In this program, you'll build on your previous bachelor's degree in Dental Hygiene or another field to advance your career as an oral health professions educator.

This 9-credit hour program is offered entirely online for practicing dental professionals, including licensed dentists, dental hygienists and dental assistants, and provides education methodology courses to enhance preparation for teaching in dental, dental hygiene, or dental assisting education. When you graduate, you'll be well prepared to teach courses in a variety of educational settings, such as community colleges, four-year institutions, and vocational/technical schools.

Admission Requirements

For admission into the program, an applicant must have:

- Graduated with a bachelor's degree from an accredited college or university
- Achieved a minimum TOEFL score of 79 or a score of 6.5 on the IELTS is required of all candidate for whom English is not the native language

Technical Standards for the School of Medical Imaging and Therapeutics

Observation

Candidates and students must have sufficient capacity to observe in the lecture hall, laboratory, and diagnostic and treatment areas of outpatient and inpatient settings. Sensory skills to perform the procedures of the healthcare profession in which students are enrolled are required. In any case where a candidate's or a student's ability to observe or acquire information through sensory modalities is compromised, the candidate or student must demonstrate alternative means and/or abilities to acquire and demonstrate the essential information conveyed in this fashion.

Communication

Candidates and students must be able to communicate effectively in both academic and healthcare settings. Candidates and students must show evidence of effective written and oral communication skills and must be able to communicate with patients in order to elicit and impart information.

Motor

The ability to participate in basic diagnostic and therapeutic maneuvers and procedures is required. Candidates and students must have sufficient motor function to execute movements reasonably required to properly care for all patients and must be able to perform motor functions with or without assistive devices.

Intellectual

Candidates and students must be able to measure, calculate, reason, analyze, and synthesize. Problem solving, one of the critical skills demanded of healthcare professionals, requires all of these intellectual abilities. Candidates and students must be able to read and understand medical literature. In order to complete the specific Health Sciences program, students must be able to demonstrate mastery of these skills and the ability to use them together in a timely fashion in healthcare problem solving and patient care.

Behavioral and Social Attributes

Candidates and students must possess the emotional health and stability required for full utilization of their intellectual abilities, the exercise of good judgment, and the prompt completion of all academic and patient care responsibilities. The development of mature, sensitive, and effective relationships with patients and other members of the healthcare team is essential. The ability to function in the face of uncertainties inherent in clinical practice, flexibility, compassion, integrity, motivation, interpersonal skills, and concern for others are all required.

Students interested in dental hygiene or medical imaging and therapeutics (diagnostic medical sonography, magnetic resonance imaging, nuclear medicine technology, radiation therapy, or radiography) are required to meet technical standards specific to each program. Students should read the technical standards specific to the program they are interested in completing.

School of Medical Imaging and Therapeutics Policies and Professional Requirements

To be in good academic standing, students in the School of Medical Imaging and Therapeutics programs must have a minimum grade point average of 2.5 in professional courses. Students also must earn a minimum grade of C+ in the professional courses in the major, including all clinical internships. Any student who fails a professional course twice is dismissed from the program.

Students whose clinical performance during the internship rotation is unsatisfactory receive a warning from their clinical supervisor by the middle of the rotation; those who fail two internship rotations are dismissed from the program.

In addition to being in good academic and financial standing, students must complete all professional coursework at MCPHS to receive their degrees in the Diagnostic Medical Sonography, Magnetic Resonance Imaging, Nuclear Medicine Technology, Radiography, or Radiation Therapy programs or the certificate in MRI or CT.

BCLS Certification

All students in School of Medical Imaging and Therapeutics programs must have current certification in Basic Cardiac Life Support (BCLS) for Healthcare Professionals before they begin their clinical rotations (DMS 302C [General track], DMS 306C [Echocardiography track], MRI 402, NMT 330C, RTT 325C, or RAD 201C).

Eligibility for Certification—ARRT

Candidates for certification through the American Registry of Radiologic Technologists (ARRT) must successfully complete a program of formal education that is accredited by a mechanism acceptable to the ARRT. Candidates also must comply with the rules of ethics contained in the ARRT Standards of Ethics. These include but are not limited to compliance with state and federal laws. A conviction or plea of guilty to, or plea of nolo contendere to a crime that is either a felony or a crime of moral turpitude must be investigated by the ARRT in order to determine eligibility.

Pregnancy Policy

NOTE: This policy applies to all female students in the Radiography, Radiation Therapy, and Nuclear Medicine Technology majors or the Mammography and Computed Tomography Advanced Certificate programs. In the event a female student becomes pregnant, the student may choose to declare her pregnancy, since there is a potential risk to the developing fetus from radiation exposure. In the event a student chooses to declare her pregnancy, the student will notify the program director in writing that she is pregnant and also state the estimated date of conception. The MCPHS Declaration of Pregnancy for Radiation Workers form, available in the School of Medical Imaging and Therapeutics dean's office, shall be used for this purpose. A copy of this declaration will be forwarded to the Radiation Safety Officer. Choosing not to declare a pregnancy will result in exemption from the specific state radiation protection regulations limiting the exposure to the embryo/fetus.

Once the student declares herself to be pregnant, the Radiation Safety Officer will issue to the student

- a second badge to be worn during the gestation period at waist level to serve as a measure of embryo/fetus exposure. The radiation exposure control criterion for this student will be to limit exposures to this waist-level badge to less than 50 mrem/month (0.5 millisieverts).
- a copy of the applicable state regulations (105CMR120.203, 105CMR120.218, 105CMR120.267) that deal with exposure to the embryo/fetus
- a copy of the U.S. Nuclear Regulatory Guide 8.13, *Instruction Concerning Prenatal Radiation Exposure*, and Guide 8.29, *Instruction Concerning Risks from Radiation Exposure*. The student will be given an opportunity to discuss this material with the Radiation Safety Officer or his or her representative.

In order to adhere to Commonwealth of Massachusetts Regulation 105CMR120.218, which requires that "the dose to an embryo/fetus during the entire pregnancy, due to occupational exposure of a declared pregnant woman, does not exceed 500 mrem (5 millisieverts)," the student is offered the following options:

- The student may continue in the program so long as her embryonic/fetal exposures are in conformance with the requirements of 105CMR120.218. If the student chooses this option, the following procedure must be followed:
 - All efforts must be made by the student to ensure that the total exposure to the waist badge does not exceed 500 mrem (5 millisieverts) for the entire gestation period.
 - The student and program director are to be notified, in writing, by the Radiation Safety Officer, if more than 80% of this dose (400 mrem) is received.
 - The student and program director are to be notified, in writing, by the Radiation Safety Officer if the monthly recommendation of 50 mrem is exceeded.
 - The student is expected to utilize her knowledge of radiation control principles at *all* times to further minimize her exposure.
 - If the maximum total exposure for the gestation period is reached, the student, Radiation Safety Officer, and program director must agree on an alternate option.
- The student may request a leave of absence from the career component of the program. The student may continue with general education courses without modification or interruption.
- The student has the option for withdrawal of the declaration of pregnancy.

NOTE: Experience shows that the radiation workers in this program generally receive to the whole body well below 500 mrem per year, 50 mrem per month, and it is most unlikely that there will be any problems adhering to the fetal exposure limits.

Policy for Content Validation after Nonprogression or Leave of Absence

Students who have not been continuously attending courses for a period of one semester or more in an undergraduate School of Medical Imaging and Therapeutics (SMIT) professional course, or who withdraw from a SMIT program via leave of absence, must validate previous knowledge and skills held prior to program exit before they may reenroll in SMIT clinical professional courses. Reenrollment is subject to clinical placement availability. (NOTE: Students returning from a leave of absence must confirm their intent to return as specified in the Return from Leave of Absence section. There is no guarantee that space will be available at the desired time of return of the student; it may take up to two years for reentry due to lack of clinical placement availability.) This policy applies to all undergraduate SMIT programs.

The validation will occur via the student's demonstration of knowledge and skills, such as meeting established program clinical competencies, in a selected clinical facility or simulation laboratory. This requires that students notify the program director of the desired date of return a minimum of 30 days prior to the anticipated return in order to make arrangements

for preparing and performing validation testing. Program faculty will provide guidance as to what content and skills (competencies) need to be reviewed by students prior to the testing, but it is the student's responsibility to prepare for the validation testing.

Students attempting to return from a leave of absence also must have been cleared to return to classes by the designated staff member in the Center for Academic Success and Enrichment (CASE) and by the Dean of Students or designee (if a medical leave of absence) prior to performing validation testing. The designated staff member in the Center for Academic Success and Enrichment will notify the Dean of SMIT when the student is eligible to take the validation test. Validation of knowledge will consist of a competency examination. A minimum grade of C on the competency examination is required. Program faculty will determine the content and skills to be included in the validation test.

If a student fails the validation test, they must enroll in a one-semester directed study course to remediate prior to reentering the program. This will delay the student's reentry for at least one semester but likely for one year (or more if there is no clinical space available). The number of semester credits assigned to the directed study course will vary (1–3 semester credits) depending upon the number of semesters successfully completed in the program. If the student completed two or fewer semesters, 1 credit will be assigned; if three or four semesters, 2 credits; and if more than four semesters, 3 credits. Students may take general education courses concurrently with the directed study but may not take any program professional courses until the directed study has been successfully completed.

If a student does not pass the directed study with a minimum of C on the first attempt, they will be dismissed from their respective program.

Accelerated 32- to 36-Month Bachelor of Science in Diagnostic Medical Sonography, Magnetic Resonance Imaging, Nuclear Medicine Technology, and Radiography *

The accelerated 32- to 36-month Bachelor of Science programs offer degrees in Diagnostic Medical Sonography (DMS), Magnetic Resonance Imaging (MRI), Nuclear Medicine Technology (NMT), and Radiography (RAD). The DMS and NMT programs are completed in 36 months, and the MRI, RTT, and RAD programs in 32 months. The Bachelor of Science program integrates didactic instruction in the liberal arts, basic and applied science, and the social sciences with clinical instruction provided by the clinical affiliates. The location of the University in the Longwood Medical and Academic Area, as well as its affiliations with medical institutions located in the Greater Boston area, enable students to train in hospitals with state-of-the-art facilities that are among the best in the world. Students planning to major in one of the Medical Imaging and Therapeutics programs will be expected to specify the program of choice during the formal application process to MCPHS. Students who are uncertain about their program of choice are encouraged to complete a shadowing activity for each specialty area in order to decide which discipline they wish to study. If the student has firmly decided on the concentration they wish to pursue, the student should contact his or her local hospital to arrange a shadowing opportunity. If such arrangements cannot be made, the MCPHS director for that program will try to accommodate the request to establish a shadowing opportunity. All such requests will be processed on an individual basis based on available space and the specific shadowing requirements at affiliate institutions. Any request to change the major after matriculation to MCPHS will be based on availability of space in the new area of interest.

For internal transfers, admission into the desired program is subject to space availability; in addition, the following must be completed:

- Transcript review by the appropriate program director and the dean of the school
- A Change of Major form signed by the Center for Academic Success and Enrichment
- A personal interview with the program director or designated program faculty
- Clinical observation in which the student will shadow a clinical supervisor in the chosen major; this requirement may be waived at the discretion of the program director

Fast Track Bachelor of Science Degrees in Diagnostic Medical Sonography, Magnetic Resonance Imaging, Nuclear Medicine Technology, Radiation Therapy, and Radiography

Designed specifically for students with either an associate or bachelor's degree in another field, these programs of study provide a fast track option for individuals ready for transition to a career in a discipline within medical imaging and therapeutics. Building on previous learning and experience gained from the student's first degree, these programs will mirror the curricula of the three-year Bachelor of Science programs previously outlined in the prior section of this catalog.

In order to be eligible for these programs, students must possess a prior bachelor's or associate's degree, or the appropriate amount of college credits and prerequisites. In addition to the prerequisite coursework, students admitted without a prior bachelor's degree must also have completed coursework equivalent to the general education core curriculum; transfer and residency credits for these students must total a minimum of 120 semester hours.

Students with a bachelor's or associate's degree, or the appropriate amount of college credits and prerequisites, may apply to the fast track program. Courses must have been completed at a regionally accredited college or university with a grade of C or better for transfer. Math and science courses taken more than ten years prior to the anticipated date of matriculation to MCPHS will not be accepted.

Required prerequisite courses for all students

- Anatomy and Physiology I & II with lab (8 credits)
- Basic Chemistry I with lab (the MRI, RTT and NMT program also requires Chemistry II – 4 credits)
- Physics I (Algebra-based) with lab (4 credits) *
- Algebra and Trigonometry (3 credits) (Acceptable substitutions include Precalculus and Calculus) *
- Expository Writing I (3 credits)
- Statistics (3 credits)
- Medical Terminology (1 credit) *

TOTAL: 25(29) credits

* MRI and RTT students for Math require Precalculus and Calculus. MRI students for Physics require a calculus based 4 credit physics class

Additional courses required for students without a Bachelor's Degree:

- Expository Writing II (3 credits)
- Introduction to Psychology (3 credits)
- American Culture, Identity, and Public Life (3 credits) (Acceptable substitutions include American History, US History, U.S. Government, Western Civilization)
- Humanities Elective (3 credits) (Acceptable courses include Literature, Creative Writing, Philosophy, Ethics, Religious Studies, Select Fine Arts, Advanced Level Languages)
- Behavioral Science Elective (3 credits) (Acceptable courses include any upper level Psychology course)
- Social Science elective (3 credits) (Acceptable courses include History, Political Science/Government, Anthropology, Upper-level Sociology, American Studies, Women Studies, Ethnic Studies, Geography, Economics)

TOTAL: 18 credits

* *NOTE: Medical terminology for DMS and MRI students is integrated into the professional phase and thus is not a course requirement*

Clinical Rotations

A number of clinical rotations in the required curriculum may be scheduled at some distance from the campus. This is necessary to provide a range of diverse learning experiences and to ensure availability and quality of clinical rotation sites. The University makes every effort to accommodate requests regarding assignments to experiential education sites, but students generally can expect to be assigned to clinical sites at some distance from the campus for at least a portion of their required clinical rotations. In such instances, students are responsible for transportation and other related travel expenses.

Bachelor of Science in Diagnostic Medical Sonography: General and Echocardiography Tracks (Accelerated, 36 months)

The Diagnostic Medical Sonography (DMS) profession uses high-frequency sound waves (ultrasound) to produce multi-dimensional dynamic images of tissue, organs, and blood flow inside the human body for the diagnosis of various medical conditions. The sonographer, a highly skilled imaging technologist, uses sophisticated ultrasound equipment to identify disease. In addition, the sonographer works closely with physicians in the processing of the ultrasound images to make a diagnosis.

The DMS program offers a full-time, Accelerated, 36-month course of study that begins in the fall semester. The comprehensive curriculum includes primary specialties of ultrasound, plus secondary specialties, offered across two tracks; the General ultrasound track, includes training in abdominal, obstetrics/gynecology, breast, pediatric, musculoskeletal and vascular sonography; the Echocardiography track focuses on adult echocardiography with secondary specialty tracks in pediatric echocardiography, and vascular sonography.

Technical Standards for DMS

Minimum expectations of the DMS programs are to prepare competent, entry-level sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. To meet these expectations, students enrolled in health sciences professional programs must have abilities and technical skills to be successful healthcare providers. The following technical standards describe the non-academic qualifications the DMS programs considers essential for the successful progression in, and completion of the educational objectives of its curriculum.

Although the DMS program will engage in an interactive process with applicants with disabilities, it reserves the right not to admit any applicant who, upon completion of the interactive process, cannot meet the technical standards set forth below, with or without reasonable accommodations. Reasonable accommodation for persons with prior documented disabilities will be considered on an individual basis. Students wishing to request accommodations for disabilities should contact the Director for Office of Student Access and Accommodations.

A DMS professional provides direct care for patients in hospitals or outpatient facilities and must be able to apply acquired knowledge and physical tasks to skillfully perform sonography procedures. These technical standards are based upon the minimum tasks performed by graduates of the program as recommended by the Society of Diagnostic Medical Sonography, Scope of Practice and Clinical Standards for the Diagnostic Medical Sonographer, April 13, 2015 <http://www.sdms.org/docs/default-source/Resources/scope-of-practice-and-clinical-standards.pdf?sfvrsn=8>

Listed below are the technical standards that all applicants must meet in order to participate in, and successfully complete the DMS programs:

Physical

The Diagnostic Medical Sonographer must be able to:

- Work standing on their feet 80% of the time.
- Use both hands, wrists, and shoulders to maintain prolonged arm positions necessary for Scanning and perform fine motor skills.
- Lift more than 50 pounds routinely.
- Transport, move, and or lift patients from a wheelchair or stretcher to the examination table or patient bed, and physically assist patients into proper positions for examination.
- Push, pull, bend and stoop routinely to move and adjust sonographic equipment and perform studies.
- Use senses (vision, hearing, and touch) to adequately view sonograms, including color distinctions; distinguish audible sounds; perform eye/hand coordination skills required in sonographic examinations; and recognize changes in patient's condition and needs.
- Work in a semi-darkened room for prolonged periods of time.
- Be physically capable of carrying out all assigned duties.

Mental and Intellectual

The Diagnostic Medical Sonographer must be able to:

- Communicate effectively, verbally and nonverbally, with patients and other healthcare professionals to explain procedures, give instructions, and give and obtain information.
- Organize and accurately perform the individual steps in a sonographic procedure in the proper sequence according to established standards.
- Understand and reach quickly to verbal instructions and patient needs.
- Follow directions effectively and work closely with members of the healthcare community.
- View and evaluate recorded images for the purpose of identifying proper protocol, procedural sequencing, technical qualities and identification of pathophysiology.

- Apply problem solving skills to help optimize patient care and produce the best diagnostic information possible.

Emotional

The Diagnostic Medical Sonographer must be able to:

- Provide physical and emotional support to the patient during sonographic procedures.
- Interact compassionately and effectively with the sick and or the injured.
- Handle stressful situations related to technical and procedural standards and patient care situations.
- Adapt to changing environments and be able to prioritize tasks.
- Project an image of professionalism.
- Demonstrate a high level of compassion for others, a motivation to serve, integrity, and a consciousness of social values.
- Interact positively with people from all levels of society and all ethnic and religious backgrounds.

Registry Exam Eligibility

Graduates of the DMS programs are eligible to apply for several registry exams offered by the American Registry of Diagnostic Medical Sonography (ARDMS) and Cardiovascular Credentialing International (CCI). Echocardiography and General Ultrasound graduates may apply, under ARDMS exam prerequisite 2, to take the adult and pediatric echocardiography, abdomen and OB/GYN credentialing exams. Echocardiography graduates may apply under CCI exam prerequisite RCS4 (adult cardiac) and RCCS5 (pediatric/adult congenital).

The student must pass the ARDMS Sonography Principles & Instrumentation (SPI) registry exam in order to pass the DMS 304, Problem Solving in Physics and Instrumentation course. In addition, passing the SPI registry exam is required to continue into Year III of the program.

All DMS courses during the professional phase of the program must be completed with a weighted grade $\geq 77\%$ (C+) in order to progress in the program.

Students must complete all professional coursework at MCPHS to receive their degrees in the Diagnostic Medical Sonography programs.

The MCPHS graduate is well suited to work in several DMS specialties and, with the BS degree, has the comprehensive education required to become a leader in the profession.

Commission on Accreditation of Allied Health Education Programs

The Diagnostic Medical Sonography, Echocardiography and General Ultrasound Programs are accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org), upon the recommendation of the Joint Review Committee on Education Programs in Cardiovascular Technology and Diagnostic Medical Sonography. Mailing address: Commission on Accreditation of Allied Health Education Programs, 9355 -113th St. N, #7709 Seminole, FL 33775 ; tel: 727.210.2350; www.caahep.org.

Curriculum: Pre-professional Phase

*NOTE: The student must earn a minimum grade of C in BIO 110/210, CHE 110/210, MAT 141, and PHY 181. Medical terminology is integrated into the professional phase and thus is not a course requirement.

Progression into the Professional Phase for DMS—General and Echocardiography Tracks:

An overall cumulative grade point average (GPA) of 2.0 and successful completion of the above courses is required as prerequisite for entry into the professional phase of the DMS programs. These requirements apply to students entering MCPHS as freshmen, students who are transferring into the DMS program from other programs within MCPHS, and those who are transferring from another accredited college or university.

Curriculum: Professional Phase: Bachelor of Science in Diagnostic Medical Sonography-General Track (Accelerated, 36 months)

Bachelor of Science Degree in Magnetic Resonance Imaging (Accelerated)

Magnetic Resonance Imaging, also referred to as MRI, is a procedure in which radio waves and a powerful magnet linked to a computer are used to create detailed images of body structures for the purpose of diagnosis. MRI technologists use their knowledge of anatomy, physiology, patient care, and MRI physical principles to safely operate advanced MRI scanners and assist the radiologist in the diagnosis of disease and injury. Unlike most MRI programs, this is a primary pathway program that recognizes MRI as a distinct and separate imaging discipline. Hence, no prior background in a medical imaging science is required.

Admission Technical Standards

Technical Standards for Admission, Promotion, and Graduation

Candidates for and students enrolled in health sciences professional programs must have abilities and skills in the areas of observation; communication; and motor, intellectual, and behavioral/social attributes. The following technical standards describe the nonacademic qualifications (required in addition to academic standards) that the MRI program considers essential for the successful progression in and completion of the educational objectives of its curriculum.

Although the MRI program will engage in an interactive process with applicants with disabilities, it reserves the right not to admit any applicant who, upon completion of the interactive process, cannot meet the technical standards set forth below, with or without reasonable accommodations. Reasonable accommodation for persons with prior documented disabilities will be considered on an individual basis. Students wishing to request accommodations for disabilities should contact the Director for Office of Student Access and Accommodations.

MRI Technical Standards

A magnetic resonance technologist provides direct care for patients in hospitals or outpatient facilities and must be able to apply acquired knowledge to skillfully perform MRI procedures. These technical standards are based upon the minimum tasks performed by graduates of the program as recommended by the American Society of Radiologic Technologists (www.asrt.org) and the American Registry of Radiologic Technologists (www.arrt.org). Listed below are

the technical standards that all applicants must meet in order to participate in and successfully complete the MRI program:

- Sufficient visual acuity to evaluate MR image quality, accurately administer contrast agents, utilize imaging equipment, and provide the necessary patient assessment and care.
- Sufficient ability to receive and provide verbal communication with patients and members of the healthcare team and to assess the health needs of patients through the use of monitoring devices such as intercom systems, cardiac monitors, respiratory monitors, and systems alarms.
- Sufficient gross and fine motor coordination to manipulate equipment such as a scan console, power injectors, and various RF receiver coils; in addition, MRI technologists must possess adequate motor coordination to perform venipuncture that is required for many routine MRI procedures.
- Sufficient communication skills (verbal, reading, writing) to interact with individuals and to communicate their needs promptly and effectively, as may be necessary in the patient's/client's interest.
- Sufficient intellectual and emotional function to plan and implement patient care

Examples of specific technical standards the MRI student must be able to meet are as follows:

- Ability to lift, transfer, and/or move patients from wheelchair/stretchers to scan table; dock/release and wheel scan table to/from scan room to patient waiting area.
- Ability to lift, move, reach, or push MRI equipment (lift MRI coils of up to 35 pounds, push/wheel docking table with patient to/from scan room).
- Manual dexterity and ability to bend/stretch.
- Ability to distinguish colors and shades of gray.
- Ability to endure an eight-hour day with a minimum of four to six hours of standing or walking.
- Effective interpersonal communication skills in the process of interviewing patients and explaining the procedure verbally and/or in writing.
- Ability to read and extract information from the medical chart, patient requisitions, and doctors' orders

To perform/assist with MRI procedures on patients, students must initially undergo the same screening procedures as patients, staff, and visitors in order to enter the scan room. The MRI scan room contains a region of intense magnetic field. Objects that display any form of ferromagnetism are therefore of particular concern for MRI. Contraindications for entering the MRI scan room include, and are not limited to

- certain biomedical implants, materials, and devices (e.g., aneurysm clips, brain clips);
- certain electrically, magnetically, and mechanically activated implants and devices (e.g., cardiac pacemakers, cochlear implants); and
- certain metallic foreign objects (e.g., shrapnel, bullets, metal in eyes).

The 32-month Bachelor of Science in Magnetic Resonance Imaging is an accelerated program combining online courses, courses on the Boston campus, and clinical internships throughout Massachusetts and southern New Hampshire. The typical course of study begins with 16 months of core curriculum preprofessional courses and general education courses followed by 16 months of professional courses and clinical internships.

Students enrolled in the MRI program receive their internship training at hospital affiliates in the Greater Boston area and southern New Hampshire. These include, but are not limited to, Beth Israel Deaconess Medical Center, Brigham and Women's Hospital, Catholic Medical Center, Dana-Farber Cancer Institute, Elliot Hospital, Mt. Auburn Hospital, and Shields MRI Centers Massachusetts and Rhode Island.

Upon graduation from the Bachelor of Science program in Magnetic Resonance Imaging, students are eligible to apply for certification through examination by the American Registry of Radiologic Technologists.

To meet the residency requirement for the BS in Magnetic Resonance Imaging degree, students must complete at least 64 semester hours at the University.

Bachelor of Science Degree in Nuclear Medicine Technology (Accelerated)

Nuclear medicine is a medical specialty that uses radioactive pharmaceuticals and tracers in the diagnosis and treatment of disease. The specialty relies on the expertise of professionals in the allied health sciences for its sophisticated, high-technology medical procedures. Among these professionals are nuclear medicine technologists, with skills ranging from patient care to the operation of nuclear instrumentation.

The technologist performs functions that complement those of nuclear medicine physicians, such as the care and preparation of patients for nuclear medicine procedures, application of quality control techniques to the nuclear medicine products and procedures, operation of instruments for in vivo and in vitro examinations, involvement in research activities, and participation in the management of the nuclear medicine laboratory.

Students enrolled in the Nuclear Medicine Technology program receive their internship training at hospital affiliates in the Greater Boston and New England areas. These include, but are not limited to in Boston, Beth Israel Deaconess Medical Center, Boston Medical Center, Brigham and Women's Hospital, Dana-Farber Cancer Institute, Massachusetts General Hospital. Throughout New England, these include, but not limited to Baystate Medical Center, Dartmouth-Hitchcock Medical Center, Hartford Hospital, Maine Medical Center, and UMass Memorial Medical Center. Transportation to and from clinical settings is the responsibility of the student.

Upon graduation from the Bachelor of Science in Nuclear Medicine Technology program, the student is eligible to apply for certification through examination by the American Registry of Radiologic Technologists and the Nuclear Medicine Technology Certification Board. To meet the residency requirement for the Bachelor of Science in Nuclear Medicine Technology, students must complete at least 61 semester hours at the University.

Progression into the Professional Phase for Nuclear Medicine Technology and MCPHS Internal Transfers

All students must meet the following requirements in order to progress into the professional phase of the Nuclear Medicine Technology program. These requirements apply to students entering MCPHS as freshmen, students who are transferring into majors in the Nuclear Medicine Technology program from other programs within MCPHS, and those who are transferring from another accredited college or university into the professional phase of Nuclear Medicine Technology Bachelor or Fast Track Baccalaureate program.

Technical Standards for Nuclear Medicine Technology

These technical standards conform to the professional technical standards required for the safe and ethical practice of the task/skills associated with clinical nuclear medicine. Each student, with reasonable accommodation, must be able to demonstrate that they are able to:

- Reach and manipulate equipment to its highest position (6 feet);
- Communicate in a clear and concise manner with patients of all ages, including obtaining health history and pertinent information;
- Read and apply appropriate instructions contained in requisitions, notes and patient charts;
- Transfer patients from wheelchairs and stretchers and help them on/off treatment table;
- Exert force and lift objects of 50 pounds routinely;
- Perform simple motor skills for unrestricted time periods;
- Push, pull, bend and stoop;
- Work standing on their feet 80% of the time;
- Reach and work overhead;
- Move a standard wheelchair and/or stretcher from a waiting area to a treatment area;
- Understand and apply clinical instructions given by department personnel;
- Visually monitor patients/charts/machine indicator lights in dimly lit conditions;
- Detect audible alarms and background sounds during procedures to ensure patient/staff safety;
- Demonstrate manual dexterity to perform necessary manipulations such as drawing doses with a syringe, manipulating locks, putting on surgical gloves;
- Endure an eight-hour day with a minimum of four to six hours of standing or walking;
- Endure a minimum of two hours of didactic instructions in a classroom environment;

- Perform tasks requiring satisfactory visual and auditory acuity;
- Read printed words in a textbook, read camera control panel and computer screens, read patient dose and medical charts, and read scintigraphic images;
- Hear instructions from health care professionals and be able to respond to verbal requests by patients at a distance of 6 to 10 feet;
- Give clear verbal commands to patients assigned for an imaging procedure at a distance of 6 to 10 feet;
- Communicate effectively with patients and other health care professionals;
- Interact compassionately and effectively with the sick and injured;
- Protect self and others from unnecessary radiation exposure

Joint Review Committee on Education Programs in Nuclear Medicine Technology

The Nuclear Medicine Technology program is accredited by the Joint Review Committee on Education Programs in Nuclear Medicine Technology. Mailing address: 820 W Danforth Rd, #B1; Edmond, OK 73003; Phone: (405) 285-0546 www.jrcnmt.org.

Requirements for Transfer

An overall cumulative grade point average (GPA) of 2.0 and successful completion of the following courses with a grade of C or better is required in order to progress into the professional phase of the student's chosen program:

COURSE	TITLE	SEMESTER HOURS
BIO 110/110L	Anatomy and Physiology I with lab	4
BIO 210/210L	Anatomy and Physiology II with Lab	4
BIO 150/151L	Biology I: Cell & Molecular Biology (with lab)	4
BIO 152	Biology II: Biology of Organ Systems	3
BIO 152L	Biology II: Biology of Organ Systems Laboratory	1
BIO 255	Medical Microbiology	3
BIO 255L	Medical Microbiology Laboratory	1
LIB 111/112	Expository Writing I & II	6
PHY 181	General Physics or	
PHY 275	Physics for Medical Imaging	4
MAT 141	Algebra and Trigonometry, or	
MAT 150/151	Pre- calculus and Calculus I	3/6
CHE 110	Basic Chemistry I	3
CHE 110L	Basic Chemistry I Laboratory and	1
CHE 210	Basic Chemistry II	3
CHE 210L	Basic Chemistry II Laboratory	1

For internal transfers, admission into the desired program is subject to space availability; in addition to the above requirements, the following must be completed:

- Transcript review by the appropriate program director and the dean of the school
- A written essay (maximum of 500 words) describing the reason for requesting the particular specialty area and what the student knows about the profession
- A Change of Program form signed by the Center for Academic Success and Enrichment
- A personal interview with the program director or designated program faculty

NOTE: All Nuclear Medicine Technology students must fulfill requirements for CPR certification and medical terminology prior to NMT Internship (NMT 330C).

Curriculum: Bachelor of Science in Nuclear Medicine Technology (Accelerated)

NOTE: All Nuclear Medicine Technology students must fulfill requirements for CPR certification and to pass medical terminology proficiency prior to NMT Internship (NMT 330C).

Total credits to complete degree requirements: 60* semester hours

*A minimum of 120 credits needed to graduate with a BS in NMT

Bachelor of Science Degree in Radiation Therapy

Radiation therapy is an allied health specialty that utilizes ionizing radiation in the treatment of disease, primarily cancer. The primary responsibilities of a radiation therapist include implementing treatment plans prescribed by a radiation oncologist and assisting in the planning of treatment with the medical dosimetrist and radiation physicist. These responsibilities require highly specialized technical skills as well as highly developed interpersonal skills for interacting effectively with other members of the oncology treatment team, patients, and their families. Students in the radiation therapy program develop these skills through an intensive didactic curriculum and through clinical internship under the supervision of certified and licensed radiation therapists. Internship training is provided at the clinical affiliates. These include, but are not limited to, Baystate Medical Center, Beth Israel Deaconess Medical Center, Beth Israel Deaconess Cancer Center and Surgical Pavilion – Needham, Brigham and Women's Hospital, Dana-Farber / Brigham and Women's (DF/BW) Cancer Center (Milford), Dana-Farber Cancer Institute, DF/BW at South Shore Hospital, Lahey Clinic, Lahey Clinic North, MetroWest Medical Center, MGH North Shore Center for Outpatient Care, Mt. Auburn Hospital, North Main Radiation, Rhode Island Hospital, Shields Radiation Oncology Center (Mansfield), St. Vincent Hospital Radiation Oncology Center, Southcoast Centers for Cancer Care, UMass Memorial Hospitals in Marlborough, Fitchburg and Worcester, and Winchester Hospital Radiation Oncology Center. Due to the widespread geographical locations of the clinical settings in the radiation therapy program, it is strongly suggested that students have a driver's license and reliable transportation. The majority of the clinical settings are not accessible by public transportation. Transportation to and from clinical settings is the responsibility of the student.

Upon graduation from the Bachelor of Science in Radiation Therapy program, the student is eligible to sit for the certification examination administered by the American Registry of Radiologic Technologists.

To meet the residency requirement for the Bachelor of Science in Radiation Therapy, students must complete at least 61 semester hours at the University.

NOTE: All Radiation Therapy students must be certified in CPR before the Clinical Internship (RTT 325C).

Technical Standards for Radiation Therapy

MCPHS University has established the following list of technical standards for the majors of Radiography, Nuclear Medicine and Radiation Therapy. These technical standards conform to the professional technical standards required for the safe and ethical practice of the tasks/skills associated with medical radiography, clinical nuclear medicine technology and clinical radiation therapy. Each student, with or without a reasonable accommodation, must be able to demonstrate that they are able to:

- Reach and manipulate equipment to its highest position (6 feet);
- Move a standard wheelchair and/or stretcher from a waiting area to the imaging/treatment room;
- Transfer patients from wheelchairs and stretchers and help them on/off imaging/treatment table;
- Lift a minimum of 60 pounds and ensure patient safety;
- Perform CPR;
- Move from room to room and maneuver in small enclosed spaces;
- Demonstrate manual dexterity to perform necessary manipulations such as drawing doses with a syringe, manipulating locks, putting on surgical gloves;
- Use sufficient corrected eyesight to observe patients and evaluate radiographic quality;
- Visually monitor patients/charts/machine indicator lights in dimly lit conditions;
- Read and apply appropriate information and instructions contained in requisitions, notes and patient charts;
- Detect audible alarms and background sounds during procedures to ensure patient and staff safety;
- Possess sufficient verbal and written skills to communicate needs promptly and effectively in English;
- Communicate in a clear and concise manner with patients of all ages, including obtaining health history and pertinent information;
- Understand and apply clinical instructions given by department personnel;
- Be able to adapt to changing environments and schedules;
- Establish rapport with fellow students, coworkers, patients and families;
- Function under stressful conditions;
- Endure an eight-hour clinical day with a minimum of four to six hours of standing or walking;
- Endure a minimum of two hours of didactic instruction in a normal classroom environment;

Working conditions for and Radiation Therapists and Radiation Therapy students typically involve:

- Possible exposure to ionizing radiation.
- Possible exposure to chemical solutions.

Radiation therapy students may be required to assist with MRI procedures on patients. To perform/assist with MRI procedures on patients, students must initially undergo the same screening procedures as patients, staff, and visitors in

order to enter the scan room. The MRI scan room contains a region of intense magnetic field. Objects that display any form of ferromagnetism are therefore of particular concern for MRI. Contraindications for entering the MRI scan room include, and are not limited to

- certain biomedical implants, materials, and devices (e.g., aneurysm clips, brain clips);
- certain electrically, magnetically, and mechanically activated implants and devices (e.g., cardiac pacemakers, cochlear implants); and
- certain metallic foreign objects (e.g., shrapnel, bullets, metal in eyes).

Progression into the Professional Phase for Radiation Therapy Majors and MCPHS Internal Transfers

All students must meet the following requirements in order to progress into the professional phase of the radiation therapy program. These requirements apply to students entering MCPHS as freshmen, students who are transferring into Radiation Therapy from other programs within MCPHS, and those who are transferring from another accredited college or university into the professional phase of the Radiation Therapy Program Bachelor or Fast Track Baccalaureate program.

Information for Students Entering the Bachelor of Science in Radiation Therapy Program (Accelerated) Prior to Fall 2022

Requirements

An overall cumulative grade point average (GPA) of 2.0 and successful completion of the following courses with a grade of C or better is required in order to progress into the professional phase of the student's chosen program:

COURSE	TITLE	SEMESTER HOURS
BIO 110/210	Anatomy and Physiology I and II (with labs)	8
PHY 181	General Physics	4
MAT 141	Algebra and Trigonometry or Pre-calculus and Calculus I	3
CHE 110/210	Basic Chemistry I and II (with labs) OR	
CHE 110	Basic Chemistry I	3
CHE 110L	Basic Chemistry I Laboratory	1

For internal transfers, admission into the RTT program is subject to space availability; in addition to the above requirements, the following must be completed:

- Transcript review by the appropriate program director and the dean of the school
- A written essay (maximum 500 words) describing the reason for requesting the particular specialty area and what the study knows about the profession
- A Change of Program form signed by the Center for Academic Success and Enrichment (CASE)
- A personal meeting with the program director or designated program faculty

Information for Students Entering the Bachelor of Science in Radiation Therapy Program (Four Year) Fall 2022 and Later

Requirements

An overall cumulative grade point average (GPA) of 2.5 and successful completion of the following courses with a grade of C+ or better is required in order to progress into the professional phase of the student's chosen program:

COURSE	TITLE	SEMESTER HOURS
BIO 110/210	Anatomy and Physiology I and II (with labs)	8
PHY 181	General Physics	4
MAT 151	Calculus I	3
CHE 110/210	Basic Chemistry I and II (with labs) OR	
CHE 110	Basic Chemistry I	3
CHE 110L	Basic Chemistry I Laboratory	1

In the professional program a minimum professional grade point average (GPA) of 2.7 is required for all RTT and RSC classes. All Boston BSRTT students must achieve a minimum passing grade of 78 (C+) in each professional radiation therapy (RTT) course or (RSC) course and must achieve a minimal professional GPA of 2.5 in the first four sequential radiation therapy (RTT) courses in order to progress. A professional GPA of 2.7 is then required at the end of each semester in order to progress in the radiation therapy major and to fulfill University requirements for graduation.

For internal transfers, admission into the RTT program is subject to space availability; in addition to the above requirements, the following must be completed:

- Transcript review by the appropriate program director and the dean of the school
- A written essay (maximum 500 words) describing the reason for requesting the particular specialty area and what the study knows about the profession
- A Change of Program form signed by the Center for Academic Success and Enrichment (CASE)
- A personal meeting with the program director or designated program faculty

Total credits to complete degree requirements: 82 semester hours

Bachelor of Science Degree in Radiography (Accelerated)

Radiography is an imaging science that utilizes ionizing radiation to assist physicians in the diagnosis of disease. Responsibilities of the radiographer include patient care and assessment, patient education, preparation and positioning for radiographic procedures, and evaluation of image quality.

The first year of this program consists of a core curriculum of preprofessional and general education courses. The didactic and clinical components of the radiography curriculum are integrated into the second and third years. Upon graduation from the Bachelor of Science in Radiography program, the student is eligible to apply for certification through examination by the American Registry of Radiologic Technologists.

To meet the residency requirement for the BS in Radiography, students must complete at least 61 semester hours at the University.

Technical Standards for Radiography

MCPHS University has established the following list of technical standards for the majors of Radiography, Nuclear Medicine and Radiation Therapy. These technical standards conform to the professional technical standards required for the safe and ethical practice of the tasks/skills associated with medical radiography, clinical nuclear medicine technology and clinical radiation therapy. Each student, with or without a reasonable accommodation, must be able to demonstrate that they are able to:

- Reach and manipulate equipment to its highest position (6 feet);
- Move a standard wheelchair and/or stretcher from a waiting area to the imaging/treatment room;
- Transfer patients from wheelchairs and stretchers and help them on/off imaging/treatment table;
- Lift a minimum of 60 pounds and ensure patient safety.
- Perform CPR
- Move from room to room and maneuver in small enclosed spaces
- Demonstrate manual dexterity to perform necessary manipulations such as drawing doses with a syringe, manipulating locks, putting on surgical gloves;
- Use sufficient corrected eyesight to observe patients and evaluate radiographic quality.
- Visually monitor patients/charts/machine indicator lights in dimly lit conditions
- Read and apply appropriate information and instructions contained in requisitions, notes and patient charts;
- Detect audible alarms and background sounds during procedures to ensure patient and staff safety;
- Possess sufficient verbal and written skills to communicate needs promptly and effectively in English.
- Communicate in a clear and concise manner with patients of all ages, including obtaining health history and pertinent information
- Understand and apply clinical instructions given by department personnel;
- Be able to adapt to changing environments and schedules.
- Establish rapport with fellow students, coworkers, patients and families.
- Function under stressful conditions.
- Endure an eight-hour clinical day with a minimum of four to six hours of standing or walking;

- Endure a minimum of two hours of didactic instruction in a normal classroom environment; Working conditions for Radiographers and Radiography students typically involve:
- Possible exposure to ionizing radiation.
- Possible exposure to chemical solutions.

To perform/assist with MRI procedures on patients, students must initially undergo the same screening procedures as patients, staff, and visitors in order to enter the scan room. The MRI scan room contains a region of intense magnetic field. Objects that display any form of ferromagnetism are therefore of particular concern for MRI. Contraindications for entering the MRI scan room include, and are not limited to

- certain biomedical implants, materials, and devices (e.g., aneurysm clips, brain clips);
- certain electrically, magnetically, and mechanically activated implants and devices (e.g., cardiac pacemakers, cochlear implants); and
- certain metallic foreign objects (e.g., shrapnel, bullets, metal in eyes).

NOTE: All Radiography students must fulfill the requirement for CPR certification and for medical terminology before the first Radiography Internship (RAD 201C).

Progression into the Professional Phase for BS in Radiography Majors and MCPHS Internal Transfers

All students must meet the following requirements in order to progress into the professional phase of the Radiography Program. These requirements apply to students entering MCPHS as freshmen, students who are transferring into Radiography from other programs within MCPHS, and those who are transferring from another accredited college or university into the professional phase of the Radiography Program Bachelor or Fast Track Baccalaureate program.

Requirements

An overall cumulative grade point average (GPA) of 2.0 and successful completion of the following courses with a grade of C+ or better is required in order to progress into the professional phase of the student's chosen program:

COURSE	TITLE	SEMESTER HOURS
BIO 110/210	Anatomy and Physiology I and II (with lab)	8
PHY 181	General Physics for DMS, NMT, RAD, and RT, or	
PHY 275	Physics for Medical Imaging	4
MAT 141	Algebra and Trigonometry for DMS, NMT, RAD, RT, or	
MAT 150/151	Pre- calculus and Calculus I	3/6 for MRI
CHE 110	Basic Chemistry I	3
CHE 110L	Basic Chemistry I Laboratory	1
For MRI, NMT, RAD		
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
CHE 132	Chemical Principles II	3
CHE 132L	Chemical Principles II Laboratory	1

For internal transfers, admission into the desired program is subject to space availability; in addition to the above requirements, the following must be completed:

- Transcript review by the appropriate program director and the dean of the school
- A written essay (maximum of 500 words) describing the reason for requesting the particular specialty area and what the student knows about the profession
- A Change of Program form signed by the Center for Academic Success and Enrichment
- A personal interview with the program director or designated program faculty

Bachelor of Science in Radiography, Physician Assistant Pathway

This alternative pathway program is designed specifically for students who want the B.S. in Radiography and wish to transfer into a physician assistant program. The program satisfies the prerequisites for most physician assistant programs. Students should be aware, a passing GPA in the radiography program is 2.5 professional and 2.0 cumulative, but acceptance into PA programs would require a much higher GPA.

Bachelor of Science Degree in Respiratory Therapy

The Bachelor of Science in Respiratory Therapy degree completion program provides certified graduates of entry level respiratory care professional practice a degree program with the additional knowledge, skills, and attributes in leadership, management, education, research, and/or advanced clinical practice as advanced degree respiratory therapists.

Eligible candidates for the BS in Respiratory Therapy Degree Completion Program require the following:

- An AS degree in Respiratory Care from a regionally accredited institution
- Hold certification in Respiratory Care from the American Board for Respiratory Care NBRC as designated by the credential RRT(Registered Respiratory Therapist)

Applicants will receive the following transfer credit:

72 credits for the AS Degree *Must be from regionally accredited institution*

Please Note: some AS programs award less than 72 credits students from these will be evaluated by the admission team and the program faculty (the standard AS programs are 64-72 credits)

12 credits for the RRT Credential

Transfer credits will be applied as a block of credits and the total maximum number possible is 84 credits.

The program of study is 36 credits **all online**. The program can be completed full time in 12 months or part time over 24 months. To earn the BS completion degree, students must complete a total of at least 120 credits with transfer credit and the MCPHS course work.

The MCPHS University BS in Respiratory Therapy Degree Completion Program requires the student to complete a total of 36 credits :

- 15 credits Core curriculum required courses
- 15 credits Respiratory core subjects
- 6 credits program focus – students can choose between courses from health sciences, public health, research and healthcare administration.

The curriculum outline below provides for a part-time curriculum, however the program is designed for either part-time or full-time. Students may begin the program in the Fall or the Spring. Part-time students may complete 6 credits, or two courses, each semester for 6 semesters or 2 years. All RES courses, except RES 490 Capstone in Respiratory Therapy, may be completed in any order.

Curriculum: Bachelor of Science Degree in Respiratory Therapy

Year I—fall

COURSE	TITLE	SEMESTER HOURS

Advanced Certificate Programs in Medical Imaging

Four certificate programs for working technologists seeking advanced certification in the advanced imaging modalities are offered by the School of Medical Imaging and Therapeutics. The certificate programs provide both didactic and clinical training, and students, upon successful completion of the program, are eligible to sit for the advanced certification examinations administered by the American Registry of Radiologic Technologists (ARRT). Certificate programs are available in Computed Tomography (CT) and Magnetic Resonance Imaging (MRI), Mammography, and Nuclear Medicine Technology. The Nuclear Medicine Technology program is also available for students who hold a bachelor's degree in any field.

Eligibility for each certificate program is established in accordance with ARRT and/or NMTCB guidelines. Applicants must hold current ARRT/NMTCB certification in the appropriate discipline as well as current CPR certification. For Nuclear Medicine Technology, applicants may hold a bachelor's degree in any field in place of holding current ARRT/NMTCB certification.

Advanced Certificate in Computed Tomography (Online)

Prerequisites: ARRT/NMTCB/ARDMS certification in Radiography, Nuclear Medicine Technology or Radiation Therapy, and:

- Current CPR certification
- ARSC 310 Cross-sectional Anatomy (3 credits)

A minimum grade of C is required in *all* courses to progress and receive the certificate. Transfer credits are not accepted.

Term 1

COURSE	TITLE	SEMESTER HOURS
RSC 320	CCT and Cross-Sectional Anatomy	3
RSC 425C	CT Clinical Internship	3
TOTAL		6

Term 2

COURSE	TITLE	SEMESTER HOURS
RSC 315	CT Imaging-Board Review	3
TOTAL		3

Total credits to complete Computed Tomography Certificate requirements: 9 semester hours

Advanced Certificate in Magnetic Resonance Imaging (Online)

Prerequisites: ARRT/NMTCB/ARDMS certification in Radiography, Nuclear Medicine Technology, Radiation Therapy, or Sonography is required. A grade of C+ or better in a cross-sectional anatomy course also is required. A minimum grade of C is required in all courses to progress and receive the certificate.

Summer

COURSE	TITLE	SEMESTER HOURS
MRI 401O.O	Physical Principles of MRI	3
MRI 405O.O	MRI Safety and Applications	3
TOTAL		6

** RSC 310 is offered during the fall semester for students who have not previously completed a 3 credit cross-sectional anatomy course.*

Fall

COURSE	TITLE	SEMESTER HOURS
MRI 410O.O	MRI Procedures	3
RSC 310O.O	Cross-sectional Anatomy	3
MRI 435C	Advanced Certificate Clinical Internship (Optional)	8
TOTAL		6 or 15 with clinical rotation

Spring

COURSE	TITLE	SEMESTER HOURS
MRI 415O.O	MRI Image Production and Quality	3
MRI 430O.O	MRI Pathology	3
TOTAL		6

*** MRI clinical rotations at affiliated hospitals will be offered to students who wish to enroll in the fall semester.*

Total credits to complete MRI Advanced Certificate requirements: 18 semester hours

Advanced Certificate in Nuclear Medicine (Online)

Candidates must meet ONE of the following two options:

- Prior Bachelor's Degree in any field OR
- ARRT/ARDMS certification in Radiography, Radiation Therapy, or Sonography

In addition to the requirements already mentioned for students in the advanced certificate program, one must have successful completion of the following courses with a grade of C or better is required as prerequisites.

BIO 110/210 Anatomy and Physiology I and II (with lab)

LIB 111 Expository Writing I

General Physics (algebra or calculus based) OR Radiation Physics
 College Algebra or higher
 CHE 110 Basic Chemistry I
 CHE 110L Basic Chemistry I Laboratory

Requirements

In addition to the requirements already mentioned for students in the fast-track program, students must have successfully complete the following courses with a grade of C+ or better and a minimum GPA of 2.5.

Summer

COURSE	TITLE	SEMESTER HOURS
NMT 260	Fundamentals of Nuclear Medicine	3
RSC 110*	Medical Terminology for Radiologic Sciences	1
TOTAL		4

Fall

COURSE	TITLE	SEMESTER HOURS
NMT 305	Cardiovascular Imaging	3
NMT 310	Radiation Sciences & Regulations	3
NMT 320	Nuclear Medicine Imaging	6
NMT330C	Nuclear Medicine Internship I	4
TOTAL		16

Spring

COURSE	TITLE	SEMESTER HOURS
NMT 340	Molecular Imaging & Theranostics	3
NMT 350	Radiopharmacy	3
NMT 331C	Nuclear Medicine Internship II	8
NMT 390	Problem Solving in Nuclear Medicine I	2
TOTAL		16

Summer

COURSE	TITLE	SEMESTER HOURS
NMT 332C	Nuclear Medicine Internship III	7
NMT 391	Problem-Solving in Nuclear Medicine II	2
RSC 320	CT & Cross Sectional Anatomy	3
TOTAL		12

Total credits to complete Nuclear Medicine Advanced Certificate requirements: 50 semester hours

Medical Terminology may be transferred from another institution if previously taken prior to entering MCPHS.

NOTE: All Nuclear Medicine Technology students must fulfill requirements for CPR certification and to pass medical terminology proficiency prior to NMT Internship (NMT 330C).

Advanced Certificate in Mammography (Online)

Prerequisites: State license and ARRT certification in Radiography.

A minimum grade of C is required in *all* courses to progress and receive the certificate. Transfer credits are not accepted.

Fall

COURSE	TITLE	SEMESTER HOURS
RSC 4500	Mammography Board Review Course	3
RSC 4520	Mammography Imaging Procedures & Patient Care	3
TOTAL		6

Spring

COURSE	TITLE	SEMESTER HOURS
RSC 456C	Clinical Internship	3
TOTAL		3

Total credits to complete Mammography Advanced Certificate requirements: 9 semester hours

MCPHS University–Boston

School of Nursing

Tammy Gravel, EdD, MS, RN, Dean of the School of Nursing and Chief Nurse Administrator and Associate Professor

Deborah McManus, PhD, MSN, RN, Assistant Professor and Associate Dean

Lorraine MacDonald, MSN, RN, PMHNP-BC, Assistant Professor and Assistant Dean of BSN Clinical Education & Experiential Learning

Carolyn Parker, MS, RN, Assistant Professor and Interim Director of Simulation and Laboratory

Caliope Archon, BSN, Faculty Associate, NCLEX Success Coach

Professor Street; Associate Professors Galindo; Assistant Professors DesRoches, Eichorn, Mataoui, McManus, Santos; Faculty Associate Archon

Degree Programs

- Bachelor of Science in Nursing (Accelerated)
- Bachelor of Science in Nursing (Postbaccalaureate)
- Bachelor of Science in Health Sciences / BSN (Postbaccalaureate) Dual Degree

School of Nursing Academic Policies

Academic Progression

A minimum grade of C+ (2.3) is required in selected prerequisite non-Nursing courses (Anatomy and Physiology, Basic Chemistry, Chemistry of Nutrition, Microbiology, Math for Nurses, Statistics, and Human Growth and Development) and all professional Nursing courses. Successful completion of both the theory and the clinical laboratory / practicum in a clinical Nursing course is required to pass the course. A minimum professional grade point average (GPA) of 2.7 is required.

All Boston BSN students must achieve a minimum passing grade of 78 (C+) in each professional nursing (NUR) course and in order to progress. A professional GPA of 2.7 is then required at the end of each semester in order to progress in the nursing major and to fulfill University requirements for graduation.

Students who do not achieve the required professional GPA needed to fulfill School of Nursing graduation requirements must complete a select remediation course(s) to reach the required professional GPA. Official University graduation and approval to write for the NCLEX will not occur until professional GPA and all graduation requirements have been met.

Any Nursing course that is graded below a C+ may be repeated only once. A second grade below C+ in the repeated course will result in dismissal from the Nursing program. Throughout the Nursing program, a student may repeat no more than two separate Nursing courses. Three grades below C+ in any combination of Nursing courses will result in dismissal from the Nursing program.

All courses must be taken sequentially.

Professional courses (designated NUR) may not be taken pass/fail.

Test of Essential Academic Skills (TEAS)

Students admitted or transferring to the BSN program must successfully complete the ATI TEAS test prior to the transition into the professional nursing curriculum.

- The ATI TEAS test must be taken before the end of the Summer Semester for students entering the Professional BSN Curriculum in the Spring Semester. ATI TEAS test results must be reported to the School of Nursing and will be documented in the student's program of study.
- Students must achieve a score of 65.3 or better within three attempts.
- Students who do not meet the benchmark score of 65.3 or better within three attempts will be dismissed from the BSN program.

Progression and Retention Policies

Students must complete the requirements for the BSN degree within five (5) years (32-month track) or three (3) years (16-month track). If this time limit from the date of admission into the major has elapsed and the student has not completed degree requirements, the student must request an extension in writing and meet with the School Dean, who may approve or deny the extension request. The School Dean's decision is final and not subject to further appeal.

CPR Certification

All students must complete CPR training prior to beginning clinical experiences in NUR 204: Health and Wellness I. Students must be certified in Basic Cardiac Life Support (BCLS) at the Healthcare Provider Level by the American Heart Association (AHA). Students must provide a copy of the AHA Healthcare Provider Level card indicating active certification. (AHA requires recertification every two years.) It is recommended that the student verify the course in advance to ensure that the course is appropriate.

Transportation

Reliable transportation to, from, and during all clinical and field experiences is the responsibility of the student. A number of clinical rotations in the required curriculum may be scheduled at some distance from the campus. This is necessary to provide a range of diverse learning experiences and to ensure availability and quality of clinical rotation sites. The University will make every effort to accommodate requests regarding assignments to experiential education sites, but students generally can expect to be assigned to clinical sites some distance from the campus for at least a portion of their required clinical rotations. In such instances, students are responsible for transportation and other related travel expenses.

Licensure

Students who successfully complete the program will be eligible to sit for the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

Employment

Due to the rigorous nature of the Nursing program, the demands placed on students are extremely high, particularly with respect to their clinical schedule and course requirements. It is for this reason that students are strongly discouraged from engaging in outside, non-program-related employment throughout the program of study.

School of Nursing Professional and Technical Standards

A prelicensure candidate for the Bachelor of Science in Nursing degree must have abilities and skills in four areas: communication, observation, motor function and endurance, and behavioral maturity. Reasonable accommodations may be made for some disabilities. However, prelicensure BSN students must be able to perform in a reasonably independent manner, with or without accommodations.

Communication

- Must be able to communicate effectively with patients, families, and members of the healthcare team through oral, written, and interpersonal means;
- Must be able to obtain information, describe patient situations, and perceive both oral and nonverbal communication (including ability to understand normal speech without seeing the speaker's face);
- Must be able to speak, comprehend, read, and write in English at a level that meets the need for accurate, clear, and effective communication. Examples include but are not limited to giving clear oral reports, reading watches or clocks with second hands, reading graphs, reading and understanding documents printed in English, writing legibly in English, and discriminating subtle differences in medical terminology.

Observation

- Must be able to observe a patient accurately. Examples include but are not limited to listening to heart and breath sounds; visualizing the appearance of a surgical wound; detecting bleeding, unresponsiveness, or other changes in patient status; detecting the presence of a foul odor; and palpating an abdomen;
- Must be able to detect and respond to emergency situations, including audible alarms (e.g., monitors, call bells, fire alarms)

Motor Function and Endurance

- Must have sufficient strength and mobility to work effectively and safely with patients and carry out nursing care activities. Examples include but are not limited to lifting and positioning patients (lifting up to 50 pounds, carrying up to 25 pounds), transferring patients in and out of bed, performing cardiopulmonary resuscitation (AHA Healthcare Provider Level certification), preparing and administering medications (oral, injection, and intravenous, including hanging IV bags at shoulder height), reading and emptying body fluid collection devices below bed level, applying pressure to stop bleeding, clearing/opening an obstructed airway, and providing daily hygiene care;
- Must be able to complete assigned periods of clinical practice, including up to 12-hour shifts, including days, evenings, nights, and weekends;
- Must be able to respond at a speed and in a manner sufficient to carry out patient assignments within the allotted time

Behavior

- Must possess mental and emotional health required for total utilization of intellectual abilities;
- Must be able to tolerate physically taxing workloads;
- Must be able to respond and function effectively during stressful situations;
- Must be capable of adapting to rapidly changing environments and of responding with flexibility in uncertain situations;
- Must be able to interact appropriately with others (i.e., patients, families, members of healthcare team) in various healthcare contexts;
- Must meet the ethical standards of the profession

Policy for Content Validation after Non-progression or Leave of Absence

A student who fails or withdraws from an undergraduate Nursing professional course, or who withdraws from a Nursing program via leave of absence, must validate previous knowledge and skills held prior to program exit before they may reenroll in Nursing clinical professional courses. Reenrollment is subject to clinical placement availability. (NOTE: Students returning from a leave of absence must confirm their intent to return as specified in the Return from Leave of Absence section. There is no guarantee that space will be available at the student's desired return date. It may take up to two years for reentry due to lack of clinical placement availability.)

The validation will occur via the student's demonstration of knowledge and skills—that is, meeting established program clinical competencies—in a selected clinical facility or simulation laboratory. The student must notify the Dean of the desired date of return a minimum of 30 days prior to the anticipated return date to make arrangements for preparing for and performing validation testing. Program faculty will provide guidance as to what content and skills (competencies) the student needs to review prior to the testing, but it is student's responsibility to prepare for the validation testing. The student must pass the validation testing as per the outcome measures determined by the faculty. Failure to meet the required outcome(s) will result in dismissal from the Nursing program and/or the need to repeat identified courses.

A student attempting to return from a leave of absence also must have been cleared to return to classes by their Academic Dean or the Student Affairs office at their campus (if a medical leave of absence) prior to performing validation testing. The Student Affairs office and Nursing faculty will coordinate communication regarding student clearance for leave of absence return and subsequent eligibility to schedule validation testing.

Bachelor of Science in Nursing

Bachelor of Science in Nursing (Accelerated) – 32-month Curriculum

Responding to the growing demand for nurses nationally, MCPHS offers an innovative accelerated 32-month nursing professional program leading to the Bachelor of Science in Nursing (BSN) degree. Reflecting the American Association of Colleges of Nursing (AACN) Essentials of Baccalaureate Education for Professional Nursing Practice and the National Council of State Boards of Nursing Detailed Test Plan for the National Council of State Boards of Nursing Licensure Examination for Registered Nurses (NCLEX-RN), the program prepares graduates to be able to respond to the complex challenges of a rapidly changing healthcare environment. The curriculum builds upon a strong foundation in the liberal arts and sciences, and guides the student toward gaining the knowledge, skills, competencies, and values required to practice as a professional nurse. This program has r approval with warning from the Massachusetts Board of Registration in Nursing (MBORN) and is accredited by the Commission on Collegiate Nursing Education.

The Bachelor of Science in Nursing is offered as a full-time baccalaureate degree program, in a 32-month accelerated, year-round format. The first two years of the program consist of 15-week fall semesters and 15-week spring semesters, and a 12-week summer session in Year II; the third and final year consists of a 15-week fall semester and a 15-week spring semester, concluding in May of the third year. The program requires 120 semester hours of credit for completion, which includes the core curriculum requirements common to all MCPHS undergraduate and first professional degree programs, additional professional support courses in the natural and social sciences, and courses in the Nursing major. Upon completion of the program, students will be eligible to sit for the NCLEX-RN.

To meet the residency requirement for the Bachelor of Science in Nursing, students must complete at least 61 semester hours at MCPHS University.

NOTE: An exception to the policy that no course examinations or graded assignments worth more than 15% of final course grade may be scheduled during the week before final examinations exists for Nursing courses. Major graded assignments or exams may be administered the week before the final week of the course. A reading day (scheduled only on a weekday, no Saturday or Sunday) will be provided between the end of scheduled classes / clinical rotations and the administration of any final exams.

Curriculum: Bachelor of Science in Nursing (Accelerated)

Year I—fall

Total credits to complete degree requirements: 120 semester hours

Bachelor of Science Degree in Nursing (Postbaccalaureate) – 16-month Curriculum

The 16-month accelerated BSN program implemented at the MCPHS–Boston campus is designed specifically for students with a bachelor’s degree in another field. The curriculum is identical to that currently offered at the Worcester and Manchester campuses. Students attend classes in Boston. Program instruction is conducted in state-of-the-art facilities at the MCPHS-Boston campus with clinical experiences in selected hospital and community agencies in the greater Worcester and MetroWest regions.

This 16-month program of study provides an accelerated option for students ready for a challenging transition to a career as a Bachelor of Science in Nursing registered nurse. Building on previous learning and experience gained from the student’s first bachelor’s degree, the 16-month program of study mirrors the Boston-based program’s professional major, guiding students toward gaining the knowledge, skills, competencies, and values required to practice as a registered nurse in the 21st century.

The Postbaccalaureate BSN is offered in a 16-month year-round format with a January or September admission. The September-admission program consists of a 15-week fall semester, a 15-week spring semester, a 12-week summer session, and a 15-week fall semester; concluding in December of the second year. The January-admission program consists of a 15-week spring semester, a 12-week summer session, a 15-week fall semester and a 15-week spring semester, concluding in May of the second year.

To be eligible for the program, the student must possess a prior Bachelor of Science or Bachelor of Arts degree and have completed the following prerequisite coursework with a minimum grade of C within the past 10 years: chemistry (with lab), anatomy and physiology (with lab), microbiology (with lab), statistics, nutrition and human development.

Students with a baccalaureate degree will not be required to meet the MCPHS general education core requirements. Students must take and pass the TEAS with a 65.3% or better in 3 or fewer attempts. The program requires a total of 120 semester hours of credit for completion. Upon completion of the program, students will be eligible to sit for the National Council of State Boards of Nursing Licensure Examination for Registered Nurses (NCLEX-RN).

NOTE: An exception to the policy that no course examinations or graded assignments worth more than 15% of final course grade may be scheduled during the week before final examinations exists for Nursing courses. Major graded assignments or exams may be administered the week before the final week of the course. A reading day (scheduled only on a weekday, no Saturday or Sunday) will be provided between the end of scheduled classes / clinical rotations and the administration of any final exams.

Total preprofessional coursework: 56 semester hours*

Total professional major: 64 semester hours

Total institutional credits to complete **BSN requirements: 120 semester hours**

* A maximum of 56 semester hours of credit for the prior Bachelor of Science or Bachelor of Arts degree from a regionally accredited college or university will be awarded upon matriculation in fulfillment of MCPHS core curriculum requirements.

Bachelor of Science in Health Sciences/BSN (Postbaccalaureate) Dual Degree

The Bachelor of Science in Health Sciences (BSHS)/BSN (Postbaccalaureate) Dual Degree program provides a pathway to nursing for students not yet holding a BS degree but interested in joining the BSN (Postbaccalaureate) program. The program will allow students to earn a BSHS while at the same time completing some BSN courses that can then be used in the BSN (Postbaccalaureate) program. The only students who will be considered for this dual degree option are those who can fully complete prerequisites prior to matriculation.

A cumulative 3.0 grade point average (GPA) in the 83 semester hours of preprofessional and health sciences courses is preferred prior to admission to the BSN courses. A TEAS score of 65.3% in 3 or fewer attempts. A 2.7 GPA is required for progression and graduation in the BSN curriculum.

Preprofessional and Core Curriculum Courses (Completion Prior to Admission Is Required)

COURSE	TITLE	SEMESTER HOURS
	Human Anatomy and Physiology I and II (with labs)	8

MCPHS University–Boston

School of Physician Assistant Studies

Alicia Kelley, DScPAS, MS, PA-C, Interim Program Director and Associate Professor, School of Physician Assistant Studies – Boston

John Kelly, MD, Medical Director

Associate Professors Graeff, Hurwitz, Kelley, Moktar, Orrahood, Vajravelu; Assistant Professors Chiavegato, Hurley, Jones, McDonald, Riley, Stavroulakis, Taglieri, Webb. Faculty Associate McDermott

Degree Program

Physician Assistant Studies (Boston)

See the MCPHS–Manchester and MCPHS–Worcester sections for information on the Physician Assistant Studies (Accelerated) program.

The MCPHS Boston Physician Assistant (PA) Studies program is dedicated to the development of clinically competent physician assistants who are thoroughly prepared to deliver quality patient care in various settings within the healthcare delivery system. Upon successful completion of the degree requirements, the Master of Physician Assistant Studies (MPAS) degree is awarded. The program is accredited by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA), and graduates are eligible to sit for the Physician Assistant National Certifying Examination (PANCE).

The MCPHS Boston PA program capitalizes on the extensive educational resources of the university, the Longwood Medical and Academic Area, as well as other regions, to prepare PA students with the skills, competencies, and attitudes needed to provide competent and compassionate medical care to diverse patients in a variety of settings. Students acquire experience in the evaluation and treatment of a broad spectrum of medical problems through the program's clinical rotations which include surgery, psychiatry, women's health, pediatrics, emergency medicine, family medicine, and internal medicine.

Students applying to the Boston Physician Assistant Studies program must submit a formal application, including official transcripts and essay, through the Central Application Service for Physician Assistants (CASPA) by October 1 of the year prior to admission. CASPA may be contacted at www.caspaonline.org. In addition, all MPAS applicants are required to complete a supplemental application, which is submitted via CASPA.

The Physician Assistant

Professional Responsibilities

According to the American Academy of Physician Assistants, PAs are medical professionals who diagnose illness, develop and manage treatment plans, prescribe medications, and often serve as a patient's principal healthcare provider. With thousands of hours of medical training, PAs are versatile and collaborative. PAs practice in every state and in every medical setting and specialty, improving healthcare access and quality.

Professional Credentials

All graduates of the PA program are awarded the Master of Physician Assistant Studies (MPAS) degree which confers eligibility to sit for the Physician Assistant National Certifying Exam (PANCE).

Master of Physician Assistant Studies

Admission Prerequisites

Students who have earned a baccalaureate degree and have met the following prerequisite course requirements must apply through the Central Application Service for Physician Assistants (www.caspaonline.org). Students who meet the requirements may be invited to campus for an interview which must be successfully completed before an offer of admission is made.

The application must include a transcript demonstrating successful completion of the following course prerequisites:

- Two semesters of Biology (one lab required), minimum of 7 semester hour credits
- One semester of Microbiology with lab, 4 semester hour credits
- Three semesters of chemistry (one lab required), minimum of 10 semester hour credits. One of the three

courses must be at the 200 level or higher (acceptable courses include Organic Chemistry, Analytical Chemistry, Physical Chemistry, or Biochemistry).

- Anatomy and Physiology I and II (6 credits). Acceptable substitutions include Anatomy and Physiology I and II or one semester's equivalent of Anatomy and one semester's equivalent of Physiology.
- One semester of Psychology, 3 semester hour credits
- One semester of Statistics or Biostatistics, 3 semester hour credits

A grade of C (2.0) or better is required for all the prerequisite courses. An overall cumulative, prerequisite and science GPA of 3.0 or better on a 4.0 scale is required.

All prerequisite courses must be completed within the past 10 years. Prerequisite courses must be completed at a regionally accredited institution of higher education in the United States. A minimum of 250 hands-on patient care hours are required.

MCPHS Premedical Pathway: Physician Assistant Studies and Health Studies students seeking admission into the Master of Physician Assistant Studies program should see Admission for MCPHS Students—Undergraduate Curriculum under School of Physician Assistant Studies Policies and Professional Requirements later in this section.

Please note: MCPHS University gives admission preference to students currently in our Pre-med Pathway: Physician Assistant Studies Program.

Health and Technical Standards

Technical Standards for Admission, Promotion, and Graduation

A candidate for the MCPHS Boston Physician Assistant Studies program must have, at a minimum, skills in five categories: observation, communication, motor, intellectual, and behavior/social. Reasonable accommodation for persons with documented disabilities will be considered on an individual basis, but a candidate must be able to perform in an independent manner. The following skills are required with or without accommodation:

Observation

Candidates must have sufficient capacity to observe in the lecture hall, the laboratory, the outpatient setting, and the patient's bedside. Sensory skills to perform a physical examination are required. Functional vision, hearing, and tactile sensation are required to properly observe a patient's condition and to perform procedures regularly required during a physical examination such as inspection, auscultation, and palpation.

Communication

Candidates must be able to communicate effectively in both academic and healthcare settings. Candidates must show evidence of effective written and verbal communication skills. Candidates must be able to communicate with patients in order to elicit information, describe changes in mood, activity, and posture, and perceive nonverbal communications. Candidates must be capable of completing thorough medical records and documents in a timely, and appropriate manner.

Motor

Candidates must be able to participate in basic diagnostic and therapeutic maneuvers and procedures (e.g., palpation, auscultation). Candidates must have sufficient motor function to execute movements reasonably required to properly care for all patients. Candidates must be able to move freely about patient care environments and must be able to move between settings such as clinics, classroom buildings, and hospitals. In addition, physical stamina sufficient to complete the rigorous course of didactic and clinical study is required. Long periods of sitting, standing, or moving are required in classroom, laboratory, and clinical experiences.

Intellectual

Candidates must be able to measure, calculate, reason, analyze, and synthesize. Problem solving, one of the critical skills demanded of physician assistants, requires all of these intellectual abilities. Candidates must be able to read and understand medical literature. In order to complete the Physician Assistant Studies program, candidates must be able to demonstrate mastery of these skills and the ability to use them together in a timely fashion in medical problem-solving and patient care.

Behavioral and Social Attributes

Candidates must possess the emotional health and stability required for full utilization of their intellectual abilities. They must exercise good judgment and be able to promptly complete all academic and patient care responsibilities. The ability to develop mature, sensitive, and effective relationships with patients and other members of the healthcare team is

essential. The ability to function in the face of the uncertainties is essential. Flexibility, compassion, integrity, motivation, interpersonal skills, and concern for others are required. Candidates must be able to function effectively under stress. They must be able to accept constructive criticism and handle difficult interpersonal relationships during training.

Clinical Rotations

Clinical rotations may be scheduled throughout the United States . This geographic diversity is necessary to provide a range of diverse learning experiences and to ensure availability and quality of clinical rotation sites. Students should expect to be assigned to clinical sites outside of Boston for at least a portion of their required clinical rotations. In such instances, students are responsible for transportation, food, parking, housing, and other related incidentals for all clinical rotations. Students are required to have a 2.85 professional GPA in order to enter into clinical rotations.

In addition to the costs of the MPAS–Boston program delineated in the Tuition, Room and Board, Fees section of this catalog, PA students can expect to spend approximately \$1,000 on medical equipment and approximately \$1,500 for books during the program.

Students in the MPAS program will need to complete a Criminal Offender Record Information (CORI) check prior to starting rotations. Positive CORI checks may impede or preclude a student's progression in the program and result in a student being ineligible for placement at a clinical rotation and/or for state licensure as a physician assistant. Students are responsible for the cost of all CORI checks and for knowing the licensure requirements of the state(s) in which they intend to seek licensure.

School of Physician Assistant Studies Policies and Professional Requirements

Basic and Advanced Life Support

All students in the Physician Assistant program must present proof of successful completion of Basic Life Support (BLS) for Healthcare Providers and Advanced Cardiac Life Support courses (ACLS) prior to entry into the clinical year and must maintain this certification throughout the remainder of the program.

Employment Outside of the University

The Physician Assistant curriculum is rigorous and requires many hours of study outside the classroom. Moreover, clinical rotations sometimes require students to be present nights, weekends, and holidays. Therefore, employment while in PA school is strongly discouraged.

Transfer of Credit

The MCPHS PA Studies program does not accept transfer credit for any PAS courses during the 32-month professional PA program.

Advanced Placement

The MCPHS Physician Assistant Studies program does not award advanced placement in its professional PA curriculum.

Performance in the Master of Physician Assistant Studies Program

All PAS-designated courses (500 level and above) count toward the professional grade point average (GPA). The following are requirements for remaining in good academic standing:

- To progress within both the didactic and clinical phases of the PA program, students must achieve a final course grade of C (2.0) or better on a 4.0 scale. When a student obtains a course grade below C, the student must remediate or repeat the course and progression through the program may be delayed.
- To remain in good standing, a cumulative professional GPA of 2.85 on a 4.0 scale must be maintained throughout the entire length of the program. A professional GPA below 2.85 may result in non-progression status, may necessitate retaking courses, or dismissal from the PA program.
- Successful completion of the PA summative examinations, administered near the end of the final year of the program, is mandatory before graduation. Students unable to pass the summative examination on the first administration will be offered one retake of the exam which must occur between 14 and 28 days following the first administration. Failure to pass the summative examination on the second attempt may result in delayed graduation and/or dismissal from the program.

In order to receive the Master of Physician Assistant Studies (MPAS) degree, students must have earned a cumulative professional GPA of 2.85 or better on a 4.0 scale, have successfully completed all required courses and rotations along with any associated requirements. Additionally, students must have demonstrated all required skills, and successfully completed the summative examination administered during the final professional year of the program.

Admission for MCPHS Students—Undergraduate Curriculum

For MCPHS undergraduate students seeking admission into the Boston MPAS program, the prerequisite requirements for application to the PA program may be met through matriculation in the Bachelor of Science in Premedical Health Studies Premedical Pathway: Physician Assistant Studies program. Students in that program must apply to the PA program through the Central Application Service for Physician Assistants (CASPA) prior to the fall semester of the third year of their undergraduate curriculum. The verified CASPA application deadline is September 1. All first-year and second-year Bachelor of Science in Premedical Health Studies courses (including any required supplemental courses and/or seminars such as PAS 402 and 403 Physician Assistant Preparation courses) must be completed successfully prior to applying to the Physician Assistant program. Outstanding third-year courses must be completed prior to admission into the MPAS program.

A grade of C (2.0) or better is required for all prerequisite courses and an overall cumulative, prerequisite and science GPA of 3.0 (on a 4.0 scale) is required. Also required are 250 hands-on patient contact hours and completion of a successful interview. Please note that meeting these minimal requirements does not guarantee admission to the PA program.

Master of Physician Assistant Studies (Boston)

The Master of Physician Assistant Studies (MPAS) program involves an intensive 30-month course of study of clinical medicine and in-depth exposure to people of all ages in various rotation settings. All courses within the MPAS program must be completed at MCPHS. The MPAS program does not award advanced placement or transfer credit for professional courses.

Curriculum: Master of Physician Assistant Studies (Boston)

Year I—fall

COURSE	TITLE	SEMESTER HOURS
PAS 514	Principles of Professional Practice	2
PAS 515	Genetics	1

Greg Landry, PhD, Assistant Professor of Pharmacology & Toxicology, Director BS Program in Pharmacology and Toxicology

Hongwei Zhang, PhD, Associate Professor of Pharmaceutics, Director BS Program in Pharmaceutical Sciences.

Professors Chuong, D'Souza, Kerr, Mehanna, Priefer, Zaghoul; Associate Professors Betharia, Gayakwad, Kiel, Migliore, Pino-Figueroa, Sridhar, Zhang; Assistant Professors Landry, Train; Faculty Associate Böhlke

Department of Pharmacy Practice

Judy Cheng, PharmD, MPH, BCPS, FCCP Professor and Chair

David Schnee, PharmD, Professor and Vice Chair

Michele Matthews, PharmD, Professor and Vice Chair

Professors , Angelini, Bhatt, Ceresia, Cheng, , Couris, Dvorkin-Camiel, Felix-Getzik, Goldman, Hudd, Kostka-Rokosz, LaPointe, Machado, Matthews, Mistry, Rudolf, Segal, Schnee, Silvia, Zaiken, Zeind; Associate Professors Choi, Crosby, DiFrancesco, , Ferullo, Gammal, Grams, Grgurich, Harris, , Jacobson, Kiritsy, McNicol, Morelli, Moukhachen, Murray, On, Prisco, Stanic, Taglieri; Assistant Professors Athanas, Beqo, DiCupero, Forman, Hall, Jain, Long, Murry, Ricupero, Sangave, Solodokin, Stern, Szumita, Thumar, Wong

Office of Experiential Education

Andrew Szumita, PharmD, Assistant Professor of Pharmacy Practice and Director of Experiential Education

Rita Morelli, PharmD, Associate Professor of Pharmacy Practice and Experiential Coordinator

Stella Athanas, PharmD, Assistant Professor of Pharmacy Practice and Experiential Education Coordinator

Degree, Certificate, and Residency Programs

- Doctor of Pharmacy (PharmD)
- Residencies in Pharmacy Practice
- Doctor of Pharmacy Pathway (Postbaccalaureate PharmD)*
- Bachelor of Science in Pharmaceutical Business
- Bachelor of Science in Pharmaceutical Sciences / Master of Pharmaceutical Sciences
- Bachelor of Science in Pharmacology and Toxicology
- Certificate in Advanced Pharmacy Practice Studies (CAPPS)

*Online programs

Doctor of Pharmacy (PharmD)

The School of Pharmacy–Boston offers a six-year program leading to a Doctor of Pharmacy (PharmD) degree. Students follow a curriculum that combines general, specialized, and applied science courses with those in the liberal arts, preparing them for an increasingly visible role on the healthcare team. In addition, required experiential courses provide opportunities to learn while practicing in areas such as ambulatory, community, inpatient, and institutional pharmacy, as well as elective experiences in geriatrics, pediatrics, industry, long-term care, and regulatory agencies. Credits earned in professional courses are valid for up to seven years.

Technical Standards for the School of Pharmacy

Introduction

The School of Pharmacy is committed to a policy of equal educational opportunity and welcomes individuals with diverse backgrounds and abilities. The school therefore prohibits discrimination according to all applicable state and federal laws. The purpose of this document is to ensure that all students entering the PharmD program have read and understand the clinical and nonacademic requirements of the program so that they can make informed decisions regarding their pursuit of the profession of pharmacy.

Candidates for admission to and students enrolled in the Doctor of Pharmacy (PharmD) program must have abilities and skills in multiple domains, including communication, intellectual, behavioral/social, and visual/auditory/tactile/motor competencies. The following technical standards describe the nonacademic qualifications (required in addition to academic standards) that the School of Pharmacy considers essential for successful progression in and completion of the educational objectives of its curriculum.

Although the School of Pharmacy will engage in an interactive process with applicants with disabilities, it reserves the right not to admit any applicant who, upon completion of the interactive process, cannot meet the technical standards set forth below, with or without reasonable accommodations.

Reasonable accommodation for persons with prior documented disabilities will be considered on an individual basis. Students wishing to request accommodations for disabilities should contact the Office of Student Access and Accommodations (see the Office of Student Access and Accommodations in the Student Services section of the catalog).

Domain: Communication

Performance Standards

- Must have functional English speaking, reading, and writing abilities necessary to communicate clearly with patients, family, caregivers, physicians, and other healthcare professionals, colleagues, and faculty. Communication includes both verbal and nonverbal expression, reading, writing, and computer skills.

Essential Functions

- Must have the ability to participate in class discussions, group projects, and practical labs for the purpose of the

delivery and receipt of medical information;

- Must have the ability to recognize both verbal and nonverbal communication, including facial expressions and body language;
- Must have the ability to report accurately and legibly in patients' charts, demonstrating the knowledge of the meaning and spelling of words, rules of composition, and grammar;
- Must have the ability to explain to other healthcare team members, patients, and/or caregivers the reason for treatment, preventive measures, disease process, and need for referral;
- Must have the ability to use computers and other technology to accurately record information and convey critical health-related documentation;
- Must have the ability to recognize and respond to the physical and psychological needs of patients

Domain: Intellectual

Performance Standards

- Must have sufficient critical and logical thinking ability to engage in clinical judgment and problem solving to address issues and problems within all learning environments;
- Must have the ability to multitask and to perform work in a logical and sequential manner

Essential Functions

- Must be able to memorize, perform scientific measurement and calculation, reason, analyze, and synthesize information;
- Must demonstrate the ability to retrieve (electronically and manually), read, understand, and interpret medical, scientific, and professional information and literature;
- Must demonstrate the intellectual and reasoning abilities required to develop problem-solving and decision-making skills;
- Must demonstrate the ability to learn effectively through a variety of modalities including, but not limited to, small group discussion, individual study of materials, preparation and presentation of written and oral reports, and use of computers and other technology;
- Must demonstrate the ability to prioritize and complete tasks in laboratory, clinical, and patient care settings with time constraints;
- Must perform a variety of duties accurately, often changing from one task to another without loss of efficiency or composure

Domain: Behavioral/Social

Performance Standards

- Must possess the ability to relate to patients, caregivers, other members of the healthcare team, and faculty in a professional manner;
- Must demonstrate sensitivity to people from a variety of cultural backgrounds;
- Must possess the ability to interact with and respond to the needs of patients and caregivers from a variety of cultural backgrounds and with a diversity of emotional, intellectual, and physical health issues

Essential Functions

- Must be able to fully utilize intellectual abilities to exercise good judgment; to complete patient care responsibilities appropriately; and to relate to patients, families, and colleagues with courtesy, compassion, maturity, and respect for their dignity;
- Must be able to effectively function when faced with challenges and uncertainties in classroom, laboratory, and experiential settings;
- Must accept constructive criticism and be able to respond and modify behavior accordingly;
- Must be able to interact with faculty, staff, peers, patients, and members of the healthcare team in a mature and professional manner that reflects the core values of the University

Domain: Visual/Auditory

Performance Standard

- Must possess sufficient visual and auditory abilities to gather data from written reference material, oral presentations, illustrations, diagrams, and patient observation

Essential Functions

- Must have the ability to gather data from written reference material, computer-based programs, and oral

presentations;

- Must have the ability to observe and/or conduct demonstrations and experiments;
- Must have the ability to utilize various types of physical assessment skills required for patient-centered care, including reading digital or analog representations of physiologic phenomena;
- Must have the ability to execute movements reasonably required to properly participate in the activities of a laboratory or an experiential rotation that are components of pharmacy practice;
- Must have the ability to read and interpret prescriptions, prescription labels, and drug labels

Domain: Tactile and Motor Competencies

Performance Standards

- Must possess sufficient tactile and motor abilities to prepare pharmaceutical products, evaluate patients, and perform basic laboratory tests;
- Must possess the manual dexterity necessary to manipulate and control laboratory equipment and materials

Essential Functions

- Must possess manual dexterity sufficient to accurately compound and prepare pharmaceutical products for dispensing to patients;
- Must possess sufficient manual dexterity and sense of touch to perform basic patient assessments, including but not limited to palpation, auscultation, percussion, and other diagnostic maneuvers;
- Must possess sufficient manual dexterity to conduct laboratory diagnostic tests and administer nonoral medications

Pharmacy Experiential Rotations

Pharmacy Experiential education rotations are required throughout the professional curriculum. Three hundred twenty (320) hours of introductory pharmacy practice experiences are required prior to the sixth (fourth professional) year; 1,440 hours of advanced pharmacy practice experiences are required in the sixth (fourth professional) year. A number of experiential rotations in the required curriculum may be scheduled at some distance from the campus. This is necessary to provide a range of diverse learning experiences and to ensure availability and quality of clinical rotation sites. The University will make every effort to accommodate requests regarding assignments to experiential education sites, but students generally can expect to be assigned to clinical sites at some distance from the campus for at least a portion of their required clinical rotations. In such instances, students are responsible for transportation and other related travel expenses.

Progression Requirements

Students must have a minimum 2.8 grade point average (GPA) by the end of the spring semester of the second year to progress into the first professional year (third year) of the PharmD program.

Students must also complete all preprofessional courses with a minimum grade of C- by the end of spring semester of the second year to progress into the first professional year. In addition to the GPA and course completion and passing requirements, the School of Pharmacy Boston and the Accreditation Council for Pharmacy Education requires all preprofessional students in the second year of the PharmD program to complete an oral interview and writing proficiency exam to progress into the first professional year (third year) of the PharmD program. Students must achieve a satisfactory score on both the verbal and written proficiency exam in order to progress into the first professional year.

All decisions concerning progression into the first professional year are made at the end of the spring semester of the second preprofessional year.

Students must maintain a cumulative GPA of 2.7 in years III-VI of the program. In addition, the minimum passing grade for all required professional courses is C-.

All PharmD students must complete all requirements and be in good academic standing before beginning sixth-year advanced clinical rotations.

All professional coursework in the PharmD program must be completed within a period of seven years. Any coursework older than seven years must be repeated.

Policy on Enrollment Management for the School of Pharmacy–Boston

The MCPHS University, School of Pharmacy–Boston seeks to maintain an appropriate balance of qualified Doctor of Pharmacy (PharmD) students per class with the need to assure high academic standards that are consistent with those of the profession. Students who are enrolled in the Pharmaceutical Sciences and Premedical Studies degree programs

within the University, who have successfully completed all required prerequisites for the PharmD program, and who have attained a *minimum GPA of 3.0 without failing or repeating courses* are eligible to apply for transfer into the first professional year of the PharmD program. Students must successfully fulfill all requirements prior to the fall semester of the first professional year, in accordance with the standards of June 2016 of the Accreditation Council on Pharmacy Education (ACPE) and those described in the policy of the School of Pharmacy–Boston on progression into the Doctor of Pharmacy program.

Applications for internal transfer into the fall semester of a given year must be submitted to the Office of Admissions by January 4th of that academic year. Students complete an interview and writing assessment and must achieve a satisfactory score on both the verbal and written proficiency exam in order to progress into the first professional year. Decisions regarding acceptance of internal transfer applicants into the PharmD program will be made by mid-August based on space availability in the first-professional-year class for the following fall semester. Matriculating students who wish to transfer into the PharmD program at any time after the close of final grades at the end of the spring semester of the second year will be required to complete their current program and may then apply after they have been awarded their degree.

External transfers into the PharmD program are required to comply with the transfer admission policy as described in the University catalog.

Academic Complaint Policy

It is the policy of the MCPHS University School of Pharmacy–Boston (SOP-B) to objectively review student grievances related to academic and non-academic issues.

Students with complaints regarding discrimination are referred to the University discrimination grievance policy. Students with issues or complaints regarding their grade or performance in an individual class are referred to the grade appeals policy. Both policies are in the Academic Policies and Procedures section of this course catalog.

If a student wishes to complain about an issue related to the accreditation standards of the Accreditation Council for Pharmacy Education (ACPE), the student should follow the procedure detailed below.

Procedure

- The student writes a letter detailing the complaint to the School of Pharmacy–Boston Assistant Dean for Academic Affairs;
- If the Assistant Dean is unable to resolve the issue, they form an ad hoc committee of three faculty members (at least one member from each department) and asks the committee to review the complaint and make a recommendation;
- The student receives a written response within 30 days;
- If the student wishes to appeal the decision, they may appeal to the SOP-B Dean within five days;
- The Dean makes a decision and informs the student within 14 days. The decision of the school dean is final;
- The SOP-B Dean's Office keeps a file of all complaints and responses

If a student wishes to file a complaint with ACPE, the student should contact the council via email, phone or mail. The ACPE contact information is available in the catalog in the introduction section under Accreditation.

Residency Requirement

Students must take all preprofessional (years 1-2) and professional courses (years 3-5) in residence at MCPHS University.

Electives

Students are required to take two professional electives during the fifth year of the PharmD program. A list of professional electives will be provided.

Students have the option to apply for a 9 credit Graduate Certificate in Precision Medicine through the MCPHS University School of Professional Studies. Coursework completed as part of this certificate may be applied towards professional elective credit. For further information about this pathway, students may consult with Dean Steven Crosby in the Office of Student Engagement & Success or PharmD faculty mentors in the Center for Academic Success and Enrichment (CASE).

Technical Requirements

Beginning with the first professional year, each student must have access to a laptop for the duration of each year to utilize the School's assessment platform of ExamSoft/ExamID/Monitor. To begin utilizing ExamSoft software at this time, students need to ensure that their laptops fulfill the following minimum requirements based on the type of device they choose to use with ExamSoft. Students need to confirm that computers meet minimum requirements prior to the start of each semester.

Curriculum: Doctor of Pharmacy

Year I—fall

COURSE	TITLE	SEMESTER HOURS
BIO 151	Biology I: Cellular and Molecular Biology	3
CHE 131	Chemical Principles I	3
CHE 131L	Chemical Principles I Laboratory	1
ITM 101	Introduction to the Major	1
LIB 111	Expository Writing I	3
MAT 150*	Precalculus or	3

TOTAL		19

***** May be taken either semester.

Year VI (fourth professional year)

COURSE	TITLE	SEMESTER HOURS
PPBC 601–606	Advanced Pharmacy Experience Program Rotations	36
PPBC 700	NAPLEX Review Modules and Board Review	0
TOTAL		36

Total credits to complete degree requirements: * 210 semester hours

Fifth Year (Third Professional Year)

Students will complete the Pharmacy Curricular Outcomes Assessment (PCOA). This exam is given only once at the beginning of the spring semester. Students will be informed of the date in the fall semester.

Sixth Year (Fourth Professional Year)

During the final year of study, PharmD students earn 36 credit hours by completing 36 weeks of advanced pharmacy practice experiential rotations. The rotations start as early as May and run consecutively through late November or December. The rotations resume in January and finish in May.

Students are required to complete rotations in internal medicine, institutional pharmacy practice, ambulatory care, and community pharmacy practice. Additionally, students complete two elective rotations from areas such as administration, cardiology, community practice, critical care medicine, drug information, emergency medicine, gastroenterology, infectious diseases, nephrology, oncology/hematology, obstetrics/gynecology, pediatrics, poison information, and psychiatry.

Elective rotations chosen by the student are reviewed by the coordinators of experiential education to determine whether the rotations provide appropriate emphasis and balance to the student's overall program. Scheduling of the rotations is completed by the Office of Experiential Education and may be modified at the discretion of the coordinator(s).

Students must also successfully complete on-line NAPLEX review modules and regularly scheduled assessments (i.e. RxPrep) during the 6th year as a condition for graduation. Although no credits or grade are assigned, students will be required to achieve a minimum score on assessments. Students must also attend a required Board Review during the last week of the final APPE rotation and complete a mandatory diagnostic exam.

School of Pharmacy–Boston, Doctor of Pharmacy (PharmD) Honors Program

The School of Pharmacy–Boston Honors Program is an enrichment of the Doctor of Pharmacy curriculum that expands educational opportunities for highly motivated and academically talented students.

Program Overview

Students in the Honors Program will:

- participate in small class seminars with peers that help students develop and improve research and presentation skills
- conduct a research project under the supervision of a research mentor in Pharmaceutical, Clinical, or Social and Administrative Sciences
- earn an Honors designation on their degree transcript with completion of all Honors Program requirements

Honors Program Eligibility

A student who is interested in applying for admission to the Honors Program must:

- be a third-year pharmacy student (first professional year, PY1) in the PharmD program; and
- have a minimum professional grade point average (GPA) of 3.50 by the end of the Fall semester of the PY1 year.

Applications for admission to the Honors Program are due by the last Friday in January of the Spring semester of the PY1 year. The applicant must:

- complete the application form
- submit their curriculum vitae / résumé
- provide two professional references
- submit an essay that outlines the reasons for pursuing the Honors Program as well as how the student expects the Honors Program to contribute to their professional goals after graduation

All applicants who meet the eligibility criteria, whose application materials are received by the deadline, are invited for an interview with members of the Honors Program Committee during the Spring semester. Applicants must maintain their professional GPA of 3.50 or higher through the end of the Spring semester of the PY1 year to be eligible for acceptance. The Honors Program Committee makes the final determination of eligible students' acceptance into the Honors Program.

Honors Program Requirements

- Honors students are expected to maintain a professional GPA of a 3.30 or higher throughout the remaining professional years of the Doctor of Pharmacy curriculum.
- Honors students participate in an Honors seminar that meets during the Fall and Spring semesters of the second professional year (PY2) and the Fall and Spring semesters of the third professional year (PY3). This seminar will foster intellectual inquiry and the technical skills necessary for development, completion and presentation of the Honors project.
- During the second professional year (PY2), each Honors student selects one required course in the Fall semester and one required course in the Spring semester in which to complete additional coursework to meet Honors Program coursework requirements. The Honors student will work under the supervision and guidance of one or more faculty members on a specific area within each course to gain further depth and knowledge in the area of study (laboratory, practicum, and clinical experience can be included) covered within each course. The student must fulfill the Honors coursework requirements as specified by the faculty member(s). The student will spend approximately two hours per week to complete the Honors Program coursework requirements in each course. By the end of the PY2 year, the Honors student will be paired with a faculty research mentor who will supervise their Honors research project throughout the remainder of the student's time in the Honors Program.
- During the third professional year (PY3), the student will focus on advancing their Honors research project under the supervision and guidance of their research mentor. In October, the student will submit their research project proposal with a timeline and budget and present their proposal to the Honors Program Committee, who must approve the proposal prior to initiation of the project. The student begins work on his or her research project in the latter portion of the Fall semester of the PY3 year and continues into the PY4 year. The student may elect to work on their Honors project with their faculty research mentor through completion of an Undergraduate Research elective as a professional elective in the Spring semester of the PY3 year. The student may also select one or two six-week rotations that will advance the goals of the research project. Rotation selections must be indicated within their proposal. These rotations should occur in the first part of the PY4

academic year since the student must complete the research project during the final semester of the PY4 year.

- During the fourth professional year (PY4), the student will focus on the advancement and completion of their research project under the supervision and guidance of their research mentor. The Honors student must submit a scientific report and give a formal presentation on the results of their research in the Spring semester of their PY4 year. Students will be encouraged to submit their projects as abstracts for presentations at regional and national meetings and to prepare manuscripts for publications.

Additional information on the Honors Program is available from the Office of the Dean of the School of Pharmacy-Boston.

Residencies in Pharmacy Practice

The School of Pharmacy–Boston offers several residencies in pharmacy practice. These postgraduate programs provide 12 months of intensive practice experience in pharmacy. Residents are appointed as adjunct instructors in the School of Pharmacy–Boston and participate in the teaching program at MCPHS University and its clinical affiliates. Further information on these programs may be obtained from the Chair of the Department of Pharmacy Practice.

Postbaccalaureate Doctor of Pharmacy Pathway (PharmD) (Online)

The Doctor of Pharmacy Pathway (Postbaccalaureate) is designed for qualified practitioners with a BS in pharmacy degree who wish to earn a degree on a part-time basis. It is currently offered in a Web-supported format with online lectures and group discussions, reducing required on-site meeting time to once per semester. This program helps pharmacists learn how to collect and interpret data to design a pharmaceutical care plan for their individual patients in collaboration with other healthcare professionals. Pharmacists learn how to recommend and implement a therapeutic plan; perform ongoing patient evaluations; and document and report new, unusual, or severe adverse drug reactions, drug interactions, or unexpected effects of newly marketed drugs.

Admission

Requests for formal admission into the pathway are obtained from and processed through the Admission Office. The PharmD Admission Committee in the School of Pharmacy–Boston is responsible for evaluating the applications and making admission decisions. All applicants to the program must:

- have a Bachelor of Science in Pharmacy from an accredited College/University
- have licensure to practice pharmacy in the United States;
- be employed in a patient care setting or have access to a site that provides opportunities to practice pharmaceutical care (e.g., community pharmacy, hospital pharmacy, managed care pharmacy).

Applications to the Doctor of Pharmacy Pathway (Postbaccalaureate) must include official transcripts from all institutions attended as well as the institution that granted the BS in pharmacy degree, curriculum vitae/resume, a short essay of 500 words stating professional goals and objectives, and proof of current pharmacy licensure. Course-by course evaluations from World Education Services or equivalent are required of all foreign transcripts.

The priority filing date for submitting application materials to the Admission Office is May 1. The program begins in September-however; a 3-day orientation is required before the start of the program. The online application is available at <http://www.mcphs.edu/apply> beginning in September. Because seats in the pathway are limited, it is important that applications be returned early in the application period.

Academic Policies for the Doctor of Pharmacy Pathway (Postbaccalaureate)

In addition to the academic policies of the Doctor of Pharmacy program, the following requirements apply to PharmD students in the postbaccalaureate pathway:

- The minimum overall grade point average for graduation from the Postbaccalaureate Doctor of Pharmacy program is 2.7. If the cumulative grade point average of any student falls below 2.7, the student is placed on academic probation and has two semesters to correct the deficiency. Failure to achieve a grade point average of 2.7 following the probationary period is grounds for dismissal from the pathway. For a description of the appeal process, refer to the MCPHS University student handbook.
- The minimum acceptable grade is C– in courses and modules in the pathway. Courses in which grades below passing are earned must be repeated until the minimum grade level is met. A student may petition to replace a maximum of one repeated course grade in his or her calculated grade point average.
- All didactic coursework must be completed within a period of three years of matriculation into the Postbaccalaureate Doctor of Pharmacy program, and all program requirements must be completed within four years of matriculation.

Curriculum: Doctor of Pharmacy Pathway (Postbaccalaureate)

The current pathway is organized into three phases that provide for progression toward the terminal educational outcomes. Completion of 37 semester hours of coursework is required to earn the degree.

Phase I—fall

COURSE	TITLE	SEMESTER HOURS
PPB 600	Principles of Pharmaceutical Care	3
PSB 421	Pharmacoepidemiology	2
TOTAL		5

Total credits to complete degree requirements: 37 semester hours

Certificate in Advanced Pharmacy Practice Studies (CAPPS)

The Certificate in Advanced Pharmacy Practice Studies (CAPPS) is a 65-credit-hour, postbaccalaureate certificate of advanced graduate study. The program may be completed over five semesters on a full-time basis. Semesters I and II are composed of didactic coursework and preparation for both the Foreign Pharmacy Graduate Equivalency Examination (FPGEE), which is administered by National Association of Boards of Pharmacy (NABP) and the North American Pharmacist Licensure Examination (NAPLEX). Semesters III through V are composed of pharmacy internships in inpatient and outpatient pharmacy practice settings. Additional presentations are offered during Semester V to assist students in continued preparation for the NAPLEX and Multistate Pharmacy Jurisprudence Examination (MPJE). During the pharmacy internships, students accumulate the 1,500 hours required for pharmacy licensure by the Massachusetts Board of Registration in Pharmacy.

Admission Requirements and Certificate Requirements

For admission to the CAPPS program, an applicant must meet the following criteria:

- Earned a BPharm or PharmD from a five-year or six-year degree program outside the United States;
- Registered for the FPGEE;
- Achieved a minimum TOEFL score of 79 prior to acceptance

The CAPPs will be awarded to students who have successfully completed 65 semester hours of required coursework and pharmacy internship rotations. Progression to Semesters III–V is contingent upon a minimum passing grade of 70% on all didactic coursework in the CAPPs program. Students must complete pharmacy internship rotation requirements with a minimum passing grade of 70%.

While the CAPPs program is designed to assist students in applying for pharmacy licensure in the United States, it is the responsibility of each student to meet the licensure requirements of NABP and the Massachusetts Board of Registration in Pharmacy. Students are responsible for achieving (1) a passing score on the FPGEE, as determined by NABP; (2) a passing score on the TOEFL Internet-based Test (iBT), as determined by NABP; and (3) a passing score on NAPLEX and the state law examination, as determined by NABP and the Massachusetts Board of Registration in Pharmacy.

Year I—fall

Bachelor of Science in Pharmaceutical Business

(Formerly Bachelor of Science in Pharmaceutical Healthcare Business)

This program combines biological and pharmaceutical sciences coursework with marketing and general management studies, preparing students for a variety of careers or for a continuation of their education in postgraduate programs that could include business, science, clinical research and/or regulatory affairs master's degrees. The Bachelor of Science in Pharmaceutical Business provides skills and experience for use in pharmaceutical sales; healthcare and health information management; food, drug, and medical device industry regulatory oversight; and pharmacy distribution systems development and implementation (e.g., wholesaling, contract purchasing, and pharmacoeconomic analysis). Graduates find career opportunities within managed care; drug development, manufacturing, and promotion; pharmacy and healthcare information systems; and other areas where an understanding of the intricacies of the pharmaceutical sciences and an appreciation for their business applications are critical.

To meet the residency requirement for this program, students must complete at least 62 semester hours at MCPHS University.

Total credits to complete degree requirements: 122 semester hours

NOTE: Students transferring from the PharmD program will have taken Chemical Principles I (CHE 131) and Chemical Principles II (CHE 132), which may be applied to Basic Chemistry I (CHE 110) and Basic Chemistry II (CHE 210). Organic Chemistry I (CHE 231) and Organic Chemistry II (CHE 232) may be applied to two electives.

Elective Requirements

Students in the Bachelor of Science in Pharmaceutical Business program are required to select a minimum of four elective courses (or at least 12 credits) in the area of business administration, including additional coursework in marketing, management, and accounting, or in a related area of study. The following is a list of acceptable courses. Other courses offered by the Colleges of the Fenway also may be acceptable upon approval of the student's academic advisor or the program director.

Recommended Electives

COURSE	TITLE
BEH 250	Health Psychology
BEH 350	Abnormal Psychology
MAT 197	Computer Applications
PSB 422	Drug Education

PSB 424	Research Methods in Pharmacoepidemiology
PSB 434	Managed Healthcare Management and Administration
PSB 444	Organizational Development
PSB 530	Undergraduate Research Project
PSB 532	Directed Study
PSB 542	Fundamentals of the Biopharmaceutical Industry
PSB 560	PHCB Internship

NOTE: While an industry internship is encouraged as a valuable learning experience, it cannot be guaranteed by the University.

Minor Requirements

For those students in School of Pharmacy–Boston who desire further study in specialty areas, a minor is available in Business.

Students complete at least three (3) courses that are only applied to one minor; these courses may not be used to fulfill requirements for the major or another minor.

These students declare minors by completing a Declaration of Minor form, and they must fulfill the minor requirements defined for their program.

Business

Coordinator: Associate Professor Melaragni

This minor includes three required courses that provide a general foundation in business. In addition to the required courses, students would choose two courses from a list of electives.

Required Courses

COURSE	TITLE	SEMESTER HOURS
<i>Required Courses:</i>		
PSB 377	Healthcare Management	3
PSB 416	Managerial Accounting or PSB 415 Financial Accounting	3
PSB 429	Operations Management	3
TOTAL		9

Elective Courses

Two courses selected from the following list for a minimum of 6 semester hours:

PSB 210 Macroeconomics (3); PSB 215 Microeconomics (3); PSB 320 Healthcare Delivery (3); PSB 376 Healthcare Marketing (3); PSB 445 Sales of Pharmaceutical & Healthcare Products(3); PSB 456 Entrepreneurship (3); PSB 447 Fundamentals of Business Law(3) or PSB 411 Pharmacy Law(3); LIB 512 Healthcare Ethics(3) HSC 310 Healthcare Informatics PSB 380 Applied Business Techniques (3); PSB 434 Managed Healthcare Management & Administration (3); PSB 447

Bachelor of Science in Pharmaceutical Sciences

The Bachelor of Science in Pharmaceutical Sciences program (BSPS) emphasizes specific coursework in the core areas of the pharmaceutical industry, preparing students for a variety of careers in industry or for a continuation of their education in postgraduate programs that could include pharmaceuticals / industrial pharmacy, biotechnology, and regulatory affairs master's or doctoral degrees. The BSPS degree provides skills and experience for use in pharmaceutical, biotechnology, and medical device development, formulation, and manufacturing; and in the evaluation and regulatory oversight of the drug and medical device industry. Career opportunities for degree holders will exist within pharmaceutical, biotechnology, and medical device companies; research laboratories; governmental regulatory agencies; and other areas where the application of these skills and capabilities is sought.

Students in the Bachelor of Science in Pharmaceutical Sciences program must have a minimum grade point average (GPA) of 2.20 at the end of Year II and must maintain a minimum GPA of 2.20 thereafter to remain in good academic standing and to progress in the program. To meet the residency requirements for this program, students must complete at least 63 semester hours at MCPHS University.

Master of Pharmaceutical Sciences

Accomplished graduates of the BSPS program may continue their studies for one additional year and earn a Master of Pharmaceutical Sciences degree. This accelerated professional master's degree program requires 30 semester hours of coursework beyond the BSPS curriculum. Students may select from approved master's-level coursework that allows them to develop competencies and knowledge in basic laboratory manipulations, experimental record keeping,

common analytical equipment, basic experimental design, regulatory affairs, pharmaceutical economics, technical record keeping and reporting skills, and so on. In addition, a research internship provides valuable experience pertinent to the pharmaceutical industry. BSPS students with a GPA of 2.75 or better may apply for the master's track at the end of their third year. For details of the curriculum please refer to the School of Pharmacy–Boston Division of Graduate Studies section of this catalog.

Bachelor of Science in Pharmacology and Toxicology

This program provides students with a strong foundation in the pharmacological and toxicological sciences for careers in the pharmaceutical and biotechnology research and development sectors, and also provides an excellent preparation for graduate and professional schools. The program is designed to meet the industrial need for qualified Bachelor of Science graduates with strong laboratory skills, particularly in integrative pharmacology and toxicology. Students have the opportunity to perform a senior (Year IV) research project or industrial internship that enhances their career potential.

Students in the Bachelor of Science in Pharmacology and Toxicology program must have a minimum grade point average (GPA) of 2.50 at the end of Year II and must maintain a minimum GPA of 2.50 thereafter to remain in good academic standing and to progress in the program. To meet the residency requirement for this program, students must complete at least 63 semester hours at MCPHS University.

Curriculum: Bachelor of Science in Pharmacology and Toxicology

Research or Curricular Track

Fourth year students will be required to designate their selected track (research vs. curricular) by end of add/drop period of fall semester of senior year to facilitate appropriate course registration. The research track provides students the ability to participate in a senior research project in parallel with a seminar course during the spring semester.

Year IV—spring (Research Track)

COURSE	TITLE	SEMESTER HOURS
PSB 404	Pharmacology and Toxicology Seminar IV	1
PSB 461	Principles of Toxicology II	3
PSB 464	Basic Pharmacology II	3
PSB 535	Senior Research Project or Industrial Internship	5
TOTAL		12

Year IV—spring (CURRICULAR TRACK)

COURSE	TITLE	SEMESTER HOURS
PSB/BIO	Course #1*	3
PSB 461	Principles of Toxicology II	3
PSB 464	Basic Pharmacology II	3
PSB 535	Course #2*	3
TOTAL		12

*Course #1 and Course #2 would come from the following select list:

1. **PSB 440:** Molecular Biotechnology – 3 credits – offered in Spring semester
2. **PSB 346:** Physicochemical Properties of Drug Molecules – 3 credits – offered in Fall semester
3. **PSB 430:** Pharmacokinetics – 3 credits – offered in Spring semester
4. **BIO 434:** Immunology – 3 credits – offered in Fall semester
5. **PSB 457:** Pharmacognosy – 3 credits – offered in Fall semester
6. **BIO 430:** Molecular Biology of Cancer – 3 credits – offered in Spring semester
7. **PSB 420:** Pharmaceutical Analysis/Lab – 3 credits – offered in Fall semester

Students selecting the curricular track cannot utilize courses from above list as additionally fulfilling program elective requirements.

**For students who will be taking professional school entrance exams such as the MCAT, GRE, or OAT, they should take PHY 280/280L & 284/284L in the place of PHY 270/270L & 274/274L. These students should also take CHE 234L in Year II-spring.

Total credits to complete degree requirements: 120 semester hours

Elective Requirements

Students in the Bachelor of Science in Pharmacology and Toxicology program are required to select a minimum of two program elective courses (or at least 6 credits) in areas of pharmacology, biotechnology, or toxicology. The following is a list of acceptable courses. Other courses offered by the Colleges of the Fenway also may be acceptable upon approval of the student's academic advisor or the program director.

Recommended Electives

Degree Programs

- Master of Science in Regulatory Affairs and Health Policy*
- Master of Science / Doctor of Philosophy in Medicinal Chemistry
- Master of Science / Doctor of Philosophy in Pharmaceutical Economics and Policy
- Master of Science / Doctor of Philosophy in Pharmaceutics
- Master of Science / Doctor of Philosophy in Pharmacology
- Master of Science in Clinical Research*
- Master of Pharmaceutical Sciences
- Graduate Certificate in Clinical Research*
- Graduate Certificate in Health Policy*
- Graduate Certificate in Regulatory Affairs*
- One-year Master of Science in Clinical Research for MCPHS University Undergraduates

*Boston and Online programs

The Division of Graduate Studies is dedicated to the education of advanced students in the pharmaceutical sciences and health sciences. Each graduate program deepens students' understanding in specialized fields of knowledge to prepare them for leadership roles in higher education, industry, government, and healthcare practice.

Graduate education is highly individualized with respect to both coursework and research requirements as relevant to the individual programs. MCPHS University requires specific courses relevant to the discipline that enable the student to develop the requisite conceptual and technical competencies needed to initiate meaningful research towards discovery learning. Students also must develop the communication skills required to disseminate professional and scientific information. Finally, and most important, graduate students are expected to demonstrate an ever-increasing ability to independently identify and resolve significant problems in their areas of specialization.

Participation in Research

Research, the experimental portion of graduate education, is the major focus of the course of study in many graduate programs and prepares students for their future careers. For certain programs, the advanced degree is awarded only after the timely completion of a written thesis or dissertation on the student's research. This research must be an original work of a quality that merits publication following critical peer review. Experienced faculty mentors work closely with students to guide them in their research and other educational endeavors.

Participation in Research

Research, the experimental portion of graduate education, is the major focus of the course of study in many graduate programs and prepares students for their future careers. The advanced degree is awarded after completion of the approved program, which in some programs, includes a written thesis or dissertation on the student's research. This research must be an original work of a quality that merits publication following critical peer review. Experienced faculty mentors work closely with students to guide them in their research and other educational endeavors.

Degree Requirements

Master of Science

The Master of Science (MS) degree is conferred upon graduate students who have mastered the advanced scientific knowledge and basic research methodology in their area of specialization and fulfilled the following basic requirements:

- Successful completion of a minimum of 30 semester hours of credit at the graduate level, including 3 semester hours of research, a capstone course, or a case study thesis. PEP students must complete 36 hours.
- Maintenance of a cumulative grade point average (GPA) of 3.0 for all coursework taken at the University. Transfer credit is not used in the calculation of the GPA.
- Presentation of an acceptable thesis embodying the results of original research which has been openly defended and approved by the student's Graduate Advisory Committee or dissemination of a case study in the field of study based upon programmatic requirements.
- Passing a general oral examination covering the major field and the thesis in those programs that require the same.
- Spending a minimum of one but no more than three continuous academic years in residence at the University conducting the student's thesis research. All graduate students involved in research continue to register for Graduate Study Extension (PSB 895) until their research is completed and thesis defended.
- Completion of all requirements for the Master of Science degree within a period of four years

NOTE: Additional requirements may be established by the individual graduate programs that are included in the program descriptions. The student's individual program of study is planned jointly with his or her Graduate Advisory Committee, which includes at least three graduate faculty members. Specific program requirements supersede general graduate requirements.

Doctor of Philosophy

The granting of the Doctor of Philosophy (PhD) degree is based on evidence of general proficiency and distinctive attainments in a specialized field, particularly on the demonstrated ability to conduct independent and original investigation. For the PhD degree, the student must complete the following basic requirements:

- A minimum of 50 semester hours at the graduate level and no less than 4 nor more than 10 semester hours (excluding summers) of doctoral research. A minimum of 8 semester hours within the minor also may be required. A student who has earned a Master of Science degree from another institution must complete a minimum of 40 semester hours at MCPHS in addition to the other requirements of the PhD program.
- Maintenance of a cumulative grade point average (GPA) of 3.0 for all coursework taken at the University. Transfer credit is not used in the calculation of the GPA.
- Successful completion of qualifying examinations, both written and oral, in the major and minor disciplines (areas of concentration) prior to the defense of a dissertation proposal. A student has no more than 2 attempts in each of the written and oral qualifying examinations. The comprehensive qualifying examinations are determined and conducted twice per year.
- Presentation of a dissertation that is a contribution to knowledge in the major discipline and that has been openly defended and approved by the student's Graduate Advisory Committee
- Completion of no less than one but no more than five continuous academic years of residence at the University conducting dissertation research. All graduate students involved in research continue to register for Graduate Study Extension (PSB 895) until their research is completed and dissertation defended.
- From the date of matriculation into the PhD program, completion of all requirements for the PhD must be done within six years. For students transferring credits from a MS degree in the same area, the completion of all requirements for the PhD must be done within four years from date of matriculation.

NOTE: Additional requirements for students who pursue the PhD directly and bypass the MS, may be required to demonstrate a competency in an area related to the major or minor. Individual programs of study are jointly determined by the student and his or her Graduate Advisory Committee, and specify such requirements. Specific program requirements supersede general graduate requirements.

Graduate Advisory Committee

For those programs requiring a thesis or dissertation, the Graduate Advisory Committee shall consist of at least three graduate faculty members, two from the major discipline and one from a different discipline. The Graduate Advisory Committee is recommended by the graduate student and their graduate advisor with the approval of the Associate Dean of Graduate Studies (GRADUATE COMMITTEE APPOINTMENT Form). While graduate faculty are the core of graduate research, the Associate Dean of Graduate Studies can appoint other University faculty or adjunct faculty with

unique specialization to serve on Graduate Advisory Committees to provide enrichment to the dissertation research. The advisor is responsible for coordinating the activity of the Graduate Advisory Committee and ensuring compliance with Graduate Studies regulations. The Graduate Advisory Committee should be appointed after a student has chosen their field of specialization (discipline), but no later than 18 months after the student matriculates.

The student must meet at least once per semester with and provide written progress reports to their Graduate Advisory Committee from the time of appointment of the committee until completion of the requirements for the degree. The Associate Dean of Graduate Studies shall be notified in writing of these meetings by the graduate advisor, as well as being provided with copies of the progress reports. More frequent meetings of the Graduate Advisory Committee and the student are encouraged in order to facilitate student-committee interaction. Meetings may be called at the discretion of the student, the advisor, or if two or more members of the Graduate Advisory Committee request such a meeting.

Academic advising

Graduate Advisory Committee

Graduate faculty have responsibility for ensuring that the standards of graduate academic performance are maintained; and to stimulate the development of creative inquiry, professional integrity, and intellectual honesty. Graduate faculty possess the appropriate terminal degree in their discipline; are actively involved in research and scholarly or creative endeavors appropriate to their discipline; maintain their activities in their graduate discipline by consistently offering graduate coursework and the mentoring of graduate students in their thesis research. While graduate faculty are the core of graduate research, the Associate Dean of Graduate Studies can appoint other University faculty or adjunct faculty with unique specialization to serve on Graduate Advisory Committees to provide enrichment to the thesis research.

Full-time Master of Science Graduate Students

The Graduate Advisory Committee consists of at least three graduate faculty members, two from the major discipline and one from a different discipline. The Graduate Advisory Committee is recommended by the graduate student and their graduate advisor with the approval of the Associate Dean of Graduate Studies (GRADUATE COMMITTEE APPOINTMENT Form). The Graduate Advisory Committee should be appointed after a student has chosen their field of specialization (discipline), but no later than 18 months after the student matriculates. In the interim, the student is advised by an interim graduate faculty advisor from the student's major discipline.

The student must meet at least once per semester with their Graduate Advisory Committee from the time of appointment of the Graduate Advisory Committee until completion of the requirements for the Master of Science degree. The Associate Dean of Graduate Studies is notified in writing of these meetings by the graduate advisor. More frequent meetings of the Graduate Advisory Committee and the student are encouraged in order to facilitate student-committee interaction. Meetings may be called at the discretion of the student, the advisor, or if two or more members of the Graduate Advisory Committee request such a meeting.

Full-time PhD Students

The Graduate Advisory Committee shall consist of at least three graduate faculty members, two from the major discipline and one from a different discipline. The Graduate Advisory Committee is recommended by the graduate student and their research advisor with the approval of the Associate Dean of Graduate Studies (GRADUATE COMMITTEE APPOINTMENT FORM). The advisor is responsible for coordinating the activity of the Graduate Advisory Committee and ensuring compliance with Graduate Studies regulations. The Graduate Advisory Committee should be appointed after a student has chosen their field of specialization (discipline), but no later than 18 months after the student matriculates.

The student must meet at least once per semester with and provide written progress reports to their Graduate Advisory Committee from the time of appointment of the committee until completion of the requirements for the degree. The Associate Dean of Graduate Studies shall be notified in writing of these meetings by the research advisor, as well as being provided with copies of the progress reports. More frequent meetings of the Graduate Advisory Committee and the student are encouraged in order to facilitate student-committee interaction. Meetings may be called at the discretion of the student, the research advisor, or if two or more members of the Graduate Advisory Committee request such a meeting.

Admission to Degree Candidacy

Formal admission to candidacy occurs when the student with full graduate status actually becomes a candidate for the Master of Science or PhD degree as regulated by the Graduate Council. Such admission requires approval of the student's Advisory Committee, through formal application (Petition to Graduate in Graduate Studies form) on or before the dates stipulated by the current University regulations on file with the Associate Dean of Graduate Studies. Admission to candidacy depends, among other requirements, upon the maintenance of an overall "B" average or higher, and all grades of "I" must be removed. The graduate student seeking candidacy for the doctoral degree may do so following the successful completion of the qualifying examinations. The degree requirements for the PhD degree program should be satisfied within two years of satisfactorily completing the qualifying examination and within maximum time limits delineated under Degree Requirements.

Change of Program

Graduate students should work carefully with their major professors and advisory committees in designing their degree programs. If a change in the degree program is deemed appropriate, it must be approved by the major advisor, the Graduate Advisory Committee, and the Graduate Council, with recommendation to the Associate Dean of Graduate Studies. Only grades of B or higher may be transferred and used towards total credit count. A change of Program form must be completed. Students are not generally allowed to change programs until completion of at least one academic year (two semesters).

Probation and Dismissal

Probation Policy

The Graduate Academic Standing Committee will recommend a student be placed on probation in his/her graduate program for unsatisfactory performance in either the classroom or laboratory. Reasons for being placed on probation will include:

- Failure to achieve a minimum passing grade in either a required or elective course all as specified in the student's program.
- Failure to achieve and maintain the minimum cumulative GPA as specified in the student's program.
- Failure to achieve a satisfactory grade in seminar, lab-rotation, and/or research.

NOTE: For students that are on probation but are unable to repeat a required course due to the course being closed or not available in the immediate succeeding term, the student will continue on probation but this will not be considered another violation. Thus, the probation period is extended up to the next available course offering. This is not deemed as lack of demonstrating improvement at the end of the first probationary period. Probationary status is not subject to appeal. Students are expected to complete the corrective action and return to good standing during the next regular semester (ie Fall or Spring).

Dismissal Policy

A graduate student may be dismissed from his/her graduate program in the following ways:

1. The Graduate Academic Standing Committee recommends dismissal to the Dean of the School of Pharmacy because:
 - a. the student failed to return to good standing after being placed on probation for two consecutive terms or;
 - b. the student's Graduate Advisory Committee recommends to the Graduate Academic Standing Committee that the student be dismissed because i) the student failed to meet the continuation or progression standards (eg PhD student has failed two attempts at either of the oral or written qualifying exams) or; ii) two-thirds of the student's Graduate Advisory Committee members formally vote that the student has not made satisfactory research progress in the program or; iii) the student was unsuccessful in defending his/her thesis or dissertation.

If the Dean of the School of Pharmacy accepts the recommendation of the Graduate Academic Standing Committee, the Dean of the School of Pharmacy shall notify the student of the decision.

2. The Dean of Students may dismiss a student from the graduate program for other situations listed in the *Student Handbook*. A student whose conduct (see Student Code of Conduct in *Student Handbook*) is unsatisfactory may be dismissed from the University at any time. In such a case, tuition fees paid for the current academic term will not be refunded.

In all cases, the dismissed student will receive written notice of dismissal which will include procedures for appeal, and notice of loss of housing, financial aid, and registration. Written notices will also outline any conditions the student should meet in an effort to gain readmission (e.g., taking a specific course and achieving a specific grade).

Appeal of a Dismissal Decision based upon recommendation of the student's Graduate Advisory Committee

The student may appeal in writing to the Dean of the School of Pharmacy who will convene a Faculty Panel to review the appeal and make a recommendation as to the student's appeal to the Dean of the School of Pharmacy. This review should include copies of prior documents of the appeals process. The student has the right to directly address the Faculty Panel; the Faculty Panel may conduct any enquiry necessary for the review process. The Faculty Panel's recommendation shall be prepared in writing and submitted to the Dean of the School. The recommendation and all documentation is to be retained in the student's file. A negative decision by the Dean may be appealed to the Vice President for Academic Affairs/Provost, whose decision is final.

Repeating Courses

A student's Graduate Advisory Committee may permit the student to repeat a course as long as the successful completion of the course would allow the student to meet the minimum requirement of the program including cumulative GPA and progression. Credit hours from courses that were repeated are counted only once. A student is not allowed to attempt a course more than twice.

Simultaneous Enrollment in another Degree Program

Any student currently enrolled in the master's or doctoral degree in the Pharmaceutical Sciences, Pharmaceutical Business and Administrative Sciences programs at MCPHS may not enroll simultaneously in another undergraduate or graduate degree program at MCPHS or another University or university unless permitted by the Graduate Council.

Student Participation in Proprietary Research

When the Faculty of the University are involved in research, some of which may be of a proprietary nature, particular care must be taken to ensure that the need for graduate students to publicly present and publicly defend the results of their thesis or dissertation research is not compromised. Graduate student advisors, and graduate students themselves, therefore, share in the responsibility to ensure that graduate students do not become involved in thesis or dissertation research that is, or has the potential to become, proprietary if participation in that research delays completion of their degree requirements or negatively affects their productivity or future employability.

The policy of the Division of Graduate Studies and the University is that a faculty member or a graduate student cannot enter into an agreement that prevents or significantly delays the presentation or publication of research results. Journal publication delays not exceeding a year are acceptable, but publication of PhD dissertation materials through ProQuest is a requirement of the Division of Graduate Studies and, thus, cannot be delayed. In instances where, despite good faith efforts on the part of the research advisor, and the graduate student, the graduate student's thesis or dissertation research is later found to be of a proprietary nature, the Associate Dean of Graduate Studies will be notified immediately. The Associate Dean of Graduate Studies, in turn, immediately convenes a meeting of the graduate student, the research advisor, and members of the student's thesis or dissertation committee. This group, in consultation with the Associate Dean of Graduate Studies resolves the problem. If the situation cannot be resolved through the efforts of this group, a ruling is made by the Associate Dean of Graduate Studies.

Thesis

A thesis contributing new knowledge is required on a topic in the major discipline. Prior to a student being certified as a candidate for the thesis track MS degree, s/he submits a research proposal on the proposed topic. Master of Science in Regulatory Affairs and Health Policy and Master of Science in Clinical Research students seeking to enroll in DRA 810 Case Study Thesis must submit a one-page proposal letter for approval by the program director or course faculty. The proposal must comply with the Handbook for the Preparation of Graduate Theses and Dissertations and/or MCPHS University School of Pharmacy Division of Graduate Studies Handbook for the Preparation of Graduate Theses and Dissertations as amended from time to time. This proposal should show evidence of creative integration of course material, superimposed on a sound understanding of the pertinent literature.

Upon approval of the research proposal by the research advisor, Graduate Advisory Committee, school dean or department chair, and the Associate Dean of Graduate Studies, the latter with regard to availability and utilization of resources, the student is certified as a candidate for the thesis track Master of Science degree. The Graduate Advisory Committee critically reviews the written proposal. The student should understand that the proposal is acceptable only if it is imaginative and provides a scientifically rigorous test of a meaningful hypothesis. The proposal may be strengthened with data from preliminary experiments. Within two weeks of the submission of the written proposal to the committee, the student presents and defends the research proposal orally before the committee. The student is questioned on those methodologies and background areas needed to complete successfully the proposed research. Such admission to candidacy must occur at least three months prior to completing requirements for the degree. The

Division of Graduate Studies recognizes that the student's research may deviate substantially from that originally proposed. The student should be encouraged to pursue promising leads; however, long-term changes in the direction of the student's research should be in consultation with the Graduate Advisory Committee.

Off-campus research is not permitted, except for unusual circumstances that require a portion of the research to be completed off-campus in the continental United States, or for students admitted into an online Master of Science degree program. If such a situation arises, the research advisor with the written approval of the Graduate Advisory Committee submits to the Associate Dean of Graduate Studies and Graduate Council a written request for permission to conduct the research off-campus. Along with the request is a letter from the off-campus researcher agreeing to serve as the off-campus mentor and a description of the resources the off-campus site provides. A visit to the off-campus site for the Associate Dean of Graduate Studies (or their designee) and the research advisor is arranged once the research commences off-campus. Such permission is not required for students admitted into an online Master of Science degree program.

Following approval of the Graduate Advisory Committee that the thesis is ready for defense, one copy of the final draft of the thesis must be available to the Associate Dean of Graduate Studies not less than two weeks before a date is set for the student's final examination. After making final corrections, the original and one copy of the thesis, approved by the Graduate Advisory Committee and the Associate Dean of Graduate Studies, per requirements of the Library, must be in the Graduate Office two weeks prior to graduation along with a RECEIPT OF THESIS/DISSERTATION Form. The thesis must comply with the regulations contained in Handbook for the Preparation of Graduate Theses and Dissertations which is Appendix I. Students are responsible for all costs related to preparation of the thesis.

Final Examination

Each candidate is required to pass a general oral examination covering the major field and the thesis/dissertation (MS in Regulatory Affairs and Health Policy, PEP non thesis graduate students, and Master of Science in Clinical Research students are not required to pass an oral examination). This shall begin with a formal presentation with appropriate slides and shall be at least 30 minutes in length for the MS candidate. The examination is conducted by the Graduate Advisory Committee, with the candidate's research advisor presiding as the chairperson. The Graduate Advisory Committee will have primary responsibility for evaluating the student's research, including the written thesis/dissertation, and the formal oral presentation which is open to the University community.

Approval of the final examination by the Graduate Advisory Committee, with no more than one dissenting vote, is necessary to recommend the awarding of the degree. The decision of the Graduate Advisory Committee is forwarded to the Associate Dean of Graduate Studies (THESIS/DISSERTATION DEFENSE Form). The graduate faculty has the authority, which it has delegated to the Associate Dean of Graduate Studies, to approve the candidate for the awarding of the degree.

Only one opportunity for re-examination shall be given (in not less than three months and not more than one year from the time of the final examination at which this decision was made). Any candidate who is granted the privilege of re-examination shall retain the status and obligations of a graduate student until the time of such re-examination.

Programs of Study

Master of Science in Regulatory Affairs and Health Policy (Boston and Online)

The University offers a Master of Science degree in Regulatory Affairs and Health Policy (MS in RAHP), and two graduate certificate programs, one in Regulatory Affairs and the other in Health Policy.

The MS in RAHP offers academic training in the law and regulation of healthcare, drugs, devices; and health policy to candidates having attained a prior baccalaureate degree or equivalent professional degree. Candidates for this program are those interested in pursuing careers in regulatory affairs, project/product management, clinical development, marketing, quality assurance, quality control, and manufacturing, or with federal or state healthcare regulatory agencies, clinical research organizations, managed care, or other health-related fields where knowledge of the regulatory and legal environment is a prerequisite. In addition to the general MS degree requirements described in the MCPHS University course catalog, the program may establish additional requirements.

Although the primary emphasis of this program is placed on regulatory affairs, other components such as ethics, policy development, policy analysis, and law are also explored. The program aims to educate a broad range of professionals who are interested in developing expertise in regulatory and policy education.

Program Objectives and Outcomes

Upon successful completion of this program, a graduate with a Master of Science in Regulatory Affairs and Health Policy should be able to

- develop a strategy for a medical product that addresses regulatory, financial, clinical, and ethical requirements;
- evaluate and deconstruct regulatory and policy issues concerning pharmaceuticals, medical devices, biologics, or healthcare in an industry or government workplace;
- provide regulatory guidance and technical support (e.g., on FDA compliance) to members of the healthcare industry and/or regulatory agencies;
- assist pharmaceutical companies in their efforts to gain FDA marketing approval of drugs, medical devices, and biologics by drawing on a comprehensive knowledge base of regulation and policy;
- assist regulatory agencies in developing, analyzing, and evaluating healthcare related policy and regulation;
- assist regulatory agencies in evaluating new or existing drugs and medical devices for marketing approval;
- develop, coordinate, and implement drug, device, or healthcare regulatory schema or policy initiatives; and
- demonstrate and incorporate a broad sensitivity to healthcare-related issues and their regulatory or policy implications.

Degree Requirements

- Successful completion of a minimum of 30 semester hours at the graduate level
- Maintenance of a cumulative GPA of 3.0 for all coursework taken at the University. B is the minimum passing grade in all courses counting toward the degree.
- Successful completion of all requirements for the MS degree within a period of four years

Curriculum: Master of Science in Regulatory Affairs and Health Policy

REQUIRED COURSES	TITLE	SEMESTER HOURS
DRA 802	Law and Health Policy of Drugs and Devices	3
DRA 804	FDA and Regulatory Affairs	3
DRA 815	International Regulatory Affairs	3
DRA 807	Statistics in Clinical Research	3
DRA 808	Protection of Human Research Subjects	3
DRA 809	Health Epidemiology	3
DRA 812	Advanced Topics in Regulatory Affairs	3

PBH 710	Introduction to Health Policy and Management	3
PBH 801	Community Organizing	3
PBH 810	Principles of Public Health Emergency Preparedness	3
PEP 802	Comparative Pharmaceutical Healthcare Systems	3
PSB 720	Good Manufacturing Practices Compliance	3

Graduate Certificates, Regulatory Affairs and Health Policy (Boston and Online)

The graduate certificate program is open to applicants who desire advanced study in regulatory affairs or health policy without a commitment to a Master degree program. These certificates complement degrees in business administration, nursing, marketing and management, and public health, for example. Each graduate certificate requires three courses and may be completed in less than one year. Current graduate students wishing to add a graduate certificate should contact the certificate program director.

Admission requirements are more flexible than those of the degree program. A minimum grade of B in each course is required for award of the certificate.

Graduate Certificate in Regulatory Affairs (Boston and Online)

REQUIRED COURSES	TITLE	SEMESTER HOURS
DRA 804	FDA and Regulatory Affairs	3

Medicinal Chemistry

Advanced degrees in chemistry provide a student with a more thorough knowledge of the behavior of chemical substances at the molecular level. The composition of molecules and their interactions in both a chemical and a physical sense are studied, with the aim of predicting the behavior and properties of new substances. A fundamental understanding of the properties of chemical substances finds application in most frontier areas of biologically related scientific research being conducted in industrial, government, and academic laboratories. Programs in chemistry lead to the MS and PhD degrees.

Admission to the chemistry graduate programs requires an undergraduate degree in pharmacy, chemistry, or biology that includes two semesters each of general, organic, and analytical chemistry (one semester of which must include instrumental analysis); physical chemistry; calculus; and physics. Students without these prerequisites may be required to complete American Chemical Society proficiency examinations in general, organic, and/or analytical chemistry during the first semester.

Medicinal chemistry is concerned with the study of those structural, stereochemical, and physical parameters that affect the biological interaction of synthetic and naturally occurring drugs at the molecular level. Research is directed toward a fuller understanding of the pharmacological actions of such substances, leading to improved drug design. Specialization in these programs requires a broad knowledge of organic and heterocyclic chemistry, pharmacy, spectroscopic instrumentation, and pharmacology. Ongoing research programs include the synthesis and evaluation of antiviral and anticancer drugs, the synthesis of new laser dyes, and the isolation and characterization of natural products from plants.

Curriculum: Master of Science Degree in Medicinal Chemistry

Year I—fall

REQUIRED COURSES	TITLE	SEMESTER HOURS
CHE 731	Advanced Organic Chemistry	4
PSB 710	Principles of Pharmaceutical Sciences	3
CHE 714	Spectroscopic Analysis (w/lab)	3
PSB 818L	Laboratory Rotations	0
PSB 819	Graduate Seminar	0
TOTAL		10

Year I—spring

REQUIRED COURSES	TITLE	SEMESTER HOURS
PSB 851	Bio-organic Chemistry	2
PSB 818L	Laboratory Rotations	1
PSB 819	Graduate Seminar	1
CHE and/or PSB 700/200	Electives	5-6
TOTAL		9-10

Year II—fall

REQUIRED COURSES	TITLE	SEMESTER HOURS
CHE 810	Heterocyclic Chemistry	2
PSB 819	Graduate Seminar	0
PSB 802	Chemistry of Macromolecules	3
PSB 880	Research	1
TOTAL		6

Year II—spring

REQUIRED COURSES	TITLE	SEMESTER HOURS
PSB 820	Advanced Medicinal Chemistry I	3
PSB 819	Graduate Seminar	1
PSB 880	Research	1
TOTAL		5

The PhD, in addition to the Master of Science requirements, will include the following:*

REQUIRED COURSES	TITLE	SEMESTER HOURS
PSB 815	Drug Metabolism	3
PSB 819	Graduate Seminar	2
PSB 880	Research	3
PSB 856G	Advanced Medicinal Chemistry II	3
PSB 856	Advanced Topics in Medicinal Chemistry	3
CHE or PSB 700/800	Electives	6
TOTAL		20

** For entry to the PhD program, students must successfully complete a medicinal chemistry comprehensive exam administered by the Medicinal Chemistry faculty.*

Total credits to complete degree requirements: minimum 50 semester hours

Suggested Elective Courses for Master of Science and PhD Programs

COURSE	TITLE	SEMESTER HOURS
CHE 717	Instrumental Analysis (with lab)	4
CHE 719	Synthetic Preparations (with lab)	3
CHE 755	Stereochemistry	3
MAT 763	Advanced Statistics	3
PSB 815	Drug Metabolism	3
PSB 860	Chromatography	2
PSB 861	Chromatography Laboratory	1
PSB 872	Special Problems	1-2

Minor in Pharmaceutics or Pharmacology: a minimum of 8 semester hours must be taken.

Drug Metabolism Minor

A minor in Drug Metabolism integrates the knowledge of drug metabolism, analysis of pharmaceuticals in biological fluids and incubation mixtures, enzyme kinetics, and animal care and use. The suggested courses to complete a Drug Metabolism minor could include a combination of the following courses for a total of 12 semester hours:

Suggested Courses for a Minor in Drug Metabolism

COURSE	TITLE	SEMESTER HOURS
PSB 815	Drug Metabolism	3
PSB 822	Enzyme Kinetics	2
PSB 835	Advanced Pharmacokinetics	3
PSB 840	Advanced Biopharmaceutics	3
PSB 855	Care and Use of Laboratory Animals	1
PSB 860	Chromatography	2
PSB 861	Chromatography Laboratory	1

Pharmaceutical Economics and Policy

The graduate program in Pharmaceutical Economics and Policy (PEP) offers a Master of Science (MS) and a Doctor of Philosophy (PhD) in Pharmaceutical Health Economics and Policy with specialty tracks or concentrations in Health and Pharmacoepidemiology and Health Economics and Outcomes Research. Two graduate certificates are also offered in Health and Pharmacoepidemiology and in Health Economics and Outcomes Research. This graduate program offers academic training primarily in the areas of pharmaceutical and health economics and drug and health policy, and also provides related training in outcomes research, regulation, marketing, healthcare administration, pharmacy services research, and pharmacoepidemiology.

The curriculum features advanced didactic and experiential education in the areas of pharmacoeconomic and health policy analysis, pharmacoepidemiologic methods and study designs, advanced biostatistics and database management, health policy and behavioral interventions and their assessment, and the role of pharmaceuticals and medical devices in healthcare and society. The program provides future leaders, educators, and researchers with the knowledge required to enhance access for patient populations to cost-effective pharmaceuticals, biologics, medical devices, and related health services, thus improving the efficiency of the pharmaceutical sector and healthcare systems. Graduates will be prepared for careers in the pharmaceutical, biotechnology, and medical device industries; hospitals and other institutional healthcare organizations; managed care organizations; pharmacy benefits management; contract research organizations; consulting firms; governments; international organizations; nongovernmental organizations; and academic institutions, among other organizations.

Master of Science (MS) in Pharmaceutical Economics and Policy

The Master of Science in Pharmaceutical Economics and Policy (PEP) provides a flexible curriculum for advanced training in pharmaceutical economics and policy, and pharmacy administration. Focus areas of the Master of Science program include pharmaceutical economics and policy, global drug policy, pharmacoeconomics and outcomes research, health epidemiology, pharmacoepidemiology, and pharmacy management. The MS Program allows for either a Thesis or Non-Thesis option. The non-thesis MS is also offered as an online degree option, intended primarily for part-time students.

Program Objectives

Upon successful completion of the MS program in PEP, a graduate should be able to:

- Assess the appropriateness of research designs for health care interventions for comparative effectiveness, policy analyses, and health economic evaluations
- Apply and interpret the results of statistical, epidemiologic and health economic analyses/evaluations
- Effectively synthesize evidence to inform key stakeholders including industry, regulators, and policy makers
- Analyze the structure and functions of U.S. and international health care systems, focusing on finance and delivery.

Admission Requirements

- PharmD or Bachelor of Science in Pharmacy, Bachelor's degree in a related area (e.g., economics, sociology, or statistics) or a professional degree in medicine, dentistry, nursing, public health, or healthcare administration from an accredited college or university.
- TOEFL or IELTS, required of all applicants for whom English is not the primary spoken language. This test requirement may be waived on an individual basis for applicants who have attended all four years of high school in the United States or have an earned degree (bachelor's or higher) from a U.S. college or university.
- Minimum grade point average (GPA) of 3.0

Degree Requirements (On campus program)

- Successful completion of a minimum of 36 semester hours at the graduate level.
- Maintenance of a cumulative GPA of 3.0 for all coursework taken at the University. The minimum grade for passing a course is B.
- Successful completion of at least one continuous academic year in residence at the University.
- Successful completion of all requirements for the Master of Science degree within a period of four years, including successful completion of the capstone project. On an exception basis, with the approval of the faculty advisor, a student may undertake a thesis in lieu of the capstone project. Thesis students will take two semesters of the Graduate Seminar along with PEP.880 (4 credit hours).
- Students currently enrolled in the PEP Master of Science program may apply to the PhD program for admission after they complete their MS program. A MS thesis is not required for admission into the PhD program.

Degree Requirements (Online program)

- Successful completion of a minimum of 36 semester hours at the graduate level.
- Maintenance of a cumulative GPA of 3.0 for all coursework taken at the University. The minimum grade for passing a course is B.
- Successful completion of all requirements for the Master of Science degree within a period of four years, including successful completion of the capstone project.

Doctor of Philosophy in Pharmaceutical Economics and Policy

The Doctor of Philosophy (PhD) in Pharmaceutical Economics and Policy is designed to train independent researchers who will assume leadership positions in national and international pharmaceutical economics and policy careers, with focus areas in pharmaceutical economics and policy, global drug policy, and pharmacoeconomics and outcomes research.

Program Objectives

Upon successful completion of the PhD program in PEP, *in addition to the MS Program Objectives listed previously*, a graduate should be able to work independently in:

- Plan, design and conduct studies to assess comparative clinical and economic value of health care interventions;
- Disseminate one's original research through publications, presentations and other professional forums;
- Demonstrate expertise such that one would be able to teach at a University level.

Admission Requirements

- PharmD or an earned master's degree or higher degree in a related area (e.g., economics, sociology, or statistics), or a professional degree in medicine, dentistry, nursing, public health, or healthcare administration from an accredited college or university. Students currently enrolled in the PEP Master of Science program may apply to the PhD program for admission after they complete their MS program. A MS thesis is not required for admission into the PhD program;
- TOEFL or IELTS, required of all applicants for whom English is not the primary spoken language. This test requirement may be waived on an individual basis for applicants who have attended all four years of high school in the United States or have an earned degree (bachelor's or higher) from a U.S. college or university;
- Minimum grade point average (GPA) of 3.0;
- Official Graduate Record Exam (GRE), General Exam scores must be submitted as part of the Admissions Process.

Degree Requirements

- Successful completion of a minimum of 50 semester hours at the graduate level, including a minimum of 4 semester hours in dissertation research and a minimum of 15 semester hours in a specialty track or area of concentration. Four semesters of Graduate Seminar are required. A student who has earned an MS degree from another institution or program must complete a minimum of 40 semester hours in addition to the other requirements of the PhD program;
- Maintenance of a cumulative GPA of 3.0 for all coursework taken at the University. The minimum grade for passing a course is B;
- Successful completion of qualifying examinations;
- Presentation of a dissertation that is a contribution of unique knowledge to the discipline and that has been openly defended and approved by the student's Graduate Advisory Committee;
- Completion of at least one continuous academic year in residence at the University conducting dissertation research;
- Completion of all requirements for the PhD degree within a period of six years

Master of Science in Pharmaceutical Economics and Policy (Online, non-thesis program)

On line program requirements are identical to those above for the On campus MS non-thesis program except that

- the courses will generally be taken in a less concentrated manner (e.g. 2 per term) and in all cases, a student's program should start with PEP 802
- courses will be offered in the summer term, enabling completion of the program in 2 calendar years

- the non-thesis 3 credits of seminar requirement is substituted by an additional 3 credit elective

Recommended Electives for all Master of Science Degrees

Year IV—spring

COURSE	TITLE	SEMESTER HOURS
PEP 890	PhD Dissertation in Research in PEP	1
TOTAL		1

Total credits to complete degree requirements: 50 semester hours

The Health and Pharmacoepidemiology Track requires the following:

COURSE	TITLE	SEMESTER HOURS
PEP 808	Meta-analysis Applications	3
PEP 809	Statistical Programming Using SAS	3
PEP 825	Health Services and Outcomes Research (HSOR)	3
PEP 850	Advanced Methods in Epidemiology and Statistics	3
PEP 806	Pharmacoepidemiology Applications	3

Health and Pharmacoepidemiology Track Electives:

COURSE	TITLE	SEMESTER HOURS
PEP 820	Market Access Pricing and Reimbursement	3
PEP 814	Healthcare Decision Analysis	3

The Health Economics and Outcomes Research Track requires the following:

COURSE	TITLE	SEMESTER HOURS
PEP 813	Pharmacoeconomic Applications	3
PEP 814	Healthcare Decision Analysis	3
PEP 825	Health Services Outcomes Research (HSOR)	3
PEP 820	Market Access Pricing and Reimbursement	3
PEP 807	Introduction to Health Economics and Outcomes Research	3

Health Economics and Outcomes Research Track Recommended Electives:

COURSE	TITLE	SEMESTER HOURS
PEP 808	Meta-analysis Applications	3
PEP 850	Advanced Methods in Epidemiology and Statistics	3
PEP 809	Statistical Programming Using SAS	3

PhD Program Electives:

COURSE	TITLE	SEMESTER HOURS
DRA 802	Law and Health Policy of Drugs and Devices	3
DRA 804	FDA and Regulatory Affairs	3
DRA 808	Laws and Regulations Governing Human Research	3
DRA 811	Health Policy Development and Analysis	3
DRA 815	International Regulatory Affairs	3
PEP 806	Pharmacoepidemiology Applications	3
PEP 808	Meta-analysis Applications	3
PEP 809	Statistical Programming Using SAS	3
PEP 811	Pharmaceutical Marketing Applications	3
PEP 812	Healthcare Management Applications	3
PEP 813	Pharmacoeconomic Applications	3
PEP 814	Healthcare Decision Analysis	3
PEP 825	Health Services and Outcomes Research	3
PEP 830	Practicum Pharm Business and Administrative Internships	1
PEP 899	Selected Topics In Pharmaceutical Economics and Policy	1-3
	Dissertation Research (both programs)	4

Master of Science / Doctor of Philosophy in Pharmaceutics

Master of Science (MS) and Doctor of Philosophy (PhD) programs in Pharmaceutics are intended to prepare students for positions of responsibility in education, government, and the pharmaceutical industries. The programs are designed to provide an appropriate balance between the theoretical and practical aspects of the area of specialization, which enables the student to be immediately productive yet prepared for future growth and development.

Admission to the pharmaceutics graduate programs requires an undergraduate degree in pharmacy, chemistry, or biology that includes two semesters each of general, organic, and analytical chemistry (one semester of which must include instrumental analysis); physical chemistry; calculus; and physics. Holders of undergraduate degrees in nonpharmacy areas are required to complete the following pharmacy courses for no credit: Physical Pharmacy, Dosage Forms, Biopharmaceutics, and Pharmacokinetics.

The student is exposed to a broad range of theory and concepts, intended to promote a firm understanding of the materials and technologies associated with pharmaceutical product development, manufacture, and evaluation. The program encompasses the study of pharmaceutical dosage forms, the release of a drug from the dosage form, drug

dissolution, drug absorption, bioavailability, and pharmacokinetics. Pharmacokinetics involves the study of the rates of drug absorption, distribution, and elimination, and the quantitative relationship of these rates to drug therapy and/or toxicity.

Research projects have typically involved development of new drug products, novel dosage forms, the release of a drug from new dosage forms, preformulation investigation of new drug entities, and pharmacokinetics.

Curriculum: Master of Science in Pharmaceutics

Year I—fall

COURSE	TITLE	SEMESTER HOURS
PSB 710	Principles of Pharmaceutical Sciences	3
PSB 808	Advanced Physical Pharmacy	3
PSB 818L	Laboratory Rotations	1
PSB 819	Graduate Seminar	0
PSB 835	Pharmacokinetics	3
TOTAL		9

Year I—spring

COURSE	TITLE	SEMESTER HOURS
PSB 818L	Laboratory Rotations	1
PSB 819	Graduate Seminar	1
	Elective	3
PSB 880	Research	1
TOTAL		6

Year II—fall

COURSE	TITLE	SEMESTER HOURS
MAT 763	Advanced Statistics	3
PSB 819	Graduate Seminar	0
PSB 825	Controlled Drug Delivery	3
PSB 880	Research	1
TOTAL		7

Year II—spring

COURSE	TITLE	SEMESTER HOURS
PSB 819	Graduate Seminar	1
PSB 826	Novel Drug Delivery	3
	Elective	3
PSB 880	Research	1
TOTAL		8

Total credits to complete degree requirements: 30 semester hours

Doctor of Philosophy (PhD) in Pharmaceutics

In addition to the Master of Science degree requirements, PhD students must complete the following required courses:

COURSE	TITLE	SEMESTER HOURS
PSB 880*	Research	7
	Electives	5
	Minor	8
TOTAL		20

** Time and credit approved by major professor*

Total credits to complete degree requirements: 50 semester hours

NOTE: A minimum of one semester of physical chemistry (thermodynamics and kinetics) is required prior to acceptance. CHEM 331 Thermodynamics and Kinetics, or its equivalent, may be taken concurrently at Simmons University without graduate credit.

Elective Courses for Master of Science and PhD Programs

COURSE	TITLE	SEMESTER HOURS
PSB 807	Unit Operations (with lab)	3
PSB 815	Drug Metabolism	3
PSB 822	Enzyme Kinetics	2
PSB 875	Pharmaceutical Dosage Forms Design (with lab)	3
PSB 840	Advanced Biopharmaceutics	3
PSB 850	Pharmacogenomics	3
PSB 860	Chromatography	2
PSB 861	Chromatography Laboratory	1

Electives in other appropriate subject areas may be taken with the approval of the major advisor. Suggested minors are Analytical Chemistry, Business Administration, or Drug Regulatory Affairs.

Master of Science / Doctor of Philosophy in Pharmacology

Pharmacology is the medical science that involves all facets of the action of drugs and environmental chemicals on biological systems and their constituent parts. This includes everything from the intermolecular reactions of chemical compounds within a cell to the evaluation of the effectiveness of a drug in the prevention, treatment, or diagnosis of human disease. Pharmacology offers unique opportunities to contribute to the knowledge, well-being, and survival of mankind.

Admission to the Pharmacology graduate program requires an undergraduate degree in pharmacy, chemistry, or biology. While formal training in pharmacology and human physiology at the undergraduate level is helpful, it is not required for admission. Students who are deficient in these areas are required to audit the undergraduate course sequences in pharmacology / medicinal chemistry and/or physiology.

Programs leading to the degrees of Master of Science and PhD are offered for graduate study in pharmacology. Each comprises two major components: (1) coursework in specific disciplines such as pharmacology, physiology, biochemistry, medicinal chemistry, and related disciplines, and (2) training in research and the scientific method.

The programs prepare students for positions of leadership and responsibility in academic, industrial, and government settings. Theoretical and experiential situations in which pharmacological information may be applied are provided to help students develop an innovative and creative approach to problem solving.

Curriculum: Master of Science in Pharmacology

Year I—fall

COURSE	TITLE	SEMESTER HOURS
PSB 710	Principles of Pharmaceutical Sciences	3
PSB 847	Graduate Biochemistry	3
PSB 818L	Laboratory Rotations	0
PSB 819	Graduate Seminar	0
PSB 841	Advanced Pharmacology: Receptor Pharmacology	3
TOTAL		9

Year I—spring

COURSE	TITLE	SEMESTER HOURS
PSB 856B	Advanced Pharmacology: Neuropharmacology	3
PSB 815	Drug Metabolism	3
PSB 818L	Laboratory Rotations	1
PSB 819	Graduate Seminar	1
PSB 855	Care and Use of Laboratory Animals	1
TOTAL		9

Year II—fall

COURSE	TITLE	SEMESTER HOURS
MAT 763	Advanced Statistics	3
PSB 856E	Advanced Pharmacology: Anticancer Drugs	3
PSB 819	Graduate Seminar	0
PSB 880	Research	1
TOTAL		7

Year II—spring

COURSE	TITLE	SEMESTER HOURS
	Elective	3
PSB 819	Graduate Seminar	1
PSB 880	Research	1
TOTAL		5

Total credits to complete degree requirements: 30 semester hours

Doctor of Philosophy (PhD) in Pharmacology

In addition to the MS degree requirements, PhD students must complete the following required courses:

COURSE	TITLE	SEMESTER HOURS
PSN 856H	Advanced Pharmacokinetics and Dynamics	3
PSB 819	Graduate Seminar	2
PSB 850	Pharmacogenomics	3
PSB 880	Research	3
	Minor	9
TOTAL		20

Total credits to complete degree requirements: 50 semester hours

Elective courses listed for the MS program also are applicable to the doctoral program. Students may select courses from other areas with the approval of their major advisor. Suggested minors are Biochemistry, Medicinal Chemistry, or Pharmaceutics.

Elective Courses for Master of Science and PhD Programs

COURSE	TITLE	SEMESTER HOURS
BIO 734	Immunology	3
CHE 717	Instrumental Analysis (with lab)	4
CHE 731	Advanced Organic Chemistry	4
PSB XXX	Experimental Methods	
PSB 715	Clinical Toxicology	3
PSB 802	Chemistry of Macromolecules	3
PSB 835	Advanced Pharmacokinetics	3
PSB 856	Selected Topics in the Neurosciences	1
PSB 860	Chromatography	2
PSB 861L	Chromatography Laboratory	1
PSB 872	Special Problems (PhD program only)	1–2

Additional electives may be selected from other appropriate graduate courses with the approval of the major advisor and the course instructor.

Master of Science in Clinical Research (Boston and Online)

The Master of Science in Clinical Research program offers academic training in clinical research to candidates who have attained a prior baccalaureate degree or equivalent professional degree. The program is geared toward students who plan to develop, conduct, and monitor clinical trials or toward students in allied fields within the industry who desire a working knowledge of the field of clinical research. Course material is applicable for career opportunities in either the hospital-based/clinical care setting or the bio/pharmaceutical/medical device industry. The program can be completed as a part-time or full-time student, and all required courses can be taken either onsite or online.

The 30-semester-hour program consists of eight required courses and two elective courses. The elective courses are intended to allow student to focus on either a patient-based clinical research track or an industry-related track. As part of MCR 804 Capstone course, students will complete a capstone project which involves written submission and oral presentation of a clinical research protocol developed by the student, and mentored by the course instructor and an assigned research mentor.

The broad focus of the program, including bioethics and regulations, product (drug, device, biologic, etc.) development, biostatistics, research methodology, protocol design, proposal development, clinical trial management, and regulatory affairs, is designed to address the educational needs of many different career paths within the pharmaceutical healthcare field.

Program Objectives and Outcomes

Upon successful completion of this program, a graduate with a Master of Science in Clinical Research should be able to:

- Describe the steps of pre-clinical and clinical drug development;
- Explain how pharmaceutical and medical device research and development has changed over time;
- Describe the elements required to develop a scientifically sound clinical protocol or research proposal;
- Assess the process required to develop a feasible and relevant clinical research question/scientific hypothesis;
- Construct the eligibility criteria (inclusion and exclusion criteria) for a disease specific population for a clinical research study;
- Determine sample sizes for clinical research studies of simple design and understand ingredients in the sample size determination for more complex designs, including clinical outcome trials and non-inferiority studies;
- Identify basic characteristics of a clinical research study and describe the advantages and disadvantages of randomized clinical studies as compared to other epidemiological and clinical investigations;
- Propose a study plan (treatment and endpoints) for a disease specific clinical study;
- Select the appropriate methodology and design for a study based on specified study requirements and objectives;
- Assess the opportunities for bias in a clinical research study and develop a study design to prevent the bias;
- Discuss examples of misconduct and fraud and their implications in clinical research;
- Design a proposal for financial support of a research initiative;
- Describe the specific design issues required for research studies involving unique patient populations (ex. dementia, dermatology, elderly, pediatric);
- Describe the different types of human pharmacology studies;
- Develop a clinical research study hypothesis and design applying skills learned in the program to submit a final written draft of a clinical study protocol to an IRB;
- Construct randomization schedules and develop procedures for carrying out randomization;
- Determine when pre-stratified designs should be used and differentiate pre from post-stratification;
- Understand considerations in defining control groups for clinical research studies, including the use of placebos;
- Identify the advantages and disadvantages of different types of endpoints for clinical research studies, and the importance of pre-specifying study estimates of interest;
- Recognize the regression to the mean phenomenon and how to minimize its effect.
- Recognize the advantages and disadvantages of different types of study designs, including crossover and factorial studies, pragmatic versus explanatory studies, point of care randomization studies, and biomarker validation studies;
- Write the statistical design and data analysis section of a protocol and identify special requirements of collaborative studies, their organization and operation;
- Determine data collection requirements and quality assurance procedures for clinical studies, including procedures to minimizing missing outcome data;
- Understand the advantages of intent-to-treat analysis and to differentiate it from analyses such as “on treatment” and “per protocol” analyses; and

- Recommend a plan for interim analyses for clinical research studies and understand the role of independent Data Monitoring Committees.

Degree Requirements

- Successful completion of a minimum of 30 semester hours at the graduate level.
- Maintenance of a cumulative GPA of 3.0 for all coursework taken at the University. B is the minimum passing grade in all courses counting toward the degree.
- Successful completion of all requirements for the MS degree within a period of four years.

Curriculum: Master of Science in Clinical Research

REQUIRED COURSES	TITLE	SEMESTER HOURS
MCR 801	Pharmaceutical R&D: From Discovery to Market	3
MCR 802	Research Methodology & the Development of Protocols	3
MCR 803	Conducting Clinical Research Studies	3

PBH 805	Maternal and Child Health	3
PBH 810	Principles of Public Health Emergency Preparedness	3
PBH 815	Mass Communication and Health	3
PBH 820	Genetics and Public Health	3

**The two required electives may be taken during any semester. **For a full-time schedule, students can take up to four courses in the fall and spring and up to two course in the summer to complete the program in 3-4 semesters.

Total credits: 30 semester hours

Graduate Certificate in Clinical Research (Boston and Online)

The graduate certificate program is open to applicants who desire advanced study in clinical research without a commitment to a Master degree program. This certificate complements degrees such as nursing, pharmacy, and public health. The graduate certificate requires three courses and may be completed in less than one year.

Admission requirements are more flexible than those of the degree program. A minimum grade of B in each course is required for award of the certificate.

Curriculum: Graduate Certificate in Clinical Research

REQUIRED COURSES	TITLE	SEMESTER HOURS
MCR 802	Research Methodology and the Development of Protocols and Proposals	3
MCR 803	Conducting Clinical Research Studies	3
DRA 808	Protection of Human Research Subjects	3
TOTAL		9

Master of Science in Clinical Research/Graduate Certificate in Health Policy or Regulatory Affairs (Boston and Online)

Students enrolled in the Master of Science Clinical Research program may enroll in the Graduate Certificate programs in Health Policy or Regulatory Affairs. These students are required to complete the three courses required by the certificate program in addition to the 30 credits for their masters program for a total of 39 credits. Current graduate students interested in applying for the certificate program should contact the certificate program director.

One-year Master of Science in Clinical Research for MCPHS University Undergraduates

Undergraduates enrolled in health science degree programs at MCPHS can learn to conduct clinical research and increase their employment opportunities by earning a both the undergraduate degree and a Master of Science in Clinical Research (MS CR) degree. Similar to the existing PharmD/Master of Public Health program, undergraduate students enrolled in the PharmD degree or BS degrees in the School of Pharmacy can apply to the MS CR program at the end of their second year of the program for Bachelor of Science degrees or after the second professional year in the PharmD program. Upon acceptance to the MS CR track, students may begin taking MS CR courses the summer or fall after their second year/second professional year. They would complete a total of 4 MS CR courses over the last two years of the undergraduate program, and then complete the MS CR program in one year after finishing the undergraduate program by taking 3 MS CR courses in the Fall and 3 MS CR courses in the Spring. Undergraduate students would be required to earn a minimum grade of B on the graduate level courses in order to receive credit for those courses.

Curriculum: One-year Master of Science in Clinical Research

Students complete their undergraduate degree as required, with option to track into Master of Science in Clinical Research program after finishing the 2nd undergraduate year or 2nd professional year (PharmD). The MS Clinical Research courses are delivered evenings or online and can be completed by adding courses as follows:

Undergraduate Year III or Third Professional Year for PharmD – summer, fall, or spring (all courses offered evenings or online, some offered in summer)

COURSE	TITLE	SEMESTER HOURS
MCR 801	Pharmaceutical R & D: From Discovery to Market	3
DRA 804	FDA and Regulatory Affairs	3
TOTAL		6

Undergraduate Year IV or Fourth Professional year—summer, fall or spring (all courses offered evenings or online, some offered in summer)

COURSE	TITLE	SEMESTER HOURS
MCR 802	Research Methodology and the Development of Protocols and Proposals	3
DRA 807	Statistics in Clinical Research	3
TOTAL		6

Additional Year —fall

COURSE	TITLE	SEMESTER HOURS
MCR 803	Conducting Clinical Research Studies	3

DRA 808	Protection of Human Research Subjects	3
DRA 809	Health Epidemiology (or Elective 1)	3
TOTAL		9

Additional Year—spring

COURSE	TITLE	SEMESTER HOURS
MCR 804	Graduate Project in Clinical Research	3
DRA 809	Health Epidemiology (or Elective 1)	3
	Elective 2	3
TOTAL		9

Total credits: 30 added credits for MS Clinical Research Degree

Master of Pharmaceutical Sciences

The Master of Pharmaceutical Sciences is an accelerated professional master's program with 30 semester hours of coursework that serves as addendum to the existing Bachelor of Science in Pharmaceutical Sciences (BSPS) program. Students of the BSPS program who meet the acceptance criteria transition into MPS and graduate with a master's qualification a year after completing the BSPS program. The Master of Pharmaceutical Sciences program builds on competencies introduced in the BSPS program with a flexible curriculum that allows students to develop advanced skills in technical record keeping and other areas of the pharmaceutical industry. The curriculum also offers students the opportunity to utilize an internship experience to replace coursework before graduation.

Two 700-level courses in Year IV fulfill 6 semester hours of elective credit for the Bachelor of Science degree. Students are required to consult with the program director for recommendations on approved courses. Students must achieve a 3.0 or better GPA in these 700-level courses at the end of the spring semester to be eligible for acceptance into the master's program. Once accepted into the program students need to complete an additional 24 credits of graduate course work over the 10-week summer, fall, and spring semesters. A 3.0 GPA is required to remain in good academic standing in the MS program and for graduation. The following is an example of an appropriate course load.

Curriculum: Master of Pharmaceutical Sciences

BSPS Year IV—fall

COURSE	TITLE	SEMESTER HOURS
LIB 512	Healthcare Ethics	3
PSB 346	Physico-chemical Properties of Drug Molecules	3
PSB 410	FDA and Regulatory Affairs	3
PSB 335	Pharmaceutical Technology	3
MAT 763	Advanced Statistics	3
TOTAL		15

BSPS Year IV—spring

COURSE	TITLE	SEMESTER HOURS
PSB 301	Pharmacology for Allied Health Professionals	3
PSB 440	Molecular Biotechnology	3
PSB 350L	Industrial Pharmacy Laboratory	1
PSB 430	Pharmacokinetics I	2
PSB 438	Ethics and Research Integrity	3

COURSE	TITLE	SEMESTER HOURS
PSB 808	Advanced Physical Pharmacy	3
PSB 825	Novel Drug Delivery I	3
PSB 710	Principles of Pharmaceutical Science	3
TOTAL		9

Year V—spring: Internship

COURSE	TITLE	SEMESTER HOURS
PSB 801	Research Internship	9-12

Other Recommended Courses

COURSE	TITLE	SEMESTER HOURS
CHE 714	Spectroscopic Analysis (with lab)	3
CHE 717	Instrumental Analysis (with lab)	4
DRA 802	Law and Health Policy of Drugs and Devices	3
DRA 811	Health Policy Development and Analysis	3
PSB 710	Principles of Pharmaceutical Science	3
PSB 875	Dosage Form Design	3

MCPHS University–Worcester

More information specific to the Worcester campus may be found in the following sections: *Facilities, Interinstitutional Cooperation, and Student Services.*

Forsyth School of Dental Hygiene

Dianne Smallidge, RDH, EdD, Professor and Interim Dean

Christine Dominick, CDA, RDA, MOcEd, Associate Dean and Professor

Linda D. Boyd, RDH, RD, EdD, Professor and Associate Dean, Graduate Studies

Lori Giblin-Scanlon, RDH, DHSc, Associate Professor and Associate Dean for Clinical Studies

Associate Professors Giblin-Scanlon, Jenkins, Laspina, Perry, Smallidge, Smilyanski; Assistant Professors Adams, Libby, McCarthy, Oh, Smethers;

Degree Programs

- Bachelor of Science in Dental Hygiene (Fast Track)

Bachelor of Science in Dental Hygiene (Fast Track)

The Forsyth School of Dental Hygiene Worcester satellite clinic and academic program is located at 10 Lincoln Square on the Worcester campus. This 250,000-square-foot building offers fantastic amenities and an independent style of city living. Lincoln Square has furnished rooms with private baths, parking, a fitness center, a dining hall, an outdoor patio, and green space. It is also home to the MCPHS University Dental Hygiene Clinic, Eye and Vision Center, and 10 Optical, a complete retail store, all of which are open to the public. The Fast Track BS 16-month dental hygiene program is available at this site. All didactic courses are provided through distance education technologies originating from either Boston or Worcester. Faculty travel from the Boston and Worcester sites regularly to meet with students and provide face-to-face instruction.

A student who holds a baccalaureate degree or higher from an accredited college or university or transfer student who has completed all of the Bachelor of Science degree requirements and prerequisites may pursue the 16-month Bachelor of Science in Dental Hygiene (Fast Track) program. The candidate for this program must have completed the prerequisite college courses listed below. An official college/university transcript will be reviewed to determine eligibility for transfer credits. The student in the Bachelor of Science (Fast Track) program takes courses in dental hygiene theory and practice, and receives clinical instruction in the MCPHS University Esther M. Wilkins Dental Hygiene Clinic. Upon successful completion of the program, the student becomes eligible for dental hygiene licensure examinations.

Prerequisites for all applicants to the Bachelor of Science (Fast Track) program include the following:

COURSE	SEMESTER HOURS
Anatomy and physiology I and II (with labs)	8
Basic chemistry I and II (with labs)	8
Microbiology (with lab)	4
Statistics	3
Introduction to Psychology	3
Introduction to Sociology	3
Expository Writing I & II	6
Introduction to Interpersonal Communication for Health Professionals	3
TOTAL	38

Additional prerequisites for applicants with no prior Bachelor of Science/Bachelor of Arts degree to the Bachelor of Science (Fast Track) program include the following:

COURSE	SEMESTER HOURS
College Algebra	3
American Culture, Identity, and Public Life	3
Social Science Elective	3
Humanities Elective	3
Behavioral Science Elective	3
TOTAL	15

Year I—fall

COURSE	TITLE	SEMESTER HOURS
DHY 202	Dental Anatomy, Embryology, and Histology	2
DHY 204	Head and Neck Anatomy	2
DHY 209	Dental Hygiene Process of Care I (with lab)	6
DHY 230	Dental Radiology (with lab)	3
DHY 231	Dental Materials (with lab)	3
DHY 232	Nutrition	2
TOTAL		18

Year I—spring

COURSE	TITLE	SEMESTER HOURS
DHY 211	Dental Hygiene Process of Care II	3
DHY 223	Clinical Dental Hygiene I	3
DHY 233	Periodontology	3
DHY 330	Pathology	3
DHY 343	Pain Management (with lab)	3
LIB 512	Healthcare Ethics	3
TOTAL		18

Year I—summer session

COURSE	TITLE	SEMESTER HOURS
DHY 310	Dental Hygiene Process of Care III	3
DHY 350	Community Oral Health	3
DHY 420	Oral Health Research	3
DHY 323	Clinical Dental Hygiene II	4
DHY 460	Capstone Leadership in Dental Hygiene I	1
PSB 320	Introduction to Health Care Delivery	3
TOTAL		17

Year II—fall

COURSE	TITLE	SEMESTER HOURS
DHY 311	Dental Hygiene Process of Care IV	2
DHY 324	Clinical Dental Hygiene III	4
DHY 342	Pharmacology	2
DHY 461	Capstone Leadership in Dental Hygiene II	2
DHY 345	Practice and Career Management	2
	Program Elective	3
TOTAL		15

Total institutional credits to complete degree requirements: 68 semester hours

Students will graduate with a Bachelor of Science in Dental Hygiene following successful credit transfer of any college prerequisites and completion of the required dental hygiene courses listed above.

New England School of Acupuncture

Dennis Moseman, DC, MS Acupuncture, L. Ac., Dipl. Ac. (NCCAOM), Dean, Professor

Amy Hull, MEd, MAOM, LicAc, Associate Dean, Professor

Maria Broderick, EdD, MAOM, LicAc, Director of Clinical Education, Program Director of Doctor of Acupuncture & Integrative Health, Associate Professor

Bing Yang, MD (China), DAIH, LicAc, Associate Professor, Director of Chinese Herbal Medicine Program

Assistant Professors Allen, Cina, Short

Degree and Certificate Programs

- Master of Acupuncture
- Master of Acupuncture with a Chinese Herbal Medicine specialization
- Certificate of Advanced Graduate Study in Chinese Herbal Medicine
- Doctor of Acupuncture

NESA Mission Statement

The NESA mission is to be the premier source for medical education rooted in the traditions of acupuncture and Chinese Medicine for the next generation of healthcare providers.

NESA Vision Statement

While fulfilling our educational mission within our community of scholarship, research and public service, we advocate for patients and for our profession and commit to a lifelong process of learning to provide excellence in clinical care that promotes wellness and relieves pain and suffering.

Core Values

We commit to the following beliefs:

- **Tradition:** We honor Traditional Chinese Medicine teachings, materials and methods and apply innovative thinking to drive new discoveries and incorporate lifelong learning with historical wisdom.
- **Excellence:** We are committed to the highest educational standards for training exceptional acupuncturists who will provide leadership and service locally and globally.
- **Integrity:** We are bound by the ethical foundations of Traditional Chinese Medicine to practice acupuncture and treat all who are in need of healthcare with respect, the highest quality of service and professionalism.
- **Diversity:** We acknowledge and respect the variety of human experience and foster unity and common purpose both within our college and in the community at large.
- **Compassion:** We are receptive to the suffering of others and provide relief with benevolence, kindness and tolerance for all who seek care.

Program Learning Outcomes

Upon successful completion of the Master of Acupuncture (MAc), Master of Acupuncture and Chinese Herbal Medicine (MAc CHM) and Certificate of Advanced Graduate Study in Chinese Herbal Medicine (CAGS CHM) programs, students will be able to:

- Apply the foundational knowledge of acupuncture, Chinese medicine and/or Chinese herbal medicine, including philosophies and theories, to patient care
- Synthesize information from the health history, intake and physical examination to accurately diagnose illness and develop and implement an effective treatment plan for patients
- Utilize critical thinking and professional judgment to manage a case appropriately over time
- Apply sufficient understanding of western biomedical terminology, pathophysiology and treatment strategies to support effective communication with other healthcare professionals
- Demonstrate preparedness to establish and maintain a successful clinical practice and to participate collaboratively in a variety of clinical settings
- Honor ethical standards in all interactions with patients and healthcare professionals
- Evaluate published research to inform clinical practice and an understanding of public health
- Respond appropriately to medical emergencies, and make informed and appropriate referrals

- Demonstrate the capacity to engage in regular self-assessment and lifelong learning to achieve continuous professional growth.

Program Learning Outcomes

Upon successful completion of the Doctor of Acupuncture (DAc), students will be able to:

- Apply the foundational knowledge of acupuncture and Chinese herbal medicine, including philosophies and theories, to patient care
- Synthesize information from the health history, intake and physical examination to accurately diagnose illness and develop and implement an effective treatment plan for patients
- Utilize critical thinking and professional judgment to manage a case appropriately over time
- Apply sufficient understanding of western biomedical terminology, pathophysiology and treatment strategies to support effective communication and collaboration with other healthcare professionals
- Demonstrate preparedness to establish and maintain a successful clinical practice, participate collaboratively in a variety of clinical settings
- Serve successfully as part of an integrative healthcare team
- Honor ethical standards in all interactions with patients and healthcare professionals
- Evaluate published research to guide healthcare improvement, innovation, and interprofessional delivery
- Exhibit an understanding of healthcare practices and policies across the healthcare system
- Respond appropriately to medical emergencies, and make informed and appropriate referrals
- Demonstrate the capacity to engage in regular self-assessment and lifelong learning to achieve continuous professional growth

New England School of Acupuncture Academic Policies

Academic Progression

Grading standards

- A minimum grade of C (2.0) is required in all professional courses in **both master's degrees, as well as a** minimum cumulative grade point average (GPA) of 2.0.
- A minimum grade of B (3.0) is required in all courses in **the doctoral degrees, as well as a** minimum cumulative grade point average (GPA) of 3.0.
- A failed course in the professional curriculum may be repeated only once.
- A second grade less than C for master's programs and B for doctoral programs in the repeated course may result in dismissal from the program.

Progression and Retention Policies

Students must complete the requirements for the Master of Acupuncture or Master of Acupuncture and Chinese Herbal Medicine within six years. Students must complete the requirements for the Doctor of Acupuncture within eight years. If this time limit from the date of admission has elapsed and the student has not completed degree requirements, the student must request an extension in writing and meet with the Dean, who may approve or deny the extension request. The School Dean's decision is final and not subject to further appeal.

CPR Certification

All students must complete and provide documentation of American Heart Association BLS for Healthcare Providers training prior to beginning and throughout the duration of Clinical Internship.

Transportation

Students are responsible for transportation to all classes and clinical sites.

Accreditation Commission for Acupuncture and Herbal Medicine (ACAHM)

The New England School of Acupuncture (NESA) Master's degree in Acupuncture (MAc) and Master's degree in Acupuncture and Chinese Herbal medicine (MAc CHM) are programmatically accredited by the Accreditation Commission for Acupuncture and Herbal Medicine (ACAHM), the recognized accrediting agency for programs preparing acupuncture and Chinese herbal medicine practitioners. The Doctor of Acupuncture (DAc) is not accredited or preaccredited by ACAOM. Graduates of this program are not considered to have graduated from an ACAHM-accredited or pre-accredited program and may not rely on ACAHM accreditation or pre-accreditation for professional licensure or other purposes. Accreditation status and notes may be viewed at <http://acaom.org/directory>. ACAHM is located at 8941 Aztec Drive, Eden Prairie, Minnesota 55347; phone 952/212-2434; fax 952/657-7068; www.acaom.org

Board Certification and Licensure

Students who successfully complete the master's programs will be eligible to sit for board certification examinations provided by the National Commission for Certification of Acupuncture and Oriental Medicine (NCCAOM). Students are

responsible for managing the application, fees, and preparation for these examinations, which are required for licensure in the Commonwealth of Massachusetts.

Acupuncture licenses in Massachusetts are issued by the Commonwealth of Massachusetts Board of Registration in Medicine's Committee on Acupuncture. Information on application is available through their website:
<http://www.mass.gov/eohhs/gov/departments/borim/acupuncture/licensing/requirements.html>

Requirements for licensure vary by state. NESAs has programs that meet the educational requirements for licensure in all states. These Professional Licensure Disclosures can be found on the Compliance page of the MCPHS website:
<https://www.mcphs.edu/about-mcphs/legal>).

Master of Acupuncture (MAc)

The Master of Acupuncture (MAc) is a 32-month full-time, year-round program, with admission each fall term that provides students with the knowledge, skills, and competencies to deliver highly effective care to patients of all ages in a variety of settings, including in private practice and hospitals. The program features both classroom and clinical training in acupuncture studies, emphasizing hands-on learning under direct supervision of experienced faculty. Upon completion of the program, students will be eligible to sit for national board certification examinations provided by the National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM) and to apply for licensure.

The programs are taught on the Worcester campus, with clinical experiences in affiliate sites in the New England region. The required core curriculum includes Chinese medical theory, diagnosis and treatment strategies, location and functions of acupuncture points, history of Chinese medicine, research on acupuncture, bodywork, and nutrition. The biomedical model of disease is included as well, including biomedical clinical sciences, pathophysiology, pharmacology and research methods. To equip the acupuncturist with competencies in cultivating the patient-provider relationship, counseling and communication skills, professional ethics, and self-care are taught. Practice management modules build skills to manage successful practices. During Clinical Internships, students treat patients under the supervision of senior faculty.

Japanese Acupuncture Styles Concentration

An optional sequence of 5 courses in Japanese Acupuncture Styles (JAS Track) may be completed concurrent with the 3-year core curriculum. Japanese acupuncture is a highly specialized modality that differs from the core curriculum in its methods of diagnosis and treatment. Students have an opportunity to sample both Chinese and Japanese styles and must complete comprehensive proficiency examinations and clinical internships in all styles they study.

Master of Acupuncture with a Chinese Herbal Medicine specialization

The Master of Acupuncture with a Chinese Herbal Medicine specialization (MAc CHM) is a 36-month, full-time, year-round program, with admission each fall term that provides students with the knowledge, skills, and competencies to deliver highly effective care to patients of all ages in a variety of settings, including in private practice and hospitals. The program features both classroom and clinical training in acupuncture studies, emphasizing hands-on learning under direct supervision of experienced faculty. In addition, MAc CHM students receive specialized training in Chinese herbal medicine. Upon completion of the program, students will be eligible to sit for national board certification examinations in acupuncture and herbs, as provided by the National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM), and to apply for a license.

The program is taught on the Worcester campus, with clinical experiences in affiliate sites in New England region. The required core curriculum) includes Chinese medical theory, diagnosis and treatment strategies, location and functions of acupuncture points, history of Chinese medicine, research on acupuncture, bodywork, and nutrition. The biomedical model of disease is included as well, including biomedical clinical sciences, pathophysiology, pharmacology and research methods. To equip the acupuncturist with competencies in cultivating the patient-provider relationship, counseling and communication skills, professional ethics, and self-care are taught. Practice management modules build skills to manage successful practices. During Clinical Internships, students treat patients under the supervision of senior faculty. Required courses in the Chinese Herbal Medicine include courses in single herbs, classic formulas, herb-drug interactions, case studies, and additional clinical supervision.

Japanese Acupuncture Concentration

An optional sequence of 5 courses in Japanese Acupuncture Styles (JAS Track) may be completed concurrent with the core curriculum. Japanese acupuncture is a highly specialized modality that differs from the core curriculum in its methods of diagnosis and treatment. Students will have an opportunity to sample both Chinese and Japanese acupuncture styles and Chinese Herbal Medicine and must complete comprehensive proficiency examinations and clinical internships in all styles they study.

Certificate of Advanced Graduate Study in Chinese Herbal Medicine (CAGS in CHM)

NESA's ACAHM accredited Certificate of Advanced Graduate Study in Chinese Herbal Medicine (CAGS CHM) program is designed for those currently enrolled in or who have completed an ACAHM-accredited/pre-accredited entry level program (master's level or professional doctoral) in acupuncture.

This program encompasses the comprehensive study of Chinese herbal medicine and its clinical application. In addition to extensive coursework, students complete 765 hours of training which includes 225 hours of clinical training. In the NESA Treatment Center interns treat patients with a variety of conditions under the direct supervision of clinical faculty highly experienced in Chinese herbal medicine.

Students assist in NESA's herbal dispensary, which is stocked with an extensive selection of high-quality herbal products. Students learn to compound concentrated granule and raw herbal formulas in a safe and accurate manner. They also gain experience in operating a successful herbal dispensary.

Graduates will be prepared to effectively utilize Chinese herbal medicine in clinical practice. Graduates are eligible to sit for the NCCAOM board examination in Chinese Herbal Medicine. This program meets the standard required by most states to dispense Chinese herbs.

**If an applicant has not completed the required 60 clock hours in biomedical clinical hours, these hours may be met by courses in Epidemiology/Biostatistics (30 clock hours, 2 semester hours), Research Design and Evaluation (45 clock hours, 3 semester hours), Physiology of Acupuncture (30 clock hours, 2 semester hours), or co-requisite sciences.

Doctor of Acupuncture (DAc)

The Doctor of Acupuncture (DAc) is a four-year program that teaches the knowledge, skills, and competencies needed to provide highly skilled and effective care to patients of all ages in a variety of settings, including in private practice and hospitals. This program also provides advanced training that prepares acupuncturists to collaborate with other healthcare professionals or work in integrative medical settings. The program features both classroom and clinical training in acupuncture studies, emphasizing hands-on learning under direct supervision of experienced faculty. Students must dually enroll in either the Master of Acupuncture or Master of Acupuncture and Chinese Herbal Medicine program as well as the Doctor of Acupuncture program. Upon completion of all master' level requirements students will be eligible to sit for national board certification examinations, as provided by the National Certification Commission for Acupuncture and Oriental Medicine (NCCAOM), and to apply for a license.

Japanese Acupuncture Concentration

An optional sequence of 5 courses in Japanese Acupuncture Styles (JAS Track) may be completed concurrent with the core curriculum. Japanese acupuncture is a highly specialized modality that differs from the core curriculum in its methods of diagnosis and treatment. Students will have an opportunity to sample both Chinese and Japanese acupuncture styles and Chinese Herbal Medicine and must complete comprehensive proficiency examinations and clinical internships in all styles they study.

Doctor of Acupuncture (DAc) Completion Program

The two-semester, 20-credit Doctor of Acupuncture Completion program prepares students to meet the demands of today's healthcare field and serve successfully as part of an integrative healthcare team. This program is designed for those who have completed a master's level program in acupuncture or acupuncture with a Chinese herbal medicine specialization.

Students gain an understanding of the healthcare practices and policies that guide collaborative care, and they explore models of integrative health and pain management. They learn directly from leaders in the emerging field of integrative health and develop a foundation of research competencies to guide explorations of integrative healthcare improvement, innovation, and interprofessional collaboration.

MCPHS University–Worcester

More information specific to the Worcester campus may be found in the following sections: Facilities, Interinstitutional Cooperation, and Student Services.

School of Medical Imaging and Therapeutics

Diagnostic Medical Sonography Program

Jeffrey C. Hill, BS, ACS, FASE, Department Chair, Assistant Professor – Echocardiography Track

Bryan Doldt, BS, RDCS, FASE, Program Director, Assistant Professor - Echocardiography Track

Jennifer Miller, MHSc, RDMS, RVT, Program Director, Assistant Professor - General Track

Erin O’Hora, BS, RDMS, RVT, Assistant Professor/Clinical Coordinator - General Track

Debra Crandell, EdD, RDMS Assistant Professor/Clinical Coordinator - General Track, Director of DMS Online

Marie Ficociello, MS, RDMS Assistant Professor/Clinical Coordinator - Echocardiography Track

Degree Programs

- Bachelor of Science in Diagnostic Medical Sonography-General and Echocardiology (Fast Track)

Bachelor of Science in Diagnostic Medical Sonography Completion Programs: General Sonography and Echocardiography Tracks (Fast Track, 16 months)

The Diagnostic Medical Sonography (DMS) profession uses sound waves (ultrasound) to produce multi-dimensional dynamic images of tissue, organs, and blood flow inside the human body for the diagnosis of various medical conditions. The sonographer, a highly skilled imaging technologist, uses sophisticated ultrasound equipment to identify disease. In addition, the sonographer works closely with physicians in the processing of the ultrasound images to make a diagnosis.

The DMS program offers a full-time, Fast Track, 16-month course of study that begins in the fall semester. The comprehensive curriculum includes primary specialties of ultrasound, plus secondary specialties, offered across two tracks; the General ultrasound track, includes training in abdominal, obstetrics/gynecology, breast, pediatric, musculoskeletal and vascular sonography; the Echocardiography track focuses on adult echocardiography with an optional secondary specialty track in pediatric echocardiography.

Registry Exam Eligibility

Graduates of the DMS programs are eligible to sit for several registry exams offered by the American Registry of Diagnostic Medical Sonography (ARDMS) and Cardiovascular Credentialing International (CCI). Echocardiography and General Ultrasound graduates may apply under ARDMS exam prerequisite 2 for the adult and pediatric echocardiography, abdomen and OB/GYN credentialing exams. Echocardiography graduates may apply under CCI exam prerequisite RCS4 (adult cardiac) and RCCS5 (pediatric/adult congenital).

The student must pass the ARDMS Sonography Principles & Instrumentation (SPI) registry exam in order to pass the DMS 304, Problem Solving in Physics and Instrumentation course. In addition, passing the SPI registry exam is required to continue into Year II of the program.

All DMS courses during the professional phase of studies must be completed with a weighted grade $\geq 77\%$ (C+) in order to progress in the program.

Students must complete all professional coursework at MCPHS to receive their degrees in the Diagnostic Medical Sonography programs.

The MCPHS graduate is well suited to work in several DMS specialties and, with the BS degree, has the comprehensive education required to become a leader in the profession.

Students with a bachelor's or associate's degree, or the appropriate amount of college credits and prerequisites, may apply to the fast track program. Courses must have been completed at a regionally accredited college or university with a grade of C or better for transfer. Math and science courses taken more than ten years prior to the anticipated date of matriculation to MCPHS will not be accepted.

Required prerequisite courses for all students:

Anatomy and Physiology I & II with lab (8 credits)

Basic Chemistry I with lab (4 credits)

Physics I (Algebra-based) with lab (4 credits)

Algebra and Trigonometry (3 credits) (Acceptable substitutions include Precalculus and Calculus)

Expository Writing I (3 credits)

Statistics (3 credits)

Total: 25 credits

Additional courses required for students without a Bachelor's Degree:

Basic Chemistry II with lab (4 credits)

Expository Writing II (3 credits)

Introduction to Psychology (3 credits)

American Culture, Identity, and Public Life (3 credits) (Acceptable substitutions include American History, US History, US Government, Western Civilization)

Humanities Elective (3 credits) (Acceptable courses include Literature, Creative Writing, Philosophy, Ethics, Religious Studies, Select Fine Arts, Advanced Level Languages)

Behavioral Science Elective (3 credits) (Acceptable courses include any upper-level psychology course)

Social Science Elective (3 credits) (Acceptable courses include History, Political Science/Government, Anthropology, Upper-level Sociology, American Studies, Women Studies, Ethnic Studies, Geography, Economics)

Total: 22 credits

Note: Prerequisite courses may be transferred in or completed at MCPHS prior to entering professional DMS courses. Up to six (6) credit hours of electives may be taken concurrently with professional DMS courses.

DMS Clinical Rotation Policy

Clinical experience is an integral part of the Diagnostic Medical Sonography curriculum. MCPHS University has clinical affiliations with excellent medical institutions throughout New England and beyond. We strive to meet each student's requests for clinical locations. However, to ensure all students have adequate exposure to the variety of ultrasound procedures necessary for completion of their degrees, students may be placed in a clinical site beyond their desired location for at least one semester. **Students are responsible for transportation to and from all assigned clinical facilities as well any expenses incurred to complete the clinical requirements of the programs.** This includes, but may not be limited to daily transportation, housing, and living expenses.

DMS Technical Standards

Minimum expectations of the DMS programs are to prepare competent, entry-level sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. To meet these expectations, students enrolled in health sciences professional programs must have abilities and technical skills to be successful healthcare providers. The following technical standards describe the non-academic qualifications the DMS programs considers essential for the successful progression in, and completion of the educational objectives of its curriculum.

Although the DMS program will engage in an interactive process with applicants with disabilities, it reserves the right not to admit any applicant who, upon completion of the interactive process, cannot meet the technical standards set forth below, with or without reasonable accommodations. Reasonable accommodation for persons with prior documented disabilities will be considered on an individual basis. Students wishing to request accommodations for disabilities should contact the Director for Office of Student Access and Accommodations.

A DMS professional provides direct care for patients in hospitals or outpatient facilities and must be able to apply acquired knowledge and physical tasks to skillfully perform sonography procedures. These technical standards are based upon the minimum tasks performed by graduates of the program as recommended by the Society of Diagnostic Medical Sonography, Scope of Practice and Clinical Standards for the Diagnostic Medical Sonographer, April 13, 2015 (<http://www.sdms.org/docs/default-source/Resources/scope-of-practice-and-clinical-standards.pdf?sfvrsn=8>)

Listed below are the technical standards that all applicants must meet in order to participate in, and successfully complete the DMS programs:

Physical

The Diagnostic Medical Sonographer must be able to:

- Work standing on their feet 80% of the time;
- Use both hands, wrists, and shoulders to maintain prolonged arm positions necessary for Scanning and perform fine motor skills;
- Lift more than 50 pounds routinely;
- Transport, move, and or lift patients from a wheelchair or stretcher to the examination table or patient bed, and physically assist patients into proper positions for examination;
- Push, pull, bend and stoop routinely to move and adjust sonographic equipment and perform studies;
- Use senses (vision, hearing, and touch) to adequately view sonograms, including color distinctions; distinguish audible sounds; perform eye/hand coordination skills required in sonographic examinations; and recognize changes in patient's condition and needs;
- Work in a semi-darkened room for prolonged periods of time;
- Be physically capable of carrying out all assigned duties

Mental and Intellectual

The Diagnostic Medical Sonographer must be able to:

- Communicate effectively, verbally and nonverbally, with patients and other healthcare professionals to explain procedures, give instructions, and give and obtain information;
- Organize and accurately perform the individual steps in a sonographic procedure in the proper sequence according to established standards;
- Understand and reach quickly to verbal instructions and patient needs;
- Follow directions effectively and work closely with members of the healthcare community;
- View and evaluate recorded images for the purpose of identifying proper protocol, procedural sequencing, technical qualities and identification of pathophysiology;
- Apply problem solving skills to help optimize patient care and produce the best diagnostic information possible

Emotional

The Diagnostic Medical Sonographer must be able to:

- Provide physical and emotional support to the patient during sonographic procedures;
- Interact compassionately and effectively with the sick and or the injured;
- Handle stressful situations related to technical and procedural standards and patient care situations;
- Adapt to changing environments and be able to prioritize tasks;
- Project an image of professionalism;
- Demonstrate a high level of compassion for others, a motivation to serve, integrity, and a consciousness of social values;
- Interact positively with people from all levels of society and all ethnic and religious backgrounds

Commission on Accreditation of Allied Health Education Programs

The Diagnostic Medical Sonography, General Ultrasound Programs are accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org), upon the recommendation of the Joint Review Committee on Education Programs in Diagnostic Medical Sonography. Mailing address: Commission on Accreditation of Allied Health Education Programs, 9355 -113th St. N., #7709 Seminole, FL 33775; tel: 727.210.2350

MCPHS University–Worcester School of Nursing

Tammy Gravel, EdD, MS, RN, Dean of the School of Nursing and Chief Nurse Administrator and Associate Professor

Gayle McGinty, DNP, MSN Ed, RN, Interim Associate Dean, BSN Administrator, Associate Professor

Lorraine MacDonald, MSN, RN, PMHNP-BC, Assistant Professor and Assistant Dean of BSN Clinical Education & Experiential Learning

Barbara Frechette, DNP, PMHNP-BC, Associate Professor and Director of Online Graduate Program

Edith Claros, PhD, MSN, PMHNP-BC, Associate Professor and Psychiatric Mental Health Nurse Practitioner Track Coordinator

Patricia Murray, DHS, MSN, FNP-BC, Interim Associate Dean of Accreditation and Assessment, Associate Professor and Family Nurse Practitioner Track Coordinator

Carolyn Parker, MS, RN, Assistant Professor and Interim Director of Simulation and Laboratory

Full Professor: Street; Associate Professors: Cabrera, Claros, Frechette, Gravel, Laurent, McGinty, McNulty, Murray; Assistant Professors Carroca, Crizer, Donahue, Heald, MacDonald, Rickan, Scola

Degree and Certificate Programs

- Bachelor of Science in Nursing (Postbaccalaureate)
- RN to Master of Science in Nursing Bridge Program (Online)
- Master of Science in Nursing - Family Nurse Practitioner Track (MSN) (Online)
- Master of Science in Nursing – Psychiatric Mental Health Nurse Practitioner Track (MSN) (Online)
- Certificate of Advanced Graduate Studies (CAGS) Family Nurse Practitioner (Online)
- Certificate of Advance Graduate Studies (CAGS) Psychiatric Mental Health Nurse Practitioner (Online)
- Doctor of Nursing Practice (DNP) (Online)

Bachelor of Science in Nursing (Postbaccalaureate) – 16-month Curriculum

The 16-month accelerated BSN program implemented at the MCPHS–Worcester campus is designed specifically for students with a bachelor's degree in another field. The curriculum is identical to that currently offered at the Boston and Manchester campuses. Students attend classes in Worcester. Program instruction is conducted in state-of-the-art facilities at the MCPHS–Worcester campus with clinical experiences in selected hospital and community agencies in the greater Worcester and MetroWest regions.

This 16-month program of study provides an accelerated option for students ready for a challenging transition to a career as a Bachelor of Science in Nursing registered nurse. Building on previous learning and experience gained from the student's first bachelor's degree, the 16-month program of study mirrors the Boston-based program's professional major, guiding students toward gaining the knowledge, skills, competencies, and values required to practice as a registered nurse in the 21st century.

The Postbaccalaureate BSN is offered in a 16-month year-round format with a January or September admission. The September-admission program consists of a 15-week fall semester, a 15-week spring semester, a 12-week summer session, and a 15-week fall semester; concluding in December of the second year. The January-admission program consists of a 15-week spring semester, a 12-week summer session, a 15-week fall semester and a 15-week spring semester, concluding in May of the second year.

To be eligible for the program, the student must possess a prior Bachelor of Science or Bachelor of Arts degree and have completed the following prerequisite coursework with a minimum grade of C+ within the past 10 years: chemistry (with lab), anatomy and physiology (with lab), microbiology (with lab), statistics, nutrition and human development. Students with a baccalaureate degree will not be required to meet the MCPHS general education core requirements. The program requires a total of 120 semester hours of credit for completion. Upon completion of the program, students will be eligible to sit for the National Council of State Boards of Nursing Licensure Examination for Registered Nurses (NCLEX-RN).

NOTE: An exception to the policy that no course examinations or graded assignments worth more than 15% of final course grade may be scheduled during the week before final examinations exists for Nursing courses. Major graded assignments or exams may be administered the week before the final week of the course. A reading day (scheduled only on a weekday, no Saturday or Sunday) will be provided between the end of scheduled classes / clinical rotations and the administration of any final exams.

For details on the curriculum, prerequisites, academic policies, professional & technical standards, and other information about the program, refer to the MCPHS–Boston School of Nursing section of this catalog. For the most current information regarding the program in Manchester, refer to the MCPHS website at www.mcphs.edu.

RN to Master of Science in Nursing Bridge Program (Online)

The RN to Master of Science in Nursing (MSN) Bridge consists of six courses (20 credits) designed to “bridge” the differences between the educational preparation of the associate degree nurse and that of the baccalaureate nurse. These six courses will be completed prior to the student’s matriculation into the MSN Family Nurse Practitioner (FNP) track, and the Psychiatric Mental Health Nurse Practitioner track. The Bridge is an entry option to the Master of Science in Nursing program for nurses without a bachelor’s degree. A bachelor’s degree in nursing will not be awarded upon completion of the Bridge curriculum. The Bridge courses complement the education of the associate degree-prepared nurse, develop the educational competencies of the baccalaureate nurse, and prepare the student for graduate-level education. Students must maintain an overall grade point average (GPA) of 3.0 in the Bridge courses in order to matriculate into the MSN-Family Nurse Practitioner track, and the MSN-Psychiatric Mental Health Nurse Practitioner track. The MSN program provides a high-quality education that prepares nurses to become competent, ethical, and compassionate nurse practitioners who will provide primary care to patients across the lifespan.

RN to MSN Bridge Program Admission Requirements

- An earned Associate Degree in Nursing from a state-approved program
- A minimum cumulative GPA of 2.0 (on a 4.0 scale) in Arts and Sciences courses and a cumulative GPA of 2.7 (on a 4.0 scale) in prelicensure Nursing courses
- RN licensure in the state in which you intend to perform your clinical hours
- Official transcripts
- A résumé or curriculum vitae
- A personal statement (500 to 1,000 words)

Forty-two (42) nontransferable transfer credits will be awarded to the licensed nurse upon matriculation into the MCPHS Bridge program. There is no time limit on accepting science courses for registered nurses. Formal matriculation into the MSN-FNP track or MSN-PMHNP track requires the completion of the six MCPHS Nursing Bridge courses with a cumulative GPA of 3.0 (on a 4.0 scale).

Arts and Sciences Prerequisite Courses

COURSE	TITLE	SEMESTER HOURS
	Anatomy and Physiology I and II (with labs)	8
	General or Medical Microbiology (with lab)	4
	Introduction to Psychology	3

TOTAL		20

Master of Science in Nursing Program (Online)

The primary goal of the Master of Science in Nursing (MSN) degree program is to prepare the graduate nurse to meet ever-evolving healthcare needs. The MSN curriculum is based on the American Association of Colleges of Nursing (AACN) Core Curriculum for an MSN program, including health promotion and disease prevention; human diversity and social issues; theoretical foundation of nursing practice; professional role development; research, ethics, and policy; and organization and financing of healthcare. Upon the completion of the MSN program, students will be able to

- Provide safe, effective, culturally competent, and advanced nursing care to individuals and families across the lifespan as a member of an interdisciplinary team and in the context of community;
- Integrate the core competencies of research, diversity, healthcare policy, ethics, health promotion and disease prevention, and theoretical foundations of nursing in the advanced nursing practice role;
- Demonstrate a leadership role in the profession of nursing;
- Engage in ongoing nursing knowledge development to guide practice

Successfully pass the Family Nurse Practitioner certification examination, the Psychiatric Mental Health Nurse Practitioner certification examination.

The MSN program offers (1) an MSN Family Nurse Practitioner (FNP) degree option, for which candidates complete core MSN courses plus three family health nursing courses, plus Survey of Telemedicine, and which include 630 clinical hours, (2) a MSN Psychiatric/Mental Health Nurse Practitioner (PMHNP) degree option, candidates complete the core MSN courses plus Survey of Telemedicine, a psychopharmacology course, therapy course and two psychiatric/mental health nursing courses, which include 630 clinical hours.

Admission Criteria

Master of Science in Nursing applicants must show proof of having attained a baccalaureate degree in nursing and/or successful completion of the MCPHS RN to MS in Nursing Bridge program.

Candidates whose primary language is not English will be required to have a minimum TOEFL score of 550.

Degree Requirements

All students must complete the required credit hours and maintain a cumulative grade point average (GPA) of 3.0.

The required courses for completion of the MSN program are as follows:

Curriculum: Master of Science in Nursing (Family Nurse Practitioner Track)

Year I—semester I

COURSE	TITLE	SEMESTER HOURS
NUR 701	Professional Role Development for Advanced Practice Nursing	3
NUR 706	Advanced Pathophysiology	3
TOTAL		6

Total credits required:		45

Certificate of Advanced Graduate Study (CAGS) in Family Nurse Practitioner, and Psychiatric Mental Health Nurse Practitioner

The Certificate of Advanced Graduate Study (CAGS) in Family Nurse Practitioner and Psychiatric Mental Health Nurse Practitioner programs are open to applicants who have previously earned a master's degree in nursing from an accredited program by either Collegiate Commission on Nursing Education (CCNE) or the National League for Nursing Accreditation Commission (NLNAC).

Curriculum: Certificate of Advanced Graduate Studies (CAGS) (Family Nurse Practitioner)

Students in the CAGS FNP program must have evidence of successful completion of the following courses:

- Advanced Pathophysiology Across the Lifespan
- Advanced Pharmacology Across the Lifespan
- Advanced Health Assessment Across the Lifespan
- Role of the Advanced Practice Nurse
- Scholarship for Advanced Nursing Building an Evidence-Based Practice
- Human Diversity Social and Policy Issues
- Translating and Integrating Scholarship Practicum

The courses must have been completed with a letter grade of B or higher at an accredited 4-year academic institution. Students who have not completed the academic equivalent of these courses previously will be required to take the course in order to complete the CAGS. The 3P courses (Adv. Pathophysiology, Adv. Pharmacology, Adv Health Assessment) must be completed within three years prior to admission to the program in order to be considered for transfer credits.

Doctor of Nursing Practice (Online)

The DNP program is designed to give experienced advanced practice nurses the knowledge, skills, and judgement competencies required for leading the way to the future of clinical nursing and health care delivery systems. The DNP prepares advanced practice nurses for roles in health systems leadership, policy development, and interdisciplinary collaboration that focus on:

- Improving healthcare quality, advocating for health policy at the local and national level;
- Applying theories and conceptual models to the analysis of healthcare disparities;
- Applying scientific evidence to improve patient outcomes;
- Utilizing informatics to monitor care, control costs, and improve efficiencies;
- Increasing healthcare access to all communities and groups.

Admission Criteria

- Earned Master's in Nursing in an advanced nursing practice specialty from a nationally accredited CCNE or NLNAC program.
- Certification as an advanced practice nurse (FNP, AGPCNP, AGACNP, ANP, PNP, GNP, ACNP, Nurse Midwife, Nurse Anesthetist, or CNS)
- A minimum of two years of practice as an APRN
- GPA 3.5 or above on a 4.0 scale
- Resume or CV
- Current licensure as a registered nurse in the state in which practice will occur
- Graduate research methods
- Transcripts from all post-secondary institutions
- Two letters of reference: One pertaining to academic ability or professional competence and a second letter referring to personal character
- Personal statement
- Skype or in-person interview will be part of the admission process
- Students are required to complete 1,000 clinical hours as part of DNP degree completion. A maximum of 500 hours of preceptor-supervised direct care clinical hours earned from your Master's degree may be applied to this requirement. Upon acceptance, you will be provided with the next steps to submitting your existing preceptor-supervised direct care clinical hours for consideration to be applied to the program requirement.

MCPHS University–Worcester School of Occupational Therapy (Manchester/Worcester)

Occupational Therapy Program

Professor C. Douglas Simmons, PhD, OTR/L, FAOTA, Program Director

Assistant Professor Olivia Freeman, MA, OTR/L, Academic Fieldwork Coordinator

Assistant Professor Lisa Shooman, PhD, OTR/L, Site Coordinator

Sarah Chevrefils, MS, OTR/L, Assistant Academic Fieldwork Coordinator

Andrea DeSimone, OTR/L Assistant Academic Fieldwork Coordinator

Assistant Professors Angela Butler, Denise Finch, Heidi Robertson

Degree Program

Master of Science in Occupational Therapy

The School of Occupational Therapy on the MCPHS University Manchester campus has been granted candidacy status by the Accreditation Council of Occupational Therapy Education (ACOTE) to expand offering of the Master of Science in Occupational Therapy (MSOT) program to the University's Worcester Campus. The School of Occupational Therapy will admit an initial cohort of students in the Fall of 2021 and undergo an accreditation visit in the Fall of 2022.

For details on the curriculum, prerequisites, and other information about the MSOT program, refer to the MCPHS University–Manchester School of Occupational Therapy section of this catalog. The Worcester curriculum will be identical to the existing program located on the Manchester campus. This consists of a total of 84 semester hours and includes approximately 30 weeks of fieldwork education. The program encompasses five areas of concentration: Basic Tenets of Occupational Therapy and Practice (24 semester hours), Foundations of Occupational Therapy Practice (18 semester hours), Scholarship (12 semester hours), Management of Occupational Therapy Services (6 semester hours), and Fieldwork Education (24 semester hours).

MCPHS University–Worcester

School of Optometry

Maryke N. Neiberg, OD, *Dean, School of Optometry*

Nancy Coletta, OD, PhD, Associate Dean for Academic Programs

Greg Waldorf, OD, Associate Dean for Clinical Programs

Larry Baitch, OD, PhD, Associate Dean for Research

Professors Baitch, Coletta, Shivanna; Associate Professors Hendricks, Malloy, Neiberg, O’Leary, Ramaswamy, Stamm; Assistant Professors Contardo, Deliso, Han, Khalaf, Imperioli, Waldorf

Degree Programs

Doctor of Optometry (OD)

The Doctor of Optometry (OD) program on the Worcester campus offers a student-oriented, learner-centered program designed to provide graduates with entry level activities to succeed in professional practice. The four-year program uses the latest in instructional and clinical technology to assure that its graduates possess the state-of-the-art education necessary to diagnose and manage the wide variety of ocular and systemic conditions encountered in today’s diverse clinical settings. The program features clinically relevant instruction and patient care; dedicated faculty who place a high importance on teaching, advising, and individual student development; and clinical experiences in selected facilities in on-campus and off-campus optometric and ophthalmologic clinics as well as Veterans’ Administration Centers, community health centers, hospitals, and community agencies in and beyond the Greater Worcester region.

Technical Standards

In order to fully describe elements required for successful completion of its professional optometric degree program, the MCPHS School of Optometry has adopted guidelines developed and adopted by the Association of Schools and Colleges of Optometry (ASCO). All students are expected to demonstrate each of the competencies contained within these functional guidelines:

Functional Guidelines for Didactic and Clinical Optometric Education at MCPHS University

To provide guidance to those considering optometry as a profession, the Association of Schools and Colleges of Optometry (ASCO) has established functional guidelines for optometric education. The ability to meet these guidelines, along with other criteria established by individual optometric institutions, is necessary for graduation from an optometric professional degree program.

Our mission is to produce graduates fully qualified to provide quality comprehensive eye care services to the public. To fulfill this mission, each institution must ensure that students demonstrate satisfactory knowledge and skill in the provision of optometric care. Admission committees therefore consider a candidate’s capacity to function effectively in academic and clinical environments as well as a candidate’s academic qualifications and personal attributes.

The functional guidelines in optometric education require that the candidate/student possess appropriate abilities in the following areas: (1) observation; (2) communication; (3) sensory and motor coordination; (4) intellectual–conceptual, integrative, and quantitative abilities; and (5) behavioral and social attributes. Each of these areas is described in this document.

In any case where a student’s abilities in one of these areas are compromised, they must demonstrate alternative means and/or abilities to meet the functional requirements. It is expected that seeking and using such alternative means and/or abilities shall be the responsibility of the student. Upon receipt of the appropriate documentation, the school or college will be expected to provide reasonable assistance and accommodation to the student.

Observation Abilities

The student must be able to acquire a defined level of required knowledge as presented through lectures, laboratories, demonstrations, patient interaction, and self-study. Acquiring this body of information necessitates the functional use of visual, auditory, and somatic sensation enhanced by the functional use of other sensory modalities. Examples of

these observational skills in which accurate information needs to be extracted in an efficient manner include the following:

Visual abilities (as they relate to such things as visual acuity, color vision, and binocularity):

- Visualizing and reading information from papers, films, slides, video, and computer displays
- Observing optical, anatomic, physiologic, and pharmacologic demonstrations and experiments
- Discriminating microscopic images of tissue and microorganisms
- Observing a patient and noting nonverbal signs
- Discriminating numbers, images, and patterns associated with diagnostic tests and instruments
- Visualizing specific ocular tissues in order to discern three-dimensional relationships, depth, and color changes

Auditory abilities:

- Understanding verbal presentations in lecture, laboratory, and patient settings
- Recognizing and interpreting various sounds associated with laboratory experiments as well as diagnostic and therapeutic procedures

Tactile abilities:

- Palpating the eye and related areas to determine the integrity of the underlying structures;
- Palpating and feeling certain cardiovascular pulses

Communication Abilities

The student must be able to communicate effectively, efficiently, and sensitively with patients and their families, peers, staff, instructors, and other members of the healthcare team. The student must be able to demonstrate established communication skills using traditional and alternative means. Examples of required communications skills include the following:

- Relating effectively and sensitively to patients, conveying compassion and empathy;
- Perceiving verbal and nonverbal communication such as sadness, worry, agitation, and lack of comprehension from patients;
- Eliciting information from patients and observing changes in mood and activity;
- Communicating quickly, effectively, and efficiently in oral and written English with patients and other members of the healthcare team;
- Reading and legibly recording observations, test results, and management plans accurately;
- Completing assignments, patient records, and correspondence accurately and in a timely manner

Sensory and Motor Coordination Abilities

Students must possess the sensory and motor skills necessary to perform an eye examination, including emergency care. In general, this requires sufficient exteroception sense (touch, pain, temperature), proprioceptive sense (position, pressure, movement, stereognosis, and vibration) and fine motor function (significant coordination and manual dexterity using arms, wrists, hands, and fingers). Examples of skills required include, but are not limited to, the following:

- Instillation of ocular pharmaceutical agents;
- Insertion, removal, and manipulation of contact lenses;
- Assessment of blood pressure and pulse;
- Removal of foreign objects from the cornea;
- Simultaneous manipulation of lenses, instruments, and therapeutic agents and devices;
- Reasonable facility of movement;
- Injections into the eye, lids, or limbs

Intellectual-Conceptual, Integrative, and Quantitative Abilities

Problem solving, a most critical skill, is essential for optometric students and must be performed quickly, especially in emergency situations. In order to be an effective problem solver, the student must be able to accurately and efficiently utilize such abilities as measurement, calculation, reasoning, analysis, judgment, investigation, memory, numerical recognition, and synthesis. Examples of these abilities include being able to:

- determine appropriate questions to be asked and clinical tests to be performed;
- identify and analyze significant findings from history, examination, and other test data;
- demonstrate good judgment and provide a reasonable assessment, diagnosis, and management of patients;
- retain, recall, and obtain information in an efficient manner; and
- identify and communicate the limits of one's knowledge and skill.

Behavioral and Social Attributes

The student must possess the necessary behavioral and social attributes for the study and practice of optometry. Examples of such attributes include the following:

- Satisfactory emotional health required for full utilization of one's intellectual ability;
- High ethical standards and integrity;
- An empathy with patients and concern for their welfare;
- Commitment to the optometric profession and its standards;
- Effective interpersonal relationships with patients, peers, and instructors;
- Professional demeanor;
- Effective functioning under varying degrees of stress and workload;
- Adaptability to changing environments and uncertainties;
- Positive acceptance of suggestions and constructive criticism

Candidates with questions or concerns about how their own conditions or disabilities might affect their ability to meet these functional guidelines are encouraged to meet with an admission counselor prior to submitting an application.

Admission Prerequisites

- Bachelor's degree from a regionally accredited postsecondary institution in the United States strongly recommended; a minimum of 90 semester hours or 135 quarter hours of college education must be completed prior to matriculation;
- Recommended minimum overall grade point average (GPA) and prerequisite GPA of 2.9 or better (on a 4.0 scale);
- Minimum grade of C in all prerequisite courses;
- Completed Optometry Centralized Application Service (OptomCAS) application;
- Optometry Admission Test (OAT) report; score of 300 or higher recommended or Graduate Record Exam (GRE) report; score of 150 or higher recommended;
- Two letters of recommendation; one professional and one academic preferred;
- Résumé;
- Personal statement (500 to 1,000 words);
- Evidence of familiarity with optometry (shadowing a practitioner, volunteer work in optometric offices, etc.);
- Official Advanced Placement (AP) or College-Level Examination Program (CLEP) scores, if applicable (transfer credit granted for AP scores of 4 or 5 and CLEP scores of 50 or higher);
- Official TOEFL (minimum of 213 computer-based or 79 iBT) or IELTS (minimum 6.5) scores for all applicants whose primary language is not English;
- Official transcripts from non-U.S. secondary schools, colleges, or universities submitted to World Education Services (WES) for a course-by-course evaluation.
- Prerequisite Coursework:
 - General Biology I and II with labs (8 semester hours)
 - Microbiology with lab (4 semester hours)
 - General Chemistry I and II with labs (8 semester hours)
 - Organic Chemistry with lab (4 semester hours)
 - Physics I and II with labs (8 semester hours)
 - Calculus (3 semester hours)
 - English (6 semester hours)
 - Psychology (3 semester hours)
 - Statistics (3 semester hours)
 - Biochemistry (3 semester hours) (not required but strongly recommended)

All math and science prerequisites must have been completed within the last 10 years.

Progression and Retention

Progression in the Doctor of Optometry program is dependent upon the student's maintaining a minimum cumulative grade point average (GPA) of 2.0.

To progress within both the didactic and the clinical phases of the program, students must achieve a final course grade of C or better, or a pass for a pass/fail course. In all OPT-designated courses, obtaining a course grade of less than a C or a fail results in a student's having to repeat the course, which stops progression through the program (i.e., results in nonprogression status) because OD courses are offered only once a year. The student will decelerate to a class cohort that is targeted to graduate later than the student's original cohort. An optometry student may be placed on nonprogression status only once during his or her tenure in the School of Optometry (OD) program. A student who receives a second nonprogression status in a subsequent semester will be dismissed from the optometry program.

Directed study during the first three years may be required as remediation in lieu of repeating one year (1) if the student fails one course that is not sequential and/or (2) at the recommendation of the instructor of record and the Academic Standing Committee. The final decision for approval of the directed study requirement during the four-year program will be at the dean's discretion.

Students in their fourth professional year who fail a clinical education experience may be required to repeat a clinical externship course, or to complete a directed study course (ranging from 1 to 3 credit hours) prior to completing their clinical education experience. Progression is subject to clinical placement availability. (NOTE: There is no guarantee that space will be available at the desired time of return of the student; it may take up to two years for reentry due to lack of clinical placement availability.)

If a student is unable to progress in a professional course or clinical education experience after two attempts, the student will be referred to the program's Academic Standing Committee with a recommendation for dismissal.

Students must complete the requirements for the Doctor of Optometry (OD) degree within five years from initial matriculation. If this time limit in the OD program has elapsed and the student has not completed degree requirements, the student must request an extension in writing and meet with the Dean of the School of Optometry, who may approve or deny the extension request. Final appeals are to the Vice President of Academic Affairs / Provost.

Clinical Rotations

At a minimum, optometry clinical rotations require background screenings. For additional information, please contact the MCPHS Chief Compliance Officer.

CPR Certification

All students must complete CPR training prior to beginning clinical experiences in OPT 650 Clinical Optometry. Students must be certified in Basic Cardiac Life Support (BCLS) at the Healthcare Provider Level by the American Heart Association (AHA). Students must provide a copy of the AHA Healthcare Provider Level card indicating active certification. It is recommended that the student verify the course in advance to ensure that the course is appropriate.

Transportation/Housing

Reliable transportation to, from, and during all clinical experiences is the responsibility of the student. A number of clinical rotations in all years of the required curriculum may be scheduled at some distance from the campus. This is necessary to provide a range of diverse learning experiences and to ensure availability and quality of clinical education sites. The University will make every effort to accommodate requests regarding assignments to experiential education sites, but students generally can expect to be assigned to clinical sites some distance from the campus for at least a portion of their required clinical rotations beginning in the first year. In such instances, students are responsible for transportation and other related travel or housing expenses.

Employment

Due to the rigorous nature of the optometry program, the demands placed on students are extremely high, particularly with respect to their clinical rotation schedule and associated student requirements. It is for this reason that students are strongly discouraged from engaging in any outside, non-program-related employment throughout the program of study.

Accreditation Council on Optometric Education (ACOE)

The Doctor of Optometry (OD) program on the Worcester campus is accredited by the Accreditation Council on Optometric Education (243 N. Lindbergh Blvd., St. Louis, MO 63141; phone: 800.365.2219).

Doctor of Optometry/Master of Public Health Dual Degree (OD/MPH)

This program option enables matriculated Doctor of Optometry (OD) students to also earn a Master of Public Health degree. Students will apply to the OD/MPH in the spring of their first year, and if accepted, begin MPH courses that summer. Optometrists with training and experience in public health can provide assessment of community needs for eye care services. They are able to assist in the definition of factors that contribute to the treatment and prevention of visual system anomalies, to develop and apply quality assurance systems, to participate and provide leadership in health-related agencies, and to foster public awareness of the need for eye care. An individual qualified both in optometry and public health is expected to have the capability to develop, administer, and evaluate eye and vision health programs in research projects; design and conduct epidemiological field studies; use statistical methods in data analysis of case-control and cohort studies; develop and implement vision health education programs; and develop occupational health and eye safety programs.

Students complete all credits for both degrees with one modification—a total of 4 semester hours from the OD program also fulfill MPH requirements: OPT 691 (1 semester hour) and OPTC 879 (3 semester hours) fulfill the requirement for PBH 701 (2 semester hours) and PBH 890 (2 semester hours). A total of 212 semester hours are required for the dual degree.

MCPHS University–Worcester

More information specific to the Worcester campus may be found in the following sections: Facilities, Interinstitutional Cooperation, and Student Services.

School of Physical Therapy

Doctor of Physical Therapy Program

Frances E. Kistner, PT, PhD, CEAS, CEEAA, Program Director and Associate Professor of Physical Therapy

Elizabeth V. Fuller, PT, EdD, Associate Director and Professor of Physical Therapy

Janna Kucharski-Howard, PT, DPT, MSM, Director of Clinical Education and Professor of Physical Therapy

Cheryl Babin, PT, DHS, MHA, CAGS, Associate Director of Clinical Education, Associate Professor of Physical Therapy

Associate Professors, Elliott, Faraclas; Assistant Professors Bellows, Joyce, Lachowski, Rydingsward

Degree Programs

- Doctor of Physical Therapy

Doctor of Physical Therapy

The entry-level Doctor of Physical Therapy (DPT) program on the Worcester campus prepares graduates to develop the advanced knowledge and skills required for contemporary physical therapy practice. The curriculum includes the elements of foundational sciences, clinical sciences, evidence-based practice, professional roles and practice issues, healthcare systems, and management competencies in the educational preparation of physical therapists. The coursework is designed to reinforce and build on each element so that the student can synthesize and apply the learned material to a variety of clinical, research, and management situations.

This postbaccalaureate program builds on the knowledge acquired from an undergraduate education and has two components: didactic and clinical. Through the didactic component, students acquire the knowledge and skills and develop the attitudes and professional behaviors needed for physical therapy practice. In the clinical education component, students apply their knowledge, skills, attitudes, and professional behaviors in clinical settings away from MCPHS. The clinical education component accounts for about one-third of the curriculum.

The curriculum for the entry-level Doctor of Physical Therapy program has a total of 122 semester hours with 30 weeks of full-time clinical education. The program is made up of five concentration areas: Foundations of PT Practice (32 semester hours), Evidence in PT Practice (8 semester hours), Professional Issues in PT Practice (8 semester hours), Patient/Client management (40 semester hours), and Clinical Education (35 semester hours).

Application for the Doctor of Physical Therapy program is through the Physical Therapy Centralized Application Service (PTCAS) at www.ptcas.org.

Admission Prerequisites

- Bachelor's degree from a regionally accredited postsecondary institution in the United States
- Minimum overall grade point average (GPA) and prerequisite GPA of 3.0 or better (on a 4.0 scale)
- Minimum grade of C in all prerequisite courses
- Two letters of recommendation; one professional and one academic preferred
- GRE (Graduate Record Examination)
- Personal statement (500 to 1,000 words)
- On-campus faculty interview (by invitation only)
- Minimum of 10 hours of physical therapy exposure/experience documented from the clinical setting, not time as a patient
- Official TOEFL (90 TOEFL or equivalent) or IELTS (minimum 7) scores for all applicants whose primary language is not English
- Official transcripts from international colleges or universities submitted to the Center for Educational Documentation (CED), Educational Credential Evaluators, Inc. (ECE), or World Education Services (WES) for a course-by-course evaluation. MCPHS requires both the official international transcript(s) and an evaluated copy.

Prerequisite Coursework

- Two courses in biology/biological sciences (not botany) (6 semester hours)
- General Chemistry I and II with labs (8 semester hours)
- Anatomy and Physiology I and II with labs (8 semester hours)
- Physics I and II with labs (8 semester hours)
- Exercise Physiology with lab (3 semester hours)
- Calculus preferred, Precalculus accepted (3 semester hours)
- Statistics (3 semester hours)
- Introduction to Psychology (3 semester hours)
- Behavioral Science Elective (3 semester hours)

All math and science prerequisites must have been completed within the last 10 years.

Mission Statement

The mission of the School of Physical Therapy Program is to prepare qualified students for successful professional careers as Doctors of Physical Therapy consistent with the mission and core values of MCPHS University and the American Physical Therapy Association. Graduates of the DPT Program are clinically competent entry level physical therapists who are able to recognize and meet changing health care needs. The program seeks to impart the development of skills for professional and ethical service and autonomous and collaborative practice; promote lifelong learning, and commit to the enrichment and promotion of the physical therapy profession. The faculty of the School of Physical Therapy at MCPHS University are dedicated to excellence in teaching, service and scholarship.

Goals

- Provide learner-centered teaching and student engagement that fosters intellectual vitality, critical thinking and continuing professional development;
- Prepare graduates who will foster the core values of the APTA and MCPHS University through ethical, legal, professional and collaborative PT practice;
- Produce graduates who will meet health-care needs and address health promotion in response to the ever-changing environment;
- Prepare graduates who will contribute to the advancement of the PT profession through evidence based practice, service and scholarship;
- Inspire a community of life-long learners that includes students, graduates, core faculty and clinical faculty through scholarship, mentorship, and participation in professional organizations, exchanges, and/or development;
- Prepare graduates who can effectively and efficiently use resources, including technology to maximize the outcomes of those they serve with attention to diversity, healthcare disparity and cross- cultural perspectives;
- Promote graduates who will have an understanding of their ability to make a positive influence on the profession, and on local and global communities; and
- Support meaningful service and scholarship that promotes the growth and wellness of the collective faculty.

Student Learning Outcomes

- Develop knowledge and performance of contemporary physical therapy practice that is safe, legal, ethical, effective and compassionate which includes screening, examination, evaluation, physical therapy diagnosis, development of the plan of care, intervention and assessment of outcomes (**practice**);
- Demonstrate professional behavior and interactions (**professional behavior**);
- Develop the ability to communicate effectively with a variety of audiences through writing, listening and speech (**communication**);
- Adapt delivery of physical therapy services with consideration for patient's differences, values, preferences and needs (**cultural competency**);
- Demonstrate technological ability to access information and demonstrate basic skills in research methodology that will allow the graduates to evaluate data and draw conclusions for relevance to practice (**evidence-based practice skills**);
- Develop critical thinking skills by making professional and practice decisions, through analysis of data relevant to their practice (**critical thinking**);

- Educate others regarding physical therapy practice, prevention, health and wellness using relevant and effective teaching methodologies (**education**);
- Manage resources to achieve physical therapy goals while understanding economic factors that impact the delivery of service (**resource management**);
- Provide autonomous care and appropriately address patients' needs for services with the use of support services and/or outside referral (**autonomous practice**);
- Participate in interprofessional collaboration and consultation in order to achieve better outcomes including health promotion in a constantly changing health care environment (**interprofessional/consultation**);
- Demonstrate commitment to life-long learning in physical therapy, through scholarship and participation in professional organizations, exchanges, and/or development (**life- long learning**); and
- Demonstrate commitment to the current and future needs of local and global communities through service (**service**).

Essential Functions

The practice of physical therapy includes the examination, diagnosis, and treatment of people with physical disabilities, movement dysfunction, and pain. Physical therapists must be prepared to conduct in a timely manner a relevant patient examination, evaluate the results of this examination, and synthesize these data to establish an accurate diagnosis, prognosis, and plan of care; implement an intervention; and use the process of reexamination to assess patient outcomes. Physical therapists must also possess the skills necessary to determine when referral of the patient/client to another healthcare professional is appropriate. Physical therapists must provide evidence that the care that they provide is effective, often through the conduct of clinically based research.

Doctor of Physical Therapy students must be able to complete the following:

- Participation in all required aspects of classroom and laboratory activities;
- Participation in all required aspects of clinical experience activities;
- Effective communication with other students, instructors, assistive personnel, patients, family members, payors, and other healthcare professionals;
- Maintenance of a safe environment for other individuals and for one's self, including use of universal precautions;
- Provision of emergency patient care, including but not limited to cardiopulmonary resuscitation (CPR);
- Completion of elements of patient/client management, including examination, evaluation of data, formulation of physical therapy diagnosis and prognosis, intervention, assessment of outcomes, and record keeping;
- Completion of specific patient/client interventions and treatments, including patient and family education, application of modalities, therapeutic exercise, and functional training;

Clinical agencies may have additional or agency-specific technical standards, which take precedence over MCPHS technical standards. The Commission on Accreditation of Physical Therapy Education (CAPTE) accredits professional physical therapy programs and requires that graduates of these programs be able to deliver entry-level clinical services. Graduates of entry-level programs are required to possess a broad base of knowledge and skills requisite for the practice of physical therapy. Physical therapists require *the intellectual-communication, behavioral-social, observational, and motor* abilities to meet the standard of practice.

Certain disabilities can interfere with a student's ability to complete the program of study and acquire the essential functions necessary for the practice of physical therapy. Reasonable accommodation can be made to compensate for some limitations. However, those that interfere with patient care or safety, or require the use of an intermediary may be incompatible with independent professional practice.

Technical Standards for Physical Therapy

Intellectual-Communication Abilities

Intellectual skills include the ability to recall and comprehend large amounts of didactic information and to apply this information to the examination, evaluation, and management of routine and complex physical therapy problems. Effective communication skills enable the physical therapist to elicit appropriate information from patients and to effectively explain examination and treatment procedures. Some of the skills an individual must be able to demonstrate include, but are not limited to, the ability to

- communicate clearly and in a timely manner with patients, physicians, other health professionals, community

or professional groups, and colleagues;

- report clearly, legibly, and in a timely manner through progress notes in patient charts, reports to physicians, insurance forms, and order forms;
- respond to such things as a patient calling from behind a curtain, warning calls from anyone, and machine alarms; and
- participate in group meetings to deliver and receive information and to respond to questions from a variety of sources.

Behavioral-Social Attributes

Students must demonstrate the ability to practice in a professional and ethical manner and possess the emotional stability to practice in a stressful work environment. Compassion, integrity, concern for others, interpersonal skills, cultural competence, and motivation are all personal attributes associated with the practice of physical therapy. Some of the skills an individual must be able to demonstrate include, but are not limited to, the ability to

- recognize and respond appropriately to individuals of all ages; genders; races; and socioeconomic, religious, and cultural backgrounds;
- cope with the stress of heavy workloads, demanding patients, and life-threatening clinical situations; and
- recognize and respond appropriately to potentially hazardous situations.

Observational Skills

Observation is one of the key tools that a physical therapist possesses. To gather data on patient/client condition and to appropriately manipulate machinery are critical to being an effective physical therapist. Some of the skills an individual must be able to demonstrate include, but are not limited to, the ability to

- observe and interpret patient movement, skin condition, safety hazards, and changes in appearance; and
- read and interpret equipment dials; assessment graphs; patient charts; professional literature; and notes from patients, physicians, and other health professionals.

Motor Skills

The practice of physical therapy requires that the practitioner possess the ability to perform basic evaluative and therapeutic procedures that require specific physical skills and stamina (e.g., palpation, transfers, gait training). A therapist must be able to use vision and somatic sensation in the evaluation and treatment of patients. Some of the skills an individual must be able to demonstrate include, but are not limited to, the ability to

- lift, carry, and push patients (150 pounds) in beds or wheelchairs, heavy equipment, body parts, and patients transferring from bed to chair or mat, or be able to instruct others in the activity, including proper body mechanics;
- walk and balance well enough to help patients walk and transfer with or without equipment, and prevent injury to patient and self;
- palpate anatomical structures and handle injured body parts without causing injury to the subject;
- exhibit sufficient manual dexterity to manipulate very small equipment, provide support and resistance as needed through complex exercise movements, perform CPR, manipulate dials, and treat acutely ill patients without disturbing sensitive monitoring instruments and lines; and
- provide for the patient's safety and well-being in all therapeutic or transporting activities.

Professional Behaviors

In addition to knowledge and skill acquisition, the process of becoming a professional involves developing competence in professional behavior. Students are expected to display professional behavior at all times including during clinical education experiences. This includes displaying a professional demeanor in interactions and boundaries with patients and their families, clinical staff, peers, faculty, and the public at all times in consideration of their representation of the profession of physical therapy and MCPHS. The 10 requisite professional behaviors are defined below.

Any student demonstrating unprofessional behavior will be referred to the PT Professional and Academic Review Committee.

Definitions

Critical thinking: The ability to question logically, identify, generate, and evaluate elements of logical argument; recognize and differentiate facts, appropriate or faulty inferences, and assumptions; and distinguish relevant from

irrelevant information. The ability to appropriately utilize, analyze, and critically evaluate scientific evidence to develop a logical argument, and to identify and determine the impact of bias on the decision-making process

Communication: The ability to communicate effectively (i.e., verbal, nonverbal, reading, writing, and listening) for varied audiences and purposes

Problem solving: The ability to recognize and define problems, analyze data, develop and implement solutions, and evaluate outcomes

Interpersonal skills: The ability to interact effectively with patients, families, colleagues, other healthcare professionals, and the community in a culturally aware manner

Responsibility: The ability to be accountable for the outcomes of personal and professional actions and to follow through on commitments that encompass the profession within the scope of work, community, and social responsibilities

Professionalism: The ability to exhibit appropriate professional conduct and to represent the profession effectively while promoting the growth/development of the physical therapy profession

Use of constructive feedback: The ability to seek out and identify quality sources of feedback, reflect on and integrate the feedback, and provide meaningful feedback to others

Effective use of time and resources: The ability to manage time and resources effectively to obtain the maximum possible benefit

Stress management: The ability to identify sources of stress and to develop and implement effective coping behaviors. This applies to interactions with self, patients/clients and their families, and members of the healthcare team in work/life scenarios.

Commitment to learning: The ability to self-direct learning to include the identification of needs and sources of learning, and to continually seek and apply new knowledge, behaviors, and skills

Adapted from L.B. Kontney, W. May, and Z.A. Iglarsh. "Professional Behaviors for the 21st Century." Manuscript in progress, University of Wisconsin–Madison Physical Therapy Educational Program, 2010.

Academic Standards for the Doctor of Physical Therapy Program

- A minimum grade of B– is required for all physical therapy (PTH-designated) courses in the DPT curriculum. Any courses designated as pass/fail must be passed in order to progress with the DPT curriculum.
- The minimum passing grade for all cumulative practical examinations is 80%, or B–.
- All DPT courses must be taken in the specified sequence of the curriculum.
- An individual PTH course may be repeated only once. A second failed attempt with a grade below the B– standard will result in dismissal from the DPT program.
- Throughout the DPT program, failure to meet the required minimum standard (B-) in more than two separate DPT courses will result in dismissal from the DPT program.
- A physical therapy student may be placed on nonprogression status only once during his or her tenure in the Physical Therapy DPT program. A student who receives a second nonprogression status in a subsequent semester will be dismissed from the Physical Therapy program.

Progression and Retention

Progression in the DPT program is dependent upon the student's maintaining a minimum cumulative grade point average (GPA) of 3.0 and a semester GPA of 3.0 as the student progresses.

To progress within both the didactic and the clinical phases of the program, students must achieve a final course grade of B– or better, or a pass for a pass/fail course. A student must be in good academic standing with a professional cumulative GPA of 3.0 to progress to full time clinical education experiences (PTHC 700). In all PTH-designated courses, obtaining a course grade of less than a B– or a fail results in a student's having to repeat the course, which stops progression through the program (i.e., results in nonprogression status) because DPT courses are offered only once a year. The student will decelerate to a class cohort that is targeted to graduate later than the student's original cohort.

Students who fail a professional course are required to repeat the course prior to progressing in the curriculum. Students who fail a clinical education experience may be required to complete PTH 685 prior to completing the clinical education experience. Progression is subject to clinical placement availability. (NOTE: There is no guarantee that space will be available at the desired time of return of the student; it may take up to two years for reentry due to lack of clinical placement availability.)

If a student is unable to progress in a professional course or clinical education after two attempts, the student will be referred to the School of Physical Therapy Academic Standing Committee with a recommendation for dismissal. Students must complete the requirements for the DPT degree within five years from initial matriculation. If this time limit

in the DPT program has elapsed and the student has not completed degree requirements, the student must request an extension in writing and meet with the Director of the School of Physical Therapy, who may approve or deny the extension request. Final appeals are to the Vice President of Academic Affairs/Provost. Students must be in good academic standing with a professional cumulative GPA of 3.0 to be eligible for graduation.

Policy for Reentry and Content Validation after Nonprogression or Leave of Absence

Students who are not continuously enrolled in the sequence of the DPT curriculum for a period of one semester or more, or who withdraw from the DPT program via leave of absence, must validate previous knowledge and skills held prior to program exit before they may reenroll in any DPT courses. Reenrollment is subject to clinical placement availability. (NOTE: There is no guarantee that space will be available at the desired time of return of the student; it may take up to two years for reentry due to lack of clinical placement availability.)

In order to ensure that all students are competent and safe in the delivery and application of patient care, any student who has not been continuously enrolled must, at the discretion of the faculty, demonstrate identified clinical competency. The validation will occur via the student's demonstration of knowledge and skills, that is, meeting established program clinical competencies. The student must notify the Director of the School of Physical Therapy by March 1 for fall start, February 1 for May start, and October 1 for January start to make arrangements for preparing for and performing validation testing. Students attempting to return from a leave of absence must also be cleared to return to classes by designated staff in the Center for Academic Success and Enrichment and the Dean of Students (if a medical leave of absence) prior to performing validation testing. The Center for Academic Success and Enrichment will notify the Director of the School of Physical Therapy when the student is eligible to take the validation test.

School of Physical Therapy faculty will provide guidance as to the content and skills (competencies) to be reviewed by the student prior to the testing. The validation testing consists of testing to assess knowledge and clinical skills taught prior to the semester of anticipated reentry. It is the student's responsibility to prepare for the validation testing. If a student fails the validation test, they must enroll in a directed study to remediate, followed by a second validation test, prior to reentering the program. Students must pass the validation testing with a minimum grade of B-, at the 80% level, in order to reenter the DPT curriculum. Failure to pass the second validation test after a directed study will result in dismissal from the Physical Therapy program.

The number of semester credits assigned to the directed study course will vary (1–3 semester credits) depending upon the number of semesters successfully completed in the program. If the student completed two or fewer semesters, 1 credit will be assigned; if three or four semesters, 2 credits; and if more than four semesters, 3 credits. Students may not take any program professional courses until the directed study and content validation testing has been successfully completed.

Commission on Accreditation in Physical Therapy Education

The Doctor of Physical Therapy program at MCPHS University is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 1111 North Fairfax Street, Alexandria, VA 22314; tel.: 703.706.3245; email: accreditation@apta.org; website: www.capteonline.org. If needing to contact the program/institution directly, please call 508-373-5741 or email DPT@mcphs.edu.

MCPHS University–Worcester

School of Physician Assistant Studies (Manchester/Worcester)

Kristy Altongy-Magee, DScPAS, PA-C, Associate Professor and Program Director

Nicole Dettmann, DScPAS, MPH, PA-C, Associate Professor, Associate Program Director and Director of Clinical Education

Craig Hricz, MPAS, PA-C, Associate Professor and Assistant Program Director

Stephanie Maclary, RN, MHS, PA-C, Assistant Professor and Director of Didactic Education

John (Jack) Kelly, MD, Clinical Associate Professor and Medical Director

Associate Professors Altongy-Magee, Dettmann, Hricz, Stowell; Assistant Professors Caffrey, Cerreto, Chouinard, Dillon, Ekstrand, Fournier, Geary, Joseph, Maclary, Martino, Petrillo-Deluca

Degree Program

Master of Physician Assistant Studies (MPAS) (Accelerated)

The MCPHS University Physician Assistant (PA) Studies program is dedicated to the education of clinically competent medical professionals who are prepared to deliver quality patient care in a dynamic healthcare delivery system. The program is accredited by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) and graduates are eligible to sit for the Physician Assistant National Certifying Examination (PANCE) required for licensure or registration.

This program capitalizes on the extensive educational resources of the University, including supervised clinical practice experiences (clinical rotations) in the North East and Mid-Atlantic regions and beyond, to prepare physician assistants with the skills, competencies, and attitudes to provide compassionate, high-quality, and comprehensive care to patients of all ages in a variety of clinical settings. The emphasis is on community-oriented primary care, and students acquire experience in the evaluation and treatment of a broad spectrum of medical problems through the program's clinical rotations. These experiential elements of the program provide training in emergency medicine, family medicine, internal medicine, pediatrics, psychiatry, surgery, and women's health in addition to an elective specialty.

Students applying to the program must submit a formal application and designate whether they are applying to the Manchester or Worcester campus. Students cannot apply to both campuses. The application must include official transcripts and an essay through the Central Application Service for Physician Assistants (CASPA) and must be received by March 1. CASPA, the centralized national application service of the Physician Assistant Education Association, may be contacted at www.caspaonline.org.

About the Program

In the spring of 2008, a two-year Master of Physician Assistant Studies (MPAS) program began on the Worcester campus. While based on the Worcester campus, the program is a satellite of the MCPHS–Manchester program with an identical curriculum—both delivered with faculty on each campus via use of synchronized distance education. For both campuses, the first year is dedicated to didactic and laboratory learning and the second to supervised clinical practice experiences (clinical rotations) in a variety of patient-care settings. Students attend classes at their respective campus, with didactic courses simultaneously delivered at both campuses using technologically sophisticated interactive videoconferencing. This technology allows students at each site to interact with other students and faculty members in real time. Laboratory courses and small-group activities are facilitated by Physician Assistant Studies faculty located on each campus.

For details on the curriculum, prerequisites, and other information about the program, refer to the MCPHS–Manchester School of Physician Assistant Studies section of this catalog. For the most current information regarding the program in Worcester, refer to the MCPHS website at www.mcphs.edu.

Technical Standards for the Master of Physician Assistant Studies

Observation

Candidates and students must have sufficient capacity to observe in the lecture hall, laboratory, and diagnostic and treatment areas of outpatient and inpatient settings. Sensory skills to perform the procedures of the healthcare profession in which students are enrolled are required. In any case where a candidate's or a student's ability to observe or acquire information through sensory modalities is compromised, the candidate or student must demonstrate alternative means and/or abilities to acquire and demonstrate the essential information conveyed in this fashion.

Communication

Candidates and students must be able to communicate effectively in both academic and healthcare settings. Candidates and students must show evidence of effective written and oral communication skills, and must be able to communicate with patients in order to elicit and impart information.

Motor

The ability to participate in basic diagnostic and therapeutic maneuvers and procedures is required. Candidates and students must have sufficient motor function to execute movements reasonably required to properly care for all patients, and must be able to perform motor functions with or without assistive devices.

Intellectual

Candidates and students must be able to measure, calculate, reason, analyze, and synthesize. Problem solving, one of the critical skills demanded of healthcare professionals, requires all of these intellectual abilities. Candidates and students must be able to read and understand medical literature. In order to complete the specific Health Sciences program, students must be able to demonstrate mastery of these skills and the ability to use them together in a timely fashion in healthcare problem solving and patient care.

Behavioral and Social Attributes

Candidates and students must possess the emotional health and stability required for full utilization of their intellectual abilities, the exercise of good judgment, and the prompt completion of all academic and patient care responsibilities. The development of mature, sensitive, and effective relationships with patients and other members of the healthcare team is essential. The ability to function in the face of uncertainties inherent in clinical practice, flexibility, compassion, integrity, motivation, interpersonal skills, and concern for others are all required.

MCPHS University–Worcester School of Pharmacy–Worcester/Manchester

Paul Belliveau, PharmD, Professor and Interim Dean

Abir Kanaan, PharmD, Professor and Assistant Dean of Curriculum and New Programs

Kevin Kearney, PhD, Professor and Assistant Dean of Student Engagement & Success

Michael Steinberg, PharmD, Professor and Assistant Dean of Assessment

Kaelen Dunican, PharmD, Professor and Assistant Dean of Interprofessional Education

Department of Pharmaceutical Sciences

Terrick Andey, PhD, Associate Professor and Interim Chair

Paul Kaplita, PhD, Professor and Assistant Dean of Graduate Studies

Professors Acquaaah-Mensah, Campbell, Friel, Goldsmith, Kaplita, Kearney, Sharma; Associate Professors Andey, Yan; Assistant Professors Mandela, Metcalf; Faculty Associates Graham, Pollano

Department of Pharmacy Practice

Sheila Seed, PharmD, MPH Professor and Chair

Cheryl Abel, PharmD, Professor and Vice-Chair

Professors Abel, Belliveau, Cooper, Dunican, Durand, Kanaan, Lynch, Pervanas, Seed, Silva, Spooner, Steinberg, Willett; Associate Professors Aungst, Bartlett, Carey, Conway-Allen, Coppenrath, Cross, Dawson, Horton, LaMothe, Lepage, Morrill, Mukherjee, Towle, Yogaratnam; Assistant Professors Bear, Herren, Nicolas; Faculty Associate Massey

Office of Experiential Education

Paul DiFrancesco, EdD, MPA, RPh Associate Professor and Associate Dean of Experiential Education, Boston/Worcester/Manchester

Kara Bonaceto, PharmD, Associate Professor of Pharmacy Practice and Director of Experiential Education

Nicole Carace, PharmD, MS, Assistant Professor of Pharmacy Practice and Experiential Education Coordinator

Gretchen Jehle, PharmD, Associate Professor of Pharmacy Practice and Experiential Education Coordinator

Brianne Morin, PharmD, Assistant Professor of Pharmacy Practice and Experiential Education Coordinator

Degree and Certificate Programs

- Doctor of Pharmacy (Accelerated)
- Doctor of Pharmacy (Accelerated)/Graduate Certificate in Medication Safety*
- Doctor of Pharmacy (Accelerated)/ Master of Public Health*
- Doctor of Pharmacy (Accelerated)/Graduate Certificate in Public Health*
- Doctor of Pharmacy (Accelerated)/Graduate Certificate in Healthcare Management*

Mission Statement

The mission of the MCPHS University School of Pharmacy-Worcester/Manchester is to improve health care by preparing graduates who can lead change and contribute to patient well-being; participate in interprofessional team-based care using knowledge, skills, abilities, behaviors, and attitudes that are consistent with professional expectations; and continuously advance their personal and professional development. The program is delivered by collaborative faculty who embrace program assessment and regularly engage in scholarship and service as part of their commitment to advancing knowledge and the pharmacy profession.

Core Values

The School of Pharmacy–Worcester/Manchester believes that the following characteristics serve as an anchor for all activities and are integral to how we function:

- **Adaptability.** Willfully responding to necessary changes in areas of responsibility to ensure continual provision of meaningful educational experiences that are consistent in the profession and grounded in reflective practices;
- **Accountability.** Demonstrating the willingness to adhere to commitments, to follow-through on promised deliverables, and to engage in self-reflection
- **Excellence.** Performing at a level that exceeds expectations;
- **Honesty.** Utilizing self-reflection and demonstrating transparency in all activities;
- **Innovation.** Willing to develop new solutions to address challenges;
- **Professionalism.** Demonstrating integrity and engaging in conduct consistent with the expectations of the profession into which student pharmacists are striving to gain membership;
- **Respect.** Treating others in a manner that values diverse viewpoints and backgrounds;
- **Collaboration.** Working with community members to achieve desired outcomes
- **Compassion.** Embracing a spirit of caring for other members of our communities.

Doctor of Pharmacy (Accelerated)

Admission to the MCPHS–Worcester/Manchester Doctor of Pharmacy (PharmD) degree program is a competitive process open only to transfer students. Applicants must have completed, or be in the process of completing, their preprofessional coursework at a regionally accredited college or university. If an applicant has completed coursework at a foreign college or university, the student must submit evidence of U.S. course/degree equivalency. The professional curriculum in pharmacy at the School of Pharmacy–Worcester/Manchester (SOP-W/M) is offered as a year-round program that allows students to complete their degree requirements for the Doctor of Pharmacy in less than three years.

Technical Standards for Programs in the Schools of Pharmacy at MCPHS (Admission and Progression)

Introduction

The School of Pharmacy is committed to a policy of equal educational opportunity and welcomes individuals with diverse backgrounds and abilities. The school therefore prohibits discrimination according to all applicable state and federal laws. The purpose of this document is to ensure that all students entering the PharmD program have read and understand the clinical and nonacademic requirements of the program so that they can make informed decisions regarding their pursuit of the profession of pharmacy.

Candidates for admission to and students enrolled in the PharmD program must have abilities and skills in multiple domains, including communication, intellectual, behavioral/social, and visual/auditory/tactile/motor competencies. The following technical standards describe the nonacademic qualifications (required in addition to academic standards) that the School of Pharmacy considers essential for successful progression and completion of the educational outcomes of its curriculum.

Although the School of Pharmacy will engage in an interactive process with applicants with disabilities, it reserves the right not to admit any applicant who, upon completion of the interactive process, cannot meet the technical standards set forth below, with or without reasonable accommodations.

Reasonable accommodations for persons with prior documented disabilities will be considered on an individual basis. Students wishing to request accommodations for disabilities should contact the Office of Student Access and Accommodations (see Office of Student Access and Accommodations in the Student Services Section of the catalog).

Domain: Communication*Performance Standards*

- Must have functional English speaking, reading, and writing abilities necessary to communicate clearly and professionally with faculty, staff, peers, patients, and healthcare professionals in a mature and professional manner that reflects the core values of the University.
- Communication includes both verbal and non-verbal expression, reading, writing, and computer skills

Essential Functions

- Must have the ability to participate in class discussions, group projects, and practical labs for the purpose of the delivery and receipt of medical information
- Must have the ability to recognize both verbal and non-verbal communication, including facial expressions and body language
- Must have the ability to report accurately and legibly in patients' charts, demonstrating the knowledge of the meaning and spelling of words, rules of composition and grammar
- Must have the ability to explain to other healthcare team members, patients, and/or caregivers' reason for treatment, preventive measures, disease process, and need for referral
- Must have the ability to use computers and other technology to accurately record information and convey critical health-related documentation
- Must have the ability to recognize and respond to physical and psychological needs of patients

Domain: Intellectual*Performance Standards*

- Must have critical and logical thinking ability sufficient to engage in clinical judgment and problem solving to address issues and problems within all learning environments
- Must have ability to multi-task and to perform work in a logical and sequential manner

Essential Functions

- Must be able to memorize, perform scientific measurement and calculation, reason, analyze, and synthesize information
- Must demonstrate the ability to retrieve (electronically and manually), read, understand, and interpret medical, scientific and professional information and literature
- Must demonstrate the intellectual and reasoning abilities required to develop problem-solving and decision-making skills
- Must demonstrate the ability to learn effectively through a variety of modalities including, but not limited to classroom instruction, small group discussion, individual study of materials, preparation and presentation of written and oral reports, and use of computers and other technology
- Must demonstrate the ability to prioritize and complete tasks in laboratory, clinical, and patient care settings with time constraints
- Must perform a variety of duties accurately, often changing from one task to another without loss of efficiency or composure

Domain: Behavioral/Social*Performance Standards*

- Must possess the ability to relate to patients, caregivers, other members of the healthcare team, and faculty in a professional manner
- Must demonstrate sensitivity to people from a variety of cultural backgrounds
- Must possess the ability to interact with and respond to needs of patients and caregivers from a variety of cultural backgrounds and with a diversity of emotional, intellectual, and physical health issues

Essential Functions

- Must be able to fully utilize intellectual abilities to exercise good judgment; to complete patient care responsibilities appropriately; and to relate to patients, families, and colleagues with courtesy, compassion, maturity, and respect for their dignity
- Must be able to effectively function when faced with challenges and uncertainties in classroom, laboratory, and experiential settings
- Must be able to accept criticism and be able to respond and modify behavior accordingly
- Must be able to interact with faculty, staff, peers, patients, and members of the healthcare team in a mature and professional manner that reflects the core values of the University and the School.

Domain: Visual/Auditory*Performance Standard*

- Must possess sufficient visual and auditory abilities to gather data from written reference material, oral presentations, illustrations, diagrams, and patient observation

Essential Functions

- Must have the ability to gather data from written reference material, computer-based programs, and oral

presentations

- Must have the ability to observe and/or conduct demonstrations and experiments
- Must have the ability to utilize various types of physical assessment skills required for patient-centered care including reading digital or analog representations of physiologic phenomena
- Must have the ability to execute movements reasonably required to properly participate in the activities of a laboratory or an experiential rotation that are components of pharmacy practice
- Must have the ability and vision sufficient to read and interpret prescriptions, prescription labels, and drug labels

Domain: Tactile and Motor Competencies

Performance Standards

- Must possess sufficient tactile and motor abilities to prepare pharmaceutical products, evaluate patients, and perform basic laboratory tests
- Must possess the manual dexterity necessary to manipulate and control laboratory equipment and materials

Essential Functions

- Must possess manual dexterity sufficient to accurately compound and prepare pharmaceutical products for dispensing to patients
- Must possess manual dexterity and sense of touch sufficient to perform basic patient assessments including, but not limited to palpation, auscultation, percussion, and other diagnostic maneuvers
- Must possess sufficient manual dexterity to conduct laboratory diagnostic tests and administer non-oral medications

Real-Time Distance Education Technology

Two years of classroom and laboratory coursework must be completed in residence at MCPHS–Worcester/Manchester. All core courses for the Doctor of Pharmacy program, except for laboratory courses, are delivered via real-time distance education technology between campuses. Approximately 85% of the program is taught synchronously from the Worcester campus to the Manchester campus, and the other 15% of the program is taught synchronously from the Manchester campus to the Worcester campus.

Clinical Rotations

A number of clinical rotations in the required curriculum may be scheduled at some distance from the campus. This is necessary to provide a range of diverse learning experiences and ensure availability and quality of clinical rotation sites. The University will make every effort to accommodate requests regarding assignments to experiential education sites, but students generally can expect to be assigned to clinical sites at some distance from the campus for at least a portion of their required clinical rotations. In such instances, students are responsible for transportation to and from their clinical sites and other related travel or housing expenses.

Progression Requirements

Students must maintain a cumulative professional 2.20 grade point average (GPA) to progress into the second and third professional years of the program. All PharmD students must complete all requirements and be in good academic standing before beginning experiential education rotations.

Grades for PSW 350, PPW 401 and 402 are pass/fail and are not included in the professional GPA calculation. A cumulative professional GPA of less than 1.70 with no F grades at the completion of any semester results in non-progression. A cumulative professional GPA of 1.70 or less and one or more F grades at the completion of any semester results in academic dismissal from the program. All progression evaluations will be based on the student's cumulative professional GPA.

Academic Complaint Policy for the Accreditation Council for Pharmacy Education (ACPE)

It is the policy of MCPHS and the School of Pharmacy–Worcester/Manchester (SOP-W/M) to objectively review student grievances related to academic and non-academic issues.

If a student wishes to file a complaint relating to the Doctor of Pharmacy program's adherence to Accreditation Council for Pharmacy Education (ACPE) standards for accreditation, they may do so using either of the procedures that follow.

Internal Procedure

1. The student must file a written complaint with the Dean of SOP-W/M.
2. The Dean will forward the complaint to an ad hoc committee of three faculty with representatives from the Department of Pharmacy Practice and the Department of Pharmaceutical Sciences. The ad hoc committee will review the complaint and render a decision concerning the complaint. The committee will inform the student of its decision via a written response within 30 working days upon receipt of the complaint.
3. If the student wishes to appeal the committee's decision, then the student must file a written appeal to the Dean within 5 working days upon receipt of the written response from the committee.

4. The Dean will review the appeal and render a written response to the student within 14 working days upon receipt of the student's written appeal. The decision of the dean is final.
5. The Office of the Dean will maintain a copy of all written correspondence.

ACPE Procedure

If a student wishes to file a complaint with the ACPE, the student should contact the Council via email, phone, or mail. The ACPE contact information is available in the catalog in the Introduction section under Accreditation.

Electives

Electives allow students to broaden their knowledge or deepen their understanding in a specific area of interest thus fostering their personal and professional development. Some electives may be campus specific while others are offered on both campuses via distance education technology.

Curriculum: Doctor of Pharmacy (Accelerated)

Transfer Policy

A transfer student is any student who 1) was or is enrolled in an ACPE-accredited Doctor of Pharmacy degree program and 2) seeks to apply credits from that program to the SOP-W/M Doctor of Pharmacy program.

Due to the highly integrated and sequential nature of the didactic and experiential components of the SOP-W/M Doctor of Pharmacy curriculum, the School will consider requests for transfer of credits only on a case-by-case basis. Because curricula in Doctor of Pharmacy programs vary greatly, students might not transfer at the same level achieved in the previous program. Transfer applicants will only be admitted as an incoming professional first-year (P1) student.

Acceptance of transfer students is dependent upon the applicant's qualifications, the curricular compatibility of prior coursework to the required SOP-W/M Doctor of Pharmacy coursework, and space availability in the SOP-W/M Doctor of Pharmacy program. Application of transfer credit may require passing a competency exam.

Consideration will only be given to students who are in good academic, professional, and ethical standing at an ACPE-accredited School of Pharmacy. Applicants must meet the same prerequisites and requirements applied to all SOP-W/M Doctor of Pharmacy applicants and provide legitimate reasons for seeking transfer. Credits accepted for transfer must have been awarded from an ACPE-accredited school of pharmacy within the year prior to matriculation into the SOP-W/M Doctor of Pharmacy program.

The SOP-W/M will review transfer applicants through submission of a complete PharmCAS application. Applicants seeking transfer must also submit the following supplemental documentation.

- A letter from the Dean of the Doctor of Pharmacy program in which the applicant is/was enrolled. The letter must summarize the applicant's credentials and verify that the applicant is in good academic, professional, and ethical standing and is eligible to continue in or return to that program.
- A formal request for transfer outlining circumstances for seeking a transfer.

SOP-W/M may request a syllabus for each pharmacy course completed in the current/previous Doctor of Pharmacy program. Applicants should not submit course syllabi unless requested.

Decisions on transfer applications are made by the SOP – W/M Admissions Committee. This committee may also seek consultation with the SOP-W/M Curriculum Committee.

All applicants are reviewed in the same holistic manner regardless of whether or not they are transfer applicants. Qualified transfer applicants must participate in the School's formal interview process.

Preprofessional Courses

REQUIRED COURSE	SEMESTER HOURS
Biology (general and human)	7
Anatomy and/or Physiology	3
Chemistry (general)	8

Opportunities for Enhancement

Students will have an opportunity to enroll in a concentration, graduate certificate or dual program while completing their studies in the PharmD program. A concentration is an identified area of focused study that includes a series of course work within the standard curricular expectations. A graduate certificate represents training at the Master's or doctoral level and requires courses in addition to the standard curricular expectations. Students will be able to complete the concentration or graduate certificate program prior to graduation. The dual program will require additional course work after graduation.

Drug Discovery and Development Concentration

The Drug Discovery and Development Concentration is designed to allow students to use and further develop skills learned in previous organic chemistry and biochemistry courses and apply them to an original project in drug discovery and drug optimization. Each student will learn cheminformatics software, to analyze early drug development data, perform physicochemical calculations, use predictive chemical modeling, and propose new compounds as next stage optimized leads. Furthermore, each student will be responsible to learn and carry out modern synthetic organic techniques, the isolation of purification of new chemical matter, and molecular spectral characterization. Much of the work done will be in conjunction with our established external partner programs. Partner programs include Drugs for Neglected Diseases initiative (DNDi), Open Source Malaria (OSM), Mycetoma Open Source (MycetOS), Open Source Antibiotics (OSantibiotics) and LEO Pharma Open Innovation.

Drug Discovery and Development

TOTAL		10

Pharmaceutical Cancer Research Concentration

The Cancer Research Concentration is a comprehensive training experience designed with a major focus on the development of scientific bench research skills while tackling clinically relevant issues in cancer research, including instruction with professional literature and database searches, scientific/ manuscript writing, and oral presentations. The research findings presented by the students at scientific conferences, are often submitted for consideration for publication in reputable scientific journals.

Pharmaceutical Cancer Research Concentration

COURSE	TITLE	SEMESTER HOURS
PSW 368	Experimental Cancer Research	2
PSW 355	Directed Study	2
PPWC 5XX	Advanced Pharmacy Practice Experience (Elective APPE)	6
TOTAL		10

Geriatric Concentration

The Geriatric Concentration is designed to provide students with a focus of study in the education needed to care for older adults. Students will learn the biology of aging and treatment concerns, medication therapy management in older adults, polypharmacy and de-prescribing and falls prevention. Students will learn to recognize emerging opportunities for geriatric practice and explore national organizations, geriatric specialties, and postgraduate programs.

Geriatric Concentration

COURSE	TITLE	SEMESTER HOURS

PPW 370D	Directed Study	2
PPWC 5XX	Advanced Pharmacy Practice Experience (Elective APPE)	6
TOTAL		10

Classical and Clinical Pharmacology Concentration

The Classical and Clinical Pharmacology Concentration is designed to allow students to graduate with an advanced understanding of classical and clinical pharmacology. The concentration provides students an opportunity to use software products to learn about classical pharmacology via simulated experiments using whole animals (BIOSOFT

Cardiolab) and isolated tissue preparation (BIOSOFT Ileum). Students gain clinical experience by applying the didactic principles learned in pharmacology and therapeutic courses to treat patients in a virtual clinical setting using SimPHARM. Students will also learn the basic aspects of animal models used for testing drugs useful in cardiovascular and neurological disorders.

Classical and Clinical Pharmacology Concentration

COURSE	TITLE	SEMESTER HOURS
PSW 361	The Pharmacological Basis of Drug Development	2
PSW 364.M	Virtual Experimental Pharmacology	2

Doctor of Pharmacy (Accelerated) / Master of Public Health (Online)

The Doctor of Pharmacy (Accelerated) and Master of Public Health (PharmD/MPH) is a joint program encompassing the requirements of both degrees. Students will have the opportunity to apply to the program in their first year of professional study in the PharmD (Accelerated) program. Upon acceptance to the joint program, students may begin their graduate study in the MPH program in the summer of their first professional year. Students will continue to take MPH courses throughout the curriculum and finish their MPH in three semesters following the conferral of the Doctor of Pharmacy degree.

A total of 10 semester hours will count toward completion of both degree programs: two MPH courses (7 semester hours) are fulfilled through PBH 705 and PBH 740, replacing PharmD electives in year I summer and year II spring. An additional 3 credits of the MPH program are satisfied by completion of PPW 340 U.S. Healthcare and Public Health.

Total credits: 137 (PharmD); 40 (MPH); 173 (PharmD/MPH)

Doctor of Pharmacy (Accelerated) / Graduate Certificate of Public Health (Online)

The Doctor of Pharmacy (Accelerated) and Graduate Certificate of Public Health is a joint program allowing students the opportunity to use appropriate statistical methods for critical reading of reports of statistical analysis of public health problems, apply the basic concepts of epidemiology to the study of the patterns of disease and injury applied to public health, determine the role of environmental factors affecting the health of a population, identify policy issues associated with the delivery, quality and costs of health care, and identify the social, behavioral, and cultural factors related to population health.. Students may begin their study in the Graduate Certificate of Public Health program in the summer of their first professional year, replacing their elective with a Graduate Certificate course. Students will continue to take public health courses throughout the curriculum and obtain their certificate with the conferral of the Doctor of Pharmacy degree.

Doctor of Pharmacy (Accelerated) / Graduate Certificate in Medication Safety (Online)

The Doctor of Pharmacy (Accelerated) and Graduate Certificate of Medication Safety is a joint program which prepares graduates to understand the fundamental concepts and tools that will guide them in developing various initiatives in medication safety at their practice settings. This includes creating a culture of safety, aligning medication safety plans with the goals of the organization, learning from defects in medication-related processes, incorporating human and environmental factors to reduce medication error and adverse events, and effectively implementing change. Students may begin their study in the Graduate Certificate of Medication Safety program in the summer of their first professional year, replacing their elective with a Graduate Certificate course. Students will continue to take medication safety courses throughout the curriculum and obtain their certificate with the conferral of the Doctor of Pharmacy degree.

Total credits required to complete requirements for Accelerated Doctor of Pharmacy: 142 semester hours with Medication Safety courses replacing Pharmacy Electives.

Doctor of Pharmacy (Accelerated) / Graduate Certificate in Healthcare Management (Online)

The Doctor of Pharmacy (Accelerated) and Graduate Certificate in Healthcare Management is a joint program allowing students the opportunity to gain knowledge to be able to lead and support the delivery of care that is equitable, timely, and patient centered, improve administrative processes through change management, diagnose systemic issues and identify organizational issues, work collaboratively within interdisciplinary teams to address inefficiency in healthcare delivery, select and deploy managerial tools, understand improvement processes, apply informatics in cycles of process improvement and demonstrate and communicate business knowledge and skills.

Students may begin their study in the Graduate Certificate in Healthcare Management program in the summer of their first professional year, replacing their elective with a Graduate Certificate course. Students will continue to take healthcare management courses throughout the curriculum and obtain their certificate with the conferral of the Doctor of Pharmacy degree.

Doctor of Pharmacy (Accelerated) / Graduate Certificate in Precision Medicine (Online)

The Doctor of Pharmacy (Accelerated) and Graduate Certificate in Precision Medicine is a joint program which includes a strong emphasis in genomics, including the genetic underpinnings of disease and treatment response, as well as the latest clinical applications of genomic medicine. Experts teach two of the courses, "Fundamentals of Genetics" and "Cancer Genomics and Precision Oncology" at Harvard Medical School. The other two courses, "Clinical Pharmacogenomics" and "Ethical, Legal, and Social Implications of Precision Medicine" are taught by nationally recognized experts in genomics and precision medicine from MCPHS University. Students may begin their study in the Graduate Certificate in Precision Medicine in the summer of their first professional year, replacing their elective with a Graduate Certificate course. Students will continue to take precision medicine courses throughout the curriculum and obtain their certificate with the conferral of the Doctor of Pharmacy degree.

MCPHS University–Manchester School of Nursing

Tammy Gravel, EdD, MS, RN, Dean of the School of Nursing and Chief Nurse Administrator and Associate Professor

Carlene Blais, DNP, RN-BC, Assistant Professor and Associate Dean, BSN Program Administrator, Manchester

Lorraine MacDonald, MSN, RN, PMHNP-BC, Assistant Professor and Assistant Dean of BSN Clinical Education & Experiential Learning

Carolyn Parker, MS, RN, Assistant Professor and Interim Director of Simulation and Laboratory

Associate Professor Britt; Assistant Professors Adams, Blais, Butler, Foote, Parker

Degree Program

Bachelor of Science in Nursing (Postbaccalaureate) – 16-month Curriculum

The New Hampshire Board of Nursing and the New Hampshire Postsecondary Education Commission have approved the 16-month accelerated BSN program implemented at the MCPHS–Manchester campus. Designed specifically for students with a bachelor's degree in another field, the curriculum is identical to that currently offered at the Boston and Worcester campuses. Students attend classes in Manchester. Program instruction is conducted in state-of-the-art facilities at the MCPHS-Manchester campus with clinical experiences in selected hospital and community agencies in Manchester and the surrounding regions.

This 16-month program of study provides an accelerated option for students ready for a challenging transition to a career as a Bachelor of Science in Nursing registered nurse. Building on previous learning and experience gained from the student's first bachelor's degree, the 16-month program of study mirrors the Boston-based program's professional major, guiding students toward gaining the knowledge, skills, competencies, and values required to practice as a registered nurse in the 21st century.

The Postbaccalaureate BSN is offered in a 16-month year-round format with a January or September admission. The September-admission program consists of a 15-week fall semester, a 15-week spring semester, a 12-week summer session, and a 15-week fall semester, concluding in December of the second year. The January-admission program consists of a 15-week spring semester, a 12-week summer session, a 15-week fall semester and a 15-week spring semester, concluding in May of the second year.

To be eligible for the program, the student must possess a prior Bachelor of Science or Bachelor of Arts degree and have completed the following prerequisite coursework with a minimum grade of C+ within the past 10 years: chemistry (with lab), anatomy and physiology (with lab), microbiology (with lab), statistics, nutrition and human development. Students with a baccalaureate degree will not be required to meet the MCPHS general education core requirements. The program requires a total of 120 semester hours of credit for completion. Upon completion of the program, students will be eligible to sit for the National Council of State Boards of Nursing Licensure Examination for Registered Nurses (NCLEX-RN).

NOTE: An exception to the policy that no course examinations or graded assignments worth more than 15% of final course grade may be scheduled during the week before final examinations exists for Nursing courses. Major graded assignments or exams may be administered the week before the final week of the course. A reading day (scheduled only on a weekday, no Saturday or Sunday) will be provided between the end of scheduled classes / clinical rotations and the administration of any final exams.

For details on the curriculum, prerequisites, academic policies, professional & technical standards, and other information about the program, refer to the MCPHS–Boston School of Nursing section of this catalog. For the most current information regarding the program in Manchester, refer to the MCPHS website at www.mcphs.edu.

MCPHS University–Manchester

School of Occupational Therapy (Manchester/Worcester)

Occupational Therapy Program

Professor C. Douglas Simmons, PhD, OTR/L, FAOTA, Program Director

Assistant Professor Olivia Freeman, MA, OTR/L, Academic Fieldwork Coordinator

Assistant Professor Lisa Shooman, PhD, OTR/L, Site Coordinator

Sarah Chevrefils, MS, OTR/L, Assistant Academic Fieldwork Coordinator

Andrea DeSimone, OTR/L, Assistant Academic Fieldwork Coordinator

Assistant Professors Butler, Finch, Robertson

Degree Program

Master of Science in Occupational Therapy

The Master of Science Occupational Therapy Program (MSOT) on the MCPHS Manchester campus prepares graduates with the advanced knowledge and skills for contemporary occupational therapy practice. The curriculum includes foundational arts and sciences, basic tenets and theoretical perspectives of occupational therapy, clinical sciences, service delivery and management, professional responsibilities and ethics, and scholarship competencies in the educational preparation of occupational therapists. The coursework is designed to reinforce and build on required elements that allow students to acquire, synthesize, analyze and apply knowledge and skills in a variety of clinical, community-based, research and management environments.

The MSOT program builds on the knowledge acquired from an undergraduate arts or science education and has two components: didactic and fieldwork education. Through the didactic component, students gain knowledge and skills and develop professional behavior required for occupational therapy practice. Through fieldwork education students apply knowledge, skills, and professional behavior in clinical, school, and community-based settings both at MCPHS and off-campus. The fieldwork education accounts for about one half of the curriculum.

The curriculum for the MSOT has a total of 84 semester hours with approximately 30 weeks of fieldwork education. The program consists of five areas of concentration: Basic Tenets of Occupational Therapy Theory and Practice (24 semester hours), Foundations of Occupational Practice (18 semester hours), Scholarship (12 semester hours), Management of Occupational Services (6 semester hours), and Fieldwork Education (24 semester hours).

Admission Prerequisites

- Baccalaureate degree from an accredited postsecondary institution. Official transcripts from all colleges or universities attended.
- Minimum overall grade point average of 3.0 or better on a 4.0 scale.
- Minimum prerequisite 3.0 GPA on a 4.0 scale.
- Three letters of recommendation
- Resume
- Personal Essay (Why You Selected Occupational Therapy As Your Profession)
- Official TOEFL (minimum of 213 computer-based or 79 iBT) or ELTS (minimum 6.5) scores for all applicants whose primary language is not English
- Official transcripts for international colleges or universities must be submitted to the Center for Educational Documentation (CED), Educational Credential Evaluators, Inc. (ECE) or World Education Services (WES) for a course-by-course evaluation. MCPHS requires both the official international transcript(s) and an evaluated copy.

Prerequisite Coursework

- Human Anatomy and Physiology I & II with Lab (8 credits)
- Abnormal Psychology (3 semester hours)
- Child Development (3 semester hours)
- Adult Development (3 semester hours)
- Statistics (3 semester hours)
- Social Sciences Electives (9 credits) (Acceptable courses include additional Psychology or Sociology, Cultural Studies, Anthropology, American Studies, Women's Studies, Ethnic Studies, Government, Economics, History or Political Science)
- Kinesiology or Exercise Physiology with lab (3-4 credits) (Recommended but not required)

All math and science prerequisite coursework must have been completed within 10 years of the anticipated date of matriculation.

Essential Functions

The practice of occupational therapy includes the examination, diagnosis, and treatment of people with physical disabilities, movement dysfunction, pain, and mental health disorders. Occupational therapists must be prepared to conduct in a timely manner a relevant patient examination, evaluate the results of this examination and synthesize these data to establish an accurate occupational diagnosis/profile, prognosis and plan of care, implement an intervention and use the process of re-examination to assess patient outcomes. Occupational therapists must also possess the skills necessary to determine when referral of the patient/client to another healthcare professional is appropriate. Occupational therapists must provide evidence that the care that they provide is effective, often through the conduct of clinically based research.

Master of Science in Occupational Therapy students must be able to complete the following:

- Participation in all required aspects of classroom and laboratory activities;
- Participation in all required aspects of both level one and level two fieldwork experience activities;
- Effective communications with other students, instructors, assistive personnel, patients/clients, family members, payors, and other health care professions;
- Maintenance of a safe environment for other individuals and for one's self, including use of universal precautions;
- Completion of elements of patient/client management, including examination, evaluation of data, formulation of occupational diagnosis and prognosis, intervention, assessment of outcomes, and record keeping;
- Completion of specific patient/client interventions and treatments, including patient and family education, occupation-focused activities, application of modalities, therapeutic exercise, and functional skill training.

Fieldwork agencies may have additional or agency-specific technical standards, which take precedence over MCPHS technical standards. The Accreditation Council for Occupational Therapy Education (ACOTE) accredits professional occupational therapy programs and requires that graduates of these programs be able to deliver entry-level generalist clinical services. Graduates of entry-level programs are required to possess a broad base of knowledge and skills requisite for the practice of occupational therapy. Occupational therapists require the intellectual-communication, behavioral-social, observational, and motor abilities to meet the standard of practice.

Certain disabilities can interfere with a student's ability to complete the program of study and acquire the essential functions necessary for the practice of occupational therapy. Reasonable accommodation can be made to compensate for some limitations. However, those that interfere with patient/client care, safety or require the use of an intermediary may be incompatible with independent professional practice.

Technical Standards for Occupational Therapy

Intellectual and Communication Skills

Intellectual skills include the ability to recall and comprehend large amounts of didactic information and to apply this information to the examination, evaluation, and management of intervention with patients/clients who have complex occupational performance problems. Effective communication skills enable the occupational therapist to elicit appropriate information from patients/clients and to effectively explain assessment and intervention processes and procedures. Some of the skills an individual must be able to demonstrate include, but are not limited to, the ability to:

- Communicate clearly and in a timely manner with patients/clients, families and care providers, physicians and other health professionals, community and professional groups, and colleagues;
- Document clearly, and in a timely manner in patient/client records, reports to physicians, insurance reports, and order forms;
- Respond to emergency situations;
- Participate in group meetings to deliver and receive information and to respond to questions from a variety of sources.

Behavioral and Social Attributes

Students must demonstrate the ability to practice in a professional and ethical manner and possess the emotional maturity to practice in a stressful work environment. Compassion, integrity, concern for others, interpersonal skills, cultural competence, and motivation are all personal attributes associated with the practice of occupational therapy.

Some of the skills an individual must be able to demonstrate include but are not limited to the ability to:

- Recognize and respond appropriately to individuals of all ages, genders, ethnicities, socio-economic, religious, and cultural backgrounds;
- Cope with the stress of heavy workloads, demanding patients/clients, and life-threatening clinical situations;
- Recognize and respond appropriately to potentially hazardous situations.

Observational Skills

Observation is integral to effective occupational therapy practice. Some of the skills an individual must be able to demonstrate include but are not limited to the ability to:

- Observe and interpret patient/client participation in a wide variety of occupations applying a broad range of biopsychosocial knowledge and perspectives;
- Read and interpret patient/client records, specialized equipment, patient/client assessment data, professional literature, and notes from patients/clients, physicians, and other health professionals.

Motor Skills

The practice of occupational therapy requires that practitioners possess the ability to perform evaluative and therapeutic procedures, requiring specific physical skills and stamina. An occupational therapist must be able to use vision and somatic sensation in the evaluation and treatment of patients/clients. Some of the skills an individual must be able to demonstrate include but are not limited to the ability to:

- Lift, carry, and push patients (150 lbs.) in bed or wheelchairs, heavy equipment, and patients/clients transferring from one surface to another using proper body mechanics;
- Walk and balance well enough to help patients/clients walk and transfer with or without equipment, and prevent injury to patient/client and self;
- Exhibit sufficient manual dexterity to manipulate small equipment, provide support and resistance as needed during the performance of complex occupations, perform CPR, and treat acutely ill patients without disturbing sensitive monitoring instruments and lines;
- Provide for patient/client's safety and well-being in all intervention activities.

Accreditation

The entry-level occupational therapy master's degree program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o AOTA is (301) 652-6611 and its Web address is www.acoteonline.org. Graduates of the program will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of the exam, the individual will be an Occupational Therapist Registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. **Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.**

This program is approved by the Division of Higher Education-Higher Education Commission, Department of Education State of New Hampshire.

Many of our programs have different admission requirements and deadlines. To see the specific admission requirements for this program, please click on the link below.

Admission Requirements for Occupational Therapy (MSOT) (Manchester)

We recognize that applying to graduate school can be a daunting process; our Admission staff is here to help you. Contact us if you have questions along the way.

Faculty/Staff

Lisa Shooman, PhD, OTR/L, CLVT – *Assistant Professor and Site Coordinator – Occupational Therapy*
Lisa.Shooman@mcphs.edu

Eileen Sheehan-Willet – *Administrative Assistant*
(P) 603.314.1786 | eileen.sheehan-willet@mcphs.edu

Professional Behaviors

In addition to knowledge and skill acquisition, the process of becoming a professional involves developing competence in professional behavior. Students are expected to always display professional behavior including during fieldwork experiences. This includes displaying a professional demeanor in interactions and boundaries with patients/clients and their families, clinical/school/healthcare staff, peers, faculty and the public always in consideration of their representation of the profession of occupational therapy and MCPHS University.

Academic Standards, Progression and Retention

All credits in the degree must be obtained in the MCPHS program. The Master of Science in Occupational Therapy (MSOT) does not award credits for prior experiential learning and/or credits by examination.

The academic progress of each student will be reviewed at the end of each academic semester. Progression in the MSOT program is dependent on the student's maintaining a minimum cumulative grade point average (GPA) of 3.0 and a semester GPA of 3.0 in all MSOT courses.

To progress in the didactic phases of the program, students must achieve a final course grade of B- or better. To progress within the clinical phases of the program students must obtain a pass (P) score on Level I experiences and obtain a minimal score of 122 on the American Occupational Therapy Association Fieldwork Performance Evaluation for the Occupational Therapist for Level II Fieldwork experiences.

In all MSOT courses, obtaining one course grade lower than a B- results in a student having to develop a remediation plan associated with OTH 685 Directed Study in Occupational Therapy. The student will take this remediation course in conjunction with other courses to remain in sequence. A student may only take OTH 685 once to remediate a grade below B-.

If a student obtains another course grade below a B- this course(s) must be repeated, which stops progression in the program. The student is placed into a non-progression status as MSOT courses are offered only once per year. The

student will be placed into a cohort that is targeted to graduate later than the students' original cohort. Students may be placed into a non-progression status once; a student who receives a second non-progression in a subsequent semester will be recommended for dismissal from the MSOT program.

Students who receive a failing fieldwork grade on the American Occupational Therapy Association Fieldwork Performance Evaluation for the Occupational Therapists (below 122) or are requested to leave a fieldwork site prior to completion will need to arrange with the AFWC to complete another fieldwork rotation at another site. The timing of this clinical rotation cannot be guaranteed to follow program sequence and may result in a later graduation date. Failure or dismissal from 2 fieldwork rotations will result in dismissal from the program. Level II fieldwork must be completed within 2 years of completion of all coursework that is prerequisite to fieldwork.

If a student is unable to progress in the didactic portion or the fieldwork portion of the program, the student will be referred to the School of Occupational Therapy Academic Standing Committee with a recommendation for dismissal. Final appeals are to the Vice President of Academic Affairs/Provost.

If there is a disruption in the sequence of the MSOT curriculum by a student for a period of one semester or more, or a student has a leave of absence, the student must validate previous knowledge and skills from previous didactic and fieldwork experiences to ensure that they are competent and safe in the delivery and application of patient care. (NOTE: There is no guarantee that fieldwork space for Level I and Level II fieldwork experience can be maintained, it could take a year or more for reentry due to lack of clinical placement availability.)

Application for the MSOT program is through the Occupational Therapy Centralized Application Service (OTCAS) at <https://otcas.liasoncas.com/applicant-ux/#/login>.

Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o AOTA is (301) 652-6611 and its Web address is www.acoteonline.org.

Stephanie Maclary, RN, MHS, PA-C, Assistant Professor and Director of Didactic Education

John (Jack) Kelly, MD, Clinical Associate Professor and Medical Director

Associate Professors Altongy-Magee, Dettmann, Hricz, Stowell, Geary; Assistant Professors Caffrey, Cerreto, Chouinard, Dillon, Ekstrand, Fournier, Joseph, Maclary, Martino, Petrillo-Deluca

Degree Program

Master of Physician Assistant Studies (MPAS) (Accelerated)

The MCPHS University Physician Assistant (PA) Studies Program is dedicated to the education of clinically competent medical professionals who are prepared to deliver quality patient care in a dynamic healthcare delivery system. The program is accredited by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) and graduates are eligible to sit for the Physician Assistant National Certifying Examination (PANCE) required for licensure or registration.

This program capitalizes on the extensive educational resources of the University and the supervised clinical practice experiences (clinical rotations) in the North East and Mid-Atlantic regions to prepare physician assistants with the skills, competencies, and attitudes to provide compassionate, high quality, and comprehensive care to patients of all ages in a variety of clinical settings. The emphasis is on community-oriented primary care, and students acquire experience in the evaluation and treatment of a broad spectrum of medical problems through the program's clinical rotations. These experiential elements of the program provide training in emergency medicine, family medicine, internal medicine, pediatrics, psychiatry, surgery, and women's health in addition to an elective specialty.

Students applying to the program must submit a formal application and designate whether they are applying to the Manchester or Worcester campus. Students cannot apply to both campuses. The application must include official transcripts and an essay through the Central Application Service for Physician Assistants (CASPA) and must be received by March 1. CASPA, the centralized national application service of the Association of the Physician Assistant Programs, may be contacted at www.caspaonline.org.

About the Program

In 2002, MCPHS acquired the Notre Dame College (New Hampshire) PA program that had been first accredited in 1998 and enrolled its first class in 1999. MCPHS-Manchester graduated its first class of Master of Physician Assistant Studies (MPAS) students in December 2002. While based on the Manchester campus, the program has a satellite on the MCPHS–Worcester campus with an identical curriculum—both delivered with faculty on each campus via use of synchronized distance education. For both campuses, the first year is dedicated to didactic and laboratory learning and the second to supervised clinical practice experiences (clinical rotations) in a variety of patient-care settings. Students attend classes at their respective campus, with didactic courses simultaneously delivered at both campuses using technologically sophisticated interactive videoconferencing. This technology allows students at each site to interact with other students and faculty members in real time. Laboratory courses and small-group activities are facilitated by Physician Assistant Studies faculty located on each campus.

Technical Standards for the Master of Physician Assistant Studies

Observation

Candidates and students must have sufficient capacity to observe in the lecture hall, laboratory, and diagnostic and treatment areas of outpatient and inpatient settings. Sensory skills to perform the procedures of the healthcare profession in which students are enrolled are required. In any case where a candidate's or a student's ability to observe or acquire information through sensory modalities is compromised, the candidate or student must demonstrate alternative means and/or abilities to acquire and demonstrate the essential information conveyed in this fashion.

Communication

Candidates and students must be able to communicate effectively in both academic and healthcare settings. Candidates and students must show evidence of effective written and oral communication skills, and must be able to communicate with patients in order to elicit and impart information.

Motor Skills

The ability to participate in basic diagnostic and therapeutic maneuvers and procedures is required. Candidates and students must have sufficient motor function to execute movements reasonably required to properly care for all patients, and must be able to perform motor functions with or without assistive devices.

Intellectual Abilities

Candidates and students must be able to measure, calculate, reason, analyze, and synthesize. Problem solving, one of the critical skills demanded of healthcare professionals, requires all of these intellectual abilities. Candidates and students must be able to read and understand medical literature. In order to complete the specific Health Sciences program, students must be able to demonstrate mastery of these skills and the ability to use them together in a timely fashion in healthcare problem solving and patient care.

Behavioral and Social Attributes

Candidates and students must possess the emotional health and stability required for full utilization of their intellectual abilities, the exercise of good judgment, and the prompt completion of all academic and patient care responsibilities. The development of mature, sensitive, and effective relationships with patients and other members of the healthcare team is essential. The ability to function in the face of uncertainties inherent in clinical practice, flexibility, compassion, integrity, motivation, interpersonal skills, and concern for others are all required.

Prerequisite COURSE	SEMESTER HOURS
Anatomy and Physiology (with labs)	8
General Chemistry (with lab)	4
Organic Chemistry (with lab)	4
Biochemistry (with lab)	3
Microbiology (with lab)	4
Statistics	3
Introduction to Psychology	3
Recommended only: Immunology	3
Recommended only: Genetics	4

Prerequisite Policy

Seven prerequisites (as indicated in the previous section) must have been completed at a regionally accredited college or university no more than 10 years prior to the anticipated date of matriculation to MCPHS. For example, for matriculation into the class starting in January 2012, the eight courses must have been completed since January 2002. All prerequisite coursework must have been completed with a final grade of C or better. The number of times a course has been taken to achieve a passing grade will be considered. Prerequisite coursework taken at a four-year institution is preferred.

If prerequisite coursework was completed more than 10 years prior, the candidate should submit a letter of request to the PA Program Admission Committee in care of the campus Admission Office. The formal letter must include when and where the course was taken, the grade received in the course, and the rationale for requesting the exception. A current résumé and copies of transcripts supporting the applicant's argument must be included.

While previous healthcare experience is not required, the majority of applicants have obtained a year or more of direct patient care experience. In addition, job shadowing of a practicing physician assistant for a minimum of 50 hours is strongly recommended. PA shadowing information should be included on the CASPA application under Related Healthcare Experience.

This program is available only to applicants who have already earned a bachelor's degree from a regionally accredited institution in any field, and who have fulfilled the prerequisite course requirements.

Prerequisites include the following:

- An earned bachelor's degree from a regionally accredited college or university with an overall cumulative grade point average (GPA) of 3.0 on a 4.0 scale;
- 250-500 hours of patient care experience (recommended);
- Physician Assistant shadowing experience (recommended);
- A minimum TOEFL (Test of English as a Foreign Language) score for all candidates for whom English is not the primary language (see International Applicants in the Admission section for details);
- Ability to fulfill the technical standards for admission, promotion, and graduation;
- Other requirements for international students as outlined in the Admission section

School of Physician Assistant Studies Policies and Professional Requirements (Manchester/Worcester)

Students who are enrolled in the program must earn grades of C (2.0) or better in all courses and maintain an overall grade point average (GPA) of 3.0 to remain in good academic standing in the program. Students are expected to understand and adhere to the codes and standards of the profession and to exhibit professional behavior.

Students are required to be in good academic standing to enter the clinical year. Students who receive below a C in a didactic course will be required to repeat the course before progressing to the next semester. This will result in a delay of one year to complete the program. Students must receive a 3.0 cumulative GPA in order to enter the clinical year. Such repetitions will lengthen the program beyond two years (please see Program Completion Policy).

Failure to achieve a cumulative 3.0 GPA at the end of the first semester of the didactic year results in being placed on probation. If the student does not demonstrate improvement by the end of the second semester of the didactic year, the student may be dismissed. If the student does not achieve a cumulative GPA of 3.0 by the end of the didactic year, the student will be dismissed.

Professional Responsibilities

Physician Assistants (PAs) are skilled members of the healthcare team qualified by academic and clinical experience to provide a broad range of healthcare services under the supervision of a licensed physician. The healthcare services that PAs provide include performing appropriate medical interviews and physical examinations, identifying healthcare problems in need of evaluation and management, screening results of laboratory diagnostic studies, implementing treatment plans, counseling patients regarding illness and health-risk behaviors, monitoring responses to physician-directed programs of therapy, and facilitating access to appropriate healthcare resources. These services may be provided to individuals of any age in those various settings considered part of the physician's practice.

Professional Credentials

Over the past 30 years, several milestones within the profession have become markers by which the appropriately trained physician assistant is identified. These markers include graduation from an academic program accredited by the Accreditation Review Commission on Education for the Physician Assistant, certification through examination by the National Commission on Certification of Physician Assistants (NCCPA), and registration or licensure by state boards of medical examiners. Continued professional competence is evidenced by the completion of 100 hours of continuing medical education every two years and successful passage of a recertification examination as required by NCCPA.

Program Completion Policy

Candidates for the Master of Physician Assistant Studies (Accelerated MPAS) Program Manchester/Worcester must have completed all program requirements (didactic and clinical) within 39 months from the date of matriculation into the accelerated MPAS program. If there is failure to complete all program requirements within the allotted timeframe, the student is subject to dismissal from the program.

Course Requirements

The undergraduate educational requirements for admission to the MPAS program in Manchester/Worcester are listed in the Admission section of this catalog. Following are the course requirements for the PA program in Manchester/Worcester.

Curriculum: Physician Assistant Studies Program Sequence

Year I—spring

COURSE	TITLE	SEMESTER HOURS
MPA 527	Healthcare Issues I	1
MPA 530	Clinical Medicine I	6
MPA 538	Patient Assessment I	4
MPA 541	Pharmacology I	2
MPA 544	Clinical Anatomy	3
MPA 546	Physiology/Pathophysiology I	2
TOTAL		18

Year I—summer

COURSE	TITLE	SEMESTER HOURS
MPA 528	Healthcare Issues II	3
MPA 531	Clinical Medicine II	6
MPA 539	Patient Assessment II	3
MPA 542	Pharmacology II	3
MPA 547	Physiology/Pathophysiology II	3
TOTAL		18

Year I—fall

COURSE	TITLE	SEMESTER HOURS
MPA 532	Clinical Medicine III	5
MPA 543	Pharmacology III	2
MPA 550	Emergency Medicine	2
MPA 552	Medical Procedures and Surgery	2
MPA 554	Special Populations	4
MPA 540	Patient Assessment III	3
TOTAL		18

Year II—spring

COURSE	TITLE	SEMESTER HOURS
MPAC	Clinical Rotations (3 rotations)	15
MPA 620	Professional Development I	2
TOTAL		17

COURSE	TITLE	SEMESTER HOURS
MPAC	Clinical Rotations (3 rotations)	15
MPA 621	Professional Development II	2
TOTAL		17

Year II—fall

COURSE	TITLE	SEMESTER HOURS
MPAC	Clinical Rotations (3 rotations)	15
MPA 622	Professional Development III	2
TOTAL		17

Total credits to complete degree requirements: 105 semester hours

The breakdown of the Professional Year II clinical rotations includes rotations in the following areas:

MPAC 600	Medicine I	5 weeks	5 semester hours
MPAC 601	Medicine II	5 weeks	5 semester hours
MPAC 602	Family Medicine	5 weeks	5 semester hours

MPAC 603	Pediatrics	5 weeks	5 semester hours
MPAC 604	Psychiatry	5 weeks	5 semester hours
MPAC 605	Surgery	5 weeks	5 semester hours
MPAC 606	Women's Health	5 weeks	5 semester hours
MPAC 607	Emergency Medicine	5 weeks	5 semester hours
MPAC 609	General Elective Rotation	5 weeks	5 semester hours
MPAC 609T	General Elective (international) Rotation	5 weeks	5 semester hours

Clinical Rotations

Clinical rotations are integral to the Physician Assistant Studies program at MCPHS University–Manchester and Worcester. It is during this phase of training that students apply and improve their clinical and patient management skills. There are 9 required clinical rotations. Each rotation is 5 weeks in duration. In addition to clinical rotations, students participate in on-campus professional seminars during the clinical phase of training.

The program has clinical affiliations with a variety of clinical sites in the North East and Mid-Atlantic regions. Additional national and international clinical sites are also available. Learning experiences occur in ambulatory and hospital-based settings and include rural, suburban and urban clinical sites. Students are encouraged to choose rural health facilities for a portion of their clinical experience. The breadth of clinical settings offers the future Physician Assistant the ability to acquire skills and competencies practices in a variety of settings.

Rotations in the required curriculum may be scheduled at some distance from the campus. This is necessary to provide a range of diverse learning experiences and ensure availability and quality of clinical rotation sites. Students are responsible for providing their own housing and transportation to and from the clinical sites and campus. Housing and travel costs for the clinical year vary widely depending on the site and location. Physician Assistant students are not responsible for identifying or arranging their own clinical sites. However, the possibility exists for students to coordinate, with the program out-of-network clinical sites. To ensure quality educational training the sites must be approved by the Physician Assistant Studies Program and University and proper protocol must be followed to arrange for out- of-network clinical rotations.

The School of Physician Assistant Studies reserves the right to make changes to all policies and procedures at any time.

MCPHS University–Manchester School of Pharmacy–Worcester/Manchester

Paul Belliveau, PharmD, Professor and Interim Dean

Abir Kanaan, PharmD, Professor and Assistant Dean of Curriculum and New Programs

Kevin Kearney, PhD, Professor and Assistant Dean of Student Engagement & Success

Michael Steinberg, PharmD, Professor and Assistant Dean of Assessment

Kaelen Dunican, Professor and Director of Interprofessional Education

Department of Pharmaceutical Sciences

Terrick Andey, PhD, Associate Professor and Interim Chair

Professors Acquaaah-Mensah, Campbell, Friel, Goldsmith, Kaplita, Kearney, Sharma; Associate Professors Andey, Yan; Assistant Professors Mandela, Metcalf; Faculty Associates Graham, Pollano

Department of Pharmacy Practice

Sheila Seed, PharmD, MPH Professor and Chair

Cheryl Abel, PharmD, Professor and Vice-Chair

Professors Abel, Belliveau, Cooper, Dunican, Kanaan, Lynch, Pervanas, Seed, Silva, Spooner, Steinberg, Willett; Associate Professors Aungst, Bartlett, Carey, Conway-Allen, Coppenrath, Cross, Dawson, Horton, LaMothe, Lepage, Morrill, Mukherjee, Towle, Yogaratnam; Assistant Professors Bear; Faculty Associate Massey

Office of Experiential Education

Paul DiFrancesco, EdD, MPA, RPh Associate Professor and Associate Dean of Experiential Education, Boston/Worcester/Manchester

Kara Bonaceto, PharmD, Associate Professor of Pharmacy Practice and Director of Experiential Education

Nicole Carace, PharmD, MS, Assistant Professor of Pharmacy Practice and Experiential Education Coordinator

Gretchen Jehle, PharmD, Associate Professor of Pharmacy Practice and Experiential Education Coordinator

Brianne Morin, PharmD, Assistant Professor of Pharmacy Practice and Experiential Education Coordinator

Degree Program

Doctor of Pharmacy (Accelerated)

MCPHS–Manchester offers an accelerated Doctor of Pharmacy (PharmD) degree in conjunction with the School of Pharmacy–Worcester/Manchester. The core pharmacy curriculum is identical to that currently offered at the Worcester campus. Students attend classes in Manchester, while most of the instructors and other students are based in Worcester. Sophisticated technology and interactive videoconferencing are utilized to deliver the core courses and some electives to the Manchester campus. Some electives, all labs, and some didactic courses are taught on site by Manchester-based faculty and qualified adjunct faculty, similar to those at the Worcester campus. Introductory and advanced clinical experiences are offered in a variety of approved settings (hospitals, clinics, community pharmacies, etc.) primarily in New England as well as outside the region, including other states and Canada, consistent with the assignments of students based in Worcester. This academically rigorous program is completed in two years and 10 months. Accepted applicants must have successfully completed all prerequisite courses prior to enrollment in the program. For details on the curriculum and other information on the accelerated PharmD program, refer to the School of Pharmacy–Worcester/Manchester section of this catalog.

School of Professional Studies

Carol Stuckey, MBA, Dean

Amber Palmer, MEd, *Director of Program Operations*

Shani Salifu, PhD, *Senior Course Designer*

Lara Shew, BS, *Director of Continuing Education*

Certificate Programs

- Graduate Certificate in Clinical Management
- Graduate Certificate in Healthcare Management
- Graduate Certificate in Principles of Healthcare Business
- Graduate Certificate in Precision Medicine

Approved by the Board of Trustees in October 2018, the School of Professional Studies was created to serve working professionals and adult learners. The mission of the School is to provide multiple pathways for current and aspiring healthcare professionals to earn credentials to begin or advance healthcare careers, to build skills, knowledge, and expertise, and to enrich their career opportunities. Credit-bearing and noncredit programs will be offered on the MCPHS campuses, online, and through hybrid delivery formats with an emphasis on creating convenient and accessible opportunities for students to meet their career goals.

The long-range plan for the School includes developing prerequisite courses for students who seek to enter professional healthcare programs, building certificate programs and other micro-credentials that target skill development, professional growth, and enhanced career opportunities, and creating executive and professional education in the form of non-credit workshops and/or continuing education courses. The cultivation of corporate and organizational partnerships with area healthcare organizations is central to the mission of the School.

Graduate Certificate in Clinical Management

The Graduate Certificate in Clinical Management is open to applicants who desire graduate-level study without the commitment of a master's degree program. The certificate is designed for healthcare professionals, including physicians, pharmacists, and nurses who are interested in improving their knowledge of clinical management. The certificate enhances interdisciplinary approaches and complements degrees in pharmacy, business administration, nursing, marketing, and management.

The graduate certificate requires four courses (12 credits) and may be completed in two semesters. All of the courses are offered online; students should be prepared for the rigor and challenges of the online learning environment. Upon completion of the certificate, students may elect to count the coursework towards the completion of the Master of Science in Clinical Management. Please note this program is not aid eligible.

Admission Requirements

Applicants are encouraged to apply before the application due date for full consideration. Applications are reviewed on a rolling basis until the program capacity has been reached.

- Bachelor's degree required;
- Undergraduate GPA of 3.0;
- Management experience in healthcare or closely aligned field preferred;

Transfer credits are not accepted for this certificate program.

Graduates of the program will be able to:

- Apply practical approaches to population-level health challenges, including advocating for patient-centered care and managing in the complex healthcare environment;
- Demonstrate ethical decision-making that is informed by data analysis, critical thinking, and evidence-based approaches;
- Apply analytical skills in evaluation and dissemination of evidence in response to core challenges in the delivery of healthcare including value, revenue, and health outcomes;

- Provide leadership and guidance for the delivery of care that meets the needs of patients, providers, and the communities served.

Curriculum: Graduate Certificate in Clinical Management (Online)

Students select 4 courses (12 credits)

COURSE	TITLE	SEMESTER HOURS
HCM 734	Value-based Healthcare	3
HCM 752	Quality Improvement in Healthcare	3
HSC 763	Managing Crisis, Conflict, and Change in Healthcare	3
HCM 821	Clinical Informatics and Data Analysis	3
HCM 825	Managing and Delivering Engaged Care	3
HCM 842	Practice Management and Leadership	3
TOTAL		12

Graduate Certificate in Healthcare Management

The Graduate Certificate in Healthcare Management is open to applicants who desire graduate-level study of healthcare management concepts without the commitment of a master's degree program. The Graduate Certificate in Healthcare Management is available to all healthcare professionals, including physicians, pharmacists, and nurses who are interested in improving their knowledge of healthcare management. The certificate enhances interdisciplinary approaches and complements degrees in pharmacy, business administration, nursing, marketing, and management.

The graduate certificate requires four courses (12 credits) and may be completed in one year. All of the courses are offered online; students should be prepared for the rigor and challenges of the online learning environment. Upon completion of the certificate, students may elect to count the coursework towards the completion of the MBA.

Curriculum: Graduate Certificate in Healthcare Management (Online)

Students choose four courses (substitutions may be allowed by the program director):

COURSE	TITLE	SEMESTER HOURS
HCM 720	Organizational Dynamics	3
HCM 730	Operations and Supply Chain Management	3
HCM 740	Managing Teams, Performance, and Human Capital	3
HCM 820	Informatics and Data Analysis	3
HCM 718	Leadership in Healthcare Administration	3
HSC 763	Managing Crisis, Conflict, and Change in Healthcare	3

Graduate Certificate in Principles of Healthcare Business

This certificate provides the fundamentals of healthcare business for students interested in exploring the fields of healthcare business or administration. This is an introductory level certificate to get students started in the field and help them build confidence in a return to academics and/or a career change or job advancement.

The graduate certificate requires three courses (9 credits) and may be completed in two semesters. All of the courses are offered online. Students must earn at least a B- in each course and a 3.0 cumulative GPA in the certificate courses. For students considering a future MBA, the certificate courses fulfill 9 credits toward the MBA for students who don't have an undergraduate business degree. If you successfully complete the certificate and hold a bachelor's degree from a regionally accredited institution, you will be admitted to the MBA program. Please note, this program is not aid eligible.

Admission Requirements

This is an open enrollment certificate. Students will not need to apply in order to register for courses.

- Bachelor's degree required
- Transfer credits are not accepted

Curriculum: Graduate Certificate in Principles of Healthcare Business (Online)

Students select 3 courses (9 credits)

COURSE	TITLE	SEMESTER HOURS
HCM 701E	Introduction to Healthcare Business Management for Non-Majors	3
HCM 715E	Healthcare Economics	3
HCM 742E	Finance and Accounting for Healthcare Organizations*	3
TOTAL		9

*Students may substitute these courses for HCM 742:

PSB 415 Accounting (offered online) and PSB 446 Healthcare Finance. Both courses need to be taken. **OR**
PSB 416 Managerial Accounting and PSB 446 Healthcare Finance. Both courses need to be taken.

Graduate Certificate in Precision Medicine

Precision Medicine is driving a new era in healthcare that involves individualizing treatments based on a person's genes, environment, and lifestyle. This graduate-level certificate program is designed specifically for healthcare professionals.

This online certificate program includes a strong emphasis in genomics, including the genetic underpinnings of disease and treatment response, as well as the latest clinical applications of genomic medicine. Courses are taught by nationally recognized experts in genomics and precision medicine from MCPHS University and Harvard Medical School's online unit, HMX. This online certificate may be completed in two semesters.

Admission Requirements*

- Bachelor's degree required
- Transfer credits are not accepted

*School of Pharmacy students interested in pursuing this certificate should reach out to their department to learn more about the application process for School of Pharmacy students.

Curriculum: Graduate Certificate in Precision Medicine (Online)

COURSE	TITLE	SEMESTER HOURS
MSC 601E	Fundamentals of Genetics (HMX)	3
MSC 602E	Clinical Pharmacogenomics	2
MSC 603E	Ethical, Legal, and Social Implications of Precision Medicine	2
MSC 604E	Cancer Genomics and Precision Oncology (HMX)	2
TOTAL		12

Course Descriptions

NOTE: Some course changes are approved following catalog printing. Consult www.mcphs.edu for updated information. Descriptions of courses being developed for future years will be available in future catalogs and on the website.

Please refer to Grading System under Academic Policies and Procedures for course key information.

Applied Natural Products (ANP)

ANP 709

Safety in Natural Products

Students cover several major topics-safety issues associated with different organ systems, direct indirect toxicities of plants natural products, pharmacovigilance, as well as principles of quality efficacy. Students focus on how to find, evaluate, review, apply the current literature around issues of botanical quality safety.

Lecture; 3 SH, 3.00 credits. Spring.

Behavioral Sciences (BEH)

BEH 101

Health Psychology Seminar I

This seminar course for health psychology majors focuses on the breadth of the field of psychology. Students read discuss articles published in professional journals as well as articles on topics related to the various applications of the knowledge skills developed through psychology. Health Psychology majors are required to three semesters of this seminar for a total of three credit hours.

Prerequisite: LIB.120. Lecture; 1 SH, 1.00 credits. Fall, Spring.

BEH 102

Health Psychology Seminar II

This seminar course for health psychology majors focuses on the breadth of the field of psychology. Students read discuss articles published in professional journals as well as articles on topics related to the various applications of the knowledge skills developed through psychology. Health Psychology majors are required to three semesters of this seminar for a total of three credit hours.

Prerequisite: LIB.120. Lecture; 1 SH, 1.00 credits. Fall, Spring.

BEH 103

Health Psychology Seminar III

This seminar course for health psychology majors focuses on the breadth of the field of psychology. Students read discuss articles published in professional journals as well as articles on topics related to the various applications of the knowledge skills developed through psychology. Health Psychology majors are required to three semesters of this seminar for a total of three credit hours.

Prerequisite: LIB.120. Lecture; 1 SH, 1.00 credits. Fall, Spring.

BEH 250

Health Psychology

This course provides an overview of the perspective, theories, topics of health psychology, focusing on the psychosocial factors in the understanding of the relationship of health to behavior.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BEH 2500

Health Psychology

This course provides an overview of the perspective, theories topics of health psychology focusing on psychosocial factors in the understanding of the relationship of health to behavior.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BEH 254

Death Dying

This course explores the sociocultural evolution of death dying, focusing particularly on cultural adaptations in the United States. Topics include factors influencing attitudes toward death dying, socialization toward death, facing lifethreatening illness, the role of healthcare systems, last rites survivors, the law death. (Formerly BEH 252, Sociology of Death Dying.)

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 260

Lifestyle Medicine

Students examine evidenced-based recommendations interventions, which lifestyle medicine practitioners utilize in healthcare settings to prevent treat chronic diseases. They also learn theories of health behavior change practice motivational approaches, which support adoption maintenance of healthy behaviors. Interventions focus on nutrition, exercise, stress management, sleep. Students apply these principles interventions to specific chronic diseases.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 330

MRI Patient Experience

Health Psychology Magnetic Resonance Imaging (MRI) students work in interprofessional collaborative teams to evaluate practice patient-centered interventions in the context of MRI. Students learn to distinguish among types of emotion, recognize patients' nonverbal verbal behaviors, implement evidence-based emotion regulation interventions. Through this course, students learn about the roles responsibilities of their respective professions.

Prerequisite: BEH.250. Lecture; 1 SH, 1.00 credits. Spring.

BEH 341

Biological Psychology

An introduction to behavioral neuroscience, this course explores the physiological bases of human behavior. With an emphasis on the brain neural communication, it covers the basic neurological processes that underlie various human behaviors, including sensation perception, learning memory, hormonal control of sexual development, psychopharmacology, psychological/neurological disorders.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BEH 344

Integrative Therapies Mental Health Health in Older Adults Therapies

Students will examine the underlying principles utilization of complementary integrative therapies to support mental health while aging. Interventions include body-based practices, nutritional approaches, expressive arts, therapeutic environments. Critical analysis of scientific literature will focus on applications for the prevention treatment of cognitive emotional disorders enhancement of quality of life in older adults.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 350

Abnormal Psychology

Presents a survey of the assessment, classification, treatment of a variety of psychiatric diagnoses described in the DSM-IV. Attention is paid to the continuum between normal abnormal behavior to the importance of cultural factors in diagnosing treating these conditions.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BEH 350O

Abnormal Psychology

Presents a survey of the assessment, classification, treatment of a variety of psychiatric diagnoses described in the DSM IV. Attention is paid to the continuum between normal abnormal behavior to the importance of cultural factors in diagnosing treating these conditions.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BEH 351

Social Psychology

This course investigates the effect of the social environment on individual behavior. Phenomena such as attitude formation change, group processes, social perception are analyzed with a view toward their application in various realworld settings.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 351O

Social Psychology

This course investigates the effect of social environment on individual behavior. Phenomena such as attitude formation change, group processes, social perception are analyzed with a view toward their application in various real-world settings.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 352**Human Development Through the Life Cycle**

Designed to expose students to human development across the lifespan, this course is intended to provide both a theoretical a practical understanding of individual growth change, distinguishing the characteristics of different stages of development, the issues processes that recur throughout the entire lifespan.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BEH 352O**Human Development Through the Life Cycle**

A course designed to expose students to human development across the life span. The course is intended to provide both a theoretical a practical understanding of individual growth change, distinguishing characteristics of different stages of development, issues processes that recur throughout the entire life span.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BEH 353**Nutrition Health**

Students examine evidence-based relationships between nutrition the maintenance of good health prevention of chronic disease. They become familiar with the U.S. Dietary Guidelines, explore current topics in nutrition, gain practical skills to make healthful food choices. Additionally, students examine strategies to influence people's food choices apply these strategies to a specific chronic disease.

Prerequisites: LIB.120, take 1 group: (BIO.151/BIO.150L, BIO.152/BIO.152L, CHE.131/CHE.131L, CHE.132/CHE.132L) or (BIO.110/BIO.110L, BIO.210/BIO.210L, CHE.110/CHE.110L, CHE.210/CHE.210L). Lecture; 3 SH, 3.00 credits. Varies.

BEH 355**Organizational Psychology**

This course is a study of the ways in which basic psychological principles research are applied to organizational behavior. Topics include personnel selection, motivation, leadership, group dynamics, work stress.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BEH 356**Gender Roles**

Designed to introduce students to the social psychology of sex gender, this course places contemporary U.S. norms in their biological, historical, cross-cultural contexts. Emphasis is placed on female gender roles, but male roles, work, family also are discussed.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 356O**Gender Roles**

A course designed to introduce students to the social psychology of sex gender, placing contemporary U.S. norms in their biological, historical cross-cultural contexts. Emphasis is placed on female gender roles, but male roles, work, family are also discussed.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 357**Positive Psychology**

Students critically review theory empirical research in the emerging field of positive psychology. Topics include positive affect, engagement, optimism, character strengths, values, goals, healthy aging. Students link course content to their personal lives professional disciplines.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 358**Theories of Personalities**

Students will explore fundamental questions about who we are how we got that way. Students will review major theoretical perspectives on personality will examine empirical efforts to address some of the questions raised by those theories. Students will also compare historical perspectives with current trends in personality theory will focus on the relationship between personality well-being.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 362O**Adult Development Aging**

Students will examine the complex interaction of biological, psychological social forces that characterize normal aging as well as age-related diseases. They will also apply theories concepts within the field of geropsychology to examine their own attitudes toward aging to help them understand the older adults they will meet as part of the requirements of this course.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BEH 405

Mind/Body Medicine

Students critically review current scientific literature that addresses the mechanisms efficacy of mind-body medicine, a category of complementary alternative medicine. Topics include psychoneuroimmunology, the relaxation response, mindfulness, meditation, yoga, tai chi, nutrition, beliefs. Students also practice interventions, examine their utilization in healthcare settings, consider how they may apply these in their future professional careers.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 451

Research Methods in Health Behavior

This course is designed to give the student an appreciation of the scientific method in general knowledge of the techniques used by psychologists sociologists in particular. Students become involved in small-scale empirical research projects.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 454

Stress Illness

This course is designed to investigate the relationship between environmentally induced stress illness. Particular emphasis is placed on the health-related effects of changes in the physical environment, sociological status, sociocultural conditions.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 456

Applications of Research Methods

Students apply concepts skills developed in BEH 451 to make ethical evidence-based decisions about real-world problems. Working in collaborative teams, students create implement a literature search strategy, critically read synthesize sources, design a study that adds to the literature. Students develop demonstrate the skills needed to communicate in a variety of oral written formats.

Prerequisite: BEH.451. Lecture; 3 SH, 3.00 credits. Varies.

BEH 457

Drugs Behavior

An introduction to the study of psychopharmacology, this course covers the principles of drug action the effects of drugs on behavior. Students learn the pharmacological, psychological, health outcomes of each major class of psychoactive drugs (recreational therapeutic), including patterns of use abuse by individuals, along with medical sociocultural factors that determine the use of psychoactive drugs.

Prerequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Varies.

BEH 458

Child Adolescent Development

Students will examine the biological, psychological, social factors of development, the interplay among them. Students will study human development from conception through adolescence.

Prerequisites: LIB.120, BEH.352. Lecture; 3 SH, 3.00 credits. Spring.

Biology (BIO)

BIO 105

Concepts of Biology

This class is an introduction to the science of biology for non-science majors. Students will learn about the fundamentals of biology: Scientific inquiry, biological chemistry, cell structure function, DNA genetics, evolution ecology, an overview of living organisms. Students will also learn about study skills for biology biological thinking.

Lecture; 3 SH, 3.00 credits. Fall.

BIO 110

Anatomy Physiology I

This course provides first-year students with directed study of the anatomical structure physiological processes of the human body. Topics include subatomic, atomic, cellular, tissue, integumentary, skeletal, muscular, nervous systems.
Corequisite: BIO.110L. Lecture; 3 SH, 3.00 credits. Fall.

BIO 110L

Anatomy Physiology I-Lab

This course provides first-year students with directed study of the anatomical structure physiological processes of the human body. Topics include subatomic, atomic, cellular, tissue, integumentary, skeletal, muscular, nervous systems.
Corequisite: BIO.110. Laboratory; 1 SH, 1.00 credits. Fall.

BIO 110O

Anatomy Physiology I

This course provides first-year students with directed study of the anatomical structure physiological processes of the human body. Topics include subatomic, atomic, cellular, tissue, integumentary, skeletal, muscular, nervous systems.
Corequisite: BIO.110OL. Lecture; 3 SH, 3.00 credits. Fall.

BIO 110OL

Anatomy Physiology I-Lab

This course provides first-year students with directed study of the anatomical structure physiological processes of the human body. Topics include subatomic, atomic, cellular, tissue, integumentary, skeletal, muscular, nervous systems.
Corequisite: BIO.110 or BIO.110O. Laboratory; 1 SH, 1.00 credits. Fall.

BIO 150L

Biology I Laboratory

This laboratory course emphasizes experimental approaches to understanding basic applied aspects of cellular molecular biology. Topics include cell structure function, biochemistry, genetics heredity, biotechnology.
Corequisite: BIO.151. Laboratory; 1 SH, 1.00 credits. Fall.

BIO 151

Biology I: Cell Molecular Biology

This course emphasizes the experimental approaches to understanding the basic applied aspects of cellular molecular biology. Topics include cell structure function, metabolism, the cellular molecular basis of development heredity, healthcare applications of molecular biotechnology.
Lecture; 3 SH, 3.00 credits. Fall.

BIO 152

Biology II: Biology of Organisms

This course introduces the fundamental principles that unify the vast diversity of organisms, including evolutionary theory, ecology, human anatomy histology, the evolution of organ systems, the normal functioning of the human organism.
Prerequisite: BIO.151. Corequisite: BIO.152L. Lecture; 3 SH, 3.00 credits. Fall.

BIO 152L

Biology II Lab

This course introduces the fundamental principles that unify the vast diversity of organisms, including evolutionary theory, ecology, human anatomy histology, the evolution of organ systems, the normal functioning of the human organism.
Prerequisite: BIO.151. Corequisite: BIO.152. Laboratory; 1 SH, 1.00 credits. Fall.

BIO 152O

Biology II: Biology of Organisms

Introduces fundamental principles that unify the vast diversity of organisms, including evolutionary theory, ecology, human anatomy histology, the evolution of organ systems, the normal functioning of the human organism.
Prerequisite: BIO.151. Lecture; 4 SH, 4.00 credits. Fall.

BIO 210

Anatomy Physiology II

A continuation of BIO 110. The following systems are explored: endocrine, immune, cardiovascular, lymphatic, respiratory, digestive, urinary, reproductive. The concept of homeostasis the underlying principles common to all systems are applied from the submolecular to the organismal level for each system.
Prerequisite: BIO.110. Corequisite: BIO.210L. Lecture; 3 SH, 3.00 credits. Spring.

BIO 210L**Anatomy Physiology II-Lab**

A continuation of BIO 110. The following systems are explored: endocrine, immune, cardiovascular, lymphatic, respiratory, digestive, urinary, reproductive. The concept of homeostasis the underlying principles common to all systems are applied from the submolecular to the organismal level for each system.

Prerequisite: BIO.110. Corequisite: BIO.210. Laboratory; 1 SH, 1.00 credits. Spring.

BIO 2100**Anatomy Physiology II**

A continuation of BIO 110. The following systems are explored: endocrine, immune, cardiovascular, lymphatic, respiratory, digestive, urinary, reproductive. The concept of homeostasis the underlying principles common to all systems are applied from the submolecular to the organismal level for each system.

Prerequisite: BIO.110 or BIO.1100. Corequisite: BIO.2100L. Lecture; 3 SH, 3.00 credits. Spring.

BIO 2100L**Anatomy Physiology II-Lab**

A continuation of BIO 110. The following systems are explored: endocrine, immune, cardiovascular, lymphatic, respiratory, digestive, urinary, reproductive. The concept of homeostasis the underlying principles common to all systems are applied from the submolecular to the organismal level for each system.

Prerequisite: BIO.110. Corequisite: BIO.2100. Laboratory; 1 SH, 1.00 credits. Spring.

BIO 255**Medical Microbiology**

An introduction to microbial principles, this course is designed to give a functional understanding of microorganisms, their role in disease the environment, our defenses against infections. The laboratory covers the principles of microscopy, aseptic techniques, microbial cultivation control.

Prerequisite: BIO.210 or BIO.152. Corequisite: BIO.255L. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BIO 255L**Microbiology Lab**

An introduction to microbial principles, this course is designed to give a functional understanding of microorganisms, their role in disease the environment, our defenses against infections. The laboratory covers the principles of microscopy, aseptic techniques, microbial cultivation control.

Prerequisite: BIO.210 or BIO.152. Corequisite: BIO.255. Laboratory; 1 SH, 1.00 credits. Fall.

BIO 2550**Medical Microbiology**

An introduction to microbial principles, this course is designed to give a functional understanding of microorganisms, their role in disease the environment, our defenses against infections. The laboratory covers the principles of microscopy, aseptic techniques, microbial cultivation control.

Prerequisite: BIO.210 or BIO.152. Lecture; 4 SH, 4.00 credits. Fall, Spring.

BIO 260**Molecular Biology**

The replication, expression, regulation of genetic information will be learned in detail, including a comprehensive review of the mechanisms involved in genetic variation signal transduction. In-depth analysis of recombinant DNA technology RNA interference are included with a stress on medical applications. Scientific reading comprehension data analysis also are emphasized.

Prerequisite: BIO.152. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BIO 3210**Nutrition Science**

This course is designed to introduce the principles of nutrition science, with emphasis on nutrients important to the human body life cycle, dietary guidelines, food composition, disease prevention, weight control, dietary modifications. Other contemporary nutrition issues will be addressed.

Prerequisites: (BIO.152 or BIO.210), (CHE.132 or CHE.210). Lecture; 3 SH, 3.00 credits. Varies.

BIO 332**Genetics**

This course studies the gene at the cellular organismal levels of expression, with an emphasis on human medical genetics. Topics include classical genetics, multifactorial traits, pedigree analysis, gene-mapping methods, cytogenetics, population genetics. Testing, diagnostics, treatment of genetic disorders also are discussed.

Corequisite: BIO.360. Lecture; 3 SH, 3.00 credits. Spring.

BIO 335L

Experimental Techniques in Molecular Biology

Building upon techniques learned in prior laboratory courses, students explore the theoretical practical applications of common techniques performed in biomedical research laboratories apply them in a research project over the course of the semester. Techniques include the polymerase chain reaction; restriction enzyme digestion; gene cloning; DNA purification analysis; cell culture techniques; protein expression, purification, analysis.

Prerequisites: BIO.260, BIO.360. Laboratory; 3 SH, 3.00 credits. Spring.

BIO 345O

Exercise Physiology

Students considering Health Science professional careers will learn the essential components of Exercise Physiology (EP). Students will explore the foundations of EP through lecture, discussion, laboratory assignments, participate in exercise assessments using interviews exercise testing to prepare an exercise prescription. EP provides students practical experience in the process health care professionals use to make clinical decisions. Students must enroll in both BIO 345 BIO 345L. Lecture lab cannot be taken separately.

Prerequisite: BIO.152 or BIO.210. Corequisite: BIO.345OL. Lecture; 3 SH, 3.00 credits. Spring.

BIO 345OL

Exercise Physiology Lab

Students considering Health Science professional careers will learn the essential components of Exercise Physiology (EP). Students will explore the foundations of EP through lecture, discussion, laboratory assignments, participate in exercise assessments using interviews exercise testing to prepare an exercise prescription. EP provides students practical experience in the process health care professionals use to make clinical decisions. Students must enroll in both BIO 345 BIO 345L. Lecture lab cannot be taken separately.

Corequisite: BIO.345O. Laboratory; 1 SH, 1.00 credits. Fall.

BIO 346

Applied Concepts in Public Health

Biological social determinants of health illness are investigated. Students will actively engage in case studies to apply concepts important in public health, including epidemiology, disease prevention, control of epidemics, environmental health, policy development.

Prerequisite: BIO.255. Lecture; 3 SH, 3.00 credits. Fall.

BIO 351

Advanced Human Anatomy Physiology I

The first of a two-part sequence exploring the anatomical design of the human body its functional relationships. Given that this course is geared for healthcare providers, the systems approach will be integrated with case histories. Classes will be a combination of traditional lecture in-class case studies using a group discussion format.

Prerequisite: BIO.152. Corequisite: BIO.351R. Lecture; 3 SH, 3.00 credits. Fall.

BIO 351L

Anatomy Physiology I-Lab

Prerequisites: BIO.152, CHE.132. Corequisite: BIO.351. Laboratory; 1 SH, 1.00 credits. Fall.

BIO 352

Advanced Human Anatomy Physiology II

The second of a two-part sequence exploring the anatomical design of the human body its functional relationships. Given that this course is geared for healthcare providers, the systems approach will be integrated with case histories. Classes will be a combination of traditional lecture in-class case studies using a group discussion format.

Prerequisites: BIO.351, BIO.351L. Corequisite: BIO.352L. Lecture; 3 SH, 3.00 credits. Spring.

BIO 352L

Advanced Human Anatomy Physiology II

BIO 351L is the second of a two part sequence exploring the anatomical design of the human body its functional relationship. Given that this course is geared for healthcare providers, the systems approach will be integrated with case history. Classes will be a combination of traditional lecture in-class case studies using group discussion format.

Prerequisites: BIO.351, BIO.351L. Corequisite: BIO.352. Laboratory; 1 SH, 1.00 credits. Spring.

BIO 360

Cellular Biochemistry

Students learn the structure, metabolism, biochemical function of major macromolecules (proteins, carbohydrates, lipids, nucleic acids). Bioenergetics, enzyme kinetics, cell signaling, regulation are studied at the molecular level. An emphasis is placed on cellular physiological applications of biochemistry (in particular, competencies important for study in medical school).

Prerequisite: CHE.232. Corequisite: BIO.360R. Lecture; 4 SH, 4.00 credits. Fall.

BIO 405

Plagues of the Past, Present & Future

Major diseases throughout history are reviewed from a scientific medical standpoint, with an emphasis on molecular biology. The course covers "older" infectious diseases that are resurfacing as public health threats, current diseases negatively impacting society, "newer" health threats including West Nile virus potential bioterrorism agents. Treatment prevention strategies from the 1900s until today also are discussed.

Prerequisite: BIO.255, BIO.151. Lecture; 3 SH, 3.00 credits. Spring.

BIO 420

Communication in the Biological Sciences

This course covers the many facets of communication in the biological sciences. Students will be expected to produce written summaries of primary scientific literature a special project involving either a professional poster or a grant proposal. Students also will learn to gear oral presentations to different audiences use communication-oriented technologies, including the creation of original podcasts blogs.

Prerequisite: BIO.360 or PSB.331. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BIO 430

Molecular Biology of Cancer

Understanding the causes of potential treatments for human cancers requires a detailed analysis of the molecular cellular mechanisms that are disrupted in cancer cells. Students will learn the current understanding of biomedical research on such topics as oncogenes, tumor suppressor genes, signal transduction pathways, cell cycle regulation, apoptosis, angiogenesis, metastasis.

Prerequisite: BIO.360. Lecture; 3 SH, 3.00 credits. Varies.

BIO 434

Immunology

This course provides an introduction to the cellular clinical aspects of immunology. Topics include clonal selection theory, immunoglobulin function, B cell T cell development functioning, cytokines, histocompatibility complex restriction mechanisms, tolerance, autoimmunity, hypersensitivity, immunodeficiency states transplantation immunology.

Prerequisites: BIO.152, BIO.360. Lecture; 3 SH, 3.00 credits. Fall.

BIO 440

Cell Biology

An in-depth study of the molecular structure function of the most fundamental unit of life, with an emphasis on analysis of scientific literature in the field of cell biology. The unique biological properties of stem cells will be a recurring theme throughout the course, along with the impact of stem cell research on medicine human health.

Prerequisites: BIO.152, CHE.232, BIO.360. Lecture; 3 SH, 3.00 credits. Varies.

BIO 445

Applied Human Physiology

This course will provide students with advanced study of the physiological processes of the major systems of the human body. Using a systems approach this course covers the cellular, histological organ functions of the body.

Prerequisite: BIO.152 or BIO.210. Lecture; 4 SH, 4.00 credits. Fall.

BIO 450N

ST: Your Inner Fish

Students will learn how 3.5 billion years of evolutionary history came to shape the human body in its current form. Students will read the bestselling book *Your Inner Fish* as a jumping off point, as well as readings from current scientific literature to help develop deeper understanding of the links between evolution, human anatomy physiology, human health.

Laboratory; 3 SH, 3.00 credits. Varies.

BIO 455

Advanced Microbiology

This lecture laboratory course in microbiology covers advanced material in microbial physiology, genetics, diversity, ecology, biotechnology. The laboratory will include exercises coordinated with the lecture topics will feature specialized laboratory techniques instrumentation, an independent study component.

Prerequisite: BIO.255. Lecture; 3 SH, 3.00 credits. Spring.

BIO 455L

Advanced Microbiology Lab

This lecture laboratory course in microbiology covers advanced material in microbial physiology, genetics, diversity, ecology, biotechnology. The laboratory will include exercises coordinated with the lecture topics will feature specialized laboratory techniques instrumentation, an independent study component.

Prerequisite: BIO.255. Corequisite: BIO.455. Laboratory; 1 SH, 1.00 credits. Varies.

BIO 460

Human Physiology

This course will provide students with advanced study of the physiological processes of the major systems of the human body. Using a systems approach this course covers the cellular, histological organ functions of the body.

Prerequisite: BIO.210 or BIO.152. Lecture; 3 SH, 3.00 credits. Fall.

BIO 465

Medical Parasitology

Students will explore the various aspects of parasite biology, host interactions, the pathogenesis of parasitic diseases. Emphasis will be placed on major parasitic organisms that impact human populations. Students will learn the fundamentals pertaining to diagnosis, treatment, transmission, control of human parasites as an introduction for those pursuing careers in the medical industry.

Prerequisite: BIO.152, BIO.255. Lecture; 3 SH, 3.00 credits. Fall.

BIO 470

The Biology of Obesity

This course will examine neurological, endocrine, environmental factors, including diet, that influence body weight energy balance in humans. We will also discuss the detailed mechanisms by which obesity is linked to type II diabetes, cardiovascular disease, other pathologies. Finally, we will discuss treatments for obesity including dietary changes, exercise, surgical intervention, medications.

Prerequisites: BIO.152 or BIO.210. Lecture; 3 SH, 3.00 credits. Fall, Spring.

BIO 530

Undergraduate Research Project

Research participation at the undergraduate level is offered to superior students in biology microbiology. Emphasis is placed on teaching the methods techniques used in solving research problems.

Lecture; 1-3 SH, 1.00-3.00 credits. Spring.

BIO 532

Directed Study

Supervised study in biology microbiology involves a survey of existing knowledge, self-instructed and/or facultyassisted inquiry into previously published data or methodologies, or other faculty-approved study of a nonresearch nature.

Prerequisite: BIO.152. Research; 1-3 SH, 1.00-3.00 credits. Varies.

BIO 734

Immunology

This course provides an introduction to the cellular clinical aspects of immunology. Topics include clonal selection theory, immunoglobulin function, B cell T cell development functioning, cytokines, histocompatibility complex restriction mechanisms, tolerance, autoimmunity, hypersensitivity, immunodeficiency states transplantation immunology.

Permission of instructor required. Lecture; 3 SH, 3.00 credits. Fall.

Biomedical Informatics (BMI)

BMI 101

Introduction to Informatics

This survey course provides students with an overview of the discipline of biomedical informatics, is intended for first-year students majoring in Biomedical Informatics. Students will learn apply principles of biomedical informatics research data management to case-based examples.

Lecture; 3 SH, 3.00 credits. Fall.

BMI 410**Data Visualization**

The course provides students with an understanding of the important of data visualization in healthcare trains them to communicate clear compelling insights in health health care data using the Tableau software tool.

Lecture; 3 SH, 3.00 credits. Fall.

Chemistry (CHE)

CHE 110**Basic Chemistry I**

This course introduces the basic principles of chemistry, including gas laws, acid-base chemistry, stoichiometry, energy, structure bonding, nuclear chemistry, solutions. Laboratory exercises are designed to complement the didactic material.

Corequisites: CHE.110L, CHE.110R. Lecture; 3 SH, 3.00 credits. Fall.

CHE 110L**Basic Chemistry I Laboratory**

This course introduces the basic principles of chemistry, including gas laws, acid-base chemistry, stoichiometry, energy, structure bonding, nuclear chemistry, solutions. Laboratory exercises are designed to complement the didactic material.

Corequisite: CHE.110. Laboratory; 1 SH, 1.00 credits. Fall.

CHE 110O**Basic Chemistry I**

This course introduces the basic principles of chemistry, including gas laws, acid-base chemistry, stoichiometry, energy, structure bonding, nuclear chemistry, solutions. Laboratory exercises are designed to complement the didactic material.

Lecture; 3 SH, 3.00 credits. Fall.

CHE 113**Chemistry Society**

This course provides an overview of basic principles of chemistry that apply to everyday life. The course is designed to generate an appreciation of chemistry. Topics covered will include unit conversion, periodic table trends, acid/base chemistry, solubility chemical reactions.

Lecture; 3 SH, 3.00 credits. Fall.

CHE 113L**Chemistry Society Laboratory**

This course provides an overview of basic principles of chemistry, which apply to everyday life. The labs are designed to generate an appreciation of chemistry. Labs covered will include the physical properties, identification of artificial coloring in food, economics of a chemical substance, energy, recycling, ideal gas law, acids bases, determination of unknowns.

Corequisite: CHE.113. Laboratory; 1 SH, 1.00 credits. Fall.

CHE 131**Chemical Principles I**

This course emphasizes the construction of scientific concepts based on observation the development of reasoning skills based on active learning. Topics include mass, force, energy, interpreting phenomena in terms of atomic theory, gases, stoichiometry, periodic properties of the elements, solutions.

Corequisite: CHE.131L. Lecture; 3 SH, 3.00 credits. Fall.

CHE 131L**Chemical Principles I-Lab**

This course emphasizes the construction of scientific concepts based on observation the development of reasoning skills based on active learning. Topics include mass, force, energy, interpreting phenomena in terms of atomic theory, gases, stoichiometry, periodic properties of the elements, solutions.

Corequisite: CHE.131. Laboratory; 1 SH, 1.00 credits. Fall.

CHE 131O**Chemical Principles I**

Emphasizes construction of scientific concepts based on observation, development of reasoning skills based on active learning. Topics include mass, force, energy, interpreting phenomena in terms of atomic theory, gases, stoichiometry, periodic properties of the elements, solutions.

Lecture; 4 SH, 4.00 credits. Fall.

CHE 132**Chemical Principles II**

This course emphasizes the construction of scientific concepts based on observation the development of reasoning skills based on active learning. Topics include atomic structure, bonding, molecular geometry, reaction energetics rates, equilibrium, redox, acid-base chemistry.

Corequisites: CHE.131, CHE.132L. Lecture; 3 SH, 3.00 credits. Spring.

CHE 132L**Chemistry II Lab**

This course emphasizes the construction of scientific concepts based on observation the development of reasoning skills based on active learning. Topics include atomic structure, bonding, molecular geometry, reaction energetics rates, equilibrium, redox, acid-base chemistry.

Corequisites: CHE.131, CHE.132. Laboratory; 1 SH, 1.00 credits. Spring.

CHE 210**Basic Chemistry II**

This course is a continuation of CHE 110 covers the basic principles of organic chemistry biochemistry their application to the life sciences. Laboratory exercises are designed to complement the didactic material.

Prerequisite: CHE.110. Corequisite: CHE.210L. Lecture; 3 SH, 3.00 credits. Spring.

CHE 210L**Basic Chemistry II Lab**

This course is a continuation of CHE 110 covers the basic principles of organic chemistry biochemistry their application to the life sciences. Laboratory exercises are designed to complement the didactic material.

Prerequisite: CHE.110. Corequisite: CHE.210. Laboratory; 1 SH, 1.00 credits. Spring.

CHE 210O**Basic Chemistry II**

This course is a continuation of CHE 110 covers the basic principles of organic chemistry biochemistry their application to the life sciences. Laboratory exercises are designed to complement the didactic material.

Prerequisite: CHE.110. Lecture; 4 SH, 4.00 credits. Spring.

CHE 230**Organic Chemistry for Health Professionals (without Lab)**

The structure, nomenclatures, stereochemistry, properties reactions of carbon-containing compounds are introduced. The mechanisms of reactions are emphasized.

Prerequisite: CHE.132. Lecture; 3 SH, 3.00 credits. Fall.

CHE 231**Organic Chemistry I**

The structure, nomenclature, stereochemistry, properties, reactions of carbon-containing compounds are introduced, the mechanisms of reactions are emphasized. Laboratory experiments develop manipulative skills in the classical methods of purification separation of organic compounds.

Prerequisite: CHE.132. Corequisites: CHE.231L, CHE.231R. Lecture; 3 SH, 3.00 credits. Fall.

CHE 231L**Organic Chemistry I Laboratory**

The structure, nomenclature, stereochemistry, properties, reactions of carbon-containing compounds are introduced, the mechanisms of reactions are emphasized. Laboratory experiments develop manipulative skills in the classical methods of purification separation of organic compounds.

Prerequisite: CHE.132. Corequisite: CHE.231. Laboratory; 1 SH, 1.00 credits. Fall.

CHE 232**Organic Chemistry II**

The chemical reactions of alkenes, aldehydes, ketones, carboxylic acids, their derivatives amines are surveyed, a mechanistic understanding of reactions is further developed. The structure properties of multifunctional compounds, including amino acids, carbohydrates, steroids, are presented.

Prerequisite: CHE.231. Lecture; 3 SH, 3.00 credits. Spring.

CHE 234L**Organic Chemistry II Laboratory**

More chemical reactions of organic compounds are carried out. A multistep sequence of reactions results in the preparation of a known pharmaceutical agent. Infrared nuclear magnetic resonance spectra are discussed applied to the identification of reaction products.

Prerequisite: CHE.231. Corequisite: CHE.232. Laboratory; 1 SH, 1.00 credits. Spring.

CHE 314

Analytical Chemistry

This course introduces students to the theory practice of quantitative analysis. Laboratory experiments are designed to be a practical realization of the topics discussed in class.

Prerequisite: CHE.132. Corequisite: CHE.314L. Lecture; 3 SH, 3.00 credits. Spring.

CHE 314L

Analytical Chemistry Lab

This course introduces students to the theory practice of quantitative analysis. Laboratory experiments are designed to be a practical realization of the topics discussed in class.

Prerequisite: CHE.132. Corequisite: CHE.314. Laboratory; 1 SH, 1.00 credits. Spring.

CHE 317

Instrumental Analysis

This course covers the fundamentals of instrumental methods of analysis, emphasizing spectroscopic, chromatographic, surface techniques. Laboratory projects make use of techniques discussed in lecture.

Prerequisites: (MAT.152, MAT.172 or MAT.251), CHE.232, PHY.270, CHE.314. Corequisite: CHE.317L. Lecture; 4 SH, 4.00 credits. Fall.

CHE 317L

Instrumental Analysis Laboratory

This course covers the fundamentals of instrumental methods of analysis, emphasizing spectroscopic, chromatographic, surface techniques. Laboratory projects make use of techniques discussed in lecture.

Corequisite: CHE.317. Laboratory. Fall.

CHE 333L

Introductory Biochemistry Laboratory

Introduces the physical methods used to isolate, identify, characterize proteins nucleic acids.

Prerequisite: PSB.331. Lecture; 1 SH, 1.00 credits. Varies.

CHE 340

Inorganic Chemistry

The occurrence physical chemical properties of elements their compounds are examined with emphasis on periodic relationships. Topics include solubility, acid-base, redox reactions, coordination compounds, elemental properties. Laboratory exercises illustrate lecture concepts provide background for discussion.

Prerequisite: CHE.132. Corequisite: CHE.340L. Lecture; 3 SH, 3.00 credits. Spring.

CHE 340L

Inorganic Chemistry Lab

The occurrence physical chemical properties of elements their compounds are examined with emphasis on periodic relationships. Topics include solubility, acid-base, redox reactions, coordination compounds, elemental properties. Laboratory exercises illustrate lecture concepts provide background for discussion.

Prerequisite: CHE.132. Corequisite: CHE.340. Laboratory; 1 SH, 1.00 credits. Spring.

CHE 365

Thermodynamics & Kinetics

Physical chemistry uses concepts techniques from physics to understchemistry. In this first semester of a twosemester series, students study states of matter, phase changes, laws of thermodynamics, principles of equilibrium, reaction kinetics mechanisms. The laboratory portion of the course provides an experimental basis for the topics covered in the lectures.

Prerequisites: (PHY.274 or PHY.284), CHE.132. Corequisite: CHE.365L. Lecture; 3 SH, 3.00 credits. Fall.

CHE 365L

Thermodynamics & Kinetics Lab

Physical chemistry uses concepts techniques from physics to understchemistry. In this first semester of a twosemester series, students study states of matter, phase changes, laws of thermodynamics, principles of equilibrium, reaction

kinetics mechanisms. The laboratory portion of the course provides an experimental basis for the topics covered in the lectures.

Corequisite: CHE.365. Laboratory; 1 SH, 1.00 credits. Spring.

CHE 367

Quantum Mechanics Molecular Structure

This course explores the basic tenets of quantum chemistry their application to model systems (e.g., particle in a box) to atomic molecular systems. Rotational vibrational spectra the use of symmetry in quantum chemistry will be covered. The laboratory portion of the course provides an experimental basis for the topics covered in the lectures.

Prerequisites: CHE.132, (PHY.274 or PHY.284). Corequisite: CHE.367L. Lecture; 3 SH, 3.00 credits. Fall.

CHE 367L

Quantum Mechanics Molefular Structure Lab

This course explores the basic tenets of quantum chemistry their application to model systems (e.g., particle in a box) to atomic molecular systems. Rotational vibrational spectra the use of symmetry in quantum chemistry will be covered. The laboratory portion of the course provides an experimental basis for the topics covered in the lectures.

Prerequisites: CHE.132, (PHY.274 or PHY.284). Corequisite: CHE.367. Laboratory; 1 SH, 1.00 credits. Spring.

CHE 410

Undergraduate Chemistry Seminar

Advanced level talks presented by students, faculty members, guest speakers from other universities pharmaceutical / biotechnology companies. Students search, read, present journal articles that are relevant to research topics.

Lecture; 1 SH, 1.00 credits. Spring.

CHE 435

Green Chemistry Sciences

Students will learn various chemistry chemical engineering skills apply these skills to the principles practices of green chemical processing environmental sustainability. Topics include tools principles of green chemistry, alternative solvents, green organic chemistry, polymers catalysts, biotransformation, sustainable energy.

Prerequisite: CHE.234L. Lecture; 3 SH, 3.00 credits. Fall.

CHE 437

Computational Methods in Chemistry

This course covers the essentials in modern computational chemistry, including methods, concepts, ideas, computational programs. Students will learn to use simulation package Gaussian09 to carry out theoretical predictions on properties of molecular systems chemical reactions, develop a sense about the accuracy limitations of these calculations. Exercises on literature search project presentation will also be included.

Prerequisite: CHE.367. Lecture; 3 SH, 3.00 credits. Fall.

CHE 445L

Experimental Methods in Chemistry

Introduces advanced techniques in chemical synthesis characterization applicable to organic, inorganic, organometallic compounds. Students will perform synthetic techniques including working under inert atmosphere handling moisture-sensitive reagents. Students will perform characterization of compounds using NMR, IR, UV-VIS spectroscopy.

Prerequisites: CHE.232, CHE.234L. Laboratory; 3 SH, 3.00 credits. Fall.

CHE 450

Pharmaceutical Chemistry

This course covers drug discovery, design, development; physiochemical properties of drug molecules; stereochemistry in drug molecules; reactions mechanisms in drug synthesis; characterization of drug molecules; drug stability metabolism. The focus will be on the synthesis of selected marketed small-molecule drugs.

Prerequisite: CHE.234L. Lecture; 3 SH, 3.00 credits. Spring.

CHE 450L

Pharmaceutical Chemistry Lab

Corequisite: CHE.450. Laboratory; 1 SH, 1.00 credits. Spring.

CHE 470

ST: Characterization of Solids

Prerequisite: CHE.717. Lecture; 3 SH, 3.00 credits. Varies.

CHE 530**Undergraduate Research Project**

Through this course, students become involved in the ongoing faculty research in chemistry. Students learn advanced laboratory techniques in natural products isolation, chemical synthesis, spectroscopic analysis.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

CHE 532**Directed Study**

Supervised study in chemistry involving a survey of existing knowledge, self-instructed and/or faculty-assisted inquiry into previously published data or methodologies, or other faculty-approved study of a nonresearch nature.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

CHE 710**Chemistry Seminar**

Advanced-level presentations by students, faculty members, guest speakers from other universities pharmaceutical biotechnology companies. Students search, read, present journal articles that are relevant to research topics. Master's-level students are required to two consecutive semesters of this seminar for a total of 2 credit hours. During the second semester, students will present the master's thesis.

Corequisites: CHE.445L, CHE.880. Lecture; 1 SH, 1.00 credits. Varies.

CHE 711**Chemistry Seminar**

Advanced-level presentations by students, faculty members, guest speakers from other universities pharmaceutical biotechnology companies. Students search, read, present journal articles that are relevant to research topics. Master's-level students are required to two consecutive semesters of this seminar for a total of 2 credit hours. During the second semester, students will present the master's thesis.

Prerequisite: CHE.445L. Corequisite: CHE.880. Lecture; 1 SH, 1.00 credits. Varies.

CHE 714**Spectroscopic Analysis**

The acquisition interpretation of infrared, nuclear magnetic resonance (NMR), ultraviolet spectra are taught. Students interpret sets of spectral data, including carbon-13 NMR mass spectra, from unknown compounds to identify the structures of the compounds.

Prerequisite: CHE.232. Corequisite: CHE.714L. Lecture; 3 SH, 3.00 credits. Fall.

CHE 714L**Spectroscopic Analysis Laboratory**

The acquisition interpretation of infrared, nuclear magnetic resonance (NMR), ultraviolet spectra are taught. Students interpret sets of spectral data, including carbon-13 NMR mass spectra, from unknown compounds to identify the structures of the compounds.

Prerequisite: CHE.232. Corequisite: CHE.714. Laboratory. Fall.

CHE 717**Instrumental Analysis**

Covers the fundamentals of instrumental methods of analysis, emphasizing spectroscopic, chromatographic, surface techniques. Laboratory projects make use of the techniques discussed in lectures.

Prerequisites: MAT.152, CHE.232, PHY.270, CHE.314. Corequisite: CHE.717L. Lecture; 4 SH, 4.00 credits. Fall.

CHE 717L**Instrumental Analysis Laboratory**

Covers the fundamentals of instrumental methods of analysis, emphasizing spectroscopic, chromatographic, surface techniques. Laboratory projects make use of the techniques discussed in lectures.

Corequisite: CHE.717. Laboratory. Fall.

CHE 731**Advanced Organic Chemistry**

This course covers the principles of physical organic chemistry the application of reaction mechanisms to the design synthesis of organic structures. The mechanisms of organic reactions the relationships between reactivity structure are stressed.

Prerequisite: CHE.232. Lecture; 4 SH, 4.00 credits. Fall, Spring.

CHE 751**Pharmaceutical Chemistry II**

In this course, students will explore the methodology used by medicinal chemists in the organic synthesis, purification, characterization of drugs. Topics include asymmetric synthesis, organometallic chemistry, carbon-carbon bond formation, formation of ring systems, the manipulation of functional groups, methods of purification characterization. Process chemistry used for the large-scale synthesis of drugs entering clinical trials will be discussed.

Prerequisites: CHE.450, CHE.450L. Lecture; 4 SH, 4.00 credits. Spring.

CHE 751L**Pharmaceutical Chemistry II Lab**

In this course, students will explore the methodology used by medicinal chemists in the organic synthesis, purification, characterization of drugs. Topics include asymmetric synthesis, organometallic chemistry, carbon-carbon bond formation, formation of ring systems, the manipulation of functional groups, methods of purification characterization. Process chemistry used for the large-scale synthesis of drugs entering clinical trials will be discussed.

Corequisite: CHE.751. Laboratory. Fall, Spring.

CHE 755**Stereochemistry**

The concept of stereoisomerism in organic chemistry is systematically studied in simple complex molecules, with an emphasis on the effects of molecular configuration conformation on organic reactions.

Prerequisite: CHE.232. Lecture; 3 SH, 3.00 credits. Spring.

CHE 810**Heterocyclic Chemistry**

An introduction to heterocyclic chemistry is presented along rational lines. Nomenclature, methods of synthesis, chemical properties of various heterocyclic ring systems are discussed.

Prerequisite: CHE.232. Lecture; 2 SH, 2.00 credits. Varies.

CHE 825**Internship**

This course provides students an advanced experience in chemical and/or pharmaceutical research either in an institutional or industrial environment. Students will apply information techniques acquired in the program to current problems of applied and/or basic research.

Lecture; 9-12 SH, 9.00-12.00 credits. Spring.

CHE 880**Research**

Students conduct a research investigation through both literature bench work in the area of pharmaceutical chemistry. Twelve semester hours are required, which are split over four semesters of the two graduate years. Within this course, students will complete the masters' thesis required for the MS in Pharmaceutical Chemistry degree.

Prerequisite: CHE.445L. Lecture; 3 SH, 3.00 credits. Varies.

CHE 885**Literature-Based Research**

This course is for the students in the MS in Pharmaceutical Chemistry program who choose the Literature-based research option. Students will complete a case study thesis, consisting of scholarly non-laboratory research culminating in a written report presentation on a topic of the student's choosing, all subject to the approval of the student's Graduate Advisory Committee.

Corequisite: CHE.710. Lecture; 3 SH, 3.00 credits. Varies.

CHE 895**Graduate Study Extension**

Students are expected to remain continuously enrolled each semester, excluding summer semesters, until all requirements for the degree have been completed. Students maintain continuing registration by indicating CHE 895 Graduation Study Extension on the registration form paying a fee.

Lecture. Fall, Spring.

Dental Hygiene (DHY)

DHY 202

Dental Anatomy, Embryology Histology

Students study oral histology embryology, dental anatomy, tooth development function. Material covered provides the basic anatomical knowledge required for the clinical component of the dental hygiene program.

Prerequisites: BIO.110. BIO.210. Lecture; 2 SH, 2.00 credits. Fall.

DHY 204

Anatomical Sciences of the Head Neck

Students study the anatomy of the head neck. Material covered provides the basic anatomical knowledge required for the clinical component of the dental hygiene program.

Prerequisites: BIO.110. BIO.210. Lecture; 2 SH, 2.00 credits. Fall.

DHY 209

Dental Hygiene Process of Care I

This course is the first in a four course series that builds upon basic principles of the dental hygiene process of care introduces concepts regarding health promotion disease prevention emphasizing assessment, diagnosis, treatment planning for patients. The pre-clinic lab portion focuses on development of instrumentation skills using typodonts student partners.

Lecture; 6 SH, 6.00 credits. Fall.

DHY 209L

Dental Hygiene Pre-Clinical Lab

Introduction to the dental hygiene process of care emphasizing assessment, diagnosis, treatment planning, implementation evaluation in preparation for direct patient care in a supervised lab setting. Skill development in this lab is introduced in coordination with concepts presented in DHY 209 Dental Hygiene Process of Care I. Instrumentation skills are also learned developed using typodonts student partners.

Corequisite: DHY.209. Laboratory. Fall.

DHY 211

Dental Hygiene Process of Care II

This course is the second in a four course series that builds upon the basic principles of the dental hygiene process of care, introduced in DHY 209 209L, designed to expstudent's knowledge of comprehensive oral hygiene care. Patient care considerations pertaining to human growth development, supplemental care, special needs population other disorders are emphasized.

Prerequisites: DHY.202, DHY.204, DHY.209, DHY.230, DHY.231. Lecture; 3 SH, 3.00 credits. Spring.

DHY 223

Clinical Dental Hygiene I

This course is the first in a series of clinical experiences in which students apply integrated multidisciplinary learning in clinical practice. Students will begin to incorporate laboratory skills into a clinical environment. The course will focus on developing clinical competencies to the beginner clinician level.

Prerequisites: DHY.202, DHY.204, DHY.209, DHY.230, DHY.231. Lecture; 3 SH, 3.00 credits. Spring.

DHY 230

Dental Radiology

Students gain a basic understanding of the fundamentals of dental radiography, including radiation physics, hygiene, safety. Emphasis is placed on the fundamentals of radiographic technique, the interpretation of radiographs for diagnostic acceptability, quality assurance. Concurrent lab sessions include exposure of traditional digital intraoral images on manikins patients to achieve lab clinical competence.

Corequisite: DHY.230L. Lecture; 3 SH, 3.00 credits. Fall.

DHY 230L

Dental Radiology Lab

Students gain a basic understanding of the fundamentals of dental radiography, including radiation physics, hygiene, safety. Emphasis is placed on the fundamentals of radiographic technique, the interpretation of radiographs for diagnostic acceptability, quality assurance. Concurrent lab sessions include exposure of traditional digital intraoral images on manikins patients to achieve lab clinical competence.

Corequisite: DHY.230. Laboratory. Fall.

DHY 231**Dental Materials**

This course is a study of the basic properties, selection, manipulation, clinical management of dental materials. Laboratory/clinic sessions provide students with the opportunity to practice techniques such as pit/fissure sealants, fabricating athletic mouth guards whitening trays, impression taking, study models, suture removal.

Corequisite: DHY.231L. Lecture; 3 SH, 3.00 credits. Fall.

DHY 231L**Dental Materials Lab**

This course is a study of the basic properties, selection, manipulation, clinical management of dental materials. Laboratory/clinic sessions provide students with the opportunity to practice techniques such as pit/fissure sealants, fabricating athletic mouth guards whitening trays, impression taking, study models, suture removal.

Corequisite: DHY.231. Laboratory. Fall.

DHY 232**Nutrition**

Based upon the principles of biochemistry, students review the nature function of micronutrients macronutrients essential for health. The role of diet/nutrition its form frequency, related to general oral disease prevention health promotion are studied

Lecture; 2 SH, 2.00 credits. Varies.

DHY 233**Periodontology**

This course focuses on the etiology, histopathology, clinical manifestations of diseases conditions of the periodontium. Emphasis is placed on the assessment, diagnosis, clinical management of periodontal diseases, as well as the relationship between systemic health/disease periodontal health/disease.

Prerequisites: DHY.202, DHY.204, DHY.209, DHY.209L, DHY.230, DHY.230L. Lecture; 3 SH, 3.00 credits. Spring.

DHY 310**Dental Hygiene Process of Care III**

Students will examine etiology; systemic oral manifestations related to medical conditions illnesses that may require specialized considerations management related to the process of care. Students apply knowledge from previous courses explore scientific literature for relevant information to assess risk, management of risk, linkages between systemic health oral disease to plan patient-centered treatment.

Prerequisites: DHY.211, DHY.223 Corequisite: DHY.323. Lecture; 3 SH, 3.00 credits. Fall.

DHY 311**Dental Hygiene Process of Care IV**

Students apply knowledge of the dental hygiene process of care to explore scientific literature to support evidence-based patient care. Students research medical psychosocial conditions as they relate to periodontal health connect them to clinical practice.

Prerequisites: DHY.310, DHY.323. Lecture; 2 SH, 2.00 credits. Spring.

DHY 323**Clinical Dental Hygiene II**

The second in a series of clinical experiences in which students apply integrated multidisciplinary learning in clinical practice. Students will use critical thinking skills to develop implement dental hygiene care plans based on evidencebased standards of care. Principles of time management, quality assessment assurance are applied to clinic management patient care. The course will focus on developing clinical competence to the novice clinician level.

Prerequisites: DHY.223, DHY.211, DHY.209. Lecture; 4 SH, 4.00 credits. Fall.

DHY 324**Clinical Dental Hygiene III**

The last in a series of clinical experiences in which students apply integrated multidisciplinary learning in clinical practice. Students will use critical thinking skills to develop implement dental hygiene care plans based on evidence-based standards of care. Principles of time management, quality assessment assurance are applied to clinic management patient care. The course will focus on developing clinical competence to the entry clinician level.

Prerequisites: DHY.310, DHY.323 Lecture; 4 SH, 4.00 credits. Spring.

DHY 330**Pathology**

This course is a study of basic pathology with emphasis on oral pathology systemic disease. Diseases of the oral tissues oral environment are presented with clinical features, histopathology, treatment modalities.
Prerequisites: DHY.202, DHY.204, DHY.209. Corequisites: DHY.211, DHY.223, DHY.233. Lecture; 3 SH, 3.00 credits. Spring.

DHY 342

Pharmacology

An introductory pharmacology course focusing on commonly used drugs, mechanisms of action, pharmacokinetics, indications major adverse effects. Pharmacotherapy of cardiovascular, nervous system, gastrointestinal, respiratory, endocrine, infections malignant conditions, along with the principles of drug administration dental implications are discussed.

Prerequisites: DHY.211, DHY.223. Lecture; 3 SH, 3.00 credits. Fall.

DHY 343

Pain Management

Lectures discuss the recognition management of pain, fear, anxiety associated with dental treatment. Neurophysiology, pharmacology local systemic complications related to the administration of local anesthesia are covered including nitrous oxide sedation. The laboratory covers the clinical application practice of local anesthesia techniques on student partners. Additional coursework may be required for individual state licensure.

Prerequisites: DHY.202, DHY.204, DHY.209. Corequisite: DHY.343L. Lecture; 3 SH, 3.00 credits. Summer, Fall.

DHY 343L

Pain Management Lab

A laboratory course that addresses the recognition management of pain, fear, anxiety associated with dental treatment. Students learn practice local anesthesia techniques including field nerve block anesthesia on student partners applying knowledge skills obtained from DHY 343. Additional coursework may be required to fulfill specific state licensing certification requirements.

Prerequisites: DHY.202, DHY.204, DHY.209. Corequisite: DHY.343. Laboratory. Summer, Fall.

DHY 345

Practice Career Management

This course focuses on ethical decision making, including principles of professionalism, ethics, jurisprudence, social responsibility; dental practice management with emphasis on productivity, remuneration, risk management, quality assurance, team-building skills; preparation for employment, including licensure requirements, professional résumés, interviewing techniques.

Prerequisites: DHY.310, DHY.323, DHY.350. Corequisite: DHY.311. Lecture; 2 SH, 2.00 credits. Fall, Spring.

DHY 350

Community Oral Health

Community Oral Health examines topics related to public health. Basic principles of epidemiology, biostatistics, health care delivery systems, methods of financing quality assessment are reviewed. Students learn to develop programs in community-based settings, focusing on assessment, prevention, policy development.

Prerequisites: DHY.211, DHY.223, DHY.233, DHY.330, DHY.343. Corequisites: DHY.310, DHY.323. Lecture; 1-3 SH, 1.00-3.00 credits. Fall, Spring.

DHY 420

Oral Health Research

Introduction to the fundamentals of research including Evidence-Based Decision Making (EBDM). EBDM is the formalized process of using a specific set of skills to identify, search for interpret clinical scientific evidence used in making care decisions for individuals populations. Topics include developing answerable research questions, research design, data collection analysis, sources of evidence, levels of evidence, critical appraisal of the evidence applying the evidence.

Prerequisite: MAT.261 or MAT.197. Lecture; 3 SH, 3.00 credits. Summer, Fall.

DHY 420O

Oral Health Research

Introduction to the fundamentals of research including Evidence-Based Decision Making (EBDM). EBDM is the formalized process of using a specific set of skills to identify, search for interpret clinical scientific evidence used in making care decisions for individuals populations. Topics include developing answerable research questions, research design, data collection analysis, sources of evidence, levels of evidence, critical appraisal of the evidence applying the evidence.

Lecture; 3 SH, 3.00 credits. Summer, Fall.

DHY 4250**Educational Theories & Methods**

Students will explore educational theories as well as didactic clinical teaching learning models appropriate for health sciences educational programs. Emphasis will be placed upon learner-centered, active teaching models. The development use of competency-based student learning outcomes as a guide to instruction will be discussed.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

DHY 432**Directed Study**

This course gives students an opportunity to explore in depth a subject relevant to their interests.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

DHY 442**Evidence Based Dental Hygiene Practice**

Critical analysis application of evidence-based practice to the dental hygiene process of care as it relates to a diverse patient population.

Lecture; 3 SH, 3.00 credits. Summer, Fall.

DHY 446O**Oral Health in Special Care Populations**

Concepts related to providing oral healthcare for special care populations. Emphasis on the assessment, planning, implementation, evaluation of care for individuals with transient or lifelong physical, mental health, medical, or social healthcare needs.

Lecture; 3 SH, 3.00 credits. Summer, Fall.

DHY 460**Capstone Leadership in Dental Hygiene I**

In the final professional year, students complete Capstone project that integrates clinical concepts and expertise with principles of leadership acquired throughout the curriculum, to produce a reflection paper and develop a project related to oral health. In part 1 of the Capstone, students identify a Capstone project, create an outline of the project plan, and identify project mentor(s).

Prerequisites: DHY.310, DHY.323, DHY.350. Corequisites: DHY.350. Lecture; 1 SH, 1.00 credits. Fall, Summer.

DHY 461**Capstone Leadership in Dental Hygiene I**

In the final professional year, students complete Capstone project that integrates clinical concepts and expertise with principles of leadership acquired throughout the curriculum, to produce a reflection paper and develop a project related to oral health. In part 2 of the Capstone, students finalize their culminating project plan, implement the project, and present their project.

Prerequisites: DHY 350, DHY 460. Corequisites: DHY 311, DHY 324. Lecture 2 SH; 2.0 credits. Fall, Spring.

DHY 490O**Internship I**

This one (1) credit online course introduces students to the concepts, practices, roles responsibilities associated with an oral health internship (field assignment). Students work with a faculty mentor to select prepare for an internship from a variety of community field placement sites. Placement opportunities are available in business, public health, research, government education.

Prerequisite: DHY.350 Lecture; 1 SH, 1.00 credits. Varies.

DHY 685**Directed Study for Dental Hygiene**

This course is organized as an individual study directed by a faculty member from the School of Dental Hygiene. Student learning involves self-instruction and/or faculty-assisted instruction using existing or previously known knowledge. Prerequisite: Approval of DHY faculty member School Dean, variable credit of 1-3 credits.

Lecture; 1-3 SH, 1.00-3.00 credits. Summer.

DHY 701**Essentials of Public Health**

Overview of the history, philosophy, scope of public health an orientation to core public health functions. Incorporates the foundation for understanding population health, including the organization, financing, delivery of healthcare services; health policy; public health ethics. Emphasizes the scientific method as a basis for community health practice, program planning evaluation, health policy, research.

Lecture; 3 SH, 3.00 credits. Fall.

DHY 703

Program Planning Evaluation

Develops the comprehension of ability to conduct a community assessment to design, develop, implement, evaluate strategies to improve individual community health. Employs problem-based learning to create project work plans, logic models, logical frameworks, budgets.

Prerequisite: DHY.701 Lecture; 3 SH, 3.00 credits. Fall.

DHY 706

Health Education Health Behavior

Surveys the theoretical basis for social, behavioral, psychological, environmental determinants of individual population health. Addresses health disparities; social inequalities; cultural, gender, economic issues in oral healthcare.

Lecture; 3 SH, 3.00 credits. Fall.

DHY 714

Research Methodology & Statistics

Students will learn fundamental biostatistical study design concepts routinely used in epidemiologic clinical research, with a special emphasis on oral health research. Concepts will be reinforced through critical evaluation of peer-reviewed oral health research. Furthermore, basic data management statistical software tools will be discussed.

Lecture; 3 SH, 3.00 credits. Fall.

DHY 715

Epidemiology

Study of patterns of disease injury in the population. Acquaints student with epidemiologic methods, including measures of disease frequency association, data collection systems, surveillance monitoring, study designs, sampling, control of bias confounding, principles of disease screening.

Prerequisite: DHY.714 Lecture; 3 SH, 3.00 credits. Spring.

DHY 722

Health Policy Finance

Covers key concepts in the formulation implementation of health policy with emphasis on delivery, quality, finance of healthcare for individuals populations. Explores current health policy issues to develop policy analysis advocacy skills.

Prerequisite: DHY.701 Lecture; 3 SH, 3.00 credits. Spring.

DHY 751

Adult Learning Theory Clinical Teaching for Oral Health Professions Education

Overview of adult learning theory with emphasis on linking theory to practice in dental hygiene educational settings. Addresses the transition from clinician to educator the role of the clinical educator in the development facilitation of learning activities to meet the needs of a diverse student population.

Lecture; 3 SH, 3.00 credits. Fall.

DHY 753

Curriculum & Course Design for Health Professions Education

Emphasizes application of adult learning theory best practices in student-centered learning as they apply to development of curricular frameworks, outcomes, competencies along with course design.

Lecture; 3 SH, 3.00 credits. Spring.

DHY 755

Health Professions Education Practicum

Individualized experience to apply principles theories in oral health professions education to practice. Advance approval arrangements are required.

Prerequisites: DHY.751, DHY.753. Lecture; 3 SH, 3.00 credits. Summer.

DHY 827

Administration Management

Provides essential knowledge, skills, values needed to manage an organization, including strategic planning, financial administration, personnel management, marketing, legislative regulatory priorities, communications. Overview of management, leadership, organizational theories.

Lecture; 3 SH, 3.00 credits. Spring.

DHY 830**Evidence-Based Literature Review**

This course will guide the student through identification of a problem development of a research question to focus a literature search. Students will conduct a literature search with critical review of the literature followed by writing a concise synthesis of their topic. Upon completion of the course, students will have a completed draft of a literature review.

Prerequisite: DHY.714 Lecture; 3 SH, 3.00 credits. Fall.

DHY 831**Research Design & Proposal Development**

This course will introduce qualitative, quantitative, mixed methods research design analysis. In addition, students will apply concepts of human subjects' protection in the development of a research proposal. Upon completion of the course, students will have a completed a research proposal.

Prerequisites: DHY.714, DHY.830 Lecture; 3 SH, 3.00 credits. Spring.

DHY 832**Data Analysis & Manuscript Preparation**

The student will implement an oral health, dental hygiene science, or education project developed in DHY831 conduct qualitative and/or quantitative analysis of the data collected. Upon completion of the course, students will have a publishable manuscript conduct an oral presentation of a scholarly project.

Prerequisites: DHY.714, DHY.830, DHY.831. Lecture; 3 SH, 3.00 credits. Varies.

DHY 835**Public Health Practicum**

Individualized public health experience designed to apply curriculum content to practice. Advance approval arrangements are required.

Prerequisites: DHY.701, DHY.703, DHY.706, DHY.714, DHY.722. Lecture; 3 SH, 3.00 credits. Spring.

DHY 840**Advanced Dental Hygiene Practice**

The course will focus on a broad view of alternative practice settings for dental hygienists with attention to scope of practice for oral health professionals with expanded functions. An introduction to alternative practice models including program development, business planning, risk management, legislative advocacy.

Lecture; 3 SH, 3.00 credits. Summer.

DHY 895**Graduate Extension of Thesis**

All degree students are expected to remain continuously enrolled each semester, until thesis requirement for the degree has been completed.

Lecture. Varies.

Diagnostic Medical Sonography (DMS)

DMS 200**Introduction to Diagnostic Medical Sonography**

An introduction to the profession of diagnostic medical sonography the role of the sonographer. Students will learn sonographic terminology, communication, professionalism in the clinical setting, will examine the history of ultrasound, accreditation, professional organizations, registry significance.

Prerequisite: LIB.220. Lecture; 2 SH, 2.00 credits. Fall.

DMS 203**Abdominal Sonography**

This course will cover didactic information regarding normal anatomy physiology, lab values as well as pathology of abdominal, organs, abdominal vasculature superficial organs. Students will correlate both normal anatomy pathology of these organs/organ systems, to their ultrasound appearance. Critical thinking exercises will be included in the course, which will encompass patient presentation, sonographic findings differential diagnoses.

Prerequisites: BIO.210, BIO.210L. Corequisite: DMS.204L or DMS.213. Lecture; 6 SH, 6.00 credits. Fall.

DMS 204L**Sonography Laboratory Procedures I**

This lab course offers beginning hands-on experiential learning in the basics of selected sonography protocols: abdomen, pelvis, individual organs / blood vessels. Under supervision of faculty / clinical coordinator, students will apply

the didactic information integration to practical lab techniques. Cross-sectional anatomy of these structures their appearance on the sonogram also will be emphasized.

Prerequisites: BIO.210, BIO.210L. Corequisite: DMS.203. Laboratory; 4 SH, 4.00 credits. Fall.

DMS 205

Breast Sonography

Students learn the principles fundamentals of breast sonography. Exploration of the physics of sonography as it relates to normal abnormal breast tissue anatomy. Correlation with other imaging modalities surgical techniques in breast pathology is stressed correlated with sonomammography breast implants.

Prerequisites: DMS.203, DMS.204L. Lecture; 3 SH, 3.00 credits. Fall.

DMS 208

Sonographic Physics Instruments I

Students will apply the principles of sound, sound propagation, pulse echo instrumentation, image formation, transducers, system operation for accurate interpretation of sonographic information image methodology. The integration of these theories abstract principles with their practice in clinical applications will be emphasized.

Prerequisites: MAT.141, MAT.261. Lecture; 3 SH, 3.00 credits. Fall.

DMS 213

Scanning Techniques Sonography

Students will receive hands-on, experiential learning. The students learn to use the imaging equipment controls, transducer position relative to the anatomy to be scanned scanning techniques for selected protocols. Under supervision of faculty/clinical coordinator, students will apply the didactic information they have learned into practical lab techniques to complete general sonography protocols.

Corequisite: DMS.203. Lecture; 4 SH, 4.00 credits. Fall.

DMS 214L

Sonography Laboratory Procedures II

This course provides a comprehensive overview of the normal pathological processes of the abdomen, thyroid, transabdominal uterus ovaries allows students to examine their appearance on ultrasound. Requires mastering the sonography protocols.

Prerequisite: DMS.204L. Corequisite: DMS.223. Laboratory; 4 SH, 4.00 credits. Spring.

DMS 218

Sonographic Physics Instruments II

This course continues exploring the theoretical abstract principles that form the technological basis of diagnostic medical sonography. Topics will include Doppler physics instrumentation, artifacts, quality assurance, hemodynamics. Physics applications collaborative learning will be highly emphasized.

Prerequisite: DMS.208. Lecture; 3 SH, 3.00 credits. Spring.

DMS 223

Obstetric Gynecologic Sonography

Students will learn about the normal abnormal female pelvis, including tumors, pelvic inflammatory diseases, congenital pelvic pathology. Applications scanning methods of obstetrical sonography as it pertains to the fetus the mother will be discussed. Pathology associated with pregnancy will be explored in addition to the application of sonography in the diagnosis treatment of infertility.

Prerequisite: DMS.203. Corequisite: DMS.214L or DMS.233L. Lecture; 6 SH, 6.00 credits. Spring.

DMS 224L

Sonography Laboratory Procedures III

This course will offer multiple simulation exercises that will allow students to apply their knowledge practical skills gained in previous coursework. Emphasis will be on correlation between clinical signs/symptoms ultrasound findings, as well as patient interaction. Advanced scanning protocols new technologies will also be discussed.

Prerequisites: DMS.214L, DMS.203, DMS.223. Laboratory; 1 SH, 1.00 credits. Summer.

DMS 225

Echocardiography I

This course introduces the student to the cardiovascular system, anatomical structure, electrocardiography, hemodynamics. In addition, an introduction to 2-dimensional imaging, including heart structure, measurements, physiology as seen by echocardiography, will be discussed.

Lecture; 5 SH, 5.00 credits. Fall.

DMS 225L**Echocardiography Lab I**

This lab course provides hands-on learning. The student becomes familiar with imaging equipment controls, transducer positions relative to anatomy, scanning techniques for a complete transthoracic protocol the utilization of the nonimaging CW transducer. Under supervision, students will apply didactic information to practical lab techniques in echocardiography. The sonographic appearance of cardiac anatomy function will be emphasized with hemodynamics. *Laboratory; 4 SH, 4.00 credits. Fall.*

DMS 230L**Cardiovascular Laboratory Procedures III**

This course will offer multiple simulation exercises that will allow students to apply their knowledge improve practical skills gained in previous coursework. Emphasis will be on correlation between clinical signs/symptoms ultrasound findings, as well as patient interaction. Advanced scanning techniques stress echocardiography will also be discussed. *Prerequisites: DMS.217, DMS.219, DMS.220L. Laboratory; 1 SH, 1.00 credits. Summer.*

DMS 232**Introduction to Clinical Sonography**

This is an introductory course designed to acclimate students to the clinical setting. Throughout the semester, students will be observing interacting with patients members of the healthcare team in a clinical setting. experiential 8 hr/wk ; 1 credit

Prerequisites: DMS.213, DMS.200, DMS.203, DMS.208. Corequisite: DMS.233L. Clinical; 1 SH, 1.00 credits. Spring.

DMS 233L**Advanced Scanning Techniques Sonography**

Students will receive hands-on, experimental learning. Students will build upon skills learned in DMS 213 strengthen their skills, accuracy, image optimization in preparation for clinical rotations. Under supervision of faculty/clinical coordinator, students will apply the didactic information they have learned into practical lab techniques in the general sonography protocols: abdomen complete, renal, aorta, pelvic, thyroid.

Prerequisite: DMS.213. Corequisite: DMS.223. Laboratory; 3 SH, 3.00 credits. Spring.

DMS 235**Cardiac Ultrasound I: Cardiovascular Principles**

This course includes the basic principles of cardiovascular anatomy physiology, embryology, electrophysiology, O2 saturation, pharmacology hemodynamics. The student will learn the complexities of the cardiac cycle including, heart rhythms, cardiac mechanics, event timing, along with intracardiac pressures. In addition, an introduction to normal heart structure measurements as seen by echocardiography will be discussed.

Prerequisites: BIO.210, BIO.210L. Corequisites: DMS.208 DMS.236L. Lecture; 3 SH, 3.00 credits. Fall.

DMS 236L**Cardiac Ultrasound Imaging Lab I**

This course is an introduction to the adult transthoracic protocol, measurements imaging as seen by two-dimensional (2D) echocardiography. The student will become familiar with ultrasound imaging planes used in the diagnosis of disease. In addition, the student will learn how to optimize 2D imaging, equipment controls, transducer positioning. Psychomotor skills will be applied in the cardiac imaging laboratory.

Corequisite: DMS.235. Laboratory; 4 SH, 4.00 credits. Fall.

DMS 245**Cardiac Ultrasound II: Introduction to Heart Disease**

This course is the continuation of Cardiac Ultrasound I with focus on an introduction of various diseases encountered during echocardiography. Topics include 2D, Doppler hemodynamic measurements of cardiomyopathies, heart function, coronary artery disease, valve stenosis, arterial hypertension. Theory, techniques concepts used to assess heart disease will be implemented in the cardiac imaging laboratory.

Prerequisites: DMS.208, DMS.235. Corequisite: DMS.246L. Lecture; 4 SH, 4.00 credits. Spring.

DMS 246L**Cardiac Ultrasound Imaging Lab II**

This course is a continuation of Cardiac Ultrasound Imaging Lab I with emphasis on optimization of the adult transthoracic protocol imaging seen by 2D echocardiography. In addition, the student will be introduced to the application of various Doppler imaging techniques used for the assessment of valvular disease hemodynamics. Psychomotor skills will be applied in the cardiac imaging laboratory.

Prerequisite: DMS.236L. Corequisite: DMS.245. Laboratory; 5 SH, 5.00 credits. Spring.

DMS 250**Selected Topics Sonography**

Students will learn the normal anatomy physiology, pathophysiology, vasculature, the sonographic appearance of selected organs organ systems. These topics will be determined by the faculty will include vascular, pediatrics, breast MSK sonography.

Prerequisite: DMS.203. Corequisite: DMS.223. Lecture; 3 SH, 3.00 credits. Spring.

DMS 260**Echocardiography Congenital Heart Disease**

This course covers pathophysiology ultrasound appearances of complex congenital heart defects as presented in adult populations. Students will learn how to evaluate patients with arterial and/or ventricular septal defects as well as transposition of the great arteries. Students will then progress to assessment of other congenital anomalies such as Tetralogy of Fallot, Eisenmenger's Syndrome, Cor Triatriatum, Ebstein's Anomaly.

Prerequisite: DMS.225. Lecture; 3 SH, 3.00 credits. Spring.

DMS 265**Echocardiography II Sonography**

This course covers pathophysiology of heart disease the role of ultrasound, including stress echocardiograms fast scans performed in the emergency room. Topics will include calculation of valve area with degree of regurgitation evaluation of systolic function. Ultrasound findings associated with multiple cardiac abnormalities, including cardiac tumors will be discussed.

Prerequisite: DMS.225. Lecture; 3 SH, 3.00 credits. Spring.

DMS 266L**Echocardiography II Lab Sonography**

This course is a hands-on laboratory procedure course designed to promote mastery of the basics learned in DMS 225L introduction to the more advanced concepts in transthoracic echocardiography. This course will prepare the student for their clinical education rotation. Students will work on mastering image quality, the speed of their exams accuracy of measurements.

Prerequisite: DMS.225L. Laboratory; 4 SH, 4.00 credits. Spring.

DMS 302C**General Clinical Sonography I**

Consecutive clinical sonography courses are an internship of supervised clinical practicum hours in which the student acquires the knowledge skills relevant to general, vascular, gynecological, and/or obstetrical sonography specialties. Students must achieve specific levels of clinical competence before advancing to the next clinical course. Emphasis will also be on professional interaction patient care.

Prerequisites: DMS.203, DMS.223, DMS.224L. Corequisite: DMS.310. Clinical; 8 SH, 8.00 credits. Summer.

DMS 304**Problem Solving in Physics & Instruments III**

This course is the cumulative physics preparation for the ARDMS credentialing board examination. This course involves interactive applications of physics instrumentation of the ultrasound equipment. Theory application of ultrasound physics principles Doppler are included. Students will review through directed group activities. Students will participate in interactive mock examinations as preparation for the ARDMS examination.

Lecture; 3 SH, 3.00 credits. Summer.

DMS 305**Adult Congenital Heart Disease Cardiac Ultrasound III: Pediatric and**

This course is the continuation of Cardiac Ultrasound II with emphasis on the assessment measurement of patients with congenital heart disease (CHD). Topics include a review of cardiac embryologic formation of the heart, cyanotic heart disease other cardiac defects. A wide variety of complex lesions including palliative procedures related to the repair of CHD will also be discussed.

Prerequisites: DMS.218, DMS.246L, DMS.245. Corequisite: DMS.307L. Lecture; 3 SH, 3.00 credits. Summer.

DMS 306C**Cardiovascular Clinical Sonography I**

The first of three consecutive clinical courses providing an internship of supervised practicum hours. The student utilizes knowledge skills relevant to adult pediatric echocardiography, as well as vascular sonography, learned in classes labs builds upon that knowledge skillset in the clinical setting. Specific levels of clinical proficiency before advancing to the next clinical course.

Prerequisites: DMS.217, DMS.219, DMS.220L. Lecture; 8 SH, 8.00 credits. Summer.

DMS 307L**Cardiac Ultrasound Imaging Lab III**

This course is a continuation of Cardiac Ultrasound Imaging Lab II with an introduction to the transthoracic protocol, measurements imaging in pediatric echocardiography. The student will become familiar with ultrasound imaging planes, measurements Doppler techniques used in the diagnosis of patients with suspected CHD. Both pediatric adult transthoracic scanning protocols will be reinforced throughout this course.

Prerequisite: DMS.246L. Corequisite: DMS.305. Laboratory; 2 SH, 2.00 credits. Summer.

DMS 310**Critical Thinking in Sonography I**

Based on a critical thinking model developed for student sonographers, this the first of two courses that offers the opportunity to integrate the academic technical concepts of diagnostic medical sonography, through interpretation critique of normal abnormal anatomy with correlation of didactic, clinical image information. Emphasis is on communication skills via written oral case presentations critiques on general sonography applications. Prerequisites: DMS 203; DMS 223

Prerequisites: DMS.203, DMS.223. Corequisite: DMS.302C. Lecture; 2 SH, 2.00 credits. Fall.

DMS 312C**General Clinical Sonography II**

This is the second of three consecutive clinical sonography courses providing an internship of supervised clinical practicum hours in which the student acquires the knowledge skills relevant to general, vascular, gynecological, and/or obstetrical sonography specialties. Students must demonstrate increasing proficiency of required ultrasound procedures that will allow them to achieve competency levels in the subsequent clinical course.

Prerequisite: DMS.302C. Clinical; 8 SH, 8.00 credits. Fall.

DMS 315**Pediatric Sonography**

Pediatric Sonography provides sonography students with specialized imaging procedures for the pediatric patient. Topics in pediatric sonography include embryology, anatomy normal variants, function physiology, indications for examination, sonographic imaging (including techniques protocols), pathology pathophysiology. Prerequisites DMS 203, 223.

Prerequisites: DMS.203, DMS.223. Lecture; 3 SH, 3.00 credits. Fall.

DMS 320**Introduction to Vascular Sonography**

This course studies the uses of sonography in the diagnosis of vascular disease. Students will learn vascular anatomy pathophysiology to include cerebrovascular, upper lower extremity venous arterial. Routine vascular protocols will be introduced. Indications, patient history, physical examinations, imaging techniques, vascular pathology will be covered in depth. Prerequisites: DMS 218 , DMS 214L or DMS 246L.

Prerequisites: DMS.218, DMS.214L, DMS.246L. Lecture; 5 SH, 5.00 credits. Summer.

DMS 320L**Introduction to Vascular Sonography Lab**

This course studies the uses of sonography in the diagnosis of vascular disease. Students will learn vascular anatomy pathophysiology to include cerebrovascular, upper lower extremity venous arterial. Routine vascular protocols will be introduced. Indications, patient history, physical examinations, imaging techniques, vascular pathology will be covered in depth.

Prerequisite: DMS.218 (DMS.214L or DMS.246L). Laboratory. Summer.

DMS 325**Cardiac Ultrasound IV: Advanced Echocardiography**

This course is the continuation of Cardiac Ultrasound III with emphasis on advanced echocardiography techniques procedures used in the treatment of various cardiac diseases. Topics include quantitative assessment of cardiomyopathies, strain imaging, 3D imaging, transesophageal imaging, pericardial disease, valve replacement, heart tumors. In addition, assessment of advanced procedures encountered in catheterization electrophysiology lab will be discussed.

Prerequisites: DMS.304, DMS.305. Corequisite: DMS.330C. Lecture; 3 SH, 3.00 credits. Fall.

DMS 330C**Cardiac Ultrasound Practicum I**

This is the first of three clinical rotations allowing the student to apply the cognitive, affective psychomotor skills learned in the program. The student will begin to perform echocardiography under supervision, assisting in the diagnosis of heart disease. The student must achieve specific levels of exam proficiency before advancing to the next practicum.
Prerequisites: DMS.320, DMS.307L. Corequisite: DMS.325. Lecture; 8 SH, 8.00 credits. Fall.

DMS 340
Sonography Internship I

This is the first course of two consecutive clinical sonography courses providing an internship of supervised clinical practicum hours in which the student acquires the knowledge skills relevant to abdominal/small parts, obstetrical gynecological sonography specialties. Students must achieve specific levels of clinical proficiency before advancing to the next clinical course. Prerequisite DMS 203; DMS 223; DMS 232.
Prerequisites: DMS.203, DMS.223, DMS.233L, DMS.232. Clinical; 8 SH, 8.00 credits. Summer.

DMS 350
Echocardiography Internship I

This is the first course of two consecutive clinical sonography courses providing an internship of supervised clinical practicum hours in which the student acquires the knowledge skills relevant to adult echo sonography specialties. Students must achieve specific levels of clinical proficiency before advancing to the next clinical course.
Prerequisites: DMS.266L DMS.265. Lecture; 8 SH, 8.00 credits. Summer.

DMS 355
Advanced Echocardiography

This course is a continuation of the topics covered in Echocardiography II that includes complex cardiovascular pathophysiology. In addition, advanced imaging techniques, as well as 2-dimensional myocardial strain, exercise echocardiography, 3-dimensional imaging, transesophageal echocardiography, will be discussed.
Prerequisite: DMS.265. Lecture; 3 SH, 3.00 credits. Summer.

DMS 401
Cardiac Ultrasound V: Critical Thinking In Echocardiography

Critical thinking in echocardiography is required by the cardiac sonographer to assist the physician in the diagnosis of heart disease. This course is the continuation of Cardiac Ultrasound IV with emphasis on applying the cognitive skills necessary for the diagnosis of various cardiac diseases. Basic advanced echocardiography cases will be reviewed along with comprehensive interpretation.
Prerequisite: DMS.325. Corequisite: DMS.415C. Lecture; 4 SH, 4.00 credits. Spring.

DMS 408
Advanced Doppler

Students learn advanced Doppler color flow; power angio; spectral analysis; basic protocols for carotid artery, duplex evaluation of the upper lower extremities, upper lower extremity venous Doppler protocols, vein mapping.
Lecture; 1 SH, 1.00 credits. Spring.

DMS 410
Critical Thinking in Sonography II

This course will include interpretation critique of normal abnormal anatomy with correlation of didactic, clinical image information using written oral case presentations There will be an emphasis on abdominal, OB/GYN, pediatric, vascular, musculoskeletal general sonography applications. Discussion summarization of pertinent journal articles are included. The student will complete a capstone project.
Prerequisite: DMS.310. Corequisite: DMS.312C. Lecture; 2 SH, 2.00 credits. Spring.

DMS 412C
General Clinical Sonography III

This is the final clinical course of three consecutive clinical sonography courses providing an internship of supervised clinical practicum hours in which the student acquires the knowledge skills relevant to general, vascular, gynecological, and/or obstetrical sonography specialties. Students must demonstrate entry-level competency in mandatory ultrasound specialties.
Prerequisite: DMS.312C. Clinical; 8 SH, 8.00 credits. Spring.

DMS 415C
Cardiac Ultrasound Practicum II

This is the second of three consecutive clinical rotations allowing the students to advance their skills in the application of echocardiography. The student will continue to perform echocardiography under supervision. The student must achieve specific levels of exam proficiency before advancing to the next practicum.

Prerequisite: DMS.330C. Corequisite: DMS.401. Clinical; 8 SH, 8.00 credits. Spring.

DMS 420

Musculoskeletal Sonography

This course will explore the use of ultrasound to evaluate the musculoskeletal system. Students will examine relevant anatomy pathology, sonographic appearance, scanning techniques protocols for ultrasound diagnoses associated with the shoulder, elbow, hand/wrist, knee, foot/ankle conditions.

Prerequisites: DMS.224L, DMS.203, DMS.304. Lecture; 3 SH, 3.00 credits. Spring.

DMS 425C

Cardiac Ultrasound Practicum III

This is the last of three consecutive clinical rotations, that focuses on final preparation of the student to perform echocardiography under minimal supervision or independently. Ongoing competencies will be performed to demonstrate the minimum skills needed to become an entry-level cardiac sonographer. As a requirement for graduation, students must achieve clinical competency in all modalities utilized in adult echocardiography.

Prerequisites: DMS.401, DMS.415C. Corequisite: DMS.431. Clinical; 8 SH, 8.00 credits. Summer.

DMS 426C

Cardiovascular Clinical Sonography III

Consecutive clinical sonography courses are an internship of supervised clinical practicum hours in which the student acquires the knowledge skills relevant to adult, fetal, pediatric echocardiology vascular sonography. Students must achieve specific levels of clinical competence before advancing to the next clinical course. With emphasis on performing proficiency competency with minimal supervision.

Clinical; 8 SH, 8.00 credits. Spring.

DMS 430C

Sonography Internship II Medical Sonography

This is the final course clinical sonography course providing an internship of supervised clinical practicum hours in which the student acquires the knowledge skills relevant to abdominal, obstetrical gynecological sonography specialties. As a requirement for graduation, students must achieve clinical competency on all mandatory ultrasound procedures. Student may include clinical competencies from previous clinical rotation.

Prerequisite: DMS.340. Clinical; 10 SH, 10.00 credits. Fall.

DMS 431

Cardiac Ultrasound Registry Review Sonography

This course focuses on preparation for the CCI/ARDMS credentialing board examinations in echocardiography. A systematic review of the American Society of Echocardiography's national curriculum model for adult pediatric ultrasound will be discussed. In addition, student will participate in discussions utilizing critical thinking problem solving skills, along with performing mock registry examinations.

Corequisite: DMS.425C. Prerequisite: DMS.415C. Lecture; 3 SH, 3.00 credits. Summer.

DMS 440

Advanced Problem Solving in Sonography Medical Sonography

This comprehensive course is designed as a review of the principles practices of diagnostic medical sonography in the abdominal OB/GYN specialties. The course includes problem-solving self-assessment techniques to embed knowledge skills, identify the students' weak areas provide guidelines for independent study to resolve those weaknesses.

Prerequisite: DMS.410. Corequisite: DMS.412C. Lecture; 2 SH, 2.00 credits. Summer.

DMS 441

Advanced Problem Solving in Echocardiography

This comprehensive course will review the basic principles of echocardiography including but not limited to, cardiac anatomy pathophysiology, valvular heart disease, cardiomyopathies, pericardial disease, cardiac tumors adult congenital heart disease. The course will include problem solving self-assessment techniques to embed knowledge, identify the students' weak areas, provide guidelines for independent study to resolve those weaknesses.

Prerequisites: DMS.316C, DMS.410. Lecture; 2 SH, 2.00 credits. Summer.

DMS 443

Advanced Problem Solving in Vascular Sonography

This course is designed as a review of the principles practices of vascular sonography. The course includes problem solving self-assessment techniques to embed knowledge skills, identify the students' weak areas, provide guidelines for independent study to resolve those weaknesses.

Prerequisite: DMS.320. Lecture; 1 SH, 1.00 credits. Summer.

DMS 446**Cardiac Ultrasound Capstone I Sonography**

This course introduces the student to the writing process, techniques, formatting, research required for the presentation of the final project in the Capstone II course. Additional material to be covered includes review of case studies, abstracts, peer-reviewed manuscripts.

Prerequisite: DMS.330C. Corequisite: DMS.415C. Lecture; 1 SH, 1.00 credits. Spring.

DMS 447**Sonographic Analysis Medical Sonography**

Sonographic Analysis facilitates critical thinking providing the student the skills to integrate technological concepts of diagnostic medical sonography with application in clinical situations. The critique analysis will include; image identification, orientation, production quality, critical reasoning skills utilized in interpretation examination performance, the overall significance the acquired sonographic information plays in the management of patient care.

Prerequisites: DMS.203, DMS.223, DMS.250. Corequisite: DMS.340. Lecture; 3 SH, 3.00 credits. Fall.

DMS 452**Echocardiography Analysis Medical Sonography**

This course introduces critical thinking techniques to integrate technological concepts of echocardiography with practical application in clinically pertinent situations. Critique analysis will include: Image identification, production quality, critical reasoning skills utilized in interpretation examination performance and, the significance of the sonographer's role in acquiring information how it relates to the management of patient care.

Prerequisites: DMS.350, DMS.355. Lecture; 3 SH, 3.00 credits. Fall.

DMS 455C**Echocardiography Internship II Medical Sonography**

This is the final course in clinical echocardiography courses providing an internship of supervised clinical practicum hours in which the student acquires the knowledge skills relevant to adult echocardiography. As a requirement for graduation, students must achieve clinical competency in all modalities utilized with adult echocardiography. Student may include clinical competencies from previous clinical rotations.

Prerequisite: DMS.350. Clinical; 10 SH, 10.00 credits. Fall.

DMS 456**Cardiac Ultrasound Capstone II Sonography**

This course is a continuum of Cardiac Ultrasound Capstone I, which allows the student to reflect on the experience throughout the program. The student will provide a presentation based on the information accumulated in Capstone I. The student is encouraged to publish the final analysis in peer-reviewed journal related to Echocardiography.

Prerequisite: DMS.446. Corequisite: DMS.425C. Lecture; 1 SH, 1.00 credits. Summer.

DMS 460**Seminar in Sonography Medical Sonography**

This course is the cumulative preparation for the ARDMS credentialing board examinations in abdominal sonography OB/GYN sonography. Review of anatomy, physiology, patient care, clinical signs symptoms, correlation with other diagnostic testing sonographic presentation of normal, abnormal variants pathologies. Student will participate in discussions utilizing critical thinking problem solving skills mock examinations.

Prerequisites: DMS.203, DMS.223, DMS.340. Corequisite: DMS.430C. Lecture; 2 SH, 2.00 credits. Fall.

DMS 465**Seminar in Echocardiography Medical Sonography**

This course is the cumulative preparation for the ARDMS credentialing board examinations in adult echocardiography. Review of anatomy, physiology, patient care, clinical signs symptoms, correlation with other diagnostic testing sonographic presentation of normal, abnormal variants pathologies. Student will participate in discussions utilizing critical thinking problem solving skills mock examinations.

Prerequisites: DMS.350, DMS.355. Lecture; 2 SH, 2.00 credits. Fall.

DMS 550**Directed Study in Sonographic Physics Instrumentation**

This is a self-directed study to reinforce concepts principles of sonographic physics instrumentation. Students will apply the principles of sound, sound propagation, transducers, system operation for accurate interpretation of sonographic information image methodology. The integration of these theories abstract principles with their practice clinical applications will be emphasized.

Permission of instructor required. Lecture; 1 SH, 1.00 credits. Varies.

DMS 555**Directed Study General Lab Physics Instrumentation**

This self-directed remediation course will allow the student additional hands-on scanning opportunities, as well as one on one professor interaction, in order to develop the skills to allow them to be successful in the program clinical setting. *Permission of instructor required. Lecture; 1 SH, 1.00 credits. Spring.*

Regulatory Affairs and Health Policy (DRA)

DRA 732**Regulatory Affairs Directed Study**

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

DRA 802**Law Health Policy of Drugs Devices**

A study of the legal principles governing the commercial use of drugs devices, including contract, tort, intellectual property, regulatory law. Policy decisions risk allocations from the legal, social, ethical, economic perspectives are emphasized.

Lecture; 3 SH, 3.00 credits. Varies.

DRA 804**FDA Regulatory Affairs**

Examines the pertinent aspects of the Federal Food, Drug, Cosmetic Act as it applies to human drug device development manufacturing. Special consideration is given to the drug approval process, CGMPs, corresponding documentation requirements.

Lecture; 3 SH, 3.00 credits. Varies.

DRA 807**Statistics in Clinical Research: Interpretation Application**

Emphasizes the interpretation application of common statistical procedures found in clinical research. Topics include experimental design, sampling, descriptive statistics, estimation, hypothesis testing, p-values, power, analysis of variance, correlation, regression, nonparametric statistics, analysis of survey data. The use of statistical software for analyzing clinical patient data also is discussed.

Lecture; 3 SH, 3.00 credits. Varies.

DRA 808**Protection of Human Research Subject**

Focuses on the principal ethical regulatory concepts that formally govern the use of human subjects in biomedical behavioral research: subjects' informed consent, researcher-physician conflicting interests, confidentiality, the use of deception/placebos in research, vulnerable research subjects, research in emergency settings, the question of the obligation to participate in biomedical research, scientific misconduct, risks to research.

Lecture; 3 SH, 3.00 credits. Varies.

DRA 809**Health Epidemiology**

Introduces students to the basic concepts principles of epidemiology as they relate to healthcare. Students learn the basic skills needed to critically evaluate epidemiological literature apply these data to healthcare decision making.

Lecture; 3 SH, 3.00 credits. Varies.

DRA 811**Health Policy Development Analysis**

Examines the roles of the federal government the private sector in developing healthcare policy drug regulatory policy in a social, political, economic context. Focuses on healthcare reform, pharmaceutical research, systems of financing healthcare.

Lecture; 3 SH, 3.00 credits. Spring.

DRA 812**Advanced Topics in Regulatory Affairs:**

Examines advanced, specific areas of regulatory affairs with special emphasis on in-depth analysis of emerging issues in agency developments, interagency agreements, international conferences. A single course coordinator facilitates discussion among students invited lecturers to explore the depth breadth of their respective fields.

Prerequisite: DRA.804 Lecture; 3 SH, 3.00 credits. Varies.

DRA 814**Data Analysis Presentation Capabilities in Regulatory Affairs**

This course is designed for students to conduct a research capstone project pertinent to professional interests. Students will practice research skills demonstrate the process of scientific writing of a manuscript suitable for submission to a peer-reviewed journal. By the end of this course, students will present an abstract, paper, poster. Additionally, students will present findings to MCPHS University faculty, peers, staff, community partners.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

DRA 815**International Regulatory Affairs**

Examines international regulations governing medical product development commercialization.

Corequisite: DRA.804 Lecture; 3 SH, 3.00 credits. Fall, Spring.

DRA 816**Principles of Quality Assurance Quality Control**

Examines all aspects of quality assurance quality control, including current good manufacturing practices (CGMPs), as they apply to the development commercialization of medical products.

Prerequisite: DRA.804. Lecture; 3 SH, 3.00 credits. Fall, Spring.

DRA 817**Development Production of Medical Devices**

Examines all aspects of development commercialization of medical devices, including the quality system regulations (QSRs).

Prerequisite: DRA.804. Lecture; 3 SH, 3.00 credits. Varies.

DRA 818**The Law of Healthcare Compliance**

Students will learn the foundational principles of the law underlying Healthcare Compliance be able to recognize potential "red flags" regarding issues that should be brought to the attention of the Legal or Compliance Office. Students will examine the complex constantly evolving practice of Healthcare Compliance learn to analyze apply the law.

Lecture; 3 SH, 3.00 credits. Varies.

DRA 850A**ST: Pharmaceutical Advertising Labeling**

Lecture; 3 SH, 3.00 credits. Varies.

English Language Services

ELA 041**Academic Bridge: Biology I**

Students strengthen their academic language study skills using the content of BIO 151, an introductory college biology course in which the student is concurrently enrolled. Among the skills developed are critical reading of academic course materials, note-taking, test-taking, study strategies, giving oral presentations. Students are introduced to program resources, college policies, the Center for Academic Success Enrichment resources, professional practices, co-curricular opportunities.

Corequisite: BIO.151. Lecture; 3 SH, 3.00 credits. Spring.

ELA 042**Academic Bridge: Anatomy & Physiology I**

Students strengthen their academic language study skills using the content of BIO 110, an introductory college anatomy physiology course in which the student is concurrently enrolled. Among the skills developed are critical reading of academic materials, note-taking, test-taking, study strategies, giving oral presentations. Students are introduced to program resources, college policies, the Center for Academic Success Enrichment resources, professional practices, co-curricular opportunities.

Corequisite: BIO.110. Lecture; 3 SH, 3.00 credits. Fall.

ELA 043**Academic Bridge: Intro to Psychology**

Students strengthen their academic language study skills using the content of LIB 120, an introductory college psychology course in which the student is concurrently enrolled. Among the skills developed are critical reading of academic course materials, note-taking, test-taking, study strategies, giving oral presentations. Students are introduced

to program resources, college policies, the Center for Academic Success Enrichment resources, professional practices, co-curricular opportunities.

Corequisite: LIB.120. Lecture; 3 SH, 3.00 credits. Spring.

ELA 044

Academic Bridge: Human Development

Students strengthen their academic language study skills using the content of BEH 352 Human Development Through the Life Span in which the student is concurrently enrolled. Among the skills developed are critical reading of academic course materials, note-taking, test-taking, study strategies, giving oral presentations. Students are introduced to program resources, college policies, the Center for Academic Success Enrichment resources, professional practices, co-curricular opportunities.

Corequisite: BEH.352. Lecture; 3 SH, 3.00 credits. Spring.

ELA 055

Academic Writing

Students develop critical reading skills through engaging with nonfiction texts from the health sciences disciplines. Students complete basic rhetorical analysis structure paragraphs short essays in a variety of modes. Students integrate sources into their writing as well as refine their grammar writing mechanics. Students develop use advanced academic vocabulary throughout all readings writings.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

ELA 065

Academic Listening Speaking

Students acquire listening speaking strategies skills for successful academic study. By examining various academic topics including the health sciences, students enhance their listening comprehension, improve the clarity comprehensibility of their speech, strengthen their knowledge of academic vocabulary. Students learn strategies for engaging in leading class discussions, delivering academic presentations, taking notes.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

ELA 070

LIB 111 Language Lab

Students strengthen their academic language study skills using the content of LIB 111 Expository Writing I in which the students are concurrently enrolled. Students improve their comprehension analysis of academic course materials engage in the writing process to improve their idea development, organization, grammatical accuracy.

Corequisite: LIB.111. Lecture; 1 SH, 1.00 credits. Varies.

ELA 071

LIB 112 Language Lab

Students strengthen their academic language study skills using the content of LIB 112 Expository Writing II, in which students are concurrently enrolled. Students develop their ability to critically read academic course materials, to use the writing process to improve written assignments, to effectively engage in classroom discourse.

Corequisite: LIB.112. Lecture; 1 SH, 1.00 credits. Varies.

ELA 075

Communication for Pharmaceutical Sciences I

To prepare for participation in academic reading writing assignments, students work on developing academic reading strategies such as previewing, annotating, outlining, summarizing through reading juried journal articles in the field of pharmaceutical sciences. Students write laboratory reports, engage in class discussions, participate in cooperative group work. Students also acquire basic library skills.

Lecture; 3 SH, 3.00 credits. Fall.

ELA 076

Communication for Pharmaceutical Sciences II

To prepare for graduate-level reading writing assignments, students read, summarize, critique juried journal articles in the field of pharmaceutical sciences. Students master the academic writing process of planning, drafting, revising, editing through the production of a literature review. Students engage in group presentations, acquire advanced library skills, present a poster based on their research.

Lecture; 3 SH, 3.00 credits. Spring.

Healthcare Management (HCM)

HCM 205

Healthcare Management Career Exploration Management

In this course students will learn about the diversity of careers available for healthcare management graduates. Utilizing assessment tools from the University's Center for Professional Career Development, students will evaluate their skills competencies readiness for these careers

Lecture; 1 SH, 1.00 credits. Fall.

HCM 210

Global Healthcare Strategy

This course establishes a strategic framework for students to evaluate the challenges issues in global healthcare, comprehend variables thoroughly consider the unique perspective responsibilities of stakeholders. The course facilitates understanding of globalization the way in which different "borders", including geographic, political cultural, impact healthcare business.

Lecture; 3 SH, 3.00 credits. Fall.

HCM 215

Economics Financing of Healthcare

This course addresses the mechanisms of finance in the changing economic environment of healthcare. Students are introduced to the application of economic principles theory in healthcare health systems financing. Topics covered include health policy, regulation, insurance, market orientations, efficiency, incentives, supply demin healthcare.

Prerequisite: (MAT.144, MAT.151 or MAT.171). Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 220

Organizational Dynamics in Healthcare

Students will experience interpret organizational theory from the structural, cultural organizational learning perspectives. Students will perform in-depth analyzes of organizational attributes determine organizational capacity for improved organization functioning. Students will be challenged to think systemically in response to specific organizational issues develop core competencies to better manage organizational behavior.

Prerequisite: HCM.102. Lecture; 3 SH, 3.00 credits. Summer, Fall.

HCM 225

Principles of Marketing

Factors influencing marketing decisions are explored from organizational consumer perspectives. Market research, basic marketing considerations for products services are reviewed. Students develop a marketing plan taking into account the increasingly global competitive marketplace combined with their evaluation of the organization the needs of its customers.

Prerequisites: LIB.111, LIB.120. Lecture; 3 SH, 3.00 credits. Spring.

HCM 230

Introduction to Finance

The course covers key language terminology, time-value of money, financial markets securities, financial statements, financial analysis, risk return, valuation of stocks bonds, capital budgeting valuation, cost of capital capital structure, working capital management, dividend policy international finance. Students are required to apply the various financial tools understhow they impact financial decision-making.

Prerequisites: LIB.111, LIB.120. Lecture; 3 SH, 3.00 credits. Spring.

HCM 235

Business Information Systems

Students are introduced to the information system explore the importance in the context of businesses, decision-making, planning. The course includes important topics related to IS, such as the drivers of IS, database concepts, IS development, the types of systems used in organizations.

Prerequisites: LIB.111, LIB.120. Lecture; 3 SH, 3.00 credits. Fall.

HCM 240

Accounting I - Financial Accounting

This course surveys business accounting concepts, including generally accepted accounting principles, financial statement analysis, general decision-making approaches. Students participate in the application of accounting principles, evaluation of internal controls, make recommendations based on reported financial data.

Prerequisite: (MAT.144, MAT.151 or MAT.171). Lecture; 3 SH, 3.00 credits. Spring.

HCM 245

Introduction to Healthcare Business

Students survey fundamental business concepts drawing critical distinctions between traditional business healthcare organizations. Students evaluate case studies throughout the course establishing the context of the current business environment the challenges uncertainty surrounding business in healthcare to develop a framework for their comparisons.

Lecture; 3 SH, 3.00 credits. Spring.

HCM 255

Business & Career Communications

Students actively explore the role of professional communications networking in identifying, seeking, developing internship career opportunities. Developmental assignments focus on establishing professional career materials, conducting informational interviews, identifying opportunities to assess workplace cultures fit, refining interpersonal team communications, creating delivering professional presentations, demonstrating leadership, addressing issues of work life balance.

Prerequisite: LIB.111. Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 285

Digital Healthcare Concepts

This course develops tests knowledge of digital healthcare delivery, using a collaborative learning model. Technology, its applications, possible barriers to its adoption, along with the evolving definitions of digital health healthcare delivery, are examined. Basic concepts are introduced along with methods for identifying critically evaluating the utility the relationship of technology with the engagement of patients.

Prerequisites: LIB.112, LIB.220. Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 300

Us Healthcare: Organization Delivery

Students explore the US healthcare system tracing its development through policy, reforms, evolving reimbursement schemes to gain insight on the intricate relationships amongst payers, providers, delivery organizations. Students participate in active case analyses to gain perspective on the current state of the healthcare system evaluate the implications of technology, cost, quality access.

Prerequisites: LIB.112, (LIB.120 or LIB.133). Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 310

Global Health Law Strategy

This course introduces students to political, economic social concepts that define global health law policy, along with key organizations stakeholders. It provides insights into governance challenges associated with global law policy. It also focuses on international standards for health protection; included are health security threats, medical-ethical standards adequacy of international health law for public health.

Lecture; 3 SH, 3.00 credits. Fall.

HCM 318

Leadership Development for Healthcare Managers

Students evaluate the impact of law in healthcare delivery by discussing development through time, establishing the foundational concepts applications in business, analyzing current challenges from legal ethical perspectives. Course focuses include the application interpretation of regulations, establishing upholding contracts, forms of negligence liability, privacy confidentiality, malpractice, employment laws, risk reporting.

Prerequisite: HCM.300 or PSB.320. Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 320

Managing Supervising Employees

Students develop an understanding of the supervisory role in contemporary healthcare organizations. The course focuses on the identification of necessary skills competencies for effective supervision, including goal setting, problem-solving, staffing, conflict management, performance evaluation, employee development.

Prerequisite: HCM.245. Lecture; 3 SH, 3.00 credits. Fall.

HCM 325

Completion Healthcare Projects From Conception to Project Leadership: Successfully Leading

This course systematically guides students through the complex task of leading projects within healthcare organizations. Students develop knowledge behavioral skills to lead teams, manage resources, schedules, scope of work. Students learn to decompose simplify their projects, with special attention given to unique challenges of project leadership such as accessing resources they do not control change resistance.

Prerequisites: LIB.112, MAT.261. Lecture; 3 SH, 3.00 credits. Fall.

HCM 335

Accounting II - Cost Accounting

This course is a continuation of Accounting I. Topics include corporate accounting financial statements, long-term liabilities, cash flow financial statement analysis, managerial accounting, budgeting, using financial data to make business decisions.

Prerequisite: HCM.240. Lecture; 3 SH, 3.00 credits. Summer, Fall.

HCM 340

Human Resource Management

Students will examine the role of human resource management (HRM) in healthcare organizations how HRM programs contribute to overall organizational effectiveness. Students learn theories practices associated with the core HRM functions of recruitment, selection, development, appraisal, retention. This course also familiarizes students with the complex legal regulatory environments in which healthcare organizations operate.

Prerequisites: LIB.120, LIB.112. Lecture; 3 SH, 3.00 credits. Spring.

HCM 352

Quality Improvement

Students will explore continuous quality improvement through case studies in five focus areas: PDSA cycles applied tools, organizing for continual improvement, educational social applications of CQI, assessment, incentives for CQI, the process of improvement through applied research.

Prerequisite: HCM.245 or PSB.235. Lecture; 3 SH, 3.00 credits. Fall.

HCM 354

Internship Preparation

Students collaboratively strategize approaches to obtaining internships that are aligned with professional goals career aspirations. Faculty guidance support is provided as students actively search, submit applications participate in internship interviews. Students collaborate to identify interpersonal leadership skills, practice active listening, develop the "soft skills" employers are seeking.

Prerequisite: HCM.300 or PSB.320. Lecture; 1 SH, 1.00 credits. Spring.

HCM 355

Internship - Healthcare Management

This course provides experiential education enabling students to apply didactic learning in practical work settings to reflect upon their experiences. Through direct observation evaluation, student achievements are monitored in relation to learning performance goals developed at the beginning of the internship with the course faculty internship supervisor. Students work domestically or internationally depending on career interest

Prerequisite: HCM.354. Lecture; 1-9 SH, 1.00-9.00 credits. Spring.

HCM 360

Law Compliance for Healthcare Business

Students evaluate the impact of law in healthcare delivery by discussing development through time, establishing the foundational concepts applications in business, analyzing current challenges from legal ethical perspectives. Course focuses include the application interpretation of regulations, establishing upholding contracts, forms of negligence liability, privacy confidentiality, malpractice, employment laws, risk reporting.

Prerequisites: LIB.112 LIB.120. Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 402

Operations Management

Students will: gain understanding of operations management importance of operations function in health care organizations, utilize learned operational analysis skills to make business decisions, prepare to become effective operations leaders/managers, lead participate in project development management. Project management skills are highly desired for career operations managers, learn skills necessary for successful careers in healthcare management.

Prerequisites: LIB.120, LIB.112, HCM.215. Lecture; 3 SH, 3.00 credits. Varies.

HCM 410

Supply Chain Management

Students will: gain overall understanding of supply chain management the role of all stakeholders in health care organizations; develop supply chain management skills that help solve organizational business challenges; be prepared to become effective leaders, managers, supply chain decision makers; learn skills necessary for successful careers in healthcare management.

Prerequisite: HCM.300 or PSB.320. Lecture; 3 SH, 3.00 credits. Summer, Fall.

HCM 430

Health Services Marketing

Students will collaboratively research develop a comprehensive health services marketing plan based on the use of internal external assessment tools, competitive analysis. The course focuses on developing marketing strategy that delivers a conceptually appropriate marketing mix, identifying explaining marketing actions, establishing critical communications, identifying factors of success appropriate measures.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 432

Global Comparative Healthcare Undergraduate Seminar

Contemporary issues in healthcare delivery, health policy, business are explored through preliminary research, field experience, reflection on US-based healthcare system practice. Specific attention is paid to equity, intercultural issues, finance, customs, comparative health policy. Students evaluate translate differences in practice, culture, outcomes amongst the host country, US, similar countries health systems.

Prerequisites: HCM.255 HCM.300. Lecture; 3 SH, 3.00 credits. Varies.

HCM 465

Global Health Capstone

Students culminate didactic learning experiential learning through identification in-depth research on a complex problem of practice in a global setting. The independent research demonstrates the application of knowledge from previous coursework, as well as information literacy, critical analysis, dissemination skills.

Prerequisite: HCM.355. Lecture; 6 SH, 6.00 credits. Fall, Spring.

HCM 490

Healthcare Management Capstone

This course considers the role of strategic planning in establishing organizational direction. A major focus of the class is on the leader's role in setting the organization mission, vision, strategic direction. We consider the use strategy as a means of establishing priorities, allocating resources, strengthening operations, ensuring that employees other stakeholders are working toward common goals.

Lecture; 3 SH, 3.00 credits. Varies.

HCM 532

Directed Study

Lecture; 1-6 SH, 1.00-6.00 credits. Varies.

HCM 701

Introduction to Business Management

Students are introduced to management theory in the context of healthcare organizations health systems. Course topics include change management, entrepreneurship innovation, operational control, strategic planning evaluation, global perspectives diversity, an introduction to the application leadership. Students will discuss the role of management leadership in a collaborative workplace, focusing on teams, tasks, motivation.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 710

Health Systems: Policy & Management Perspective

Students study the complexities of the US healthcare system through historical evolution, policy, various reforms to gain insight on the intricate relationships amongst payers, providers, delivery organizations. Students participate in active case analyses apply managerial tools concepts to gain perspective on the system evaluate managerial decision-making opportunities potential outcomes.

Lecture; 3 SH, 3.00 credits. Fall.

HCM 715

Healthcare Economics

This course addresses the changing economic environment of healthcare, introducing students to the application of economic theory to healthcare health systems. Topics covered include health policy, regulation, insurance, market orientations, efficiency, incentives, supply demin healthcare.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 718

Leadership in Healthcare Administration

Students explore theoretical practical applications of leadership in healthcare, evaluating leadership as a component of management organizational development. The course focuses include identification of personal strengths attributes, application of leadership theories to decision-making, developing leadership skills to meet professional organizational needs. Students use case studies, applied research, peer-review, reflection activities to develop leadership skills.
Prerequisite: HCM.701 or HCM.710. Lecture; 3 SH, 3.00 credits. Summer, Fall.

HCM 720

Organizational Dynamics

Students experience interpret organizational theory from the structural, cultural, organizational learning perspectives. Students perform in-depth analysis of organization attributes determine organizational capacity. Students will be challenged to think systemically in response to specific organizational issues develop core competencies for the edification of learning organizations.

Prerequisite: HCA.710 or PBH.710. Lecture; 3 SH, 3.00 credits. Summer.

HCM 722

Business Statistics Care

The collection, evaluation, summation business data will be explored. The course focuses on applied statistical analysis, interpretation, representation using standard statistical methods, including descriptive statistics, probability distributions, random variables. The testing of hypotheses, estimation, regression correlation analyses are carried out in the context of managerial informed decision-making.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 730

Operations Supply Chain Management

Students are introduced to operations supply chain management for manufacturing service-oriented organizations through a case-based approach requiring the application of analytical tools approaches focused on systematic informed decision-making. Students will collaboratively evaluate service designs organizational capacity, design implement quality controls, forecast demmake adjustments to operations planning, inventory management.

Lecture; 3 SH, 3.00 credits. Summer.

HCM 732

Graduate Directed Study Healthcare Admin

Supervised study in health science involving a survey of existing knowledge, self-instructed or faculty assisted inquiry into previously published data or methodologies or other faculty approved study of a non-research nature. Prerequisite: Approval of HSC Program Director, Faculty and/or School Dean, variable credit of 1-6 credits.

Permission of instructor required. Lecture; 1-6 SH, 1.00-6.00 credits. Fall.

HCM 734

Value-Based Healthcare Capital

Students develop a comprehensive definition of value-based care drawing context from current historical perspectives, patient populations risk management. Economic perspectives, cost containment, financial implications, the charges in organizational structures are discussed. Future considerations analyzed including care coordination, use of technology, quality, safety.

Prerequisite: (HCM.701, HCM.710 or PBH.710). Lecture; 3 SH, 3.00 credits. Fall.

HCM 738

Revenue Cycle Management Care

Students explore the revenue cycle beginning with the patient encounter, the translation of that encounter to billable elements, transmission of claims, the management of claims, including denials. Emphasis is added to the changing landscape of payments with value-based care other considerations such as technology the importance of patient experience.

Prerequisite: (HCM.701, HCM.710, PBH.710, or HSC.801). Lecture; 3 SH, 3.00 credits. Fall, Spring.

HCM 740

Managing Teams, Performance, Human Capital

Students survey the essential functions of human resources management establish the relationship between human capital, high performing teams, the attainment of organizational goals. Students participate in case-based discussions that stress legal ethical issues, recruiting, hiring onboarding of talent, assessing rewarding performance.

Lecture; 3 SH, 3.00 credits. Fall.

HCM 742

Finance Accounting for Healthcare Organizations

Case studies provide context for the application of basic accounting finance in healthcare organizations. Budgeting revenue management, as well as the identification categorization of expenses, assets, liabilities are covered. Analysis of financial statements ordinary budget tools, ratios documents are explored with a special focus on healthcare organizations.

Prerequisite: HCM.701 or HCM.710. Lecture; 3 SH, 3.00 credits. Fall.

HCM 750A

ST: Clinical Informatics Data Analysis

Lecture; 3 SH, 3.00 credits. Varies.

HCM 750C

ST: Strategic Planning for HC Orgs

Students will develop the knowledge skills to effectively engage the strategic planning process in the rapidly changing environments facing healthcare organizations. Analyzing the environment, setting organizational direction, formulating strategy, implementation are discussed. Assignments will incorporate students' analysis evaluation skills by requiring them to apply innovative strategies best practices to contemporary healthcare case studies.

Lecture; 3 SH, 3.00 credits. Varies.

HCM 750D

ST: Data Collection, Analysis & Rep In HC

This course will examine various aspects of data collection analysis to address complex healthcare challenges with informed decision-making. Proper data collection techniques, critical evaluation of data sources, data sufficiency are discussed. Best practices for developing visualizations, the process of cognition translation of visual displays, as well as ethical standards are explored through assignments.

Lecture; 3 SH, 3.00 credits. Varies.

HCM 752

Quality Improvement in Healthcare

Students explore continuous quality improvement through case studies in five focus areas, PDSA cycles applied tools, organizing for continual improvement, educational social applications of CQI, assessment incentives for CQI, the process of improvement through applied research. Students will complete weekly case analyses directly related to the weekly topic present a scholarly project.

Prerequisite: (HCA.710, HCM.710 or PBH.710). Lecture; 3 SH, 3.00 credits. Fall.

HCM 760

Applied Business Law & Ethical Practice

The legal system, development evolution of law, application interpretation of statutes, regulatory process are discussed. The influence of federal state government, corporate structures, requirements for compliance are evaluated. Liability, negligence, risk are discussed along with consent, contracts, compliance, major healthcare legislation. Patient rights ethical responsibilities are debated.

Prerequisite: HCM.701 or HCM.710. Lecture; 3 SH, 3.00 credits. Fall.

HCM 763

Conflict, Crisis, Communication In Health Care

Conflict in interpersonal organizational contexts is explored from the position of paradox consideration for opposing views. Crises conflicts are also viewed evaluated in the framework of a learning organization considering genuine learning opportunities. Students will work in interdisciplinary teams to assess present crisis and/or conflict relevant communication plans.

Lecture; 3 SH, 3.00 credits. Fall.

HCM 770

Population Health Risk Management

Students work in teams to effectively collaborate coordinate activities in population health risk management. Particular emphasis will be placed on identification of at-risk populations, evidence-based practice, community engagement, methods to share outcomes. The course will also address cost containment, provision of effective equitable interventions to reduce risk in diverse populations.

Corequisite: (HCM.701, HSC.701, PBH.710 or HCM.710). Lecture; 3 SH, 3.00 credits. Spring.

HCM 788

Budgeting Planning in Healthcare

Students will learn about budgeting in healthcare organizations from the operational level through strategic budget planning. Key concepts in financial planning, accounting, budgeting will provide students with the knowledge needed

to create analyze organizational budgets. Students will apply their knowledge skills to assignments including budget development, justification, presentation; along with interactive weekly discussions.

Prerequisite: HSC.801. Lecture; 3 SH, 3.00 credits. Fall.

HCM 806

Strategic Planning for Health Organizations

Students develop knowledge skills to engage effectively the strategic planning process in the rapidly changing environments facing healthcare organizations. Analyzing the environment, setting organizational direction, formulating strategy, implementation are discussed. Assignments will incorporate students' analysis evaluation skills by requiring them to apply innovative strategies best practices to contemporary healthcare cases.

Lecture; 3 SH, 3.00 credits. Spring.

HCM 815

Innovation Entrepreneurship in Healthcare

Students explore theoretical practical applications of innovation entrepreneurship in healthcare. Current future healthcare needs are investigated through course discussions supported by research. Students will propose innovative business ideas as potential solutions to identified needs, develop a business plan/model, pitch their ideas to peers through course presentations. Students use case studies, discussions, course materials, peer-review to develop entrepreneurial skills.

Prerequisite: HCM.701 or HCM.710. Lecture; 3 SH, 3.00 credits. Spring, Summer.

HCM 820

Informatics Data Analysis Perspective

Students develop working knowledge of approaches used to describe visualize population characteristics the statistical tests used to identify associations between variables within datasets. This course introduces the use of "bigdata" to answer healthcare access cost questions. Additionally, students will utilize Tableau other tools to build reports dashboards displaying information based on archival billing data.

Prerequisite: HCM.710 or PBH.710. Lecture; 3 SH, 3.00 credits. Fall.

HCM 821

Clinical Informatics Data Analysis

Using electronic health records (EHR) case studies, students develop familiarity with clinical administrative data structures processes. Using clinical examples, students collect, query, evaluate interpret clinical administrative data from the EHR. The culminating project includes applying critical data analysis the development of comprehensive compelling visualizations in support of complex decision-making in clinical settings.

Prerequisite: (HCM.710, PBH.710 or HSC.801). Lecture; 3 SH, 3.00 credits. Spring.

HCM 825

Managing Delivering Engaged Healthcare

Students explore patient-centered care, patient-centered decision-making, patient engagement from educationalbehavioral perspectives. Students research present a scholarly paper exploring relevant patient or provider perspectives on chronic illness the evolving role of the patient in the management of their health their participation in health care encounters.

Prerequisite: HCA.710 or PBH.710. Lecture; 3 SH, 3.00 credits. Spring.

HCM 828

Data Collection, Analysis, Representation in Healthcare

This course will examine various aspects of data collection analysis to address complex healthcare challenges with informed decision-making. Proper data collection techniques, critical evaluation of data sources, data sufficiency are discussed. Best practices for developing visualizations, the process of cognition translation of visual displays, as well as ethical standards are explored through assignments.

Lecture; 3 SH, 3.00 credits. Spring.

HCM 832

Global Comparative Healthcare Seminar Care

Contemporary issues in healthcare delivery, health policy, business are explored through preliminary research, field experience, reflection on US-based system practice. Specific attention is paid to equity, intercultural issues, finance, customs, comparative health policy. Students evaluate translate differences in practice, culture, outcomes amongst the host country, US, similar countries health systems.

Prerequisite: HCM.710 or HSC.801. Lecture; 3 SH, 3.00 credits. Varies.

HCM 842**Medical Practice Management & Leadership**

Students explore evaluate fundamental management concepts for medical practices, including practice operations, revenue cycle, risk management, patient experience. Contemporary issues in practice management are presented discussed in select guest lecturers. Students apply fundamental principles develop essential skills required to negotiate the "business" of medicine to become influential leaders as medical practice managers.

Prerequisite: HCM.710. Lecture; 3 SH, 3.00 credits. Summer.

HCM 845**Informed Decision Making for Healthcare Executives**

The use of evidence in organizational decision-making is explored from a critical perspective to reveal common challenges, including data quality, parity, timeliness. Students culminate the class experience with assignments focused on translating identified challenges class experiences to the delivery of evidence-based managerial decisions that are clearly explained justified by a thorough analysis presentation of data.

Prerequisite: HSC.801. Lecture; 3 SH, 3.00 credits. Fall.

HCM 850**Healthcare Management Capstone**

Strategic management theory, models, techniques are applied in the development presentation of a strategic plan addressing a complex problem in healthcare. Strategic change management is a focus throughout. Knowledge from previous coursework, as well as research analytical skills, are applied in the analysis of organizational strategy, position, competition.

Prerequisites: (HCA.710, PBH.710 or HCM.710), (HCA.720 or HCM.720), HCM.763. Lecture; 3 SH, 3.00 credits. Summer.

HCM 871**Innovating Disrupting Leading Change In Healthcare**

This course covers technical innovations in healthcare delivery novel approaches to systemic challenges in uncertain complex organizational environments. Course assignments focus students on actively developing, refining, demonstrating collaborative cross-disciplinary leadership that establishes the vision for enduring change that meets professional ethical standards while maintaining fiduciary responsibilities.

Lecture; 3 SH, 3.00 credits. Fall.

HCM 874**Strategic Financial Management Accountability**

Students will develop operational knowledge of financial management skills designed to promote organizational success. By exploring challenges critical issues facing healthcare organizations students will develop skills to implement financial management strategies in the changing healthcare environment. Application of financial management concepts to real-world decisions promote analytical skill development.

Lecture; 3 SH, 3.00 credits. Spring.

HCS 101**Introduction to US Healthcare**

This course will be open only to high school students. Students will learn introductory concepts that contribute to the United States Healthcare system by discussing understanding settings of healthcare delivery, the role of healthcare professionals, the role of government in the healthcare system , how healthcare is paid for strengths weaknesses of the system.

Lecture; 3 SH, 3.00 credits. Spring.

HCS 101E**Introduction to US Healthcare**

This course will be open only to high school students. Students will learn introductory concepts that contribute to the United States Healthcare system by discussing understanding settings of healthcare delivery, the role of healthcare professionals, the role of government in the healthcare system , how healthcare is paid for strengths weaknesses of the system.

Lecture; 3 SH, 3.00 credits. Spring.

Health Sciences (HSC)

HSC 110

Health Sciences Seminar I

This introductory course is designed for learners in the health sciences major provides an introduction to health care delivery systems the health sciences industry. The course focuses on essential core qualities competencies required of healthcare professionals those working in the health industry. The course also introduces emphasizes successful strategies for health career development.

Lecture; 1 SH, 1.00 credits. Spring.

HSC 210

Health Sciences Seminar II

This introductory course is the second seminar for health sciences majors. The course continues the focus on essential core qualities competencies required of healthcare professionals those working in the health industry. The course also introduces the concentrations in the major, potential minor programs, strategies on choosing learning pathways courses of study applicable to health career goals.

Prerequisite: HSC.110. Lecture; 1 SH, 1.00 credits. Fall.

HSC 2200

Personal Health Wellness

Before students can eventually care for communities and/or individuals, they should learn about taking care of themselves holistically. Students will be introduced to the eight domains of wellness - emotional, environmental, financial, intellectual, occupational, physical, social, spiritual - with a focus on identifying tools to be used to foster their personal health wellness.

Prerequisite: HSC.110. Lecture; 3 SH, 3.00 credits. Summer, Fall.

HSC 301

Health Promotion

Students relate major models theories of the field of health promotion to strategies for increasing health-enhancing behaviors, decreasing health risk behaviors, creating environments supportive of healthy lifestyles.

Lecture; 3 SH, 3.00 credits. Fall.

HSC 3010

Health Promotion

Students relate major models theories of the field of health promotion to strategies for increasing health-enhancing behaviors, decreasing health risk behaviors, creating environments supportive of healthy lifestyles.

Lecture; 3 SH, 3.00 credits. Fall.

HSC 305

Navigating Healthcare Systems

This course is focused on patient-centered care navigating US healthcare systems from the patient perspective. Students will also consider professional provider perspectives as members of the healthcare workforce.

Lecture; 3 SH, 3.00 credits. Fall.

HSC 308

Healthcare Leadership & Teamwork

This course focuses on preparing students for leadership roles in the health sciences healthcare industry. Special emphasis is on leadership the importance of fostering interprofessional teamwork collaboration to advance mission outcomes in improving individual population health.

Lecture; 3 SH, 3.00 credits. Fall.

HSC 3100

Healthcare Informatics

Provides an overview of the role of information systems in healthcare organizations. Students correlate these roles to the integration of evidence-based practice research into clinical decision making determine the influence of information systems on health outcomes.

Lecture; 3 SH, 3.00 credits. Varies.

HSC 3150

Planning Health Education Promotion Programs

This course provides practical exposure to the process of program planning by organizations that provide health education. Students will study needs assessment, goal setting, commonly used program planning models, the

marketing mix, behavior change models, program evaluation. Students will assume the role of a program planning team to create viable program plans for local public health entities.

Lecture; 3 SH, 3.00 credits. Varies.

HSC 3200

Writing for Health Science Professionals

Health science professionals must present their work clearly, technically, competently for colleague patient comprehension. Students will review the writing process with an emphasis on writing better sentences paragraphs, choosing better words, editing, proofreading. They will learn how to write research technical papers, position papers, patient case studies / histories, manuscripts for publication, a personal statement.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Fall.

HSC 3300

Advocacy Leadership in Health Education Promotion

Advocating for leading initiatives related to health education promotion is necessary in the current healthcare climate. Students will learn about the fundamental concepts of advocacy, leadership, management, administration within health education promotion. Students will then practice their newfound skills by planning, conducting, assessing an advocacy project on a relevant topic in healthcare.

Prerequisites: LIB.112, LIB.220. Lecture; 3 SH, 3.00 credits. Varies.

HSC 340

Health & Safety

This course covers a variety of topics issues related to health safety. Topics include personal, occupational, environmental health safety, as well as principles of patient safety. Students will plan, propose, advocate for promoting maintaining a culture of health safety at home, in communities, in the workplace, in healthcare delivery.

Lecture; 3 SH, 3.00 credits. Spring.

HSC 345

Emergency Medical Technician

Students learn the essentials of pre-hospital emergency care including basic anatomy, patient assessment, airway management, other critical considerations in emergency situations. The course includes lecture, supervised handson practice, required observation hours. Students are prepared to the written practical Emergency Medical Technician certification exam issued by the Commonwealth of Massachusetts the National Registry of EMTs.

Lecture; 4 SH, 4.00 credits. Fall, Spring.

HSC 3550

Contemporary Topics in Health Education Promotion

Health education promotion's mission is to enable people communities to increase control over to improve their health. Students will study practice the role of Health Educator by reviewing contemporary case studies in public health researching a variety of personal community-based options that can mitigate health issues while being mindful of health equity inclusion.

Lecture; 3 SH, 3.00 credits. Varies.

HSC 360

Health Equity, Diversity & Inclusion

This course covers a range of concepts, controversies, solutions related to social determinants of health, cultural competence efforts to improve health equity. Special emphasis is focused on exploring issues related to health equity, disparities, diversity, culture, inclusion in public health healthcare delivery.

Lecture; 3 SH, 3.00 credits. Spring.

HSC 401

Public Health Policy

Students discuss the evolution of the public health system in the US its impact on health care delivery. With this foundation for understanding local, state, national, global issues initiatives their impact on health wellness across populations, students propose health policy solutions.

Lecture; 3 SH, 3.00 credits. Spring.

HSC 401O

Public Health Policy

Students discuss the evolution of the public health system in the United States its impact on healthcare delivery. With this foundation for understanding local, state, national, global issues initiatives, their impact on health wellness across populations, students propose health policy solutions.

Lecture; 3 SH, 3.00 credits. Varies.

HSC 410

Health Research Methods

Research is the necessary foundation for meaningful improvements in health sciences. Students will learn about the research process, including identifying a study question, selecting a study approach, designing the study, data collection, data analysis, dissemination of findings. Subsequently, students will develop their own research plan, including the development of a problem of practice, literature review, design.

Prerequisite: HSC.3100. Lecture; 3 SH, 3.00 credits. Varies.

HSC 4100

Research Analysis Methods

Students critically evaluate allied health nursing peer-reviewed non-peer-reviewed professional literature correlate research to the concepts of evidence-based practice. Students apply research design methods in individual or group projects.

Prerequisite: HSC.3100. Lecture; 3 SH, 3.00 credits. Varies.

HSC 421

Assessing Community Health Needs

Needs capacity assessments are used to better understand the impacts on the health well-being of individuals population groups so that the appropriate health-enhancing next steps can place. Students will be introduced to a variety of methods to complete these assessments, with special focus on the role of the Health Educator in the development oversight processes.

Lecture; 3 SH, 3.00 credits. Fall.

HSC 460

Health Communications, Literacy & Disparities

Health literacy is defined as the capacity to obtain, process, understand basic health information services to make appropriate decisions about health. Poor health literacy impacts access to health information quality health services. This course explores the link between health literacy health disparities in relation to health information health communications products, programs interventions.

Prerequisite: HSC.3010. Lecture; 3 SH, 3.00 credits. Varies.

HSC 4600

Health Communications, Literacy & Disparities

Health literacy is defined as the capacity to obtain, process, understand basic health information services to make appropriate decisions about health. Poor health literacy impacts access to health information quality health services. This course explores the link between health literacy health disparities in relation to health information health communications products, programs interventions.

Prerequisites: HSC.3010, BEH.250. Lecture; 3 SH, 3.00 credits. Varies.

HSC 470

Health Sciences Practicum

This course provides supervised, non-clinical, practical experience in the healthcare industry related to health sciences major and/or minor concentration areas of study. A combination of classroom review, online reporting, field study experience will be involved. Students will identify a practicum site supervisor prior to enrollment in this course.

Lecture; 3 SH, 3.00 credits. Fall.

HSC 4700

Health Sciences Practicum

This course provides supervised, non-clinical, practical experience in the healthcare industry related to health sciences major and/or minor concentration areas of study. A combination of classroom review, online reporting, field study experience will be involved. Students will identify a practicum site supervisor prior to enrollment in this course.

Lecture; 3 SH, 3.00 credits. Fall.

HSC 490

Health Sciences Capstone

This course is the culminating experience for Health Sciences students. Students will plan, conduct present service-oriented capstone projects. Course will assist students with developing needed skills to obtain employment in the healthcare industry or apply to postgraduate programs in the health sciences, for demonstrating assessing learning outcomes cumulative competencies relative to the health sciences program.

Lecture; 3 SH, 3.00 credits. Spring, Summer.

HSC 532**Directed Study**

Supervised study in health sciences involving a survey of existing knowledge, self-instructed or faculty-assisted inquiry into previously published data or methodologies, or other faculty-approved study of a nonresearch nature.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

HSC 616**Graphic Medicine**

Students explore new modalities of healthcare narrative visual communication, including graphic novels through comics. Students gain literacy in the sequentialized hybrid of word image for growing insights improved value to patient, healthcare, clinical experiences.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

HSC 710**Health Professions Education Across Higher Education Spectrum**

This course focuses on the essential skills competencies for health professions faculty educators. The course covers the four educator competency domains: teaching, research scholarship, professional institutional service administration. Students develop a personal education scholarship philosophy statement, engage in selfassessment review the literature for evidence-based best practices for each competency domain.

Lecture; 3 SH, 3.00 credits. Summer.

HSC 715**Educator Competencies in Health Professions**

This course focuses on the essential skills competencies for health professions faculty educators. The course covers the four educator competency domains: teaching, research scholarship, professional institutional service administration. Students develop a personal education scholarship philosophy statement, engage in selfassessment review the literature for evidence-based best practices for each competency domain.

Lecture; 3 SH, 3.00 credits. Spring.

HSC 718**Qualities Characteristics of Leadership in Healthcare**

This course focuses on the competencies that distinguish good leadership great leadership in healthcare. Case studies, exercises, self-assessments are used to help participants internalize apply concepts. Participants will explore both personal team values in improving behavior, performance, morale. The course will offer practical strategies for strengthening leadership interaction skills for enhancing overall effectiveness.

Lecture; 3 SH, 3.00 credits. Spring.

HSC 732**Independent Study Graduate Health Sciences**

Under the guidance of a graduate faculty member, students demonstrate apply the core concepts of research scholarship to study or address a specific problem of practice. The independent study culminates with a presentation of findings to faculty fellow students.

Permission of instructor required. Lecture; 1-6 SH, 1.00-6.00 credits. Summer.

HSC 769**Bioethics Graphic Medicine**

The ethical philosophies underlying medical education, patient care, the general health sciences require examination, particularly in a cultural context. Graduate student learners will engage commercial visual narratives in graphic medicine to apply their understanding of bioethics to select audiences.

Lecture; 3 SH, 3.00 credits. Summer.

HSC 771**Critical Global Health Issues**

This course explores the many facets of global health exposes students to the complexity of the concepts that impact healthcare in developing developed countries the importance of exploring sustainable interventions models of improvement.

Lecture; 3 SH, 3.00 credits. Spring, Summer.

HSC 773**International Relations Healthcare Politics**

The course reviews how national systems have evolved how countries confront the emerging issues in healthcare. Specific topics discussed with include the historical evolution of health systems, the various models that are used around the world, the main components of a health system, the criteria used to assess the functioning of a health system.

Lecture; 3 SH, 3.00 credits. Summer.

HSC 777

Disaster Management

Students examine the critical role of healthcare public health organizations in all four phases of disaster management life-cycle. The evolution of systems at the federal, state local levels will be compared with emerging issues associated with large-scale emergencies disasters are explored through case studies.

Lecture; 3 SH, 3.00 credits. Fall.

HSC 781

Transformative Leadership

Students explore the role of leadership in meeting challenges facing healthcare delivery in the United States as it evolves pressures mount to decrease costs increase access. The future the challenges of stakeholder engagement, conflict management, strategy development, inter-disciplinary inter-professional practice are explored through an integrated framework of case studies experiential learning.

Prerequisite: (HSC.801, HCM.701, HCM.710 or HSC.710). Lecture; 3 SH, 3.00 credits. Spring.

HSC 782

Learning Principles & Theories of Teaching and

This course integrates teaching learning concepts with learning theory to provide the foundation for understanding learning styles related to adult learning. Students will examine traditional theories, philosophies, contemporary models of education, as well as practical application methods that influence learning. Students will examine evidence to determine best practices for effective teaching promoting knowledge transfer in higher education.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

HSC 783

Digital Health Communication

This course provides an overview of the platforms, tools, best practices utilized in digital health communication studies the processes by which health-related organizations adapt to deliver their health messages in a digital arena. Using case examples, students will explore what defines effective communication in the digital space how that differs from traditional communication methods.

Lecture; 3 SH, 3.00 credits. Fall.

HSC 784

Designing Curriculum

This course introduces students are introduced to curriculum course development, including selecting curricular components, philosophical foundations of design, development of learning objectives. Factors issues influencing curriculum development, including designing for assessment, high impact learning experiences, creation of positive learning environments will be explored.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

HSC 785

Health Policy Reform

This course exposes students to the application of public policy in healthcare; examining health policy development process its effect; applications of potential solutions to contemporary policy issues. Students learn to think systematically about policy issues the various methods available to policymakers. The methods of critically analyzing writing proper policy analyses are developed applied.

Lecture; 3 SH, 3.00 credits. Summer.

HSC 786

Assessment Evaluation of Teaching Learning

This course identifies specific assessment techniques, instruments their applications for learning teaching effectiveness are discussed, evaluated, applied. Students compare contrast assessment approaches, discussing differences in assessment as learning, assessment for learning, assessment of learning. Students apply knowledge of assessment evaluation to develop an assessment strategy comprehensive assessment plan, including formative summative approaches.

Prerequisite: (HSC.710, HSC.715, HSC.782, HSC.784 or DHY.751). Lecture; 3 SH, 3.00 credits. Fall, Spring.

HSC 787**Financial Human Resource Management**

This course explores strategic financial resource management through study of workforce development, leadership, organizational climate culture, relationships partnerships, financial practices. Within those five domains, students focus on evaluating employee training, assistance, expectations, compliance, ethical practices, flow of information, support of innovation, shared governance, collaboration, mission vision alignment, financial resources, expenditures reallocation.

Lecture; 3 SH, 3.00 credits. Summer.

HSC 801**Introduction to Doctoral Studies**

This course encourages students to recognize best practices develop skills that will support their doctoral journey. Students are introduced to evaluated on academic writing, reading, critical analysis, ability to deliver accept constructive criticism. Students are encouraged to an introspective look at how graduate studies relate to personal professional goals.

Lecture; 3 SH, 3.00 credits. Varies.

HSC 805**Conducting Literature Reviews & Focusing Research**

Students are guided through the literature review process. Each of the four sections of the literature review (background, methods, results discussion) will be taught through a series of reading assignments focused exercises. Upon completion, students will have a draft of a literature review.

Lecture; 3 SH, 3.00 credits. Summer.

HSC 815**Healthcare Research Methods Focusing Research**

This course establishes the role of the scholar-practitioner in healthcare research; focusing on the research process, scientific methods, analytical tools required to critically evaluate scientific research evidence-based practices in healthcare. This course will equip students with foundational knowledge to effectively investigate reflect upon preliminary ideas for the Capstone Evidence-based Healthcare Research project.

Corequisite: HSC.801 or HSC.710. Lecture; 3 SH, 3.00 credits. Spring.

HSC 821**Health Wellness Across Lifespan In Healthcare**

This course focuses on health promotion disease prevention across the lifespan. Health well-being will be examined with an emphasis on the impact of genetics, health behaviors, values, environmental, cultural influences, health equity. Nationwide health improvement priorities evidence-based practice initiatives will be highlighted.

Lecture; 3 SH, 3.00 credits. Fall.

HSC 823**Cultural Mental Health Issues**

This course explores cultural mental health issues through historical context current challenges of diverse populations. Emphasis is placed on culture in understanding human behavior, mental health, conceptualization of illness. Variations across cultures related to gender age will also be explored along with cultural contributions to the current opioid crisis in the US potential interventions.

Lecture; 3 SH, 3.00 credits. Spring.

HSC 827**Workplace Ethics & Professionalism**

This course explores the nature of professional practice through the lens of professionalism, integrity, ethics. Workplace roles of scholar/practitioners, clinicians, researchers, educators, leaders are compared contrasted. Social, historical, modern technological influences are discussed with a focus on the evolving sense of professionalism ethical decision-making in relation to a community of practice individual values.

Lecture; 3 SH, 3.00 credits. Spring.

HSC 828**Interpersonal Education & Collaborative Practice**

This course explores the complex interconnected topics of interprofessional education collaborative practice. Course topics include individual, team, system-level issues in the design, delivery evaluation of theoretically sound interprofessional initiatives in varied clinical, professional, educational environments.

Prerequisite: HSC.801. Lecture; 3 SH, 3.00 credits. Summer.

HSC 831**Demographics Population Health**

This course explores foundational principles of population health science determinants of health: biological, psychological, social, macrosocial factors. It examines causation of disease at individual population levels. Students will begin thinking about health inequalities based on demographics such as race, gender, sexual orientation, socioeconomic status, disabilities, with an emphasis on policies practices to improve population health.

Lecture; 3 SH, 3.00 credits. Spring.

HSC 833**Disease: Population Impacts Influence**

This course explores disease; whether chronic, infectious, or injury; the impacts disease has on populations. The course will incorporate public health theory as the basis for conversation movement of these conditions through populations over time.

Lecture; 3 SH, 3.00 credits. Spring.

HSC 836**Innovative Healthcare Technology**

The intersection of exponential technological growth its applications within healthcare delivery are investigated along with the skills approaches required for evaluating managing the potential of innovation. Creating, implementing, sustaining a multidisciplinary vision for continuous innovation is discussed from a collaborative practice perspective.

Prerequisite: HSC.801. Lecture; 3 SH, 3.00 credits. Fall.

HSC 837**Patient-Centered Care & Health Integration**

This course reviews some of the critical issues that impact the United States healthcare system. The healthcare system faces multiple challenges with increasing chronic disease disabilities, a graying population, excessive costs with limited resources. The new direction for healthcare is to focus on population health, patient-centered care, value-based care, all delivered with an integrated system.

Lecture; 3 SH, 3.00 credits. Summer.

HSC 841**Patient Safety & Risk Management Integration**

Students explore risk management safety from a systems-based perspective. Course topics include safety-based culture, high-reliability, failure, measures indicators, the business case for quality. Conceptual understanding of risk in clinical settings is developed along with quality safety. Leadership management in the mitigation of risk is explored through multiple contexts, including systems, organizational structure culture.

Lecture; 3 SH, 3.00 credits. Summer.

HSC 843**Health Systems Monitoring & Evaluation**

Students are introduced to the basic concepts methods used in monitoring evaluating health systems programs. Systematic thinking critical analysis will guide practical applications of learning in developing applying key evaluation questions. Scientific writing skills will be used in developing proposing a comprehensive monitoring evaluation approach for a health program or system.

Prerequisite: HSC.801 or HCM.710. Lecture; 3 SH, 3.00 credits. Summer.

HSC 849**Evidence-Based Practice**

As evidence generated from research is continuously changing education clinical practice, this course aims to prepare health professionals with essential skills to incorporate quality research with clinical expertise patient values for improved quality of care positive health outcomes. Students will identify explore evidence-based resources while combining a critical review of the evidence decision-making activities.

Prerequisite: (HSC.815, HSC.710 or HSC.801). Lecture; 3 SH, 3.00 credits. Spring.

HSC 852**EBHC Capstone: Question Development & Search for Evidence**

Students explore an evidence-based approach to healthcare gain the knowledge skills to formulate questions seek answers to dilemmas in practice. Effective literature search critical review are applied, supporting the dynamic translation of evidence. Students are introduced to the application of evidence-based approaches in healthcare, promoting the translation of knowledge to action through evidence.

Prerequisite: HSC.815. Lecture; 3 SH, 3.00 credits. Varies.

HSC 854

EBHC Capstone: Appraisal of the Evidence

Students critically appraise their collected literature, examining judging the importance of the question results; validity methods; interpretation of findings; application to practice. Use of validated tools for a critique of systematic reviews, randomized controlled trials, cohort studies, qualitative research, practice guidelines are covered. Findings are interpreted, collated reported using a scientific approach.

Prerequisite: HSC.852. Lecture; 3 SH, 3.00 credits. Varies.

HSC 856

EBHC Capstone III: Dissemination of Findings

This course completes the capstone project culminates the series. Students examine their literature reviews critical appraisals, apply findings to answer the PICO question. Students design a dissemination strategy to share findings formulate an evaluation plan to appraise potential outcomes. The end product should result in the direct translation of evidence to practice.

Prerequisite: HSC.854. Lecture; 3 SH, 3.00 credits. Varies.

Humanities (HUM)

HUM 230

Introduction to the Health Humanities

This course is an introduction to the interdisciplinary approaches methods associated with health humanities. Students review literature defining the scope interests of this discipline; study illness, health healthcare through the perspectives of literature, film, essay/memoir, history, social science; think critically about health illness as these phenomena are discursively constructed in professional popular culture.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 252

The Short Story

Through a survey of short prose fiction, students study definitions problems associated with the short story genre; the origins evolution of the "modern" short story; connections between texts their historical, social, gender contexts. Emphasis is on American stories.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 2520

The Short Story

Through a survey of short prose fiction, students study definitions problems associated with the short story genre, the origins evolution of the "modern" short story, connections between texts their historical, social gender contexts. Emphasis is on American stories.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 255

Monsters in World Literature

Students will study literature that engages with monsters monstrosity. They will analyze texts that include a wide range of threat types, varying across physical monsters to imagined monsters to monsters in the systems around us. They will read works across multiple countries, languages of origin, time periods. Students will engage with scholarship on monsters to produce research papers.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Spring.

HUM 291

Introduction to Film

Application of visual, literary, historiographic, semiotic analysis to film. Topics include aesthetics, film theory, visual composition, editing, narrative. Representative films by such directors as Eisenstein, Huston, Hitchcock, De Sica, Kurosawa are viewed discussed.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 340

Introduction to Philosophy

Inquiry concerning the quest for certain knowledge, beginning with ancient Greek philosophy of nature reality (reading Aristotle or his predecessors, especially Pythagoreans, the Skeptics, the Atomists); transitioning to the scientific revolution of the 17th 18th centuries (Bacon, Descartes, La Mettrie, Hume); culminating in our century's two cultures, the sciences the humanities.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 341**World Literature**

This course reads world literature to explore a chosen topic in depth (e.g., war in world literature). Readings, discussions, lectures engage literatures from various continents; genres such as the novel, poetry, short stories; various time periods.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 350**Selected British Writers**

An introduction to some of the major British writers from the Middle Ages to the present. Although attention is paid to historical biographical materials, the focus of the course is on the literary texts themselves.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 352**Survey of World Religions**

Religion is key in U.S. politics, commerce, pop culture, everyday life, yet few Americans are knowledgeable in any faith, including their own. One must understand both what others believe also how they believe. This course introduces students to the essential principles histories of several world religions, with no background in any faith required or favored.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 352O**Survey of World Religions**

Religion is key in U.S. politics, commerce, pop culture, everyday life, yet few Americans are knowledgeable in any faith including their own! One must understand both what others believe also how they believe. This course introduces students to the essential principles histories of several World Religions, with no background in any faith required nor favored.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 353**Literary Boston in the 19th Century**

Students will read fiction, nonfiction, poetry writings by 19th-century Boston-based authors such as Emerson, Thoreau, Fuller, others who viewed literature as a means of shaping America's political social landscapes. They will consider how authors sought to answer the country's call for a unique American literature to establish a unique American identity. Boston field trips included.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 354**Poets Warriors: Irish Literature Film, Culture**

This course is an introduction to Irish film from Man of Aran to contemporary films, Irish literature from the Iron Age to the present, emphasizing contemporary genres: short stories, plays, poetry, novels. A selection of Irish films readings/discussion will introduce students to Irish history culture. Students analyze the connections between Irish culture, history, film, literature.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Fall, Spring.

HUM 355**Science, Technology Values**

What is the relationship between science values? Popular culture often portrays scientific endeavor as diametrically opposed to value-laden activities like religion. In our course we will explore the complex dynamics between the two. In the process, we will also explore the rationality of scientific revolutions the role novel technologies play in them.

Prerequisite: (LIB.512, HUM.340, or HUM.450R). Lecture; 3 SH, 3.00 credits. Varies.

HUM 357**Immigrant Literature**

Through the study of literature, students will investigate the fundamental motivations that prompt people to immigrate. Students will be encouraged to assess how immigrants contribute to their new discourse community through language, culture, religion. Furthermore, students will be urged to consider alternative ways of looking at the world to enjoy the linguistic formal elements of immigrant literature.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 357O**Immigrant Literature**

Through the study of literature students will investigate the fundamental motivations that prompt people to immigrate. Students will be encouraged to assess how immigrants contribute to their new discourse community through language, culture, religion. Furthermore, students will be urged to consider alternative ways of looking at the world to enjoy the linguistic formal elements of immigrant literature.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 358

Detective Fiction/Film

Lecture; 3 SH, 3.00 credits. Varies.

HUM 365

Technology in Literature

Students in this course will read seminal works of science fiction analyze these works in historical context. They will learn how ideas of technological potential risk are often filtered through the cultural artistic lens thereby affect and/or reflect a society's understanding of its own potential. In-depth literary analysis discussion will be expected.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Spring.

HUM 375O

Modern Novels of the Afterlife

The afterlife is a frequent topic in our multimedia society, particularly in the modern novel. In this class, students will read such works in terms of their literary predecessors as commentary on modern society. Students' analytical capacities will be sharpened for how storytelling works-how writers fit within a medium about time space stories that lay outside them.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Summer.

HUM 385

Detective Film Fiction

This course will focus on analyzing the detective story in film fiction. Students will see classic films clips from films that feature detectives and/or mystery plots. Students will read short fiction by masters of the genre, analyze the genre conventions, learn analysis of film technique to recognize compare the style of the films fiction.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Spring.

HUM 390

Gilgamesh to Star Trek: Adapting the Epic in World Literature

In this course, students evaluate what epics say, how genres create meaning, evaluate the success of these adaptations. For Gilgamesh, we analyze such texts as Komunyakaa's Gilgamesh Star Trek The Next Generation's "Darmok." For the Odyssey, we evaluate such works as Canto 18 from Dante's Inferno, Atwood's Penelopiad, Glück's Meadowlands the film O Brother, Where Art Thou?

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Spring.

HUM 395

Gothic Narrative in Literature Popular Culture

This course surveys gothic narrative in its popular forms, tracing its development from the literary fiction of the 18th 19th centuries to its contemporary iterations in popular culture (horror, fantasy, science fiction). Students engage in critical reading research, apply principles of literary cultural analysis to better understand the interplay of popular media, history, culture.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Spring.

HUM 425

Applied Ethics

The course provides a survey of contemporary moral political issues, including the right to welfare, the duty to help the needy, sexual equality, affirmative action, pornography, animal rights, the rules of war. The aim of the course is to teach students to describe an ethical issue formulate a well-grounded analysis.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 444

Creative Writing

Introduction to writing poetry creative non-fiction essays informed by analysis of writing techniques. Focus on developing creative expression skills through writing revising in response to feedback, close reading, critique of the work of peers contemporary writers.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 450AJ**ST: Graphic Medicine**

At the intersection of comics medicine is the rise of the "graphic medicine" scholarship field. This course examines the ways in which the hybrid word-and-image is bringing new insights to patient, healthcare, clinical experiences.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 450AL**ST: Speculative Fiction Film**

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 450AS**ST: The Discourse of Dissent**

In this writing-intensive course, students will use principles of rhetorical analysis to analyze journalistic sources, social media, other texts in order to understand the discourses of protest activism in US culture. Student research will focus on current issues of social climate (in)justice.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 450O**ST: Technology in Literature: Wonder Terror**

Description: Attitudes towards science technology are always changing, at all times in history there has been a delicate balance between the wonders science may bring us the terrors it might inflict. This course studies changing social attitudes towards technology applied science from the turn of the 20th century to the turn of the 21st as has been depicted in works of literature science fiction. Students will read work from HG Wells, Isaac Asimov, William Gibson among others, through them explore the close relationship between science, society, hope for the future.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 454**Speculative Fiction Film, Literature, & Popular Culture**

Students examine speculative texts across multiple mediums genres such as science fiction, fantasy, horror, magical realism, revisionist history, utopian/dystopian fiction, superhero stories, weird tales, other "what if" narratives. Analysis of common tropes motifs will provide students with insight into widely held cultural beliefs, social structures, historical power relations.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 456**Narrative Medicine**

This course surveys various literary works to explore the historical cultural factors affecting both the development of narratives about popular understandings of medicine illness. Students consider how clinical practice is represented in narratives; how different forms of storytelling reflect attitudes toward illness; how medical narratives can function as powerful vehicles for social critique. September 16 2016 1:02 PM M0270006

Prerequisite: LIB.112, (HUM.345, LIB.205 or PSB.430) Lecture; 3 SH, 3.00 credits. Fall.

HUM 458**Modern American Writers**

This course studies selected American literature from 1900 to 1939, the literary conventions innovations of the time, the forces that influenced writers, including World War I, women's suffrage, technology, race, ethnicity.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

HUM 480**Health Humanities Capstone**

A capstone seminar for health humanities majors. Each student will undertake an independent research project drawing on knowledge interests emerging from their health humanities degree program. Students discuss research models, submit a research proposal for seminar critique, write an interdisciplinary research paper that is presented for seminar discussion.

Prerequisite: HUM.230. Lecture; 3 SH, 3.00 credits. Spring.

HUM 532**Directed Study**

Prerequisite: BIO.152. Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

INSTRUCTIONAL RESOURCES (INF)

INF 210

Survey of the Literature of Chemistry

Introduces students to the methods used for finding utilizing chemical information. Print electronic resources are discussed, including handbooks, indexes, journal patent literature, online databases, information from the Internet.

Prerequisites: CHE.231, Take 1 group: (INF.110, INF.220, INF.330) or (INF.101, INF.102, INF.103). Lecture; 1 SH, 1.00 credits. Varies.

INF 532

Directed Study

Supervised study in health information literacy, scholarly communication or informatics involving a survey of existing knowledge, self-instructed and/or faculty assisted inquiry into previously published data or methodologies, or other faculty approved study of a non-research nature.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

Certificate in Advanced Pharmacy Practice Studies (INT)

INT 400

Topics in Pharmaceutical Sciences Pharmacy Practice

Part one of a two-semester sequence providing a review of the professional pharmacy curriculum as preparation for the Foreign Pharmacy Graduate Equivalency Examination (FPGEE). Students will participate in interactive sessions apply concepts to pharmacy practice. Students will apply drug literature evaluation, practice management, physical assessment skills. Topics include: drug literature evaluation, practice management, physical assessment, biochemistry, biotechnology, infectious diseases, pharmaceuticals, clinical pharmacokinetics.

Lecture; 4 SH, 4.00 credits. Varies.

INT 401

Topics in Pharmaceutical Sciences Pharmacy Practice II

This seminar is the second part of a year-long seminar course that provides a review of the professional pharmacy curriculum as part of the preparation for the Foreign Pharmacy Graduate Equivalency Examination (FPGEE). Topics for spring semester (part II) include pharmacotherapy topics, Over-the-Counter/Self Care topics, vaccines, complementary alternative therapies, biopharmaceuticals, biotechnology, pharmacology, federal law/regulatory affairs, pharmacoeconomics

Lecture; 4 SH, 4.00 credits. Varies.

INT 500

CAPPS Pharmacy Internships I II Experience

Prerequisites: PPB.519, PPB.502, PPB.545, PPB.551, PSB.432, PPB.546, PPB.552, PSB.411. Lecture; 6 SH, 6.00 credits. Varies.

INT 501

Pharmacy Internship I

Lecture; 6 SH, 6.00 credits. Varies.

INT 502

Pharmacy Internship II

Lecture; 6 SH, 6.00 credits. Varies.

INT 503

Pharmacy Internship III

Lecture; 6 SH, 6.00 credits. Varies.

INT 504

Pharmacy Internship IV

Lecture; 6 SH, 6.00 credits. Varies.

INT 505

Pharmacy Internship V

Lecture; 6 SH, 6.00 credits. Varies.

INT 506**Pharmacy Internship VI**

Lecture; 6 SH, 6.00 credits. Varies.

INT VISIT**Summer International Visitor**

Lecture. Varies.

Introduction to the Major (ITM)

ITM 101**Introduction to the Major**

Assists students with the transition from high school to college by orienting them to College resources, career opportunities, the academic skills needed for classroom success.

Lecture; 1 SH, 1.00 credits. Fall.

Liberal Arts (LIB)

LIB 105**Vocabulary Grammar in Academic Writing for Multilingual Students**

Students will analyze the vocabulary grammar patterns frequently used in academic texts practice these patterns to exptheir strategies for making appropriate lexical choices to increase their linguistic accuracy. Students will apply these strategies in editing their own writing assignments.

Prerequisite: LIB.110 or LIB.111. Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 110**Introduction to Academic Reading Writing**

This course is an introduction to college-level reading writing. It covers rhetorical analysis; summary, synthesis, paragraphing skills; the development of composition skills, grammar, vocabulary.

Lecture; 3 SH, 3.00 credits. Fall.

LIB 111**Expository Writing I**

Focuses on writing clear coherent summaries, reports, essays, with a special focus on understanding, using, documenting college-level nonfiction texts as evidence for effectively formulating accurately supporting a thesis.

Lecture; 3 SH, 3.00 credits. Fall.

LIB 112**Expository Writing II**

Applies LIB 111 skills to writing a research paper basic literary analysis. Students write a coherent, well-documented paper, requiring library research the synthesis of professional popular sources. The literary analysis incorporates knowledge of literary concepts, devices, techniques.

Prerequisite: LIB.111. Lecture; 3 SH, 3.00 credits. Spring.

LIB 120**Introduction to Psychology**

Designed to orient students to the scientific study of behavior through the exploration of selected principles theories of human behavior. Topics include perception, learning memory, personality development, abnormal behavior, social influences on behavior.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 1200**Introduction to Psychology**

Designed to orient students to the scientific study of behavior through the exploration of selected principles theories of human behavior. Topics include perception, learning memory, personality development, abnormal behavior, social influences on behavior.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 133**American Culture, Identity, Public Life**

This course covers a broad sweep of American experiences examines ways that individuals communities have perceived themselves as "American." Students explore how people with differing cultural, ethnic, racial, gender, socioeconomic backgrounds experienced contributed to American culture public life how they formed American identities. Narratives, ethnographies, histories, films help develop an understanding of identity formation.
Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 1330

American Culture, Identity, Public Life

This course covers a broad sweep of American experiences examines ways that individuals communities have perceived themselves as "American." Students explore how people with differing cultural, ethnic, racial, gender, socioeconomic backgrounds experienced contributed to American culture public life how they formed American identities. Narratives, ethnographies, histories, films help develop an understanding of identity formation.
Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 205

Health Professions Orientation Seminar

This course introduces Premedical Health Studies majors to the key features of the degree program, including the interdisciplinary curriculum, minor options, affiliated professional pathway opportunities. It reviews personal statement writing, professional school admissions tests, interview preparation, career self-assessment.
Prerequisites: BIO.150L, BIO.152, CHE.132. Lecture; 1 SH, 1.00 credits. Fall.

LIB 220

Introduction to Interpersonal Communication for Health Professionals

Students acquire a theoretical vocabulary for understanding interpersonal communication for critically examining their commonsense conceptualizations of it. Using case studies problem-based learning, students learn communication techniques such as displaying empathy, managing groups, being assertive, managing conflict. Throughout, emphasis is placed on the coordinated cultural character of interpersonal communication, particularly in patient-centered, interprofessional healthcare contexts.
Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 2200

Introduction to Interpersonal Communication for Health Professionals

Students acquire a theoretical vocabulary for understanding interpersonal communication for critically examining their commonsense conceptualizations of it. Using case studies problem-based learning, students learn communication techniques such as displaying empathy, managing groups, being assertive, managing conflict. Throughout, emphasis is placed on the coordinated cultural character of interpersonal communication, particularly in patient-centered, interprofessional healthcare contexts.
Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 252

Introduction to Speech

Study practice of public speaking in order to persuade or inform an audience. Students present several formal informal speeches a debate. Emphasizes building confidence competence in public presentations.
Prerequisite: LIB.253 or OPE.001. Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 253

Fundamentals of Oral Communication in Healthcare

Students improve their speaking listening skills by focusing upon essential pronunciation features, developing control of language structures, monitoring the accuracy of spoken English, engaging in a variety of discourse genres. Course activities will center around scientific biomedical topics as well as clinical interactions.
Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 305

Medical College Preparation Course

Students will focus on developing quantitative, written verbal reasoning skills in preparation for the MCAT, DAT or OAT exams. This includes practicing skills related to critical thinking reading comprehension in scientific disciplines. They will also acquire proficiency in basic medical terminology, as well as learn to apply strategies regarding standardized test-taking managing test anxiety. This course does not fulfill the LIB elective distribution requirement.
Corequisite: PHY.274L or PHY.284L. Lecture; 2 SH, 2.00 credits. Spring.

LIB 3300

Introduction to Communication Sciences Disorders

Introduction to Communication Sciences & Disorders (CSD) will provide students preparing for healthcare careers with a comprehensive overview of speech, language hearing disorders; typical diagnostic, intervention case management techniques; clinical services provided by speech-language pathologists audiologists. The roles of CSD professionals as integral members of the healthcare community will be emphasized throughout the course.

Prerequisites: LIB.112, (LIB.220 or LIB.252). Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 340

Spanish for Health Care Professionals

This course is designed to develop Spanish communication skills in the medical field. Medically relevant vocabulary/phrases are introduced to enable students to build practice basic language skills for their work as healthcare providers. The course emphasizes Spanish conversations (patient-healthcare provider) understanding of written Spanish from medical documents (histories, prescriptions, laboratory results). Intermediate working knowledge of Spanish is necessary.

Permission of instructor required. Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 480

Premedical Health Studies Capstone Seminar

This capstone seminar for Premedical Health Studies seniors focuses on the review synthesis of literature in multiple health-related disciplines including the humanities, life, social, behavioral sciences. Students discuss research methods, present research for peer instructor critique, write interdisciplinary papers that are presented for seminar discussion.

Lecture; 3 SH, 3.00 credits. Spring.

LIB 512

Healthcare Ethics

Students learn to identify, articulate, analyze ethical issues in the practice of the biomedical sciences. Drawing on the tools of philosophical bioethics, this course applies established ethical theories methods of critical thinking to both long-standing emerging issues. Topics may include some of the following: truth telling, new reproductive technologies, distribution of scarce resources, responsible conduct of research.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

LIB 512O

Healthcare Ethics

Students learn to identify, articulate, analyze ethical issues in the practice of the biomedical sciences. Drawing on the tools of philosophical bioethics, this course applies established ethical theories methods of critical thinking to both long-standing emerging issues. Topics may include some of the following: truth telling, new reproductive technologies, distribution of scarce resources, responsible conduct of research.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 530

Undergraduate Research Project

Research participation at the undergraduate level in various fields of behavioral sciences, social sciences, humanities. Consent of instructor dean.

Prerequisite: LIB.112. Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

LIB 532

Directed Study

Supervised study in behavioral sciences, social sciences, humanities involving a survey of existing knowledge, self-instructed and/or faculty-assisted inquiry into previously published data or methodologies, or other faculty-approved study of a nonresearch nature.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

LIB 590

Health Psychology Field Placement I

With the approval of the course coordinator, students identify a placement site that allows them to explore a professional pathway to apply the knowledge skills gained through the Health Psychology major.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 591

Health Psychology Field Placement II

According to their interests, students are matched with a field placement involving research or clinically oriented activities in health psychology. Students meet regularly with the course coordinator on a weekly basis to integrate their new experiences with prior knowledge.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

LIB 592

Health Psych Capstone Seminar

This capstone course for health psychology majors focuses on refining literature search techniques, strengthening reading, summarization, integration skills. Each student selects a topic, conducts library research, presents progress reports, prepares an APA style literature review.

Prerequisite: BEH.456. Lecture; 3 SH, 3.00 credits. Varies.

Mathematics (MAT)

MAT 141

Algebra Trigonometry

Covers roots, radicals, fractional exponents; quadratic equations, linear quadratic functions, graphing techniques, variation, exponential functions, logarithms, log-log semilog graphs, trigonometric functions, solving right triangles, with applications to biology, physics, chemistry.

Lecture; 3 SH, 3.00 credits. Fall.

MAT 141O

Algebra Trigonometry

Covers roots, radicals, fractional exponents; quadratic equations, linear quadratic functions, graphing techniques, variation, exponential functions, logarithms, log-log semilog graphs, trigonometric functions, solving right triangles, with applications to biology, physics, chemistry.

Lecture; 3 SH, 3.00 credits. Fall.

MAT 142

Mathematics for Nurses

Students learn to utilize the mathematics required for the Nursing program. Topics include fractions, decimals, percentages, proportions, conversions within between metric nonmetric systems. Emphasis is placed on problem-solving techniques for rational equations percentage problems, especially on modeling calculations with solutions, concentrations, drug dosage, intravenous flow rates. Calculator use is limited. Not for general elective credit.

Lecture; 3 SH, 3.00 credits. Fall.

MAT 143

Foundations of Algebra & Trigonometry

Students learn to utilize the mathematics required for the Dental Hygiene program. Topics include fractions, decimals, percentages, proportions, algebra, measurement systems, conversion procedures, linear equations, graphing, variation, exponential logarithmic functions, basic geometry. Not for general elective credit.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

MAT 144

Business Math Computer Applications

Students will apply basic mathematical concepts to common business usage, including such topics as percentages, interest, consumer credit mortgages, stock trades, bank cash discounts, payroll time value of money. Students will gain hands on experience utilizing Microsoft Excel for Business math applications.

Lecture; 3 SH, 3.00 credits. Fall.

MAT 150

Precalculus

This course covers the real number system, functions their graphs, including polynomial, rational, exponential, logarithmic, trigonometric functions, with applications to biology, physics, chemistry. Students may not receive credit for both MAT 141 MAT 150. Class, 3 hrs.; credit, 3 s.h.; fall, spring.

Lecture; 3 SH, 3.00 credits. Varies.

MAT 151

Calculus I

Derivatives their interpretations applications are covered. Topics include limits, derivative rules, implicit differentiation, curve sketching, optimization problems. Emphasis is placed on polynomial, exponential, logarithmic functions, with applications to biology, physics, chemistry.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

MAT 151O

Calculus I

Derivatives their interpretations applications are covered. Topics include limits, derivative rules, implicit differentiation, curve sketching, optimization problems. Emphasis is placed on polynomial, exponential, logarithmic functions, with applications to biology, physics, chemistry.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

MAT 152

Calculus II

Integration its interpretation, techniques, applications are covered. Topics include indefinite, definite, improper integrals, as well as first-order differential equations, with applications to biology, physics, chemistry.

Prerequisite: MAT.151 or MAT.171. Lecture; 3 SH, 3.00 credits. Fall, Spring.

MAT 152O

Calculus II

Integration its interpretation, techniques, applications are covered. Topics include indefinite, definite, improper integrals, as well as first-order differential equations, with applications to biology, physics, chemistry.

Prerequisite: MAT.151 or MAT.171. Lecture; 3 SH, 3.00 credits. Fall, Spring.

MAT 171

Calculus I (Advanced)

Derivatives their interpretations applications are covered in depth. Topics include limits, derivative rules, implicit differentiation, curve sketching, optimization problems. Emphasis is on applications to biology, physics, chemistry.

Lecture; 3 SH, 3.00 credits. Varies.

MAT 172

Calculus II (Advanced)

Integration, its interpretation, its applications are covered in depth. Topics include indefinite, definite, improper integrals, as well as first order differential equations, partial derivatives repeated integrals, with applications to biology, physics chemistry.

Prerequisite: MAT.171. Lecture; 3 SH, 3.00 credits. Varies.

MAT 197

Computer Applications

This course provides a hands-on introduction to Microsoft Office applications-word processing, spreadsheets, charting, presentations-as well as computer concepts that are fundamental to the field of health sciences.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

MAT 197O

Computer Applications

This course provides a hands-on introduction to Microsoft Office applications-word processing, spreadsheets, charting, presentations-as well as computer concepts that are fundamental to the field of health sciences.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

MAT 261

Statistics

An introduction to descriptive inferential statistical principles. Topics include summary statistics, regression, normal distribution, hypothesis testing, estimation of parameters. Emphasis is placed on applications to biology, chemistry, physics.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

MAT 261O

Statistics

An introduction to descriptive inferential statistical principles. Topics include summary statistics, regression, normal distribution, hypothesis testing, estimation of parameters. Emphasis is placed on applications to biology, chemistry, physics.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

MAT 461

Biostatistics

The continuation of MAT 261 covers topics including power analysis sample size determination, ANOVA, post hoc tests, risk ratios, regression analyses, selected nonparametric methods. Emphasis is placed on scientific reasoning: reading, writing, interpreting, validating statistical analyses found in public health, behavioral, health sciences journal articles. Students will utilize software to develop written oral presentations.

Prerequisite: MAT.261. Lecture; 3 SH, 3.00 credits. Fall, Spring.

MAT 532

Directed Study

Supervised study in computer sciences mathematics involving a survey of existing knowledge, self-instructed and/or faculty assisted inquiry into previously published data or methodologies, or other faculty approved study of a non-research nature.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

MAT 763

Advanced Statistics

Covers commonly practiced statistical methods experimental designs used in research. Topics include analysis of variance, regression, nonparametric statistics. Some coursework requires interpreting validating statistical analyses in research papers.

Prerequisite: MAT.261. Lecture; 3 SH, 3.00 credits. Fall.

Clinical Research (MCR)

MCR 801

Pharmaceutical R&D: From Discovery To Market

Pharmaceutical R&D: From Discovery to Market Students will learn about the activities processes involved in development of a new product from discovery through postmarketing.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

MCR 802

Research Methodology the Development Of Protocols Proposals

Students will learn the elements required to develop a scientifically sound clinical protocol or research proposal. They will evaluate the processes required to develop a feasible relevant research question, understresearch methodology, choose a study design.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

MCR 803

Conducting Clinical Research Studies

Conducting clinical research according to good clinical practices is key to the success of any clinical study. Students will learn the requirements for the successful conduct of clinical research from the FDA, IRB, industry sponsor, clinical investigator perspectives.

Prerequisite: MCR.802. Corequisite: MCR.801. Lecture; 3 SH, 3.00 credits. Varies.

MCR 804

Graduate Project in Clinical Research

Students will independently research develop a clinical protocol the accompanying study schema, data collection instruments, informed consent document. Upon completion, they will present defend their protocol as a Capstone Project.

Prerequisites: MCR.803 MCR.802. Lecture; 3 SH, 3.00 credits. Varies.

Physician Assistant Studies-Manchester/Worcester (MPA)

MPA 527

Healthcare Issues I

Designed to highlight professionalism, history of the PA profession, the health systems science parameters of advocacy, insurance, risk management, healthcare delivery. Culture-based interprofessional education is provided, the public health system is introduced as well as topics on provider self-care. The research module is started in Healthcare Issues I will continue in Healthcare Issues II.

Lecture; 1 SH, 1.00 credits. Spring.

MPA 528

Healthcare Issues II

Designed to highlight medical ethical responsibilities of physician assistants, global health, social determinants of health, HIPAA training, professional liability, completing the research module started in Healthcare Issues I. Addresses interviewing communication skills while respecting cultural influences throughout the lifespan including end of life care treatment adherence. Addresses different needs of the military, LGBTQ, substance dependency populations.

Prerequisite: MPA.527 Lecture; 3 SH, 3.00 credits. Summer.

MPA 529

Healthcare Issues III

Designed to provide students with a historical perspective of the profession, as well as current issues affecting Physician Assistant (PA) practice. Research methodology is investigated, building on the previous trimester's course, including statistical analysis. The student is introduced to the role of the PA in medicine through collective collaborative instruction.

Prerequisite: MPA.528 Lecture; 3 SH, 3.00 credits. Fall.

MPA 530

Clinical Medicine I

Utilizing multiple instructional methods students learn the principles of clinical medicine by incorporating the pathophysiology of disease by system specialty as well as addressing clinical therapeutics. Includes modules in Medical Terminology, Clinical Psychiatry, Nutrition, Clinical Laboratory Medicine, EENT (ears, eyes, nose throat), Radiology Cardiology.

Lecture; 6 SH, 6.00 credits. Spring.

MPA 531

Clinical Medicine II

Students continue to build upon the knowledge skills attained in MPA 530 study the presentation, work-up, treatment of multiple conditions. As with Clinical Medicine I, the topics differ across Clinical Medicine I, II, III. This section, Clinical Medicine II, includes conditions diseases related to the cardiovascular, peripheral vascular, gastroenterology, nutrition, genitourinary nephrologic systems genetics.

Prerequisites: MPA.527, MPA.530, MPA.541, MPA.546, MPA.528 Corequisites: MPA.542, MPA.547. Lecture; 6 SH, 6.00 credits. Summer.

MPA 532

Clinical Medicine III

Students build upon the knowledge skills attained in MPA 530 531 study the presentation, work-up, treatment of multiple conditions. As with Clinical Medicine I II, the topics differ across the courses. This section includes conditions diseases related to the neurologic, orthopedic, rheumatologic, hematologic oncologic systems psychiatry.

Corequisites: MPA.530, MPA.531 Lecture; 5 SH, 5.00 credits. Fall.

MPA 538

Patient Assessment I

Students learn foundational skills techniques required to gather a complete history perform a thorough physical examination of a simulated patient. Students integrate knowledge obtained in MPA 530. During laboratory sessions, students learn proper use of diagnostic equipment technique to perform a comprehensive physical examination of the skin, head, neck, eyes, ENT CV/PV. They also learn how to perform mental status exam.

Corequisite MPA.530. Lecture; 4 SH, 4.00 credits. Spring.

MPA 538L

Patient Assessment I Lab

Students learn foundational skills techniques required to gather a complete history perform a thorough physical examination of a simulated patient. Students integrate knowledge obtained in MPA 530. During laboratory sessions, students learn proper use of diagnostic equipment technique to perform a comprehensive physical examination of the skin, head, neck, eyes, ENT CV/PV. They also learn how to perform mental status exam.

Laboratory. Varies.

MPA 539

Patient Assessment II

Builds upon the foundational skills techniques learned in MPA 538 to complete a thorough physical examination. They also learn diagnostic examinations of the pulmonary, abdominal, neurological musculoskeletal systems. Students integrate knowledge of the structure function of the human body, coupled with laboratory sessions emphasizing the proper use of diagnostic equipment technique, to perform a comprehensive physical examination.

Prerequisite: MPA.538 Lecture; 3 SH, 3.00 credits. Summer.

MPA 539L**Patient Assessment II Lab**

Builds upon the foundational skills techniques learned in MPA 538 to complete a thorough physical examination. Students integrate knowledge of the structure function of the human body, coupled with laboratory sessions emphasizing the proper use of diagnostic equipment technique, to perform a comprehensive physical examination.

Lecture. Fall, Spring.

MPA 540**Patient Assessment III**

This course builds upon the foundational skills techniques learned in the Patient Assessment I II courses to complete a thorough physical examination. Students integrate knowledge of the structure function of the human body, coupled with laboratory sessions emphasizing the proper use of diagnostic equipment technique, to perform a comprehensive physical examination.

Corequisites: MPA.538, MPA.539 Lecture; 3 SH, 3.00 credits. Fall.

MPA 540L**Patient Assessment III Lab**

This course builds upon the foundational skills techniques learned in the Patient Assessment courses I II, MPA 538 539 to complete a thorough physical examination. Students integrate knowledge of the structure function of the human body, coupled with laboratory sessions emphasizing the proper use of diagnostic equipment technique, to perform a comprehensive physical examination.

Prerequisites: MPA.538, MPA.539. Laboratory. Fall.

MPA 541**Pharmacology I**

Pharmacodynamic, pharmacokinetic, pharmacotherapeutic principles are introduced to provide a foundation for the study of pharmacology therapeutics. Combined lecture active learning exercises are designed to develop the pharmacologic therapeutic skills that a physician assistant needs to enhance patient care in clinical practice focusing on autonomic pharmacology, pulmonary, inflammatory, infectious, malignant diseases psychiatric diseases.

Corequisite MPA.530. Lecture; 2 SH, 2.00 credits. Spring.

MPA 542**Pharmacology II**

Students build upon the knowledge skills obtained in MPA 541. Combined lecture active learning exercises are designed to develop the pharmacologic therapeutic skills that a physician assistant needs to enhance patient care in clinical practice, focusing on cardiology, peripheral vascular disease, gastroenterology, nephrology/urology vasopressors inotropes.

Prerequisites: MPA.530, MPA.541 Corequisite: MPA.531. Lecture; 3 SH, 3.00 credits. Summer.

MPA 543**Pharmacology III**

Students build upon the knowledge skills obtained in MPA 541 542. Combined lectures active learning exercises are designed to develop the pharmacologic therapeutic skills that a physician assistant needs to enhance patient care in clinical practice, focusing on neurologic, analgesics, drug addiction, rheumatologic, hematologic, oncologic psychopharmacologic agents.

Prerequisites: MPA.531, MPA.542 Corequisite: MPA.532. Lecture; 2 SH, 2.00 credits. Fall.

MPA 544**Clinical Anatomy**

Examines human morphology the fundamental relationships between neurological, musculoskeletal, cardiovascular, gastrointestinal, respiratory, renal reproductive systems with conceptual presentations of every major region of the human body. Emphasis is on clinical application of this knowledge.

Lecture; 3 SH, 3.00 credits. Spring.

MPA 544L**Clinical Anatomy**

Examines human morphology the fundamental relationships between neurological, musculoskeletal, cardiovascular, gastrointestinal, respiratory, renal reproductive systems with conceptual presentations of every major region of the human body. Emphasis is on clinical application of this knowledge.

Laboratory. Varies.

MPA 546

Physiology/Pathophysiology I

Students learn integrative human physiology pathophysiology involving the cardiovascular, pulmonary, renal, musculoskeletal systems with an emphasis upon homeostatic mechanisms etiologies of disease. The interrelationships of function dysfunction at the molecular, cellular tissue level, organ systemic level provide a foundation for MPA 530 Clinical Medicine I.

Corequisite MPA.530. Lecture; 2 SH, 2.00 credits. Spring.

MPA 547

Physiology/Pathophysiology II

Students learn integrative human physiology pathophysiology involving the continuation of cardiology, the introduction to gastrointestinal, neurological, endocrine, reproductive systems with an emphasis upon homeostatic mechanisms etiologies of disease. The interrelationships of function dysfunction at the molecular, cellular, tissue, organ, systemic level provide a foundation for MPA 531 532 Clinical Medicine II III.

Prerequisites: MPA.530, MPA.546. Corequisite: MPA.531. Lecture; 3 SH, 3.00 credits. Varies.

MPA 550

Emergency Medicine

Students learn medical disorders traumatic injuries that commonly present to the emergency department. Utilizing a case-based format, students learn the appropriate diagnostic therapeutic measures to treat or stabilize patients with life-threatening trauma or illness.

Prerequisites: MPA.530, MPA.531. Lecture; 2 SH, 2.00 credits. Varies.

MPA 552

Medical Procedures Surgery

Through lectures laboratory exercises, students learn how to perform procedures such as suturing, splinting, wound care, intravenous insertions, injections, placement of nasogastric tubes, Foley catheter placement. Students also learn the principles of surgery, including preoperative, intraoperative, postoperative care, minor surgical procedures.

Prerequisite: MPA.528, MPA.531, MPA.539, MPA.542, MPA.547. Lecture; 2 SH, 2.00 credits. Varies.

MPA 552L

Medical Procedures Lab

Through lectures laboratory exercises, students learn how to perform procedures such as suturing, splinting, wound care, intravenous insertions, injections, placement of nasogastric tubes, Foley catheter placement. Students also learn the principles of surgery, including preoperative, intraoperative, postoperative care, minor surgical procedures.

Laboratory. Fall, Spring.

MPA 554

Special Populations

Students learn about primary care subspecialties, including women's health, pediatrics, geriatrics. This class is taught in a modular format using a variety of learning methods, including traditional lectures interactive techniques, such as case-based learning. Student experiences include simulated patient encounters that facilitate skills in the examination of adult male female genitalia.

Prerequisites: MPA.530, MPA.531. Lecture; 4 SH, 4.00 credits. Varies.

MPA 554L

Special Populations Lab

Students learn about primary care subspecialties, including women's health, pediatrics, geriatrics. This class is taught in a modular format using a variety of learning methods, including traditional lectures interactive techniques, like case-based learning. Student experiences include simulated patient encounters that facilitate skills in the examination of adult male female genitalia.

Laboratory. Fall, Spring.

MPA 555

Clinical Research Methods Design Community

This course provides instruction in the basic principles of clinical research methodology application to evidence based medicine. Course topics: hypothesis generation, research study design methodology, outcome measurements, biostatistical analysis/interpretation principles of diagnostic clinical utility. Course topics will also include approaches to evaluating research, common medical databases to access medical literature limitations of medical research.

Prerequisite: MPA.528, MPA.531, MPA.539, MPA.542, MPA.547. Lecture; 1 SH, 1.00 credits. Fall.

MPA 620

Professional Development I

During the clinical phase, students prepare for transition to the professional role by developing employment skills learning about professional practice issues. Students learn a framework necessary to achieve maintain certification.
Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 2 SH, 2.00 credits. Varies.

MPA 621

Professional Development II

Physician Assistants (PAs) are a versatile component of the U.S. health care workforce. During the clinical phase, students prepare for transition to the professional role by developing employment skills learning about professional practice issues. This course will include discussion on healthcare policy, coding, billing, reimbursement, licensing & credentialing, malpractice professionalism includes the completion of the Medication-Assisted Treatment (MAT) Waiver Training for Physician Assistants.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 2 SH, 2.00 credits. Varies.

MPA 622

Professional Development III

Students synthesize the knowledge skills obtained during the program through successful completion of a summative OSCE (objective structured clinical examination), completion of the Procedures Technical Skills Passport, completion of the summative multiple-choice examination. By demonstrating competency in the above methods of assessment, students will have attained the competencies for graduation.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 2 SH, 2.00 credits. Varies.

MPAC 600

Medicine I Clerkship

These rotations provide clinical experience with common diseases the manifestation of acute chronic illnesses. Learning experiences include the traditional approach to direct, initial comprehensive care for patients of all ages as well as continuity of care for the individual patient the family.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 5 SH, 5.00 credits. Varies.

MPAC 601

Medicine Elective

These rotations provide clinical experience with common diseases the manifestation of acute chronic illnesses. Learning experiences include the traditional approach to direct, initial comprehensive care for patients of all ages as well as continuity of care for the individual patient the family.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 5 SH, 5.00 credits. Varies.

MPAC 602

Family Medicine

This rotation teaches the application of medical knowledge to the evaluation of primary care problems encountered in general medicine. Understanding of these disorders is accomplished during the accurate collection of data, identification of problems, development of differential diagnosis management plans. Students interview examine patients, synthesize information to identify problems, formulate implement therapeutic plans. Health promotion health maintenance are an integral part of the rotation.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 5 SH, 5.00 credits. Varies.

MPAC 603

Pediatrics

This rotation provides clinical experience with normal infant, child, adolescent development as well as with common diseases of childhood. Learning experiences include but are not limited to eliciting history from the parent/patient, performing the appropriate developmental screening, developing a rapport with the patient so that an appropriate physical examination can be performed. Diagnoses of common illnesses patient/parent education in preventive issues also are emphasized.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 5 SH, 5.00 credits. Varies.

MPAC 604

Psychiatry

This rotation provides clinical experience with patients diagnosed with common psychiatric disorders. The student gains familiarity with the use of the DSM-V in classifying mental illness is exposed to a variety of treatment modalities for psychiatric disorders. This rotation may be observation only.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 5 SH, 5.00 credits. Varies.

MPAC 605

Surgery

This rotation provides clinical experience with medical conditions requiring surgical treatment. Exposes students to the behaviors, techniques, procedures involved in the setting of the operating suite. Learning experiences include, but are not limited to, pre-op histories physicals, intra-operative procedures assisting, post-op management of surgical patients. *Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 5 SH, 5.00 credits. Varies.*

MPAC 606

Women's Health

This rotation provides clinical experience in normal female healthcare to include prenatal gynecologic care. Education of patients preventive care from menarche to menopause beyond are emphasized.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 5 SH, 5.00 credits. Varies.

MPAC 607

Emergency Medicine

This rotation provides clinical experience with common urgent emergent health problems. Students are exposed to minor more serious life-threatening emergencies, as well as some trauma cases.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 5 SH, 5.00 credits. Varies.

MPAC 609

General Elective Rotation

Upon completion, the student is able to use the problem-oriented approach to elicit a medical history, perform a pertinent physical examination, obtain indicated laboratory studies, assess the results, formulate a management plan, transmit information, assist in the implementation of appropriate therapy for the common problems encountered in these rotations.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 5 SH, 5.00 credits. Varies.

MPAC 609T

International Rotations

General elective rotation.

Prerequisites: MPA.532, MPA.543, MPA.550, MPA.552, MPA.554, MPA.540. Lecture; 5 SH, 5.00 credits. Varies.

Magnetic Resonance Imaging (MRI)

MRI 305

Patient Care in MRI

In this online course, students become familiar with the basics of patient care through the use of case studies, online discussions, up-to-date online text materials. Topics include patient interactions, transfer immobilization techniques, vital signs, infection control, medical emergencies, an introduction to contrast media used in magnetic resonance imaging.

Prerequisites: BEH.250, BEH.254, LIB.2200, PHY.275. Lecture; 2 SH, 2.00 credits. Spring.

MRI 305O

Patient Care in MRI

In this online course, students become familiar with the basics of patient care through the use of case studies, online discussions, up-to-date online text materials. Topics include patient interactions, transfer immobilization techniques, vital signs, infection control, medical emergencies, an introduction to contrast media used in magnetic resonance imaging.

Prerequisite: RSC.110 Lecture; 2 SH, 2.00 credits. Summer.

MRI 401

Principles of Magnetic Resonance Imaging

Students learn physical principles of magnetic resonance imaging based on discussion of both classical quantum physics. Topics include magnetic field properties, electromagnetic spectrum, system hardware, instrumentation, tissue characteristics, spatial localization, the basics of pulse sequencing.

Prerequisites: BEH.250, BEH.254, LIB.2200, PHY.275. Lecture; 3 SH, 3.00 credits. Fall.

MRI 401O

Principles of Magnetic Resonance Imaging

Students utilize knowledge obtained in MRI Principles to understand standard MRI protocols used for imaging procedures. Protocol parameters, coil selection, imaging options for all anatomic regions are presented. In addition, students learn advanced imaging procedures, indications for contrast-enhanced imaging, application of postprocessing procedures.

Lecture; 3 SH, 3.00 credits. Summer.

MRI 402**Introduction to Clinical MRI**

Students become familiar with the clinical aspects of magnetic resonance imaging. Students use information provided in the didactic portion of this course along with clinical experience to acquire skills related to patient care safety, basic flow of a magnetic resonance facility, the basics of coil protocol selection.

Prerequisite: LIB.220. Corequisites: MRI.305, MRI.401, MRI.405, RSC.310. Lecture; 2 SH, 2.00 credits. Spring.

MRI 405**Magnetic Resonance Imaging Safety Applications**

Students learn to understand MRI from the standpoint of safety clinical application. Personal safety, safety of co-workers, patient safety comfort are discussed as a primary responsibility of the technologist. Students learn about special patient care issues unique to MRI through a case study approach.

Prerequisites: BEH.250, BEH.254, LIB.2200, PHY.275. Lecture; 3 SH, 3.00 credits. Spring.

MRI 405O**Magnetic Resonance Imaging Safety Applications**

Students learn to understand MRI from the standpoint of safety clinical application. Personal safety, safety of coworkers, patient safety comfort are discussed as primary responsibilities of the technologist. Students learn about special patient care issues unique to MRI through a case study approach.

Lecture; 3 SH, 3.00 credits. Summer.

MRI 410**Magnetic Resonance Imaging Procedures**

Students utilize knowledge obtained in MRI Principles to understand build standard MRI protocols used for imaging procedures. Protocol parameters, coil selection, imaging options for all anatomic regions are presented. In addition, students learn advanced imaging procedures, indications for contrast-enhanced imaging, application of postprocessing procedures.

Prerequisites: MRI.305, MRI.4010, MRI.4050, RSC.3100. Corequisite: MRI.402. Lecture; 3 SH, 3.00 credits. Summer.

MRI 410O**Magnetic Resonance Imaging Procedures**

Students utilize knowledge obtained in MRI Principles to understand build standard MRI protocols used for imaging procedures. Protocol parameters, coil selection, imaging options for all anatomic regions are presented. In addition, students learn advanced imaging procedures, indications for contrast enhanced imaging, application of post processing.

Prerequisites: MRI.305, MRI.4050, MRI.4010, RSC.3100, MRI.402. Corequisite: LIB.5120. Lecture; 3 SH, 3.00 credits. Fall.

MRI 415**Magnetic Resonance Image Production Quality**

Students utilize knowledge obtained in MRI Principles to build apply proper pulse sequence parameters for optimization of MR images. Artifact reduction based on appropriate imaging option selection is discussed. Students learn to maximize image quality while ensuring both the safety comfort of the patient.

Prerequisites: MRI.401, MRI.402, MRI.405, RSC.3100, LIB.220. Corequisite: MRI.410. Lecture; 3 SH, 3.00 credits. Fall.

MRI 415O**Magnetic Resonance Image Production Quality**

Students utilize knowledge obtained in MRI Principles to build apply proper pulse sequence parameters for optimization of MR images. Artifact reduction based on appropriate imaging option selection is discussed. Students learn to maximize image quality, while ensuring both the safety comfort of the patient.

Prerequisites: MRI.4010, MRI.402, MRI.410, RSC.3100, RSC.325, (LIB.420 or LIB.220). Lecture; 3 SH, 3.00 credits. Spring.

MRI 420C**Clinical Internship I**

Students practice patient care safety, become familiar with coil protocol selection basic scanning parameters. They use information provided during the lab to practice patient care imaging skills at an assigned clinical facility under the direct supervision of a registered MRI technologist. Students have access to the facilities, personnel, examinations, materials to meet the course objectives.

Prerequisite & Corequisite: MRI.401, MRI.405. Corequisite: MRI.410. Clinical; 5 SH, 5.00 credits. Spring.

MRI 421C

Clinical Internship II

Students continue to practice patient care safety, perform coil protocol selection basic scanning parameters. They build on the knowledge learned during lab to practice patient care imaging skills at an assigned clinical facility under the direct supervision of a registered MRI technologist. Students will begin to work on the required ARRT competencies will have access to the facilities, personnel, examinations, materials to meet the course objectives.

Prerequisites: MRI.401, MRI.402, MRI.405, MRI.410, MRI.420C, RSC.310, RSC.325, LIB.220. Corequisite: MRI.430. Clinical; 10 SH, 10.00 credits. Summer.

MRI 422C

Clinical Internship III

Students achieve competency in obtaining high-quality MR images while maintaining the safety comfort of patients. This progressive competency-based course takes place at a clinical education facility uses performance objectives based on the ARRT requirements as a measure of achievement.

Corequisite: MRI.430. Prerequisites: MRI.415, MRI.421C. Clinical; 10 SH, 10.00 credits. Summer.

MRI 425C

Advanced Certificate Clinical Intership

The student will become familiar with the clinical aspects of magnetic resonance imaging will use the clinical experience to acquire the necessary skills to complete the required performance competencies in order to be eligible to apply for the ARRT MRI registry exam.

Prerequisites: MRI.401, MRI.405. Clinical; 8 SH, 8.00 credits. Fall.

MRI 430

Magnetic Resonance Pathology

Students will recognize common pathology visualized on MR images utilizing course content case studies provided online. Students will complete pathology research assignments by applying new previously learned knowledge to demonstrate the student's ability to select appropriate scanning parameters that demonstrate the various types of injury disease with MR Imaging.

Prerequisites: MRI.401, MRI.402, MRI.410, RSC.310, RSC.325. Lecture; 3 SH, 3.00 credits. Spring.

MRI 430O

MRI Pathology Online

Students recognize common pathology seen on MR images utilizing information case studies provided online in text. Applying knowledge gained through the course students prepare their own case studies demonstrating their ability to select apply appropriate pathology sequences.

Prerequisite: MRI.401, MRI.402, MRI.410, RSC.310, RSC.325. Lecture; 3 SH, 3.00 credits. Spring.

MRI 435

MRI Registry Review

The student will participate in program review instruction assessments. This course will both reinforce essential material as well as identify specific areas of learning which are not fully mastered. The student will establish a plan to become proficient in all content areas required to pass the national registry for MRI technologists to function in a medical imaging department.

Corequisite: MRI.430. Prequisite: MRI.415 Lecture; 2 SH, 2.00 credits. Spring.

MSC 601

Fundamentals of Genetics

An understanding of genetics has never been more important for the practice of medicine as most conditions have some genetic basis. In this ten-week asynchronous online course from Harvard Medical School (HMX), students learn fundamental concepts of genetics, including gene structure genetic variation. Students examine inheritance of disease, population-specific risk, genetic testing come away with a solid foundation for further study of precision medicine pharmacogenomics.

Lecture; 3 SH, 3.00 credits. Varies.

MSC 602

Clinical Pharmacogenomics

This course, designed for current future healthcare providers, explores the genetic basis of drug response emphasizes current applications of pharmacogenomics in the clinic. Students will interpret pharmacogenomic test results, analyze evidence-based guidelines, optimize pharmacotherapy outcomes using genetic information. In addition, students will

examine contemporary challenges associated with direct-to-consumer genetic testing implementing pharmacogenomics into clinical practice.

Lecture; 2 SH, 2.00 credits. Spring.

MSC 602E

Clinical Pharmacogenomics

This course, designed for current future healthcare providers, explores the genetic basis of drug response emphasizes current applications of pharmacogenomics in the clinic. Students will interpret pharmacogenomic test results, analyze evidence-based guidelines, optimize pharmacotherapy outcomes using genetic information. In addition, students will examine contemporary challenges associated with direct-to-consumer genetic testing implementing pharmacogenomics into clinical practice.

Lecture; 2 SH, 2.00 credits. Spring.

MSC 603E

Ethical, Legal, Social Implications Of Precision Medicine

This course explores the ethical, legal, social implications of precision medicine through both didactic learning interactive review of current case studies. Students will engage in virtual group discussions that facilitate their ability to dissect these complex issues. In the culminating exercise, students will present their own case studies highlighting independent analysis of the ethical, legal, social issues.

Lecture; 2 SH, 2.00 credits. Fall.

MSC 604

Cancer Genomics Precision Oncology

Growing knowledge of human genetics is changing the way physicians researchers approach diagnosis of cancer risk treatment. This 10-week asynchronous online course from Harvard Medical School (HMX) covers the links between genetics cancer, provides an inside look at tumor sequencing, shares how genomics knowledge is advancing precision cancer treatments.

Corequisite: MSC.601. Lecture; 2 SH, 2.00 credits. Varies.

Medication Safety (MSM)

MSM 701

Introduction to Quality Healthcare

This course will familiarize students with the definition, evolution, implications of quality in healthcare. Students will utilize various methods to assess quality in healthcare, formulate quality criteria standards, apply models for quality improvement. Students will learn how to construct a monitoring system measure outcomes to successfully implement a quality improvement plan.

Lecture; 2 SH, 2.00 credits. Varies.

MSM 702

Introduction to Medication Safety

This course will expose students to medication safety concepts utilized in a variety of settings. Students will critically assess various adverse drug events recommend corresponding prevention strategies that incorporate both human system factors. Students will have a bachelor's degree currently be practicing in a healthcare setting.

Lecture; 2 SH, 2.00 credits. Varies.

MSM 703

Communication & the Team Approach

In this course students will learn principles of effective verbal nonverbal communication the impact on patient safety. Students will learn elements of an effective team utilize team based methods to increase patient safety. Students will utilize various techniques to improve interprofessional personal communication to enhance patient safety.

Prerequisites: (MSM.702 or PPW.371Q), MSM.701. Lecture; 2 SH, 2.00 credits. Varies.

MSM 704

Medication Safety Tools, Analysis & Application

This course will expound the medication safety quality concepts discussed in the introductory courses. Students will be given the opportunity to apply develop medication safety tools for use within their own work environments. Safety assessment techniques a framework for a medication safety strategic plan will also be discussed.

Prerequisites: (MSM.702 or PPW.371Q), MSM.701. Lecture; 3 SH, 3.00 credits. Varies.

MSM 830

Measurement, Error, Improvement

Students explore the linkage between data measures, human error, organizational improvement in patient safety quality management. The science of human factors engineering will be explored from the intersection of error systems thinking. Hindsight bias, human error, environmental conditions, contributing factors, culture will be discussed.
Prerequisites: (MSM.704, HCA.710 or PBH.710), MSM.701, MSM.702, MSM.703. Lecture; 3 SH, 3.00 credits. Spring.

MSM 850

Patient Safety Capstone & Informatics

Students to integrate their experience training in identifying, analyzing solving relevant patient safety issues facing healthcare organizations. With faculty guidance, students develop recommendations for sustainable actions, managing change, assessing progress. Students will utilize prior learning, professional experience, existing evidence to develop, support, disseminate their strategic recommendations to professional audiences.

Prerequisites: MSM.703, MSM.704, MSM.830. Lecture; 4 SH, 4.00 credits. Varies.

Nuclear Medicine Technology (NMT)

NMT 260

Fundamentals of Nuclear Medicine

Students will explore the fundamentals of nuclear medicine and molecular imaging. Students will describe basic concepts in radiation physics and detection, radiation safety and regulations, pharmaceutical and radiopharmaceutical agents, instrument operations and quality control, and clinical procedures. *Prerequisites: BIO.110, PHY.181. Lecture; 3 SH, 3.00 credits. Summer.*

NMT 3010

Global Experiences in Nuclear Medicine

Students will journey to an international location to explore the ways in which nuclear medicine molecular imaging is performed, along with how health care is delivered. Radiopharmaceuticals, procedures technology not used or performed in the United States will be the focus of this course with the opportunity to visit hospitals clinics in other countries.

Prerequisite: NMT.271 or NMT.272. Corequisite: NMT.215 or NMT.216. Lecture; 1 SH, 1.00 credits. Spring, Summer.

NMT 310

Radiation Sciences and Regulations

Students will apply principles of radiation physics and interactions with matter to the study of radiation biology. Students will describe how the theories of radiobiology translate into practical radiation protection practices using the concepts of time, distance, shielding, and risk vs. benefit. Students will also explore survey meter instrumentation and the regulations pertaining to occupationally and nonoccupationally exposed individuals. *Prerequisites: PHY.181, NMT.260, MAT.141. Lecture; 3 SH, 3.00 credits. Fall.*

NMT 330C

Nuclear Medicine Internship I

Each rotation provides supervised practical internship education in nuclear medicine technology at hospital or radiopharmacy affiliates. Learning modules are also provided to enhance student learning throughout clinical rotations.

Prerequisite: NMT.260, NMT.215, NMT.265, NMT.271, NMT.3100. Lecture; 4 SH, 4.00 credits. Fall.

NMT 331C

Nuclear Medicine Technology Internship II

Each rotation provides supervised practical internship education in nuclear medicine technology at hospital or radiopharmacy affiliates. Progression is contingent upon successful completion of previous rotation. Learning modules are also provided to enhance student learning throughout clinical rotations.

Prerequisites: NMT.215, NMT.265, NMT.271, NMT.3100, NMT.330C. Lecture; 8 SH, 8.00 credits. Varies.

NMT 332C

Nuclear Medicine Internship III

Each rotation provides supervised, practical internship training in nuclear medicine technology at hospital affiliates. Progression is contingent upon successful completion of previous rotation. Learning modules are also provided to enhance student learning throughout clinical rotations.

Prerequisites: NMT.270, NMT.275, NMT.331C. Lecture; 7 SH, 7.00 credits. Spring.

NMT 390

Problem Solving in Nuclear Medicine I

Students demonstrate their knowledge of nuclear medicine technology through a variety of mock certification examinations. Additionally, they will determine their best approach to the examinations through study methods test taking strategies required for the board certification exams.

Corequisites: NMT.270, NMT.275, NMT.331C. Lecture; 2 SH, 2.00 credits. Spring.

NMT 391

Problem Solving in Nuclear Medicine II

In this second course of the sequence, students will demonstrate their knowledge of nuclear medicine technology through a variety of mock certification examinations. Additionally, they will continue to refine their best approach to the examinations through study methods test taking strategies required for the board certification exams.

Prerequisite: NMT.390 Lecture; 2 SH, 2.00 credits. Spring.

Nursing (NUR)

NUR 2010

Professional Practice I

This course focuses on the theoretical, historical contemporary underpinnings affecting the nurse as an individual professional delivering care to patients in varying settings healthcare delivery models. Students engage in significant pre-class work to facilitate active learning strategies employed during class time using the synchronous conferencing tool Collaborate.

Corequisites: NUR.204, NUR.245. Lecture; 3 SH, 3.00 credits. Fall, Spring.

NUR 204

Health Wellness I

This course introduces nursing students to the nursing metaparadigm with special attention on the concept of health promotion, prevention, injury prevention throughout the lifespan. The application of concepts through clinical skills in seminar, laboratory, the clinical setting provides students with the knowledge, skills, attitudes, behaviors congruent with foundational nursing practice.

Corequisites: NUR.2010, NUR.245, NUR.220. Lecture; 9 SH, 9.00 credits. Fall, Spring.

NUR 204L

Health & Wellness I Lab

Corequisite NUR.204. Laboratory. Varies.

NUR 245

Healthcare Participant I

Students acquire foundational knowledge of health assessment health promotion, their relationship to comprehensive nursing care. Students learn to perform a comprehensive holistic assessment of the patient across the lifespan, including systematic collection, analysis, synthesis of health data from patients secondary sources. Students develop the organizational critical thinking skills necessary for the planning delivery of nursing care, integrate the essential nursing core competencies concepts of health promotion, risk reduction, disease prevention in the clinical laboratory setting.

Prerequisites: BIO.255, LIB.220. Lecture; 3; lab 1 SH, 4.00 credits. Fall, Spring.

NUR 245O

Health Assessment Promotion

Students acquire foundational knowledge of health assessment health promotion, their relationship to comprehensive nursing care. Students learn to perform a comprehensive holistic assessment of the patient across the lifespan, including systematic collection, analysis, synthesis of health data from patients secondary sources. Students develop the organizational critical thinking skills necessary for the planning delivery of nursing care, integrate the essential nursing core competencies concepts of health promotion, risk reduction, disease prevention in the clinical laboratory setting.

Lecture; 4 SH, 4.00 credits. Fall.

NUR 250

Chemistry of Nutrition

Students will analyze the basic chemical principles of the science of nutrition discuss their influence on the promotion of good health disease prevention. Topics will include a study of chemical components of food (natural synthetic), the biochemical breakdown of food how nutrients vitamins function in human metabolism.

Lecture; 3 SH, 3.00 credits. Fall.

NUR 250O

Chemistry of Nutrition

Students will analyze the basic chemical principles of the science of nutrition discuss their influence on the promotion of good health disease prevention. Topics will include a study of the chemical components of food (natural synthetic), the biochemical breakdown of food, how nutrients vitamins function in human metabolism.

Lecture; 3 SH, 3.00 credits. Fall.

NUR 300

Service Learning Within the Profession Of Nursing

Students acquire foundational knowledge about the characteristics of the nursing professional the roles responsibilities of the baccalaureate prepared nurse through a variety of service learning venues. This experiential learning will allow the student to develop a sense of caring, social responsibility, civic engagement cultural competence. The student will participate in community service meet in seminars to discuss the work thus, integrating learning service.

Prerequisites: NUR.226, NUR.245. Corequisites: NUR.325, NUR.330. Lecture; 1 SH, 1.00 credits. Summer.

NUR 301

Professional Practice II

This course introduces the nursing student to pharmacologic nursing practice throughout the lifespan with special attention to the legal ethical implications of drug administration therapeutic drug monitoring.

Corequisites: NUR.304, NUR.320, NUR.322. Lecture; 3 SH, 3.00 credits. Fall, Spring.

NUR 304

Health Wellness II

This course is an introduction to medical surgical content. The course provides a framework for application of professional nursing concepts exemplars within the professional nursing roles. Integration of previous health care knowledge skills into the role development of the professional nurse as a provider of patient-centered care, patient safety advocate, member of the healthcare team, a member of the profession. Emphasis is on clinical decision-making for patients their families.

Prerequisites: NUR.2010, NUR.204, NUR.245, NUR.220. Corequisites: NUR.301, NUR.322, NUR.320. Lecture; 9 SH, 9.00 credits. Fall, Spring.

NUR 304L

Health & Wellness II Lab

Corequisite: NUR.304. Laboratory. Varies.

NUR 320

Nursing Seminar II

This primary focus of this course is to facilitate the beginning nursing student with the synthesis, integration, application of the knowledge gained through their academic courses during their second term in nursing core.

Corequisites: NUR.301, NUR.304, NUR.322. Lecture; 1 SH, 1.00 credits. Varies.

NUR 322

Health Participant I

This course introduces the nursing student to the attributes associated with the recipients of healthcare: individual, families, community. The course explores the concepts of healthcare disparities, social justice, healthcare equity.

Corequisite: NUR.301, NUR.304 NUR.320, Lecture; 3 SH, 3.00 credits. Spring, Summer.

NUR 330

Information Healthcare Technologies

Students acquire foundational knowledge of nursing healthcare informatics, gaining an understanding of the theories social economic forces influencing the development application of information healthcare technologies. Students begin to use these technologies in the delivery of nursing care learn to adapt emerging technologies to clinical nursing practice. Students explore the legal ethical ramifications of using information healthcare technologies to improve patient safety the quality of healthcare to protect patient privacy.

Prerequisite: NUR.215, NUR.245, NUR.208, NUR.206, NUR.226. Lecture; 3 SH, 3.00 credits. Varies.

NUR 3500

Scholarly Inquiry

Students acquire an understanding of the historical development of nursing as a scholarly discipline appraise its contemporary standing in the scientific community. Students learn the research process, methods of qualitative quantitative research, the legal ethical considerations of engaging in nursing research. Students learn to apply critical thinking to evaluation of professional popular literature other sources of information, apply research-based knowledge from nursing the sciences as the evidence base for nursing practice participate in the research process.

Lecture; 3 SH, 3.00 credits. Varies.

NUR 4010

Professional Practice Iii: Evidence- Based Practice

Students acquire an understanding of the historical development of nursing as a scholarly discipline, appraise its contemporary standing in the scientific community. Students learn the research process, methods of qualitative quantitative research, the legal ethical considerations of engaging in nursing research. Students learn to apply critical thinking to the evaluation of professional popular literature other sources of information, apply research-based knowledge from nursing the sciences as the evidence base for nursing practice, participate in the research process.

Prerequisites: NUR.301, NUR.304, NUR.322, NUR.320. Corequisites: NUR.404, NUR.420, NUR.422. Lecture; 3 SH, 3.00 credits. Fall, Spring.

NUR 404

Health Wellness Iii: Care of Vulnerable Populations

Students apply concepts principles acquired in all prerequisite concurrent nursing courses to the provision of care for vulnerable populations to include; patients families, as well as patients with psychosocial issues in diverse clinical settings. Professional nursing concepts include; clinical judgement, communication, evidence-based practice are integrated along with additional QSEN competencies to deliver safe patient care.

Prerequisites: NUR.301, NUR.304, NUR.322, NUR.320. Corequisites: NUR.4010, NUR.422, NUR.420. Lecture; 9 SH, 9.00 credits. Summer, Fall.

NUR 404L

Health Wellness III Lab

Corequisite NUR.404. Laboratory. Varies.

NUR 410

Professional Role Development

Students will examine historical, philosophical, ethical legal aspects of nursing practice, contemporary issues facing nursing the influence of societal trends on nursing practice on today's health care delivery system.

Corequisite NUR.2500. Lecture; 3 SH, 3.00 credits. Fall.

NUR 410O

Professional Role Development

Students will examine the historical, philosophical, ethical, legal aspects of nursing practice; the contemporary issues facing nursing; the influence of societal trends on nursing practice on today's healthcare delivery system.

Corequisite NUR.2500. Lecture; 3 SH, 3.00 credits. Fall.

NUR 422

Health Participant II

Students will develop the knowledge, skills to care for patients with psychosocial needs psychiatric disorders in diverse clinical settings. Students will use a holistic approach to assessment, care, management of persons with psychosocial issues selected psychiatric disorders. Students learn to incorporate contemporary social issues as they relate to the mental social health of patients their families.

Prerequisite: NUR.301, NUR.304, NUR.322, NUR.320. Corequisites: NUR.404, NUR.420, NUR.4010. Lecture; 3 SH, 3.00 credits. Varies.

NUR 426

Community Health Nursing

This Bridge course for registered nurses provides a theoretical background for the study of community health nursing, emphasizing the assessment of interrelationships between individuals, families, aggregates, communities in determining the health status of each. Students gain an understanding of health promotion, health maintenance, disease prevention among populations. The sociopolitical, economic, environmental, cultural impact on population health is examined.

Prerequisites: NUR.410 Lecture; 4 SH, 4.00 credits. Varies.

NUR 426O

Community Health Nursing

This Bridge course for registered nurses provides a theoretical background for the study of community health nursing, emphasizing the assessment of interrelationships between individuals, families, aggregates, communities in determining the health status of each. Students gain an understanding of health promotion, health maintenance, disease prevention among populations. The sociopolitical, economic, environmental, cultural impact on population health is examined.

Prerequisite: NUR.410 or NUR.410O. Lecture; 4 SH, 4.00 credits. Varies.

NUR 501O

Professional Practice Iv: Nursing Integrations

Students will demonstrate learning acquired across the curriculum in preparation for RN licensure. Students will complete a variety of standardized assessments proctored testing across the semester to assess knowledge acquired to date. Remediation strategies will be individualized to support student first time licensure success upon graduation.

Prerequisites: NUR.401O, NUR.404, NUR.422, NUR.420. Corequisites: NUR.522, NUR.520. Lecture; 3 SH, 3.00 credits. Fall, Spring.

NUR 504

Health Wellness Iv: Complex Care Across the Lifespan

Students integrate concepts principles acquired in all prerequisite concurrent nursing courses. Students exptheir knowledge skills to care for patients with complex health problems across the lifespan to include; cancer, infectious disease, trauma, end-of-life care. Students have opportunities to demonstrate principles of coordination of care in both acute chronic settings.

Prerequisites: NUR.401O, NUR.404, NUR.422, NUR.420. Corequisites: NUR.501O, NUR.522, NUR.520. Lecture; 9 SH, 9.00 credits. Summer, Fall.

NUR 504L

Health & Wellness IV Lab

Corequisite: NUR.504. Laboratory. Varies.

NUR 520

Nursing Seminar IV

The Nursing Seminar III supports the synthesis, application integration of key concepts of the forth semester courses.

Corequisites: NUR.501O, NUR.504, NUR.522. Lecture; 1 SH, 1.00 credits. Varies.

NUR 522

Health Participant Iii: Nursing Leadership

The student will examine contemporary theories of management, leadership change related to nursing practice. Discussions are focused on effective communication within inter-professional teams, addressing conflict, delegating successfully, building teams. The student will utilize knowledge acquired across the curriculum to develop strategies to address a contemporary nursing practice issue.

Prerequisites: NUR.401O, NUR.404, NUR.422, NUR.420 Corequisites: NUR.501O, NUR.520, NUR.504. Lecture; 3 SH, 3.00 credits. Varies.

NUR 532

Directed Study

Supervised study in professional nursing involving a survey of existing knowledge, self-instructed or faculty assisted inquiry into previously published data or methodologies; or other faculty approved study of a non-research nature.

Permission of instructor required. Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

NUR 701

Professional Role Development in Nursing

In this course, students will compare analyze the theories conceptual models relevant to advanced roles in the nursing profession. Students will examine historical contemporary professional issues related to various advanced roles in nursing. Role differentiation, role transition, role development will be analyzed in the context of social healthcare environments. Students will integrate knowledge of role transition development into advanced nursing practice as clinicians, practitioners, leaders, and/or educators.

Lecture; 3 SH, 3.00 credits. Fall.

NUR 702

Human Diversity, Ethics, Social Policy Issues

Students will learn to examine the social, ethnocultural, demographic barriers in seeking receiving healthcare in the United States will recommend interventions for assuring the delivery of appropriate individualized healthcare to diverse populations. Students also will learn about healthcare systems strategies in order to assume a leadership role in the management of clinical practice.

Lecture; 3 SH, 3.00 credits. Fall.

NUR 703

Advanced Health Assessment

Students will learn to conduct an advanced comprehensive history a physical psychological assessment of signs symptoms, pathophysiologic changes, psychosocial variations of the client across the lifespan. Students will apply diagnostic reasoning in physical diagnosis develop a differential diagnosis based on the health history identified signs symptoms.

Prerequisites: NUR.701, NUR.706, NUR.707. Lecture; 5 SH, 5.00 credits. Summer.

NUR 706

Advanced Pathophysiology

Students will critically examine the advanced physiologic pathologic mechanisms of diseases. The focus of the course is to provide students with advanced concepts theories related to pathophysiological processes that occur across the lifespan. Knowledge gained from this course provides a firm foundation for the advanced practice nurse to interpret changes in normal abnormal function to assess individuals' responses to the pharmacologic management of disease processes.

Lecture; 3 SH, 3.00 credits. Varies.

NUR 707

Advanced Clinical Pharmacology

Students will primarily learn the knowledge needed for safe medication prescription monitoring to clients across the lifespan. The course is designed to meet requirements for prescription writing by advanced practice nurses. It builds upon basic knowledge of pharmacology, commonly used drugs, drug interactions used in the treatment of selected health conditions. Students will explore pharmacodynamics, pharmacokinetics, pharmacotherapeutics in relation to common body system illnesses diseases.

Prerequisite: NUR.706 Lecture; 3 SH, 3.00 credits. Summer.

NUR 715

Psychopharmacology for the Psychiatric Mental Health Nurse Practitioner

Students will acquire knowledge for the safe effective use of medications for psychiatric mental disorders in populations across the life span. Emphasis is on the selection use of psychoactive medications in the treatment of clients experiencing psychiatric disorders in the restoration of wellness.

Prerequisites: NUR.701, NUR.702, NUR.703, NUR.706, NUR.707, NUR.708. Corequisite: NUR.805. Lecture; 3 SH, 3.00 credits. Summer.

NUR 801

Survey of Telemedicine

Course introduces foundational knowledge of telemedicine technology its application into advanced practice nursing. Focus is on role of advanced practice nurse using telemedicine in care of populations across the life span with consideration to ethical, legal human diversity. Students evaluate use of technology infrastructure models to support telemedicine services to provide access to health care in different settings.

Prerequisites: NUR.701, NR.706, NUR.707. Corequisite: NUR.703. Permission of instructor required. Lecture; 1 SH, 1.00 credits. Varies.

NUR 805

Basic Counseling Theory & Techniques for The Psychiatric Mental Health Nurse Practitioner

Along with the general types of counseling offered to clients, prominent individual, group family therapy approaches are considered. In addition, an opportunity to learn, explore practice the foundational evidence-based interaction skills essential in the delivery of psychotherapy is provided. Relevant ethical concerns are noted addressed during role play counseling sessions.

Corequisite: NUR.715. Prerequisites: NUR.701, NUR.702, NUR.703, NUR.706. NUR.707, NUR.708. Permission of instructor required. Lecture; 3 SH, 3.00 credits. Spring.

NUR 805C

Basic Counseling Theory & Techniques for The Psychiatric Mental Health Nurse Practitioner Clinical

Along with the general types of counseling offered to clients, prominent individual, group family therapy approaches are considered. In addition, an opportunity to learn, explore practice the foundational evidence-based interaction skills essential in the delivery of psychotherapy is provided. Relevant ethical concerns are noted addressed during role play counseling sessions.

Corequisite NUR.805. Permission of instructor required. Lecture; 1 SH, 1.00 credits. Varies.

NUR 806

Psychiatric Mental Health Nurse Practitioner I

This is the first of two sequential courses that will build upon prerequisite knowledge of theoretical concepts of advanced practice nursing related disciplines. Students will identify implement appropriate culturally sensitive interventions for the

care of patients their families with mental health care needs across the lifespan. Ethical legal issues, health promotion disease prevention are emphasized.

Prerequisites: NUR.715, NUR.805 Permission of instructor required. Lecture; 3 SH, 3.00 credits. Varies.

NUR 806C

Psychiatric Mental Health Nurse Practitioner I Clinical

This is the first of two sequential courses that will build upon prerequisite knowledge of theoretical concepts of advanced practice nursing related disciplines. Students will identify implement appropriate culturally sensitive interventions for the care of patients their families with mental health care needs across the lifespan. Ethical legal issues, health promotion disease prevention are emphasized.

Corequisite: NUR.806. Prerequisites: NUR.715, NUR.805 Permission of instructor required. Lecture; 4 SH, 4.00 credits. Varies.

NUR 807

Psychiatric Mental Health Nurse Practitioner II

In Psychiatric Mental Health Nurse Practitioner II, the student will deliver a holistic healthcare managed approach to caring for patients with mental health needs across the lifespan. Emphasis is placed on the acute, complex chronic psychiatric mental healthcare needs of patients their families in a culturally diverse environment within integrated coordinated care.

Prerequisites: NUR.715, NUR.806 Permission of instructor required. Lecture; 3 SH, 3.00 credits. Varies.

NUR 807C

Psychiatric Mental Health Nurse Practitioner II Clinical

This is the first of two sequential courses that will build upon prerequisite knowledge of theoretical concepts of advanced practice nursing related disciplines. Students will identify implement appropriate culturally sensitive interventions for the care of patients their families with mental health care needs across the lifespan. Ethical legal issues, health promotion disease prevention are emphasized.

Corequisite: NUR.807, Prerequisites: NUR.715, NUR.806 Permission of instructor required. Lecture; 4 SH, 4.00 credits. Varies.

NUR 809

Family Primary Care I (Pedi/Women's Health)

Students will focus on advanced practice nursing health care management of pediatric patients women with reproductive needs- their families. The student will provide primary health care services to women with needs related to the reproductive system. During the pediatric section, students will focus on performing comprehensive health developmental assessments for children their families, in addition to managing episodic chronic disease states. Health promotion disease/injury prevention will be an integral component of the course.

Prerequisites: NUR.701, NUR.706, NUR.707, NUR.703, Permission of instructor required. Lecture; 6 SH, 6.00 credits. Summer.

NUR 810

Family Primary Care II: Apn Theory Intervention

Students will focus on advanced practice nursing the healthcare management of adults. They will provide comprehensive primary healthcare services that are evidence based, personalized, cost-effective to adults with acute chronic health conditions. Students will learn course content that includes developmental, physiological, psychosocial changes relative to health maintenance disease prevention.

Prerequisites: NUR.701, NUR.706, NUR.707, NUR.702, NUR.703. Permission of instructor required. Lecture; 6 SH, 6.00 credits. Spring.

NUR 811

Family Family Primary Care III

Students will focus on advanced practice nursing the healthcare management of older adults. They will provide comprehensive primary healthcare services that are evidence based, personalized, cost-effective to older adults with acute chronic health conditions. Students will learn course content that includes developmental, physiological, psychosocial changes relative to health maintenance disease prevention.

Prerequisites: NUR.809, NUR.810. Permission of instructor required. Lecture; 6 SH, 6.00 credits. Fall.

NUR 815

Psychiatric Mental Health Nursing I (Child Adolescent)

Students review the major childhood mental health disorders looking at epidemiology, health mental health promotion prevention, risk factors, cultural factors, assessment issues specific to children adolescents, use of selected

diagnostic/screening tools rating scales, as well as evidence-based child adolescent specific treatment therapeutics. This course also reviews medical comorbidities in this population family based therapies interventions.

Prerequisites: NUR.701, NUR.702, NUR.703, NUR.706, NUR.707, NUR.708 *Corequisite:* NUR.715. *Lecture; 6 SH, 6.00 credits. Summer.*

NUR 816

Scholarship Adv Nur: Evid-Based Practice Building an Evidence-Based Practice

This course builds upon the research process/concepts learned in baccalaureate nursing education. Students refine their skills in critiquing qualitative quantitative scholarship to determine the meaning appropriateness of evidence as it relates to advanced practice nursing. Students also learn to utilize new knowledge derived from evidence to improve practice associated health outcomes in the primary care setting.

Prerequisites: NUR.701, NUR.706. *Corequisite:* NUR.807 or NUR.835 or NUR.809. *Lecture; 3 SH, 3.00 credits. Fall.*

NUR 820

Translating Integrating Scholarship Into Practice

Students apply the core concepts of research scholarship to challenge current practices, procedures, or policies in order to address a specific gap in nursing practice. This course will provide the student the opportunity to explore the cyclical scholarship/research process in which nurses engage including identifying questions needing answers, searching or creating evidence for potential solutions or innovations, evaluating outcomes, identifying additional questions.

Prerequisite: NUR.708. *Lecture; 2-4 SH, 2.00-4.00 credits. Fall.*

NUR 823

Translating Integrating Scholarship Into Practice

Students apply the core concepts of research scholarship to challenge current practices, procedures, or policies in order to address a specific gap in nursing practice. This course will provide the student the opportunity to explore the cyclical scholarship/research process in which nurses engage including identifying questions needing answers, searching or creating evidence for potential solutions or innovations, evaluating outcomes, identifying additional questions.

Prerequisite: NUR.708. *Lecture; 3 SH, 3.00 credits. Varies.*

NUR 825

Psychiatric Mental Health Nursing II (Young Middle Aged Adult)

Students review the major young middle age mental health disorders looking at epidemiology, health mental health promotion prevention, risk factors, cultural factors, assessment issues specific to young middle age adults. The use of select diagnostic/screening tools, as well as evidenced-based specific treatments therapeutics are applied. Common medical comorbidities in this population are also reviewed.

Prerequisites: NUR.701, NUR.702, NUR.703, NUR.706, NUR.707, NUR.708, (NUR.815 or NUR.805). *Corequisite:* NUR.820. *Lecture; 6 SH, 6.00 credits. Fall.*

NUR 835

Psychiatric Mental Health Nursing III (Older Adult)

Students review the major older adult mental health disorders looking at epidemiology, health mental health promotion prevention, risk factors, cultural factors, assessment issues. Select diagnostic/screening tools, as well as evidenced-based specific treatments therapeutics are applied. Common medical comorbidities in this population are also reviewed with the impact of mental health disorders on the client's family.

Prerequisites: NUR.701, NUR.702, NUR.703, NUR.706, NUR.707, NUR.708, NUR.815, NUR.825. *Corequisite:* NUR.820. *Lecture; 6 SH, 6.00 credits. Spring.*

NUR 900

Clinical DNP Practice Foundations Analysis

The student will explore the advanced practice role as it relates to translating evidence into practice. The student will explore the theoretical foundations of practice, conceptual models to implement research, strategies to implement evidence-based practice. The student will examine factors contributing to the evolution of the development of the doctorate in nursing practice role.

Lecture; 3 SH, 3.00 credits. Summer.

NUR 905

Organizational System Leadership for Quality Improvement

Students will explore the role of the DNP as organizational system leader within complex health care systems. This course prepares students to develop effective strategies to ensure safety quality health care for patients populations includes evaluation of health care outcomes. Students engage in inquiry into the state of health care delivery, patient-

centered care, sustainable change, ethical principles surrounding practice. Students consider the goal of managing outcomes through data analysis as well as through knowledge skills based on contemporary theory research.

Lecture; 3 SH, 3.00 credits. Summer.

NUR 910

Methods for Evidence-Based Practice

The student will understand qualitative quantitative statistics. The student will be able to read interpret medical literature with application to clinical practice. Students will gain familiarity of biostatistics as it applies to clinical practice. The student will disseminate evidence from inquiry to diverse populations using multiple methods.

Prerequisites: NUR.900, NUR.905. Lecture; 3 SH, 3.00 credits. Summer.

NUR 915

Healthcare Policy Advocacy From Local to Global Issues

The Doctor of Nurse Practice student will analyze evaluate healthcare policy proposals within ethical, legal, related issues from the perspective of stakeholders. The student will evaluate healthcare delivery, organizational systems, impact on health. Emphasis will be placed on the student to lead advocate for social justice, equity, ethical policies in healthcare arenas.

Lecture; 3 SH, 3.00 credits. Varies.

NUR 920

Advanced Concepts in Population Health

This course introduces the student to comprehensive concepts in population health by examining health promotion prevention strategies through the use of healthcare quality measures, diversity principles, cultural, socioeconomic, ethical dimensions of care population safety considerations. Concepts of epidemiology biostatistics in public health as it relates to advanced nursing practice will be discussed. Basic elements of grant writing will be introduced relative to population health.

Prerequisite: NUR.910. Corequisite: NUR.915. Lecture; 3 SH, 3.00 credits. Summer.

NUR 930

Research Translation I

The Doctoral Nurse Practice student will participate in clinical practice, collaborative teamwork, practice-based evaluation in their advanced practice role. Doctoral Nurse Practice students will lead a scholarly project with emphasis on the evaluation of quality practice with a focus on vulnerable populations.

Prerequisites: NUR.900, NUR.905, NUR.910. Lecture; 3 SH, 3.00 credits. Summer.

NUR 931

Research Translation II

Doctoral Nurse Practice students will participate in clinical practice, collaborative teamwork, and practice-based evaluation in their advanced practice role. Students will participate in a mentored practicum related to their chosen Scholarly Practice Project. Doctoral Nurse Practice students will lead the implementation of a scholarly project with emphasis on the evaluation of quality practice with a focus on vulnerable populations.

Prerequisites: NUR.900, NUR.905, NUR.910, NUR.930. Lecture; 3 SH, 3.00 credits. Spring.

Optometry (OPT)

OPT 610

Clinical Anatomy

This course provides foundational knowledge of human anatomy from the optometric perspective. Accordingly, the course emphasizes the anatomy of the eye body. Students will be able to develop an appropriate, detailed knowledge of anatomy of the human to develop a multidimensional understanding of the anatomical relationships of the structures in the body.

Corequisite: OPT.656. Lecture; 4 SH, 4.00 credits. Fall.

OPT 610L

Clinical Anatomy Lab

This course provides foundational knowledge of human anatomy from the optometric perspective. Accordingly, the course emphasizes the anatomy of the eye body. Students will be able to develop an appropriate, detailed knowledge of anatomy of the human to develop a multidimensional understanding of the anatomical relationships of the structures in the body.

Corequisite: OPT.610. Laboratory. Fall.

OPT 612

Ocular Biochemistry & Physiology

Students will gain a foundational knowledge of the biochemical physiological processes of the human body appropriate for an optometrist.

Prerequisite: OPT.610. Corequisite: OPT.709. Lecture; 2 SH, 2.00 credits. Fall.

OPT 613

Neuro Anatomy & Physiology

The mission of this course is to provide foundational knowledge of human neuroanatomy appropriate for an optometrist. Students will learn about the head neck, under a detailed survey of cranial nerves as well as the parasympathetic sympathetic nervous systems.

Prerequisites: OPT.610, OPT.656, OPT.721. Lecture; 3 SH, 3.00 credits. Fall.

OPT 622

Visual Perception

Students will gain foundational knowledge about vision science in perception color vision appropriate for an optometrist. The course emphasizes these topics from a clinical perspective.

Prerequisite: OPT.630. Lecture; 3 SH, 3.00 credits. Fall.

OPT 630

Geometric Physical Optics

Students will learn geometrical physical optics appropriate for an optometrist. The course covers the basic theory of optics, which is necessary for understanding optometric refraction, ophthalmic corrective lenses, ophthalmic instruments low-vision devices. Topical areas in geometrical optics include vergence, refraction, reflection, ray tracing, prisms, thin thick lenses, mirrors, optical models of the eye refractive errors. The physical optics portion of the course covers the wave nature of light as well as quantum theory.

Lecture; 5 SH, 5.00 credits. Fall.

OPT 630L

Geometric Physical Optics Lab

Students will learn geometrical physical optics appropriate for an optometrist. The course covers the basic theory of optics, which is necessary for understanding optometric refraction, ophthalmic corrective lenses, ophthalmic instruments low-vision devices. Topical areas in geometrical optics include vergence, refraction, reflection, ray tracing, prisms, thin thick lenses, mirrors, optical models of the eye refractive errors. The physical optics portion of the course covers the wave nature of light as well as quantum theory.

Laboratory. Fall.

OPT 631

Visual Optics

Students will learn visual physical optics appropriate for an optometrist.

Prerequisite: OPT.630. Corequisite: OPT.622. Lecture; 4 SH, 4.00 credits. Fall.

OPT 631L

Visual Optics Lab

Prerequisite: OPT.630. Corequisite: OPT.631. Laboratory. Fall.

OPT 632

Ophthalmic Optics

Students will learn ophthalmic optics appropriate for an optometrist.

Prerequisites: OPT.631, OPT.622, OPT.652. Lecture; 5 SH, 5.00 credits. Fall.

OPT 632L

Ophthalmic Optics Lab

Students will learn ophthalmic optics appropriate for an optometrist. This course concerns the optical physical properties of ophthalmic lenses, as well as lensometry, standards eyewear design.

Prerequisite: OPT.631. Laboratory. Fall.

OPT 640

Systems Based Physiology

This Systems Based Physiology Course provides an understanding how cells, tissues, organs, organ systems function together to create one organism. Furthermore, the course lays the basis for understanding diagnosis treatment of diseases.

Prerequisites: OPT.613, OPT.657. Lecture; 3 SH, 3.00 credits. Summer.

OPT 650**Optometry Theory Methods I (w/Lab)**

This course provides clinical education on basic examination elements, including ocular terminology, clinical hygiene equipment care, case history, visual acuity, utilization of pretesting equipment, sphygmomanometry, stereoacuity, color vision, documentation utilizing electronic health records. Students must demonstrate competency for individual basic skills used in a primary care examination, communicate appropriate principles of professionalism, identify normal findings.

Lecture; 2 SH, 2.00 credits. Fall.

OPT 650L**Optometric Theory Methods I (w/Lab)**

This course provides clinical education on basic examination elements, including ocular terminology, clinical hygiene equipment care, case history, visual acuity, utilization of pretesting equipment, sphygmomanometry, stereoacuity, color vision, documentation utilizing electronic health records. Students must demonstrate competency for individual basic skills used in a primary care examination, communicate appropriate principles of professionalism, identify normal findings.

Laboratory; 1 SH, 1.00 credits. Fall.

OPT 652**Optometric Theory Methods 2**

This course provides clinical education on examination elements, including refractive binocular vision assessment, while incorporating relevant basic science components. Students must demonstrate competency for individual basic skills used in a primary care examination, communicate appropriate principles of professionalism, identify normal findings.

Prerequisites: OPT.630, OPT.650. Lecture; 2 SH, 2.00 credits. Fall.

OPT 652L**Optometry Theory Methods Lab II**

This course provides clinical education on examination elements, including refractive binocular vision assessment, while incorporating relevant basic science components. Students must demonstrate competency for individual basic skills used in a primary care examination, communicate appropriate principles of professionalism, identify normal findings.

Prerequisites: OPT.630, OPT.650. Corequisite: OPT.652. Laboratory; 1 SH, 1.00 credits. Fall.

OPT 653**Optometric Theory Methods 3**

This course provides clinical education on examination elements, including advanced anterior segment posterior segment assessment, while incorporating relevant basic science components. Students must demonstrate competency for individual basic skills used in a primary care examination, communicate appropriate principles of professionalism, identify normal findings.

Prerequisites: OPT.631, OPT.652. Lecture; 2 SH, 2.00 credits. Fall.

OPT 653L**Optometric Theory Methods Lab III**

Prerequisites: OPT.631, OPT.652. Laboratory; 1 SH, 1.00 credits. Fall.

OPT 655**Systemic Disease I**

This introductory course is designed to prepare optometry students to recognize, list under the most common systemic diseases as they present in the contemporary practice of Optometry. Emphasis will be on high frequency, high mortality, high morbidity diseases, may include diseases that have ocular manifestations.

Lecture; 1 SH, 1.00 credits. Varies.

OPT 656**Histology Embryology**

Students will understand the basic concepts related to embryology histology, especially as they relate to clinical optometry.

Corequisite: OPT.610. Lecture; 3 SH, 3.00 credits. Fall.

OPT 657**Microbiology**

Students will understand the basic concepts related to microbiology, especially as they relate to clinical optometry.

Prerequisites: OPT.610, OPT.656. Lecture; 1 SH, 1.00 credits. Spring.

OPT 691

Optometry & Public Health

Students will gain an appreciation for the history contemporary role of public health practice. Students will learn basic public health concepts applications, particularly as they relate to optometric practice advocacy, with a special emphasis on the epidemiology of major eye diseases. This course is intended for optometry students.

Prerequisite: OPT.651. Corequisite: OPT.860. Lecture; 1 SH, 1.00 credits. Fall.

OPT 699

Research / Independent Study Elective

The course goals are to provide students with a better understanding of optometric research, research design, research methodology. Students will analyze, develop, reflect upon a research study chosen by the faculty with student input.

Permission of instructor required. Lecture; 1-3 SH, 1.00-3.00 credits. Fall.

OPT 705

Neurodiagnostics Visual Neurophysiology and

Graduating optometrists must possess a robust understanding of retinal cortical neural processing the clinical procedures used to assess retinal cortical neural function. Through lectures videos of diagnostic procedures, students will gain a comprehensive understanding of retinal cortical neural processing in the visual pathway how neural processing can be assessed in patients through neuro-diagnostic techniques.

Prerequisites: OPT.613, OPT.622. Lecture; 1 SH, 1.00 credits. Fall.

OPT 709

Systemic Pharmacology I

This overview of systemic pharmacology introduces general drug mechanisms followed by an in-depth coverage of autonomic pharmacology. This sets the stage for the topics that follow, including cardiovascular, pulmonary, renal, gastrointestinal pharmacology. A major course objective is to provide tools necessary to continued learning as drug treatments evolve, including the increasing approval of biologics gene therapy products.

Prerequisites: OPT.610, OPT.656. Corequisite: OPT.612. Lecture; 2 SH, 2.00 credits. Spring.

OPT 710

Systemic Pharmacology II

Students will develop a firm understanding of pharmacokinetics pharmacodynamics. They will understand the application of systemic pharmacology with an optometric perspective. Students will understand drug-drug interactions, drug mechanisms, side effects.

Prerequisites: OPT.612, OPT.657, OPT.709. Lecture; 2 SH, 2.00 credits. Fall.

OPT 711

Immunology

Students will understand the basic concepts related to immunology as well as the concepts of altered health states.

Prerequisites: OPT.612, OPT.657. Lecture; 1 SH, 1.00 credits. Summer.

OPT 712

Ocular Pharmacology

Students will demonstrate knowledge of ocular pharmacological principles, including preparations, bioavailability, routes of administration, mechanisms of action, contraindications side effects, treatment management.

Prerequisites: OPT.710, OPT.711. Lecture; 3 SH, 3.00 credits. Fall.

OPT 721

Visual Development

This course presents ocular embryology vision science related to vision development in the infant child. It also addresses changes in vision with aging. The course covers the effects of early environmental restrictions, changes in vision with aging, visual perceptual skills, anomalies of child development.

Lecture; 2 SH, 2.00 credits. Fall.

OPT 722

Oculomotor Function

This course presents the oculomotor system. Eye movements are described in detail, including the basic types their purpose mechanisms. The course also looks at clinical manifestations of anomalies of these eye movements.

Prerequisite: OPT.622. Lecture; 2 SH, 2.00 credits. Fall.

OPT 741**Practice Business Management I**

Students will be introduced to the functional business management areas necessary to operate an eye care practice. They will review the principles of strategy, finance accounting, marketing, human resources, operations management, information technology as applied to eye care practice. Students will become familiar with business process analysis problem solving.

Lecture; 2 SH, 2.00 credits. Spring.

OPT 745**Systemic Disease II**

This intermediate course is designed to prepare optometry students to recognize, diagnose, create a differential diagnosis, a treatment plan refer as appropriate systemic disease as it presents in the contemporary practice of Optometry. The course will integrate the material learned from Pathophysiology Pharmacology. Emphasis will be on high frequency, high mortality, high morbidity diseases that have ocular manifestations.

Prerequisites: OPT.655, OPT.766. Lecture; 2 SH, 2.00 credits. Spring.

OPT 750**Anterior Segment Ocular Disease I**

Students will understand the etiology, signs symptoms, treatment management of various anterior segment ocular diseases disorders.

Prerequisites: OPT.640, OPT.711. Lecture; 4 SH, 4.00 credits. Fall.

OPT 751**Optometric Theory Methods 4**

This course provides clinical education on examination elements, including advanced anterior segment posterior segment assessment, while incorporating relevant basic science components. Students must demonstrate competency in individual basic skills used in a primary care examination, communicate appropriate principles of professionalism, identify normal findings.

Prerequisite: OPT.653. Lecture; 2 SH, 2.00 credits. Fall.

OPT 751L**Optometric Theory & Methods IV Lab**

This course provides clinical education on examination elements, including advanced anterior segment posterior segment assessment, while incorporating relevant basic science components. Students must demonstrate competency in individual basic skills used in a primary care examination, communicate appropriate principles of professionalism, identify normal findings.

Prerequisite: OPT.653. Laboratory; 1 SH, 1.00 credits. Fall.

OPT 752**Contact Lenses I**

Students will be introduced to all aspects of contact lens care. Students will learn about contact lens materials design, fitting techniques, patient management.

Prerequisite: OPT.750 Lecture; 3 SH, 3.00 credits. Spring.

OPT 752L**Contact Lenses Lab I**

Students will be introduced to all aspects of contact lens care. Students will learn about contact lens materials design, fitting techniques, patient management.

Prerequisite: OPT.750 Laboratory; 1 SH, 1.00 credits. Spring.

OPT 753**Posterior Segment I**

This course provides instruction regarding the classification, epidemiology, anatomy, physiology, pathology of posterior segment ocular diseases the critical understandings necessary for diagnosis, treatment, management of the various conditions. Elements including definitions, classifications, clinical techniques, utilization of equipment, proper documentation utilizing electronic health records will be emphasized.

Prerequisite: OPT.750 Lecture; 4 SH, 4.00 credits. Spring.

OPT 754**Low Vision Geriatrics**

Students will learn fundamental low-vision principles, principles of magnification, utilization selection of low-vision devices, therapeutic treatment management.

Prerequisites: OPT.632, OPT.753. Lecture; 3 SH, 3.00 credits. Spring.

OPT 754L

Low Vision & Geriatrics Lab

Students will learn fundamental low-vision principles, principles of magnification, utilization selection of low-vision devices, therapeutic treatment management.

Prerequisite: OPT.630. Laboratory. Spring.

OPT 755

Pediatrics

Students will learn about the needs of the pediatric population about pediatric vision testing, treatment, management. Students also will understand the social academic demands on the pediatric population.

Prerequisites: OPT.721, OPT.751, OPT.759, OPT.852, OPT.855. Lecture; 3 SH, 3.00 credits. Spring.

OPT 755L

Pediatrics Lab

Students will learn about the needs of the pediatric population about pediatric vision testing, treatment, management. Students also will understand the social academic demands on the pediatric population.

Prerequisites: OPT.650, OPT.650L. Laboratory. Spring.

OPT 756

Foundations of Binocular Vision

Students will learn the theory behind binocular visual perception, as well as binocular vision testing, treatment, management, with emphasis on adult treatment management.

Prerequisite: OPT.652. Lecture; 2 SH, 2.00 credits. Fall.

OPT 757

Clinical Binocular Vision I Biology

Prerequisites: OPT.652, OPT.722, OPT.756. Lecture; 4 SH, 4.00 credits. Spring.

OPT 758

Neuro-Optometry

This course is a convergence of general neuroanatomy/neurology clinical manifestations of neurological disorders, especially as these relate to oculomotor visual function. Students will be able to recognize the presentation of, describe diagnosis management of neurological disorders impacting oculomotor visual function.

Prerequisites: OPT.757, OPT.766. Lecture; 2 SH, 2.00 credits. Fall, Spring.

OPT 759

Anterior Segment Ocular Disease II

Students will understand the etiology, signs symptoms, treatment management of various anterior segment ocular diseases disorders. The focus will be on case discussion, treatment management of anterior segment ocular disease.

Prerequisites: OPT.712, OPT.753. Lecture; 1 SH, 1.00 credits. Summer.

OPT 766

Pathophysiology of Systemic Disease

Students will learn integrative human physiology pathophysiology of the neurological, neuromuscular, cardiovascular, endocrine, hematological, integumentary, pulmonary, hepatic, renal, musculoskeletal gastrointestinal systems, with an emphasis on systemic conditions pertinent to optometrists.

Prerequisites: OPT.640, OPT.711. Lecture; 3 SH, 3.00 credits. Fall.

OPT 768

Ocular Surface Disorders Dry Eye

This course is designed to prepare optometry students to understand, diagnose appropriately treat ocular surface disease dry eye. Conditions contributing to dry eye are a common presentation in optometric practice. Using the current literature a pathophysiological model, the course will discuss the most current theories approaches to diagnosis treatment of these common conditions.

Prerequisite: OPT.750. Corequisite: OPT.759. Lecture; 1 SH, 1.00 credits. Summer.

OPT 770C

Primary Care Clinic I

Students will gain experience in primary care optical clinical settings in conducting vision screenings utilizing skills learned in the Clinical Optometry course sequence. Students will gain the ability to differentiate between normal

abnormal clinical findings. Students will develop an understanding of clinical protocols, billing coding, compliance. Students will develop communication skills, including taking a medical history, patient education, public speaking. Students will develop case presentation skills.

Prerequisites: OPT.640, OPT.652, OPT.705, OPT.710, OPT.711, OPT.722. Lecture; 2 SH, 2.00 credits. Fall.

OPT 771C

Primary Care Clinic II

Students will gain experience in primary care pediatric clinical settings utilizing skills learned in the Clinical Optometry course sequence. Students will begin exposure to community health center based Optometry. Students will gain the ability to differentiate between normal abnormal clinical findings. Students will learn to develop articulate initial patient management strategies. Students will develop an understanding of clinical protocols, billing coding, compliance. Students will develop case presentation skills.

Prerequisites: OPT.712, OPT.750, OPT.756, OPT.766, OPT.770C. Lecture; 2 SH, 2.00 credits. Spring.

OPT 772C

Primary Care Clinic III

Students will gain experience in primary care clinical settings; particularly community health center based Optometry. Students will use skills acquired in the Optometric Theory Methods course sequence. Students will gain the ability to differentiate between normal abnormal clinical findings. Students will learn to develop articulate initial patient management strategies.

Prerequisites: OPT.751, OPT.752, OPT.753, OPT.757, OPT.771C. Lecture; 2 SH, 2.00 credits. Fall.

OPT 799

Research / Independent Study Elective

The course goals are to provide students with a better understanding of optometric research, research design, research methodology. Students will analyze, develop, reflect upon a research study chosen by the faculty with student input.

Permission of instructor required. Lecture; 1 SH, 1.00 credits. Fall.

OPT 810

Integrative Seminar

Students review patient cases that are frequently encountered in optometric practice. Working in small groups, students integrate information from prior didactic laboratory courses to arrive at diagnoses treatment plans for individual cases. Students perform literature searches, differential diagnoses provide treatment plans for each case then present their findings to the class.

Prerequisites: OPT.752, OPT.753, OPT.757, OPT.771C, OPT.851,. Lecture; 1 SH, 1.00 credits. Summer.

OPT 820

Cataract & Refractive Surgery

Optometry is evolving to a more medical model of patient care. Graduating optometrists must possess a robust understanding of cataract refractive surgery, the most commonly-performed ophthalmic surgical procedures. Through lecture didactic, case reports live observation, students will gain a comprehensive understanding of cataract refractive surgery- from diagnostics through post-operative management of normal complicated clinical cases.

Prerequisites: OPT.632, OPT.653, OPT.759, OPT.855. Lecture; 1 SH, 1.00 credits. Fall.

OPT 830

Professional Ethics

The purpose of this course is to provide a practical overview of ethical principles challenges that are part of healthcare professional practice. The course will review ethical theories their application to clinical practice. Ethical problems that challenge students practitioners in a changing healthcare environment will be discussed using case studies current events.

Lecture; 1 SH, 1.00 credits. Fall.

OPT 840

Special Populations Topics

This course focuses on the specialties of Optometry including; Pediatrics, Low Vision, Advanced Contact Lenses, Vision Therapy, individuals with developmental disabilities. Through weekly meetings, participation in the already existent Primary Specialty Care Optometry Clinic, the student will gain a stronger more integrated experience in these areas of specialty.

Prerequisites: OPT.755, OPT.754, OPT.852, OPT.870C. Corequisite: OPT.879C. Lecture; 2 SH, 2.00 credits. Spring.

OPT 845

Advanced Optometric Theory Methods

This course provides a practical overview of various aspects of Optometric practice, including the application of basic optics equations, prescription of contact lenses, low vision devices, infectious disease management. Students also interpret patient symptoms, their relevance to ocular disease to prepare for independent practice.
Prerequisites: OPT.754, OPT.855, OPT.855, OPT.857, OPT.859, OPT.755, OPT.870C. Lecture; 2 SH, 2.00 credits. Spring.

**OPT 851
Glaucoma I**

This course provides fundamental instruction regarding the classification, epidemiology, anatomy, physiology, pathology of glaucoma, the critical understandings necessary for diagnosis, treatment, management of the disease. Definitions, classifications, clinical techniques, utilization of specialized equipment, proper documentation utilizing electronic health records will be emphasized.
Prerequisite: OPT.712, OPT.766. Lecture; 2 SH, 2.00 credits. Fall.

**OPT 852
Clinical Binocular Vision II**

Students will review binocular vision disorders, be introduced to vision therapy methods. Students will utilize laboratory time to demonstrate competency understanding of vision therapy specialized binocular vision techniques.
Prerequisite: OPT.757. Lecture; 3 SH, 3.00 credits. Fall.

**OPT 852L
Clinical Binocular Vision II Lab**

Students will review binocular vision disorders, be introduced to vision therapy methods. Students will utilize laboratory time to demonstrate competency understanding of vision therapy specialized binocular vision techniques.
Prerequisite: OPT.750. Laboratory. Spring.

**OPT 854
Ocular Manifestations of Systemic Disease**

This course provides instruction regarding the classification, epidemiology, anatomy, physiology, pathology of eye-relevant systemic diseases as well as the critical understandings necessary for effective proper diagnosis, treatment, management of the various ocular conditions resulting from systemic disorders.
Prerequisites: OPT.712, OPT.766. Lecture; 2 SH, 2.00 credits. Spring.

**OPT 855
Contact Lenses II**

Students will be introduced to advanced contact lens care. Students will learn about advanced designs of contact lenses as well as how to manage patients with irregular corneas using contact lenses.
Prerequisites: OPT.630, OPT.631, OPT.632, OPT.752. Lecture; 1 SH, 1.00 credits. Spring.

**OPT 857
Posterior Segment Ocular Disease II**

This course is both a review of basic diagnosis, treatment management in Posterior Segment Ocular Disease in case-based format, an introduction to advanced concepts in posterior segment ocular disease.
Prerequisite: OPT.753. Lecture; 1 SH, 1.00 credits. Fall.

**OPT 859
Glaucoma II**

This course provides instruction regarding the classification, epidemiology, anatomy, physiology, pathology of advanced secondary glaucomas. It includes the critical understandings necessary for diagnosis, treatment, management of the advanced glaucomatous disease.
Prerequisite: OPT.851. Lecture; 2 SH, 2.00 credits. Summer.

**OPT 860
Research Statistical Methods Biology**

The course goals are to provide students with a better understanding of optometric research, research design, statistical analysis, research methodology. Students will analyze, develop, reflect upon a research study chosen by the faculty with student input. The class will focus on sources for research proper documentation.
Prerequisites: OPT.651, OPT.751. Corequisite: OPT.691. Lecture; 1 SH, 1.00 credits. Spring.

**OPT 870C
Primary Specialty Care Optometry I**

Students will gain experience in primary care clinical settings, utilizing skills learned in the Clinical Optometry course sequence. Students will gain the ability to develop differential diagnoses clinical assessments. Students will learn to develop articulate initial patient management strategies. Students will participate in glaucoma, vision therapy, contact lens, low vision, community health clinics. Students will develop an understanding of clinical protocols, billing/coding, compliance.

Prerequisites: OPT.751, OPT.772C, OPT.758, OPT.759, OPT.851, OPT.852, OPT.855. Lecture; 3 SH, 3.00 credits. Fall.

OPT 879C

Primary Specialty Care Optometry II

Students will gain experience in multidisciplinary community healthcare clinical settings, utilizing skills learned in the Clinical Optometry course sequence. Students will gain the ability to develop differential diagnoses patient management strategies. Students will participate in glaucoma, vision therapy, contact lens, low vision, community health clinics. Students will develop the ability to coordinate care with members of a multidisciplinary health human services team.

Prerequisites: OPT.754, OPT.755, OPT.810, OPT.820, OPT.857, OPT.859, OPT.870C. Corequisite: OPT.840. Lecture; 3 SH, 3.00 credits. Spring.

OPT 899

Research / Independent Study Elective

The course goals are to provide students with a better understanding of optometric research, research design, research methodology. Students will analyze, develop, reflect upon a research study chosen by the faculty with student input.

Permission of instructor required. Lecture; 1 SH, 1.00 credits. Fall.

OPT 951O

Online Clinical Seminar

Students will perform post case reviews in an online forum to be evaluated, shared/discussed. Students participate in OPT 951 during each of the three required externships.

Prerequisites: OPT.741, OPT.830, OPT.840, OPT.845, OPT.879C. Lecture; 3 SH, 3.00 credits. Varies.

OPT SEM

Online Clinical Seminar

Prerequisites: OPT.870C, OPT.879C. Lecture. Varies.

OPTC 971

Externship Rotation 1

Prerequisites: OPT.751, OPT.751L, OPT.879C. Lecture; 16 SH, 16.00 credits. Varies.

OPTC 972

Externship Rotation 2

Externship rotations represent a full academic year of clinical rotations offered primarily at off-campus sites. All rotations are 16 weeks in duration. Students will gain experience in patient care in a variety of settings, including hospitals, community health centers, private practices, specialty clinics, and multidisciplinary settings.

Prerequisites: OPT.751, OPT.752L. Lecture; 16 SH, 16.00 credits. Varies.

OPTC 973

Externship Rotation 3

Externship rotations represent a full academic year of clinical rotations offered primarily at off-campus sites. All rotations are 16 weeks in duration. Students will gain experience in patient care in a variety of settings, including hospitals, community health centers, private practices, specialty clinics, multidisciplinary settings.

Prerequisites: OPT.870C, OPT.879C. Lecture; 16 SH, 16.00 credits. Varies.

Occupational Therapy (OTH)

OTH 500

Contemporary Theory in Occupational Therapy Practice

Theoretical foundations of occupational therapy have evolved into broad discrete theories that guide occupational therapy practice scholarship. This course introduces students to the historical perspectives of the profession from which contemporary occupation-based theories have developed. Students gain an understanding of how theory guides clinical reasoning throughout the occupational therapy process.

Lecture; 3 SH, 3.00 credits. Fall.

OTH 505

Clinical Reasoning in Occupational Therapy

Students integrate the Occupational Therapy Practice Framework (OTPF) into key practice areas such as client care, documentation describing client outcomes. The OTPF is explored in detail allowing students to understand its purpose in defining the domain scope of occupational therapy practice. Students will gain knowledge practice skills in activity analysis to develop clinical reasoning skills.

Lecture; 3 SH, 3.00 credits. Fall.

OTH 510

Practice Engagement: Mental Health

This course, the first in a series of skills-acquisition courses, focuses on occupational therapy mental health practice across the lifespan. Prevalent mental health conditions are explored with an emphasis on mental health promotion prevention the role of occupational therapy intervention. The occupational therapy process is applied in acute care hospital, rehabilitation, outpatient, day programs community mental health settings.

Lecture | Clinical; 3 SH, 3.00 credits. Fall.

OTH 511

Practice Engagement: Therapeutic Groups

This skills-acquisition course explores the theoretical foundations evidence-based support for occupational therapy group interventions. Students acquire skills to develop lead therapeutic group interventions concomitant with developing an in-depth understanding of group dynamics, group-member roles, group process, integrating this knowledge into group therapy. A structured group supervision model is utilized to provide students active learning opportunities for development of group facilitation group documentation skills. Prevalent mental health conditions from OTH 510 are integrated into student facilitated groups. Students work with local community-based sites to develop population-based group intervention programs over the semester which will be implemented in the spring semester as part of their first Level I fieldwork experience.

Lecture; 3 SH, 3.00 credits. Fall.

OTH 520

Scholarship in Practice: Evidence-Based Practice

Evidence-based practice (EBP), research utilization (RU), knowledge translation (KT) are important elements of contemporary occupational therapy practice. In this course students learn about this practice develop skills related to critiquing quantitative qualitative research with regard for the levels of evidence, validity, strength application to the profession of occupational therapy. Students gain an understanding of the importance of creating, exchanging using research findings for guiding clinical practice.

Lecture; 3 SH, 3.00 credits. Fall.

OTH 525

Practice Engagement: Environments Technologies

This skills-acquisition course examines the importance of contexts environments in occupational therapy clinical reasoning with clients, occupational therapy practice settings service delivery. Key factors include the influence of social determinants, culture, policy, physical environments on health, performance, engagement participation. Community, home, work environments are emphasized. Intervention skills include application of assistive technology, modification of contexts environments, ergonomics universal design principles.

Prerequisites: OTH.500, OTH.505, OTH.510, OTH.511, OTH.520. Corequisite: OTH.525L. Lecture | Clinical; 4 SH, 4.00 credits. Spring.

OTH 525L

Practice Engagement: Environments Technologies Lab

Prerequisites: OTH.500, OTH.505, OTH.510, OTH.511, OTH.520. Corequisite: OTH.525. Laboratory. Spring.

OTH 530

Motor Performance Across the Lifespan

This skills-acquisition course explores human movement from both developmental recovery perspectives. Motor learning motor developmental theories are applied to occupational therapy clinical reasoning using activity analysis in the areas of occupations, performance skills, performance patterns client factors for practice application. Developmental milestones motor control are emphasized. Treatment approaches (mirror therapy, motor-imagery, virtual reality, action-observation) are explored. Students understand common occupational therapy conditions associated with orthopedic neurological impairment that impacts the shoulder complex, postural stability, fine motor control.

Prerequisites: OTH.500, OTH.505, OTH.510, OTH.511, OTH.520. Corequisite: OTH.530L. Lecture | Clinical; 4 SH, 4.00 credits. Spring.

OTH 530L

Motor Performance Across the Lifespan Lab

Prerequisites: OTH.500, OTH.505, OTH.510, OTH.511, OTH.520. Corequisite: OTH.530. Laboratory. Spring.

OTH 535**Scholarship in Practice: Methodologies**

This course builds on OTH 520 Evidence-Based Practice, by enhancing the students' knowledge of the research process, styles of inquiry including quantitative qualitative methods, quantitative measurement, statistical analysis professional responsibilities. Students are also be introduced to apply software/coding methods for quantitative qualitative data analysis.

Prerequisites: OTH.500, OTH.505, OTH.510, OTH.511, OTH.520. Lecture; 3 SH, 3.00 credits. Spring.

OTH 540**Practice Engagement: Assessment Fundamentals Across the Lifespan**

This course builds on the occupational therapy process, incorporating use of assessment tools, intervention, outcomes, evidence-based practice. This course emphasizes the need for valid reliable occupational therapy assessment for intervention. Emphasis is placed on occupational performance documentation for effective communication of assessment results intervention outcomes.

Prerequisites: OTH.500, OTH.505, OTH.510, OTH.511, OTH.520. Lecture | Clinical; 3 SH, 3.00 credits. Spring.

OTH 545**Neuroscience in Occupational Performance**

This course explores neuroscience as related to the clinical reasoning decision making of the occupational therapist. The nervous system, central peripheral, is explored. Students integrate information into intervention planning for common neurological diagnosis seen by the occupational therapist. Students articulate both verbally through written documentation the influence of neurological function dysfunction on human occupational performance.

Prerequisites: OTH.525, OTH.530, OTH.540, OTHC.565. Lecture; 3 SH, 3.00 credits. Summer.

OTH 550**Practice Engagement: Adult Rehabilitation**

This skills-acquisition course introduces students to common conditions prevalent in occupational therapy physical disability practice including orthopedic, cardiac, pulmonary, medically complex, oncologic conditions. This class continues to build on the student knowledge of conditions involving the shoulder complex, elbow, wrist such as arthritis, carpal tunnel syndrome, hdeformity. Students apply occupation-based intervention aligned with these conditions.

Prerequisites: OTH.525, OTH.530, OTH.540, OTHC.565. Corequisite: OTH.550L. Lecture | Clinical; 4 SH, 4.00 credits. Summer.

OTH 550L**Practice Engagement: Adult Rehabilitation Lab**

This course introduces students to common conditions prevalent in occupational therapy physical disability practice including orthopedic, cardiac, pulmonary, burn, medically complex, oncologic conditions. This class continues to build on the student knowledge of conditions involving the shoulder complex, elbow, wrist such as arthritis, carpal tunnel syndrome, hdeformity. Students apply occupation-based intervention aligned with these conditions.

Prerequisites: OTH.525, OTH.530, OTH.540, OTHC.565. Corequisite: OTH.550. Lecture. Fall.

OTH 555**Scholarship in Practice: Applied Designs Methods**

This course builds on evidence-based practice research methods, focusing on integrating research findings into practice. Translational research will be explored applied to practice, allowing students to consider the steps needed to apply research findings in community-based partnerships. Single case study design is emphasized to demonstrate practice research possibilities to students. Grant writing methods for practice-based research are introduced.

Prerequisites: OTH.525, OTH.530, OTH.540, OTHC.565. Lecture; 3 SH, 3.00 credits. Summer.

OTH 560**Systems of Practice: Managing the Practice of Occupational Therapy**

This course introduces the basics of management in the healthcare community health arenas. Students integrate knowledge of the occupational therapy process evidence-based practice into the management delivery of services. Students explore develop knowledge skills for business practice success including leadership; management; supervision; intra/interprofessional relationships; standards of practice; ethics; advocacy. Healthcare reimbursement systems are explored. Students use key AOTA documents that guide occupational therapy practice.

Prerequisites: OTH.525, OTH.530, OTH.540, OTHC.565. Lecture; 3 SH, 3.00 credits. Summer.

OTH 570L

Apprenticeship: Adult Rehabilitation (level I) Lab

In this two-week, full-time Level I Fieldwork students participate with practicing occupational therapists to experience first-hand the occupational performance effects of prevalent conditions in occupational therapy practice with adults who have physical disabilities. Students integrate knowledge practice skills as they work along-side practitioners in inter-professional practice settings.

Prerequisites: OTH.525, OTH.525L, OTH.530, OTH.530L, OTH.540, OTHC.565. Corequisite: OTHC.570. Lecture. Summer.

OTH 600

Practice Engagement: Children Adolescents

This course introduces students to prevalent conditions in the occupational therapy pediatric practice arena. These include development delays; musculoskeletal, neuro-motor, traumatic conditions; sensory processing disorder; emotional behavioral disorders. Context of care will include Neonatal Intensive Care Unit, acute outpatient hospital, early intervention, school systems, community mental health.

Prerequisites: OTH.545, OTH.550, OTH.550L, OTH.555, OTH.560, OTHC.570. Corequisite: OTH.600L. Lecture; 4 SH, 4.00 credits. Fall.

OTH 600L

Practice Engagement: Children Adolescents

This course introduces students to prevalent conditions in the occupational therapy pediatric practice arena. These include development delays; musculoskeletal, neuro-motor, traumatic conditions; sensory processing disorder; emotional behavioral disorders. Context of care will include Neonatal Intensive Care Unit, acute outpatient hospital, early intervention, school systems, community mental health.

Prerequisites: OTH.545, OTH.550, OTH.550L, OTH.555, OTH.560, OTHC.570. Corequisite: OTH.600. Laboratory. Fall.

OTH 605

Scholarship in Practice: Academic Careers in Occupational Therapy

This is the culminating course of the 3-course research sequence. Students aggregate, analyze interpret data from their single-subject research projects (OTH 555) disseminate findings by presenting research posters at a school symposium or occupational therapy conference. This course also introduces students to the role of the occupational therapist in the academic setting concepts principals of instructional design. Students apply this learning through course assignments in developing their research poster for presentation.

Prerequisite: OTH.545, OTH.550, OTH.550L, OTH.555, OTH.560, OTHC.570. Lecture; 3 SH, 3.00 credits. Fall.

OTH 610

Practice Engagement: Cognitive Visual Challenges Across the Lifespan

This course examines occupational therapy theory, evaluation treatment techniques associated with children adults with cognitive deficits visual dysfunction. Deficits including age-related eye-health disorders, low vision, visual acuity fields, visual processing, attention executive functioning will be discussed. Theories of brain function cognitive-perceptual treatment will be explored. Assessments, remediation compensatory strategies will be addressed.

Prerequisites: OTH.545, OTH.550, OTH.550L, OTH.555, OTH.560, OTHC.570. Lecture | Clinical; 3 SH, 3.00 credits. Fall.

OTH 615

Systems of Practice: Advance Management Concepts Program Planning Capstone

Advanced topics in the management of occupational therapy practice including population health, community-based practice, occupational justice are explored. Through business program development projects, students apply concepts such as needs assessment, SWOT analysis, financial management, reimbursement, marketing, outcomes planning, evidence-based practice as a means of identifying meeting population needs. The work in this course results in a Capstone Project that includes a program description, business plan professional presentation.

Prerequisites: OTH.545, OTH.550, OTH.550L, OTH.555, OTH.560, OTHC.570. Lecture; 3 SH, 3.00 credits. Fall.

OTH 620O

Preparing for Professional Life, I

This online course explores role changes that accompany leaving academics entering professional practice. Research on professional development indicates this transition is easier when students are prepared in both personal institutional domains. Students analyze factors that contribute to successful professional development ethical practice, using the results of their analyses to map the transition to fieldwork entry-level practice.

Prerequisites: OTH.600, OTH.605, OTH.610, OTH.615, OTHC.630. Lecture; 2 SH, 2.00 credits. Spring.

OTH 6250

Preparing for Professional Life, II

This is the second in a two online course sequence exploring role changes that accompany leaving academics entering the larger realm of professional practice. The goal of this course is for students to create a success-plan for entering occupational therapy through resume cover letter writing as well as interview strategies practice.

Prerequisites: OTH.6200, OTHC.640. Lecture; 2 SH, 2.00 credits. Summer.

OTH 630L

Apprenticeship: Children Adolescents (level I) Lab

Prerequisites: OTH.545, OTH.550, OTH.550L, OTH.555, OTH.560, OTHC.570, OTH.570L. Corequisite: OTH.630L. Lecture. Fall.

OTH 685

Directed Study in Occupational Therapy (level I)

Permission of instructor required. Lecture. Varies.

OTHC 565

Apprenticeship: Community Mental Health (level I)

In this semester-long, Level I fieldwork, students design, implement, evaluate the therapeutic groups developed in OTH 511. Occupational therapy practitioner-mentors support students' application of learning skills from didactic coursework. Students use BlackBoard to write submit occupational therapy documentation of services provided.

Prerequisites: OTH.500, OTH.505, OTH.510, OTH.511, OTH.520. Lecture; 3 SH, 3.00 credits. Spring.

OTHC 570

Apprenticeship: Adult Rehabilitation (level I)

In this two-week, full-time Level I Fieldwork students participate with practicing occupational therapists to experience first-hand the occupational performance effects of prevalent conditions in occupational therapy practice with adults who have physical disabilities. Students integrate knowledge practice skills as they work along-side practitioners in inter-professional practice settings.

Prerequisites: OTH.525, OTH.530, OTH.540, OTHC.565. Lecture; 4 SH, 4.00 credits. Summer.

OTHC 630

Apprenticeship: Children Adolescents (level I)

In this semester long, full-time Level I Fieldwork students participate with practicing occupational therapists to experience first-hand the occupational performance effects of prevalent conditions in occupational therapy practice with children adolescents. Students integrate knowledge practice skills as they work along-side practitioners in inter-professional practice settings.

Prerequisites: OTH.545, OTH.550, OTH.550L, OTH.555, OTH.560, OTHC.570. Lecture | Clinical; 4 SH, 4.00 credits. Fall.

OTHC 640

Level II Fieldwork, I

Level II fieldwork is integral to entry-level education of occupational therapists, providing students opportunities to apply deepen their skills for entry-level practice in settings similar to the one experienced on this fieldwork. Students complete the twelve-week fieldwork experience after successful completion of the previous four semesters of academic work level I fieldwork experiences.

Prerequisites: OTH.600, OTH.605, OTH.610, OTH.615, OTHC.630. Lecture; 7 SH, 7.00 credits. Spring.

OTHC 645

Level II Fieldwork, II

Level II fieldwork is integral to entry-level education of occupational therapists, providing students opportunities to apply deepen their skills for entry-level practice in settings similar to the one experienced on this fieldwork. Students complete the twelve-week fieldwork experience after successful completion of the previous four semesters of academic work level I fieldwork experiences.

Prerequisites: OTH.6200, OTHC.640. Lecture; 7 SH, 7.00 credits. Summer.

Physician Assistant Studies-Boston (PAS)

PAS 402

Physician Assistant Preparation Course

Undergraduate pre-medical pre Physician Assistant students must understand the role of the Physician Assistant (PA) in healthcare develop their communication critical thinking skills to successfully matriculate to the graduate MCPHS PA

program. Students will learn the responsibilities of the PA within the healthcare team learn various ways to obtain healthcare experience prior to entering the PA program.

Lecture. Summer.

PAS 403

Physician Assistant Preparation Course 2

Undergraduate pre-medical pre Physician Assistant students must understand the role of the Physician Assistant (PA) in healthcare develop their communication critical thinking skills to successfully matriculate to the graduate MCPHS PA program. Students will learn the responsibilities of the PA within the healthcare team learn various ways to obtain healthcare experience prior to entering the PA program.

Prerequisite: PAS.402. Lecture. Summer.

PAS 500

Clinical Year Introductory Seminar I

Clinical Year Seminar sessions introduce the second year didactic PA students to Clinical Rotations. These sessions will familiarize the students with the rules and protocols, process of rotation scheduling, and expectations, grading and professionalism of the clinical year. Also covered are HIPPA and OSHA/Universal Precautions.

Prerequisites: PAS.520, PAS.524, PAS.525, PAS.527, PAS.535. Lecture. Fall.

PAS 501

Clinical Year Introductory Seminar II

Clinical Year Seminar sessions introduce the second year didactic PA students to Clinical Rotations. These sessions will familiarize the students with the rules and protocols, process of rotation scheduling, and expectations, grading and professionalism of the clinical year. Also covered are the complexities of Billing and Coding and Surgical Scrub techniques

Prerequisites: PAS.520, PAS.524, PAS.525, PAS.527, PAS.535. Lecture. Spring.

PAS 514

Principles of Professional Practice

The course introduces the PA profession. Topics include the history of the PA profession, scope of practice, professionalism, code of conduct and competencies. Ethical principles, including consent and confidentiality, will be discussed. Legal issues, reimbursement, medical errors, patient safety and cultural competence in providing care across different cultures and religions are presented

Lecture; 2 SH, 2.00 credits. Varies.

PAS 515

Genetics

This course discusses the basic principles concepts in genetics at the level of cells, chromosomes, nucleic acids. Topics include protein synthesis, human genome organization, gene expression its regulation, epigenetics, principles of genetic variation, DNA repair mechanisms, patterns of inheritance, types of mutations, errors in metabolism, dysmorphology, cancer genetics, ethical considerations related to genetic testing fundamental principles of gene therapy. The course provides the fundamental understanding of the genetic basis the clinical features of the most common genetic diseases the students will encounter as a PA.

Lecture; 1 SH, 1.00 credits. Fall.

PAS 516

Introduction to Psychiatry

Students examine psychiatric disorders including their epidemiology, pathophysiology, clinical presentation, differential diagnosis, natural history, and treatment. By evaluating medico-legal issues, such as referral, voluntary and involuntary commitment, and competency, students further develop critical thinking skills.

Lecture; 2 SH, 2.00 credits. Fall.

PAS 517

Human Physiology Pathophysiology I

This course focuses on concepts of pathophysiology that are essential in understanding the alterations in normal physiological functions in response to disease processes. Topics include the fundamental concepts processes of human pathophysiology such as cellular response to stress, inflammation, diseases of the immune system, endocrine, heart, lungs, kidney blood disorders.

Lecture; 3 SH, 3.00 credits. Fall.

PAS 518

Clinical Pharmacology I

Emphasizes the basic principles of pharmacology, pharmacokinetics, pharmacodynamics, dose-response relationships along with an in-depth consideration of drugs affecting the autonomic, cardiovascular, renal, hematological, endocrine, central nervous systems.

Lecture; 3 SH, 3.00 credits. Fall.

PAS 520

Clinical Pharmacology II

A continuation of PAS 518 that provides an in-depth study of agents used to treat neurological, psychological, musculoskeletal, neoplastic, gastrointestinal, dermatologic and respiratory disorders as well as agents used for the treatment of bacterial, fungal, and viral infectious diseases.

Lecture; 3 SH, 3.00 credits. Spring.

PAS 524

Gross Anatomy

Students examine human anatomy embryology through lectures cadaver dissection. Relating this knowledge to future clinical applications, students present their findings to their classmates, improving communication skills. Radiographic images are examined to compare two-dimensional images to three-dimensional anatomical structures. This course provides a foundation for the study of clinical medicine in year two of the Program.

Lecture; 5 SH, 5.00 credits. Spring.

PAS 524L

Gross Anatomy LAB

Students examine human anatomy embryology through lectures cadaver dissection. Relating this knowledge to future clinical applications, students present their findings to their classmates, improving communication skills. Radiographic images are examined to compare two-dimensional images to three-dimensional anatomical structures. This course provides a foundation for the study of clinical medicine in year two of the Program.

Corequisite: PAS.524. Laboratory. Spring.

PAS 525

Diagnostic Methods

Physician Assistant students are introduced to the principles, appropriate use, and interpretation of various diagnostic tests/studies, including laboratory medicine and radiologic examinations. There is a focus on commonly utilized studies, techniques including palpation that aid in the diagnosis and management of illness, disease, and injury.

Lecture; 2 SH, 2.00 credits. Spring.

PAS 527

Human Physiology Pathophysiology II

This course focuses on concepts of pathophysiology that are essential in understanding the alterations in normal physiological functions in response to disease processes. Topics include central and peripheral nervous systems, musculoskeletal system, head and neck, infectious diseases, neoplasia, gastrointestinal tract, liver and gallbladder, pancreas, female and male genital systems, breast, urinary tract, skin, eye and nutrition.

Lecture; 3 SH, 3.00 credits. Spring.

PAS 533

Evidence-Based Medicine Assistants II

This course will foster the PA student's understanding of the purpose significance of health research as clinicians. Students will examine different types of study approaches be able to select the most appropriate study type in any given clinical scenario. Ultimately, students will develop an appreciation of EBM its significance & application in their everyday clinical career.

Lecture; 2 SH, 2.00 credits. Fall.

PAS 534

Introduction to Public Health

The students will receive an introduction to public health concepts practice. They will receive an overview of the US health care delivery system, epidemiological methods attendant application to the control of disease conditions, principles of environmental health, social determinants of health.

Lecture; 2 SH, 2.00 credits. Spring.

PAS 535

Electrocardiography

Students analyze interpret electrocardiogram (ECG) studies to aid in diagnosing multiple abnormalities, including myocardial infarction, arrhythmias, ischemia, conduction blocks, chamber hypertrophy.

Lecture; 2 SH, 2.00 credits. Spring.

PAS 536

Patient Assessment I

In this course, students will develop skills in the art of patient interviewing, history taking, documentation of the history physical examination, various types of medical note writing. Students will medical histories on volunteers who are either simulated or actual patients.

Prerequisites: PAS.516, PAS.517, PAS.518, PAS.520, PAS.525, PAS.527, PAS.535. *Corequisites:* PAS.538, PAS.551, PAS.552. *Lecture; 2 SH, 2.00 credits. Fall.*

PAS 537

Clinical Management of the Patient I

This course will teach students how to integrate the knowledge gained in pathophysiology, clinical medicine, physical exam and pharmacology to develop management plans for patients with various medical pathologies. This is the first of a two-semester curriculum.

Prerequisites: PAS.517, PAS.518, PAS.520, PAS.525, PAS.527, PAS.535. *Corequisites:* PAS.538, PAS.551, PAS.552. *Lecture; 2 SH, 2.00 credits. Fall.*

PAS 538

Physical Exam I With Lab

This course, which involves elements of didactic delivery of content as well as hands on lab instruction, provides experiences designed to develop patient physical examination skills and facilitate the synthesis of differential diagnoses. Instructional techniques include lectures, demonstrations, media presentations and small group exercises.

Prerequisites: PAS.524. *Lecture; 4 SH, 4.00 credits. Fall.*

PAS 540

Physical Exam II: Skills & Procedures

This course is a continuation of PAS 538 with an emphasis on learning to perform specialized physical examination skills as well as receiving exposure to common clinical/technical procedures that are requisite for practicing PAs. This course incorporates an associated weekly clinical laboratory.

Prerequisites: PAS.538. *Lecture; 4 SH, 4.00 credits. Spring.*

PAS 546

Patient Assessment II

Students continue development of diagnostic and critical thinking skills by collecting medical histories and performing physical examinations on patients in clinical and/or simulation settings. Students are assigned to clinician-led small groups to discuss patient cases (clinical history, physical exam findings, diagnostic tests). Students create an assessment, formulate a treatment plan and hone skills in medical documentation and oral presentation.

Prerequisites: PAS.536, PAS.538. *Lecture; 2 SH, 2.00 credits. Spring.*

PAS 547

Clinical Management of the Patient II

This course will teach students how to integrate the knowledge gained in pathophysiology, clinical medicine, physical exam and pharmacology to develop management plans for patients with various medical pathologies.

Prerequisites: PAS.537, PAS.538, PAS.551, PAS.552. *Corequisites:* PAS.553, PAS.554. *Lecture; 2 SH, 2.00 credits. Spring.*

PAS 551

Clinical Medicine I

This course fosters understanding of the epidemiology, etiology, history, signs, symptoms, differential diagnoses, diagnostic studies, treatment modalities, preventative medicine patient education associated with dermatology, ophthalmology, otolaryngology, cardiology geriatrics. Students synthesize information to develop diagnostic skills treatment plans.

Prerequisites: PAS.517, PAS.518, PAS.520, PAS.525, PAS.527, PAS.535. *Corequisite:* PAS.538. *Lecture; 5 SH, 5.00 credits. Fall.*

PAS 552

Clinical Medicine II

This course fosters understanding of the epidemiology, etiology, history, signs, symptoms, differential diagnoses, diagnostic studies, treatment modalities, preventative medicine patient education associated with pulmonology, nephrology gastroenterology. Students synthesize information to develop diagnostic skills treatment plans.

Prerequisites: PAS.517, PAS.518, PAS.520, PAS.525, PAS.527. Corequisite: PAS.538. Lecture; 5 SH, 5.00 credits. Fall.

PAS 553
Clinical Medicine III

This course fosters understanding of the epidemiology, etiology, history, signs, symptoms, differential diagnoses, diagnostic studies, treatment modalities patient education associated with the areas of genitourinary, women's health, infectious disease, musculoskeletal disease, rheumatology. Students synthesize information to develop diagnostic skills treatment plans.

Prerequisites: PAS.517, PAS.518, PAS.520, PAS.525, PAS.527, PAS.538. Lecture; 5 SH, 5.00 credits. Fall.

PAS 554
Clinical Medicine IV

This course fosters understanding of the epidemiology, etiology, history, signs, symptoms, differential diagnoses, diagnostic studies, treatment modalities patient education associated with the areas of hematology, pediatrics, neurology endocrinology. Students synthesize information to develop diagnostic skills treatment plans.

Prerequisites: PAS.517, PAS.518, PAS.520, PAS.525, PAS.527, PAS.538. Lecture; 5 SH, 5.00 credits. Spring.

PAS 590
Directed Study

Individual didactic study directed by faculty in an area of expertise.

Lecture; 1-6 SH, 1.00-6.00 credits. Varies.

PASC 600
Internal Medicine Rotation

This Supervised Clinical Practice Experience (SCPE) provides clinical experience with common diseases the manifestations of acute chronic illnesses. Learning experiences include the traditional approach to direct, initial comprehensive care for patients in inpatient or outpatient settings as well as continuity of care disease injury prevention health promotion for the individual patient. Students interview examine patients, synthesize information to identify problems formulate implement therapeutic plans.

Prerequisite: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture; 5 SH, 5.00 credits. Varies.

PASC 601
Pediatric Medicine Rotation

This Supervised Clinical Practice Experience (SCPE) provides an exposure to care of the child from birth through adolescence. The focus of the learning experience is on the assessment of normal growth development on the recognition management of common childhood illnesses. Emphasis is on counseling of parents regarding immunizations, anticipatory guidance, well child checkups, nutrition, common medical psychosocial problems.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture; 5 SH, 5.00 credits. Varies.

PASC 602
Psychiatry Rotation

This Supervised Clinical Practice Experience (SCPE) is designed to provide an understanding of the behavioral components of health, disease disability. Through exposure to patients presenting with a broad spectrum of psychiatric disorders in varied medical settings, students will develop history taking mental status examination skills, classification skills utilizing DSM V criteria, be exposed to evaluate different treatment modalities for varying presentations. The student will enhance their ability to recognize categorize psychiatric disturbances techniques of early intervention psychiatric referral.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture; 5 SH, 5.00 credits. Varies.

PASC 603
Surgery Rotation

This Supervised Clinical Practice Experience (SCPE) will provide an introduction of students to patients of various ages with surgically managed disorders. Students will be exposed to the pre-operative evaluation preparation of patients, intra-operative postoperative care.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture; 5 SH, 5.00 credits. Varies.

PASC 604
Emergency Medicine Rotation

This Supervised Clinical Practice Experience (SCPE) is designed to provide the physician assistant student with exposure to common illnesses injuries that necessitate emergency care. This clerkship emphasizes the development of the following skills: patient interview, physical examination, formulation of a differential diagnosis, ordering

interpreting of diagnostic studies, diagnosis management of emergency illness injury, performance of related procedures.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture; 5 SH, 5.00 credits. Varies.

PASC 605

Women's Health Rotation

This Supervised Clinical Practice Experience (SCPE) is designed to expose the physician assistant student to the practice of women's health, which may include routine screening, contraception, prenatal post-partum care, family planning birth control, recognition treatment of sexually transmitted disease, cancer detection common obstetric gynecologic conditions. Involvement in surgical procedures may also be provided.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture; 5 SH, 5.00 credits. Varies.

PASC 606

Elective Rotation

This Supervised Clinical Practice Experience (SCPE) will provide clinical experience in a specialty of medicine. The purpose of this rotation is to allow students to explore more completely an area of interest in clinical medicine or surgery. Students will engage in all aspects of patient care from history physical exam to development implementation of treatment plans patient follow-up.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture; 5 SH, 5.00 credits. Varies.

PASC 607

Family Medicine Rotation

This Supervised Clinical Practice Experience (SCPE) provides clinical experience with common diseases the manifestations of acute chronic illnesses. Learning experiences include the traditional approach to direct, initial comprehensive care for patients across the lifespan in outpatient settings as well as continuity of care disease injury prevention health promotion for the individual patient the family. Students interview examine patients, synthesize information to identify problems formulate implement therapeutic plans.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture; 5 SH, 5.00 credits. Varies.

PASC 608

Elective Rotation

This Supervised Clinical Practice Experience (SCPE) will provide clinical experience in a specialty of medicine. The purpose of this rotation is to allow students to explore more completely an area of interest in clinical medicine or surgery. Students will engage in all aspects of patient care from history physical exam to development implementation of treatment plans patient follow-up.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture; 5 SH, 5.00 credits. Varies.

PASC 609

Elective Rotation - Non-Clinical

Rotation provides experience in an area of the PA profession determined by the student and approved by the Director of Clinical Education. The purpose of this rotation is to allow students to explore an area of interest for their future employment. Rotation areas include medical research, teaching, public health, global health and other opportunities as approved by the Clinical Team.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture; 5 SH, 5.00 credits. Varies.

PASC 620

Graduate Seminar I

Graduate Seminar sessions follow the end of each of the nine five week rotation blocks. Graduate Seminars (GS) are a required component of each rotation; attendance at these sessions is mandatory. The two-day GS sessions include competency testing, end of rotation exams, enrichment learning activities, didactic instruction review sessions.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture. Varies.

PASC 621

Graduate Seminar II

Graduate Seminar sessions follow the end of each of the nine five week rotation blocks. Graduate Seminars (GS) are a required component of each rotation; attendance at these sessions is mandatory. The two-day GS sessions include competency testing, end of rotation exams, enrichment learning activities, didactic instruction review sessions.

Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture. Varies.

PASC 622

Graduate Seminar III

Graduate Seminar sessions follow the end of each of the nine five week rotation blocks. Graduate Seminars (GS) are a required component of each rotation; attendance at these sessions is mandatory. The two-day GS sessions include competency testing, end of rotation exams, enrichment learning activities, didactic instruction review sessions. *Prerequisites: PAS.536, PAS.546, PAS.551, PAS.552, PAS.553, PAS.554. Lecture. Varies.*

PASC 800

PA Clinical Rotations

Prerequisites: PAS.540, PAS.553, PAS.554, PAS.546, PAS.547. Lecture; 15 SH, 15.00 credits. Varies.

Public Health (PBH)

PBH 206

Public Health Seminar

This course provides exposure to the BSPH degree discipline of public health from a career planning perspective. Various paths will be explored, including global health, civil service, law, industry. Strategies for graduate admissions preparation, including GRE, LSAT, GMAT, MCAT exams will be introduced. Content includes pre-professional portfolio development. Speakers from public health-related fields will share their experiences.

Lecture; 1 SH, 1.00 credits. Fall.

PBH 230

Peer Health Education

Students will learn strategies to empower engage peers on decision-making related to wellness. Students will develop competencies in health promotion, peer-support, leadership skills, will receive training on topics related to health, wellness, prevention. Students will then sit for the Certified Peer Educator (CPE) exam earn the CPE credential from NASPA.

Prerequisite: LIB.111. Lecture; 3 SH, 3.00 credits. Spring.

PBH 250

Introduction to Public Health

This course introduces provides exposure to the five core areas of public health, including biostatistics, environmental health sciences, epidemiology, healthcare organization policy, social behavioral sciences. Students will gain knowledge of key terminology, common analytic measures, the three core functions of public health: assessment, assurance, policy development.

Lecture; 3 SH, 3.00 credits. Fall.

PBH 260

Public Health Research Methods

This course is intended for public health students others interested in health research. Students will complete a literature review, propose a research question, choose a study design, analyze interpret data, write a report about their findings. Upon course completion, students will have a thorough background in research methods be prepared for conducting research in the future.

Corequisite: MAT.261. Lecture; 3 SH, 3.00 credits. Fall.

PBH 3100

Public Health Surveillance

This introductory surveillance course provides an overview of public health surveillance systems. Students learn about the public health surveillance process, including the design, implementation, evaluation of public health surveillance programs. Course content covers basic epidemiologic concepts planning considerations, sources collection of data, analysis interpretation of findings communication as it relates to public health.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Varies.

PBH 330

Introduction to Epidemiology

This course is designed to provide a foundation of epidemiologic terminology, concepts, measures. Students will identify key sources of data, calculate basic epidemiology measures, evaluate the strengths limitations of epidemiologic reports. Additionally, students will gain exposure to the concepts of epidemiologic study design, association, causality, as well as the epidemiologic approach to disease intervention.

Prerequisites: MAT.261, (PBH.250 or BIO.346). Lecture; 3 SH, 3.00 credits. Spring.

PBH 335

Human Sexuality

This course provides exposure to the study of human sexuality, encourages critical evaluation of societally constructed views of attractiveness, sex appeal, security, sexually normative behavior, the psychological impact of love on human relationships. Lecture topics include anatomy, gender roles, communication in intimate relationships, contraception, abortion, pregnancy childbirth, STIs, the CDC's HP2020, use of sexuality in product advertisement.

Prerequisite: PBH.250 or BIO.531. Lecture; 3 SH, 3.00 credits. Spring.

PBH 340

Environment Public Health

This course explores the key areas of environmental public health covers topics in the development prevention of environmental health problems. Using the perspectives of population community, students will gain an understanding of individual community interactions with the environment, the impact on health of environmental changes agents, specific applications of environmental public health concepts.

Lecture; 3 SH, 3.00 credits. Spring.

PBH 350

Global Health

This interdisciplinary course examines social determinants of health in global context. Students examine public health infrastructure, global health delivery health systems changes, equity, social justice, opportunities for prevention health promotion initiatives within across borders. Such subjects as emerging re-emerging infectious diseases, challenges of chronic illness, maternal health, water access, sanitation, emergency preparedness are studied.

Prerequisite: SSC.495 or PBH.250. Lecture; 3 SH, 3.00 credits. Varies.

PBH 360

Health Data Collection Management

This course introduces the collection, maintenance, compilation, cleaning, analysis presentation of human health care data (including surveillance data from programs overseen by the Center for Disease Control). Students are introduced to data collection tools, data entry using EXCEL, variable management, data verification descriptive statistics using a widely used statistical software package (STATA).

Prerequisites: MAT.261, (PBH.250 or BIO.346). Lecture; 3 SH, 3.00 credits. Varies.

PBH 375

Survey of Gerontology

This course seeks to educate students about the public health, social, psychological, biological, cultural impacts of an increasingly aging population. As students learn about these aspects of aging, they will examine how changes in aging demographics impact healthcare delivery. They will also explore different cultural attitudes toward aging how aging is portrayed by the media.

Prerequisite: LIB.111. Lecture; 3 SH, 3.00 credits. Fall.

PBH 377O

Introduction to Maternal Child Health

The purpose of this course is to provide an overview of maternal child health populations, factors that affect the health of these populations, the policies, programs, practices that support women, children, families.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Fall.

PBH 380O

Aging, Place, Health

Our societies are aging. Though much of this aging is the result of good public health practice, failure to plan for this longer life expectancy can present as a unique public health challenge. This course provides exposure to the epidemiology of aging, introduces relevant resources, provides students an opportunity to introduce a policy that will positively impact elder populations.

Prerequisite: LIB.111. Lecture; 3 SH, 3.00 credits. Spring.

PBH 420

Community Health

This course introduces applies public health perspectives tools to community health issues. Students engage in problem-based learning using case studies; assess community health needs; identify public health resources; develop health prevention, education, promotion strategies. Students apply community health principles acquire in-depth knowledge of specific health topic areas through group individual projects.

Prerequisite: PBH.250. Lecture; 3 SH, 3.00 credits. Spring.

PBH 430

Infection Disease Epidemiology Research

This course introduces principles methods of infectious disease (ID) epidemiology. Students will learn about spread control of IDs, develop an understanding of risk factors, causes different modes of transmission. It will provide a basic understanding of epidemiologic tools used in studying IDs. Students will examine current issues in the field as it applies to public health.

Prerequisite: PBH.250. Lecture; 3 SH, 3.00 credits. Fall.

PBH 432

Epidemiology of Chronic Diseases

It has been estimated that over 30 million deaths annually are due to chronic diseases, a number that is increasing. In this course, students will explore how epidemiologists study chronic diseases, risk factors for chronic diseases, methods for preventing chronic diseases. Specific diseases conditions that will be covered include: obesity, heart disease, cancer, diabetes, neurological disorders.

Prerequisite: LIB.111. Lecture; 3 SH, 3.00 credits. Spring.

PBH 435

Public Policy Public Health

Students will evaluate U. S. public health infrastructure, policymaking processes, decision making. Within cultural, environmental, political, economic contexts, they will investigate historical contemporary public health problems, initiatives, controversies, intervention strategies. Students will perform analysis of both US domestic global public health performance the consequences for human health well being.

Lecture; 3 SH, 3.00 credits. Varies.

PBH 440

Introduction to SAS Programming

This course introduces students to the basics of SAS programming. Students will learn to access explore public health data learn to analyze it using common data processing tasks. This course will prepare students to conduct basic descriptive statistical analysis as it applies to public health research using SAS statistical software.

Prerequisite: MAT.261. Lecture; 3 SH, 3.00 credits. Fall.

PBH 450A

ST: Peer Health Education

Students will learn evidence-based strategies for empowering engaging peers in healthy decision-making. Students will develop peer support, leadership, health navigation skills, receive training on a wide variety of health promotion prevention topics. After completing this course, students will be eligible to the Certified Peer Educator (CPE) exam earn their CPE credential from BACCHUS Network

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Spring.

PBH 450AB

ST: Survey of Gerontology

This introductory course provides exposure to the social, political, psychological, biological impacts related to aging populations. The world is aging; those who are responsible for the care of our aging communities should understand age-related changes can impact mobility, healthcare, the physical environment, cognitive functioning, multi-morbidity. Students will also learn about research in the field that has led to better understanding predictors of healthy aging prevention of age-related morbidity premature mortality. The course will also explore different cultural attitudes toward aging how aging is portrayed by the media.

Lecture; 3 SH, 3.00 credits. Varies.

PBH 450D

ST Public Health Perspectives on Trauma Infectious Diseases

Special topics course.

Prerequisite: LIB.112. Lecture; 3 SH, 3.00 credits. Spring.

PBH 450F

St: Healthcare Planning for Catastrophic Events

Catastrophic events, such as hurricanes, oil spills, terrorist attacks others, can challenge public health departments at every level for many years. Not only is it important to plan for such events, but the aftermath can be devastating to survivor physical mental health, to the environment on which we depend to our economic health. All aspects of public health will be covered for some of the most damaging catastrophic events in the U.S. beyond.

Lecture; 3 SH, 3.00 credits. Spring.

PBH 450H

ST: Disability Health Issues

Special topics course.

Prerequisite: (PBH.250, BIO.346 or BIO.531). Lecture; 3 SH, 3.00 credits. Spring.

PBH 450I

ST: Social Justice

Social Justice is a multifaceted concept. The environments in which we live, work, play continuously shape our opinions, attitudes, knowledge, skills, abilities, especially our health outcomes. Students will be required to think critically about differential societal structures that shape access trajectory. Discussion topics include health disparities, health equity, privilege, socioeconomic status, criminal justice, ethnocentrism.

Prerequisite: PBH.250. Lecture; 3 SH, 3.00 credits. Spring.

PBH 450R

ST: Community Based Participatory Research

This course provides an introduction to the process of Community-Based Participatory Research (CBPR). Community-Based or Community-Engaged Research aims to assert a collaborative approach to research that places a critical emphasis on including members of the community in program planning intervention development. Historical models have excluded stakeholder input lacked the concepts of mutual respect shared learning. Due to the lack of collaboration, many interventions have incorporated biases that have led to decreased effectiveness. Students will understand the importance of CBPR, will demonstrate accepted methods for improving individual community capacity. Lastly, students will discuss the importance of dissemination translation of research findings that incorporate a community-engaged approach.

Lecture; 3 SH, 3.00 credits. Varies.

PBH 450T

ST: Outbreak Investigation

This course will introduce students to the field of outbreak investigation as it applies to public health research practice. Students will learn about outbreak detection, surveillance, investigation methodologies control measure strategies that are used in the field. Hands-on training using a public domain software in outbreak investigation case-study discussions will be an integral part of this course, which will prepare students to plan implement a simple outbreak investigation, provide support to a more complex investigation.

Lecture; 3 SH, 3.00 credits. Varies.

PBH 450U

ST: Occupational Health

In this course, students will explore health safety issues related to various types of work. Discussion will include how various professions interact to provide for the safety of workers regulations that have been implemented to decrease work-related morbidity mortality. Students will utilize epidemiological evidence to consider risk assessment of various professional responsibilities, predictors of work-related unintentional injury.

Lecture; 3 SH, 3.00 credits. Varies.

PBH 450X

ST: Program Evaluation

Special topics course.

Lecture; 3 SH, 3.00 credits. Varies.

PBH 450Z

ST: Social Epidemiology

Why is the life expectancy in some neighborhoods of Boston 30 years higher than others? Why do managers have fewer heart attacks than their employees? Why do racial ethnic inequities in health outcomes persist? This course covers how epidemiologist study, understand, try to intervene on the impact that social factors like income, work, racism have on health.

Prerequisite: PBH.330. Lecture; 3 SH, 3.00 credits. Varies.

PBH 460

Field Placement

This course is a planned, supervised evaluated field experience that provides students with the opportunity to synthesize, integrate, apply basic skills knowledge acquired in coursework other learning experiences. Students employ theory principles in a final project that approximates some aspect of professional practice in public health.

Lecture; 3 SH, 3.00 credits. Spring.

PBH 480

Public Health Capstone Seminar

The public health capstone seminar is a culminating experience designed to synthesize the knowledge, skills, abilities students have acquired during the entire course of the Public Health program. The seminar will include instructions for writing the capstone paper, strategies for professional presentations, creation of an academic curriculum vitae, preparation of IRB documents, discussions about professional practices ethics.

Prerequisites: PBH.250, MAT.461. Lecture; 3 SH, 3.00 credits. Spring.

PBH 532

Directed Study

This course provides faculty-directed, individualized study to a student wishing to explore a particular aspect of public health in greater detail. The student will work with a public health faculty member to design an appropriate course of study for the semester.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

PBH 701

Survey of Public Health

Introduces concepts of community engagement, organization, development for empowering communities to address the social determinants of health. Examines the role of public health practitioners, grassroots activists, other community members in stimulating social, political, economic approaches to promote community health. Provides skills for the creation of partnerships through coalition building reviews strategies for public policy advocacy.

Lecture; 2 SH, 2.00 credits. Varies.

PBH 705

Introduction to Environmental Health Sciences

Provides an overview of the major issues in environmental health. Students will learn basic techniques to assess, control, prevent environmental health hazards.

Lecture; 3 SH, 3.00 credits. Varies.

PBH 710

Introduction to Health Policy Management

Introduces healthcare policy services, to include organization, delivery, payment for, finance of healthcare. Students will discuss historical current government interventions to ensure access, cost containment, quality of healthcare.

Lecture; 3 SH, 3.00 credits. Varies.

PBH 715

Introduction to Social Behavioral Sciences

This course is based upon the premise that understanding the basic principles, theories, research, techniques of the social behavioral sciences creates a more effective public health practice. Students will discuss social behavioral science that can should be used to assess resolve public health problems, will apply this knowledge to current public health issues.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

PBH 732

Graduate Public Health Directed Study

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

PBH 740

Methods in Biostatistics Epidemiology

The goal of this course is to teach students the fundamentals of epidemiology biostatistics by combining epidemiological concepts with statistical modeling analysis. This course covers epidemiological study designs, examining the association between exposure disease, causation, an introduction to commonly used statistical software (Stata), common statistical tests, models distributions using a calculator Stata.

Lecture; 4 SH, 4.00 credits. Varies.

PBH 750

Community Health Science Practice

Examines the theoretical practical foundations of community-oriented public health. Introduces systems-thinking concepts as an orientation to community health practice. Explores community engagement ethical considerations. Reviews the fundamentals of community health assessment improvement approaches, including health promotion program selection evaluation.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

PBH 755

Health Promotion Education

This course outlines the history, evolution, status of the practice of health education among groups of people who define themselves as a community. There is a focus on health behaviors, environmental influences, health policy, economic healthcare system issues in health promotion disease prevention.

Lecture; 3 SH, 3.00 credits. Fall.

PBH 760

Program Design Evaluation of Public Health Interventions

Students will develop skills in the design evaluation of public health programs. In particular, students will engage in problem-based learning to identify a public health issue, develop measurable goals objectives to address the problem, create strategies to reach the desired improvements in health status, establish a method to measure the success of the program.

Prerequisites: (PBH.701, DHY.701, OPT.691 or PPW.340) Lecture; 3 SH, 3.00 credits. Fall, Spring.

PBH 765

Community Health Assessments

Reviews the theory practice of community assessment in public health. Community assessment focuses on measuring a community's health status its determinants. It also focuses on assessing a community's capacity to improve health. Qualitative quantitative methods will be introduced.

Prerequisites: (PBH.701, DHY.701, OPT.691 or PPW.340), PBH.750. Lecture; 3 SH, 3.00 credits. Fall.

PBH 770

Qualitative Research in Public Health

Reviews current theories, paradigms of inquiry, approaches, along with importance of selecting an appropriate theoretical framework reflecting on positionality, or the lens of the researcher. The role of qualitative research in the assessment evaluation of public health problems interventions is considered. Students work in interdisciplinary groups to apply concepts in the design conduct of research.

Lecture; 3 SH, 3.00 credits. Varies.

PBH 801

Community Organizing

Introduces concepts of community engagement, organization, development for empowering communities to address the social determinants of health. Examines the role of public health practitioners, grassroots activists, other community members in stimulating social, political, economic approaches to promote community health. Provides skills for the creation of partnerships through coalition building reviews strategies for public policy advocacy.

Lecture; 3 SH, 3.00 credits. Fall.

PBH 805

Maternal Child Health

Introduces the principles practices of public health maternal child health. Students will examine the social determinants of health development of women, infants, children, adolescents.

Lecture; 3 SH, 3.00 credits. Fall.

PBH 810

Principles of Public Health Emergency Preparedness

Introduces the concepts of public health emergency preparedness. Students will discuss complex public health responses at the local, state, federal level. An emphasis will be placed on how public health fits into the National Response Framework the National Preparedness System to prevent, respond to, recover from, mitigate against natural disasters, acts of terrorism, other man-made disasters.

Lecture; 3 SH, 3.00 credits. Fall.

PBH 815

Mass Communication Health Preparedness

Students will apply health marketing communication principles to design a health communication campaign on a topic of their choosing. Students will use surveys or other techniques to develop health messages that inspire audiences to change behavior or a desired action. An emphasis will be placed on critical thinking "hands-on" learning of Web 2.0 technologies.

Prerequisite: PBH.701. Lecture; 3 SH, 3.00 credits. Fall.

PBH 820

Genetics Public Health

This course will discuss the relationship between advances in genetics genomics in the post-Human Genome Project era public health. Basic principles of human inheritance advances in genetic genomic technology will be explored. The ethical, legal, societal implications of these technological advances, their influence on health promotion disease prevention, will be examined.

Lecture; 3 SH, 3.00 credits. Fall.

PBH 825

Public Health Law

Students will understand when the law can be used to implement public health policies programs. Students will construct written arguments while analyzing how American law balances the rights of individuals with the interests of government and, where appropriate, analyze the ethics of policy choices. Prior experience or education in law is not required.

Lecture; 3 SH, 3.00 credits. Fall.

PBH 830

Health Informatics

Through the Health Informatics course, students will examine technology's application in healthcare, with a focus on public health, explore the role of health professionals better understand to think like interact with an informaticist. Students will learn how to develop analyze business requirements to support design, development implementation of systems that meet public health program needs provide data to inform decision making. Prior experience or education in health informatics is not required.

Lecture; 3 SH, 3.00 credits. Fall.

PBH 856C

ST: Community Mapping

Lecture; 3 SH, 3.00 credits. Varies.

PBH 856D

ST: Plagues Pandemics

This course is focused on the microbiology global public health issues related to infectious diseases. Students analyze apply knowledge regarding the etiology, symptoms, diagnosis, transmission, treatment prevention of infectious diseases that are either newly emerging or resurfacing as public health threats. Concepts are studied through problem-based learning case investigations.

Lecture; 3 SH, 3.00 credits. Varies.

PBH 856E

ST: Public Health Disability

This course discusses disability conditions & current health issues that impact people living with varying ability levels. Students will explore critical socio-ecological issues including access, barriers, caregiving, early intervention, education, empowerment, employment, public policy, transportation, universal design, etc. Review history of disability rights concepts of ableism, discrimination, social determinants of health within the disability community, self-advocacy

Lecture; 3 SH, 3.00 credits. Varies.

PBH 890

Public Health Practice Experience

Provides field experience for all MPH candidates. Students will select a public health agency, healthcare facility, nonprofit organization, or other health-related site. Students must submit a proposal to their faculty advisor before registering. Students also will be evaluated by an on-site supervisor. A minimum of 120 clock hours is required.

Prerequisites: PBH.701, PBH.750. Lecture; 2 SH, 2.00 credits. Fall.

PBH 895

Preparatory Seminar, Culminating Experience Preparedness

Provides an opportunity for collaboration with students faculty. The intent is to introduce students to the culminating experience requirement. The duration of the seminar is five days, students must have completed 12 semester hours in the program prior to registering.

Lecture; 1 SH, 1.00 credits. Fall.

PBH 898

Culminating Experience

The culminating experience requires students to synthesize integrate knowledge acquired in coursework apply theories principles of public health. The product of the culminating experience demonstrates the student's application integration of knowledge skills in the investigation, analysis, synthesis, evaluation of real-world public health practice issues.

Prerequisites: (PBH.701, DHY.701, OPT.691 or PPW.340), PBH.750. Lecture; 3 SH, 3.00 credits. Fall.

PBH 899

Culminating Experience Continuation

This course is intended for students who were unable to successfully complete the requirements of PBH898 Culminating Experience. Under the guidance of a faculty mentor, students in this course will continue working on research project of their own design, allowing them to synthesize/integrate the foundational concentration competencies they learned throughout the MPH translate theory into practice.

Prerequisites: (PBH.701, DHY.701, OPT.691 or PPW.340), PBH.750. Lecture. Varies.

Pharmaceutical Economics and Policy (PEP)

PEP 801

Quantitative Methods in PEP

Students will cover the basic statistical techniques in analyzing data pertinent to epidemiology, biomedical, other public-health related research. Topics include descriptive statistics, sampling, inferential statistics including hypothesis testing, parametric statistics, non-parametric statistics, elements of study design.

Lecture; 3 SH, 3.00 credits. Fall.

PEP 802

Comparative Pharmaceutical Healthcare Systems

This course provides students with an overview of the economic policy issues of the pharmaceutical medical device markets. The course also describes the roles of the different agents participating in the pharmaceutical medical device markets.

Lecture; 3 SH, 3.00 credits. Fall.

PEP 804

Regression Analysis in PEP

The purpose of this course is to provide students with an overview of regression methods. The course also provides a working knowledge of the application of the array of regression models to research in the areas of pharmacoconomics, comparative effectiveness, health economics, pharmacoepidemiology, outcomes research.

Prerequisites: (PEP.801 or DRA.807), DRA.809. Lecture; 3 SH, 3.00 credits. Spring.

PEP 806

Pharmacoepidemiology Applications

This course introduces epidemiology as the scientific method of public health, how it is applied to measuring drug use identifying drug use problems. Many life-saving discoveries have been made through the study of Drug Epidemiology, now called Pharmacoepidemiology, including: major adverse drug reactions, new beneficial effects of drugs, causes spread of drug epidemics, predicting drug supply needs for an entire country.

Prerequisites: (PEP.801 or DRA.807), PEP.809, PEP.804. Lecture; 3 SH, 3.00 credits. Fall.

PEP 807

Introduction to Health Economics Outcomes Research

Students will be introduced to Economic Evaluation (its relevance, the importance of timing of costs effects, ways of eliciting patient treatment preferences measuring Health-Related Quality of Life, varying approaches to modeling outcomes, etc.). Students will learn the reasons for methods of using such techniques in various health care environments, including, but not limited to, pharmaceuticals.

Lecture; 3 SH, 3.00 credits. Fall.

PEP 808

Metanalyses Applications

This course provides students with a review of the advanced quantitative analysis methodologies applied to pharmacoconomics outcomes research. The course also explores current debates related to the evaluation of outcomes cost, the economic assessment of pharmaceuticals medical devices.

Prerequisites: DRA.809, (PEP.801 or DRA.807). Lecture; 3 SH, 3.00 credits. Fall.

PEP 809

Statistical Programming Using SAS

This class is designed to give students the necessary tools to manipulate and/ or restructure a certain dataset before it can be analyzed using one of the statistical procedures. This course is essential for database management. Students can use SAS to analyze data for their poster presentations, thesis projects, peer-reviewed journal articles.

Prerequisite: DRA.807 or PEP.801. Lecture; 3 SH, 3.00 credits. Spring.

PEP 813**Pharmacoeconomic Applications**

This course provides students with a review of the advanced quantitative analysis methodologies applied to pharmacoeconomics outcomes research. The course also explores current debates related to the evaluation of outcomes cost, the economic assessment of pharmaceuticals medical devices.

Prerequisites: PEP.801, PEP.807, PEP.814. Lecture; 3 SH, 3.00 credits. Fall.

PEP 814**Healthcare Decision Analysis**

This is an advanced course in the methodologies applications of decision analysis in health care. The course focuses on the use of decision analysis in pharmaceutical economics policy research. The course provides the student with the knowledge to conduct decision analysis studies in the economic evaluation of health care technologies services.

Prerequisites: PEP.801, PEP.807, PEP.813. Lecture; 3 SH, 3.00 credits. Spring.

PEP 820**Market Access, Pricing Reimbursement Of Drugs Medical Devices**

The purpose of this course is to provide students with an overview of the economic, regulatory policy issues of market access, pricing reimbursement of pharmaceuticals medical devices in the US the global market.

Lecture; 3 SH, 3.00 credits. Fall.

PEP 825**Health Service Outcomes Research**

Students will be introduced to Health Service Outcome Research (basic advanced design of studies), compare health outcome measurements used in clinical trials real-world situations. Students will examine the inter-relationship of epidemiologic study designs their associated statistical analyses. Students will be able to critique health service studies identify research areas in relation to drug life cycle patient-reported outcomes (PROs)

Prerequisites: DRA.809, (PEP.801 or DRA.807). Lecture; 3 SH, 3.00 credits. Spring.

PEP 830**Practicum in Pharmaceutical Business Administrative Sciences**

Students will obtain direct field experience from an internship at an off-campus site. This investigation/field study will be conducted in the areas of the student's major or minor field of study is open to all departmental graduate students who have completed at least one semester of study.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

PEP 840**Data Analysis Presentation Capabilities in PEP**

Students will learn the scientific writing process for different peer-reviewed article types; will present an article related to their research interests; will conduct a research project pertinent to their interests. The project entails creating an abstract, a paper, a poster which will be presented to MCPHS Faculty peers.

Permission of instructor required. Lecture; 3 SH, 3.00 credits. Spring.

PEP 856I**ST: Patient Health Related Quality of Life Reported Outcomes; Theory, Methods Practice**

Students will be introduced to the theory, methods, practice of Health-Related Quality of Life (HRQOL) Patient Reported Outcomes (PRO) in clinical research whether it be for a claim of symptom alleviation to appear in the package insert, input for a cost effectiveness model, or evidence of the humanistic value of a therapeutic intervention. Valid, reliable, useful measures are neither developed in a day or analyzed in the same way as other measures of health status. Further, the impact of temporal, social, cultural, psychological factors on the data its method of collection make understanding interpretation extremely complex challenging.

Prerequisite: PEP.807. Lecture; 3 SH, 3.00 credits. Fall, Spring.

PEP 870**Graduate Seminar in PEP**

This course is a weekly seminar involving graduate students, department faculty, invited speakers.

Lecture; 1 SH, 1.00 credits. Fall, Spring.

PEP 880**MS Thesis Research in PEP**

The MS thesis research involves research under the supervision of a faculty advisor(s). It requires approval of the proposal by the Advisory Committee.

Lecture; 1 SH, 1.00 credits. Varies.

PEP 890

PhD Dissertation Research in PEP

The PhD dissertation research involves 2-5 semester hours of research under the supervision of a faculty advisor(s). It requires approval of the proposal by the Advisory Committee.

Lecture; 1-4 SH, 1.00-4.00 credits. Varies.

Pharmacy-Boston (PHB)

PHB 380

Personal Professional Development 1

This year-long course is the first in a series of courses that use a combination of instructional sessions required co-curricular activities to guide the development of skills essential for a student's personal professional development as a pharmacist. Students are required to complete assignments in an online portfolio meet with an assigned faculty member to evaluate their progress.

Prerequisite: PPB.210. Lecture. Fall.

PHB 381

Personal Professional Development 1

This course is a continuation of PHB.380.

Prerequisite: PHB.380. Lecture; 1 SH, 1.00 credits. Spring.

PHB 480

Personal Professional Development 2

This year-long course is the second in a series of courses that use a combination of instructional sessions required co-curricular activities to guide the development of skills essential for a student's personal professional development as a pharmacist. Students are required to complete assignments in an online portfolio meet with an assigned faculty member to evaluate their progress.

Prerequisites: PHB.380, PHB.381. Lecture. Fall.

PHB 481

Personal Professional Development 2

This course is a continuation of PHB.480.

Prerequisites: PHB.380, PHB.381. Lecture. Spring.

PHB 535

Introduction to Cannabis Studies Professionals

The student will become familiar with the introductory principles of cannabis studies including but not limited to place in the current healthcare system, regulatory issues, pharmacognosy, chemistry, dosage formulation, introductory therapeutics patient experience. The emphasis of the introductory course is to acquire knowledge of cannabis topics to assist counseling patients/users.

Prerequisites: PSB.454, PSB.442, PPB.446. Lecture; 3 SH, 3.00 credits. Fall.

PHB 536

Advanced Cannabis Studies Professionals

The student will become familiar with the advanced principles of cannabis including but not limited to advanced therapeutic uses for specific clinical safety considerations, kinetics, laboratory testing, patient monitoring adherence. The emphasis of the advanced course is to develop skills necessary to work in interprofessional teams to create new treatment protocols based on specific concerns products available.

Prerequisites: PSB.454, PSB.442, PPB.446, PHB.535. Lecture; 3 SH, 3.00 credits. Spring.

PHB 540

Digital Health for Healthcare Professionals

Students will become familiar with the introductory principles of digital health. They will gain knowledge develop skills necessary to work in teams to create new products, applications directions in healthcare. Students will explore solutions to real-life healthcare problems present them at MCPHS Digital Health Symposium at the end of semester.

Prerequisites: PSB.442, PSB.454, PPB.445, PPB.446. Corequisite: PPB.556. Lecture; 3 SH, 3.00 credits. Fall.

PHB 560

Advanced Digital Health for Healthcare Professionals

The student will apply introductory concepts of digital health by working with faculty preceptors on projects to improve healthcare outcomes. The emphasis is to gain practical knowledge of developing digital health field skills necessary to work in interprofessional teams in creating new products, services.

Prerequisite: PHB.540. Lecture; 3 SH, 3.00 credits. Spring.

PHB 580

Personal Professional Development 3

This year-long course is the third in a series of courses that use a combination of instructional sessions required co-curricular activities to guide the development of skills essential for a student's personal professional development as a pharmacist. Students are required to complete assignments in an online portfolio meet with an assigned faculty member to evaluate their progress.

Prerequisites: PHB.480, PHB.481. Lecture. Fall.

PHB 581

Personal Professional Development 3

This course is a continuation of PHB.580.

Prerequisites: PHB.480, PHB.481. Lecture; 1 SH, 1.00 credits. Spring.

Physics and Radiopharmacy (PHY)

PHY 181

General Physics

A non-calculus presentation of classical physics for students in allied health programs. Topics include: Newton's Laws of Motion, work energy, simple harmonic motion, waves. Course also covers electricity, magnetism atomic physics.

Prerequisite: (MAT.141, MAT.171 or MAT.151). Lecture; 4 SH, 4.00 credits. Spring.

PHY 181O

General Physics

This course is a noncalculus presentation of classical physics for students in allied health programs. Topics include Newton's laws of motion, work energy, simple harmonic motion, waves. The course also covers electricity, magnetism, atomic physics.

Prerequisite: (MAT.141, MAT.171 or MAT.151). Lecture; 4 SH, 4.00 credits. Spring.

PHY 270

Foundations of Physics I

In this introductory calculus-based course, students make an in-depth study of concepts, principles, applications of physics drawn from classical mechanics. PHY 272L provides the associated laboratory for degree programs requiring it.

Prerequisite: MAT.152 or MAT.172. Lecture; 3 SH, 3.00 credits. Fall, Spring.

PHY 272L

Physics I Lab

This introductory calculus-based laboratory is taken concurrently with PHY 270 by students whose degree programs require physics with a laboratory component. Laboratory experiments include explorations of collisions in one dimension, constant acceleration, forces torques in static equilibrium, vibrations waves, laminar fluid flow.

Prerequisite: MAT.152 or MAT.172. Corequisite: PHY.270. Laboratory; 1 SH, 1.00 credits. Fall, Spring.

PHY 274

Foundations of Physics II

In this introductory calculus-based course, students make an in-depth study of concepts, principles, applications of physics drawn from electricity magnetism (including electric circuits), areas of classical mechanics more advanced than those covered in PHY 270.

Prerequisites: Take 1 group: (PHY.270, PHY.272L) or (PHY.280, PHY.280L). Corequisite: PHY.274L. Lecture; 3 SH, 3.00 credits. Spring.

PHY 274L

Foundations of Physics II Lab

In this introductory calculus-based physics course, students study concepts, principles applications drawn from mechanics, electricity magnetism, DC circuits, ray wave optics. Emphasis is placed on interpreting solving problems, on translating between verbal, pictorial, diagrammatic, symbolic mathematical, graphical representations. Students develop the solid foundation required for a working knowledge of physics.

Prerequisites: PHY.270, PHY.272L. Corequisite: PHY.274. Laboratory; 1 SH, 1.00 credits. Spring.

PHY 275**Physics for Medical Imaging**

Students undergo an in-depth study of the physics required for careers in medical imaging. Topics studied include the essentials of kinematics Newton's laws followed by a detailed study of electromagnetism (focused on sources of magnetic fields, magnetic forces torques, electromagnetic induction, magnetic properties of matter).

Prerequisite: MAT.141, MAT.150 or MAT.151. Lecture; 4 SH, 4.00 credits. Spring.

PHY 280**Physics I**

In this in-depth calculus-based course/laboratory, students study the concepts, principles, applications of rigid body mechanics, mechanical vibrations waves, sound, mechanical properties of fluids solids. Emphasis is placed on critical analysis, problem solving, pathways to solutions, assessing mathematical results. Recommended as preparation for professional school admission tests (MCAT, OAT, DAT).

Prerequisite: (MAT.152 or MAT.172). Corequisites: PHY.280L, PHY.280R. Lecture; 3 SH, 3.00 credits. Fall, Spring.

PHY 280L**Physics I Lab**

In this in-depth calculus-based course/laboratory, students study the concepts, principles, applications of rigid body mechanics, mechanical vibrations waves, sound, mechanical properties of fluids solids. Emphasis is placed on critical analysis, problem solving, pathways to solutions, assessing mathematical results. Recommended as preparation for professional school admission tests (MCAT, OAT, DAT).

Prerequisite: MAT.152 or MAT.172. Corequisite: PHY.280. Laboratory; 1 SH, 1.00 credits. Fall, Spring.

PHY 284**Physics II**

In this in-depth calculus-based course, students study the concepts, principles applications of electricity magnetism, DC AC circuits, ray wave optics, atomic nuclear physics. Emphasis is placed on critical analysis, problem-solving, pathways to solutions, assessing mathematical results. This course is recommended as preparation for professional school admissions tests (MCAT OAT).

Prerequisites: PHY.280, PHY.280L. Lecture; 3 SH, 3.00 credits. Fall, Spring.

PHY 284L**Physics II Lab**

This laboratory course takes experimental approaches to study the concepts, principles applications of electricity magnetism, circuits, ray wave optics, atomic nuclear physics. Emphasis is placed on knowledge application, lab hands-on skills, experiment results discussions, error analysis, critical thinking problem-solving. This course is recommended as preparation for professional school admissions tests (MCAT OAT).

Prerequisites: PHY.280, PHY.280L. Corequisite: PHY.284. Laboratory; 1 SH, 1.00 credits. Fall, Spring.

Pharmacy Practice-Boston (PPB)

PPB 210**Introduction to Pharmacy**

In this introductory, required course, students will explore how pharmaceutical care is delivered the role of the pharmacist. Small group activities will foster critical thinking, problem solving, team work communication skills. Students will learn medical terminology, concepts of cultural awareness, public health medication safety. In addition, students will be introduced the variety of career pathways in pharmacy.

Prerequisites: BIO.152, CHE.132. Corequisite: PPB.210L. Lecture; 1 SH, 1.00 credits. Fall.

PPB 210L**Introduction to Pharmacy Lab Lab**

In this introductory, required course, students will explore how pharmaceutical care is delivered the role of the pharmacist. Small group activities will foster critical thinking, problem solving, team work communication skills. Students will learn medical terminology, concepts of cultural awareness, public health medication safety. In addition, students will be introduced the variety of career pathways in pharmacy

Corequisite: PPB.210. Laboratory. Fall.

PPB 325**Introduction to Practice Management I**

Students are introduced to the concepts of pharmaceutical care, professionalism, the role of the pharmacist in a variety of practice settings. Students will also gain knowledge in preparation for their Introductory Pharmacy Practice

Experience (IPPE) rotations as well as their integration into the Advanced Practice Management (APM) laboratory. Students will attend weekly lectures one lab.

Prerequisites: BIO.255, CHE.232, PHY.270, MAT.261, PPB.210, PSB.225. Corequisite: PPB.325L. Lecture; 3 SH, 3.00 credits. Fall.

PPB 325L

Introduction to Practice Management I Lab

Students are introduced to the concepts of pharmaceutical care, professionalism, the role of the pharmacist in a variety of practice settings. Students will also gain knowledge in preparation for their Introductory Pharmacy Practice Experience (IPPE) rotations as well as their integration into the Advanced Practice Management (APM) laboratory. Students will attend weekly lectures.

Prerequisites: BIO.255, CHE.231, PHY.270, MAT.261, PPB.210, CHE.232. Corequisite: PPB.325. Laboratory. Fall.

PPB 335

Introduction to Practice Management II

Students are introduced to the concepts of pharmaceutical care, professionalism, the role of the pharmacist in a variety of practice settings. Students will also gain knowledge in preparation for their Introductory Pharmacy Practice Experience (IPPE) rotations as well as their integration into the Advanced Practice Management (APM) laboratory. Students will attend weekly lectures.

Prerequisite: PPB.325. Lecture; 2 SH, 2.00 credits. Spring.

PPB 335L

Introduction to Practice Management II Lab

Students are introduced to the concepts of pharmaceutical care, professionalism, the role of the pharmacist in a variety of practice settings. Students will also gain knowledge in preparation for their Introductory Pharmacy Practice Experience (IPPE) rotations as well as their integration into the Advanced Practice Management (APM) laboratory. Students will attend weekly lectures.

Prerequisite: PPB.325 Corequisite: PPB.335. Laboratory. Spring.

PPB 414

Virology Anti-infectives

Students will learn about the commonly used antibiotic, antiviral, antifungal agents through an integration of the medicinal chemistry, pharmacology, therapeutics of these agents. The therapeutic management, recognition, prevention of important infectious diseases, antibiotic allergies resistance, as well as immunization, will be discussed using a variety of problem-based active-learning techniques.

Prerequisites: PSB.441, PSB.451. Lecture; 4 SH, 4.00 credits. Spring.

PPB 419

Introductory Pharmacy Experience Programs I

The IPPE I course provides fourth-year students with an introductory community rotation. This course will provide students with pharmacy practice experience with active learning in a community practice setting with an opportunity to begin the development of basic practice skills to interface with patients healthcare providers. Rotations are assigned through the Office of Experiential Education are available in the summer preceding the fourth year with limited availability during the fall or spring semester of the fourth year. This rotation will consist of a 160-hour rotation to be completed in the time assigned.

Prerequisites: PSB.329, PSB.338, PPB.335, PSB.354, PSB.359L, PSB.424, PSB.320. Clinical; 2 SH, 2.00 credits. Fall.

PPB 430

Clinical Application of the Pharmacists' Patient Care Process

The current healthcare model emphasizes collaboration among a clinical team. As members of the healthcare team, pharmacists have an opportunity to improve the quality of patient care optimize medication outcomes. Students will learn apply the fundamental steps of PPCP through lectures active learning that focus on critical thinking, communication skills, documentation, patient care.

Prerequisites: PSB.451, PSB.441, PPB.485, PPB.445. Lecture; 1 SH, 1.00 credits. Spring.

PPB 445

Therapeutics I

Students become familiar with the rational application of drugs to ensure optimal therapeutic outcomes in common disease states through discussion selection of appropriate drug regimens, correct application of laboratory other monitoring parameters to determine efficacy adverse reactions, identification of drug interactions, dosing individualization of therapy, determination of therapeutic endpoints goals. Sequence of topics is closely adapted to those concurrently taught in PSB 441 451. Integrated patient cases bridge science practice.

Prerequisites: PSB.328, PSB.329. Corequisites: PSB.441, PSB.450, PSB.451, PPB.485. Lecture; 3 SH, 3.00 credits. Fall.

PPB 446
Therapeutics II

This course is a continuation of a sequence of courses that addresses the principles of pharmacotherapeutics the functional consequences of major diseases (see PPB 445 description). The sequence of topics is closely adapted to those concurrently taught in PSB 442 454. Integrated patient cases bridge science practice.

Prerequisites: PPB.419, PPB.485, PSB.451, PSB.441, PPB.445, PSB.450. Corequisites: PPB.414, PSB.430, PSB.442, PSB.454, PPB.430. Lecture; 3 SH, 3.00 credits. Spring.

PPB 485
Drug Literature Evaluation

Students retrieve, evaluate, apply medical pharmacy literature. Assignments develop the student's skills in applying literature to clinical problem solving.

Prerequisite: PSB.424. Lecture; 3 SH, 3.00 credits. Fall.

PPB 502
OTC Drugs/Self Care

Students learn about nonprescription medications, herbs, vitamins, homeopathic products, medical parapharmaceutical devices used by patients for self-treatment disease-state monitoring in such common illnesses as cough cold, dermatological gastrointestinal disorders, pregnancy, analgesia.

Prerequisites: PSB.441, PSB.451. Lecture; 3 SH, 3.00 credits. Fall.

PPB 510
Clinical Pharmacokinetics

This course is a continuation of Pharmacokinetics I with discussion of the influence of the physiochemical factors on the bioavailability of drugs their in vivo performance. It includes the kinetics of drug disposition following administration by intravenous infusion, intravenous bolus, oral multiple dosing; discusses the pharmacokinetics of drugs that follow a two-compartment model the principles of nonlinear kinetics; involves clinical applications of pharmacokinetic principles factors that contribute to the variability in the pharmacokinetics of selected drugs.

Prerequisite: PSB.430. Lecture; 3 SH, 3.00 credits. Fall.

PPB 519
Introductory Pharmacy Experience Programs II

The IPPE II course provides fifth-year students with an introductory institutional rotation. This course will provide students with pharmacy practice experience active learning in hospital practice or other institutional practice settings, including an opportunity to begin the development of basic practice skills interface with patients healthcare providers. Rotations are assigned through the Office of Experiential Education are available in the summer preceding the fifth year with limited availability during the fall or spring semester of the fifth year. This rotation will consist of a 160-hour rotation to be completed in the time assigned.

Prerequisites: PPB.414, PPB.446, PSB.430, PSB.442, PSB.454, PPB.430. Clinical; 1 SH, 1.00 credits. Fall.

PPB 521
Culinary Applications for Health Promotion Disease State Management

Student will become familiar with principles nutrition, practice of food organization culinary techniques. Students will learn culinary choices skills to implement best practices for health promotion to improve chronic disease state management. Students will explore science-based evidence for making healthy choices for patients. Students will identify strategies to educate patients to implement personalized food choices.

Lecture; 3 SH, 3.00 credits. Fall.

PPB 525
Cardiovascular Pharmacotherapy

Prerequisite: PPB.555. Lecture; 3 SH, 3.00 credits. Spring.

PPB 526
Common Threads: Pain Addiction

Students will be introduced to principles related to pain management addiction medicine with emphasis on how these areas of health care may overlap in clinical practice. Students will learn practical approaches to the management of pain addiction as well as behavioral intervention techniques including motivational interviewing. Legal regulatory issues related to pain addiction will also be emphasized.

Prerequisite: PPB.555. Corequisite: PPB.556. Lecture; 3 SH, 3.00 credits. Spring.

PPB 527**Interpretation of Lab Data**

The student will delineate identify commonly used laboratory tests interpret their results in diagnosing monitoring diseases. By relating tests to the patient's overall condition, the student will employ the principles of monitoring determining drug effectiveness toxicity in assessing patient outcomes.

Prerequisites: PPB.414, PSB.454, PSB.442. Lecture; 3 SH, 3.00 credits. Spring.

PPB 528O**Medication Safety**

PPB 528O Medication Safety Students will be exposed to pertinent topics in patient medication safety will focus on issues surrounding the provision of safe, high quality patient care in inpatient outpatient settings. A culture of medication safety will also be examined to improve increase the quality of care provided by interdisciplinary teams of healthcare professionals. Students will apply medication safety concepts during online group discussions group presentations will complete online lectures, learning activities, assignments to enable application of course concepts. Prerequisites: PPB 414; PSB 454, PSB 442; class, 3 hrs.; credit, 3 s.h.; fall.

Prerequisites: PPB.414, PSB.454, PSB.442. Lecture; 3 SH, 3.00 credits. Fall.

PPB 529**Ambulatory Care Pharmacy Practice**

This course will introduce pharmacy students to the various roles disease states pharmacists encounter in ambulatory care. Students will develop patient-specific pharmaceutical care plans, be required to present a patient case using primary literature current guidelines to support their clinical pharmacotherapeutic plans. In addition, they will create a patient education tool applicable to their patient case.

Prerequisites: PPB.445, PPB.446, PPB.555. Lecture; 3 SH, 3.00 credits. Spring.

PPB 530**Undergraduate Research Project**

Research participation at the undergraduate level is offered, with emphasis on developing methods techniques to conduct research.

Permission of instructor required. Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

PPB 532**Directed Study**

This course provides faculty-directed study to an individual student wishing to explore a particular aspect of a pharmacy practice-related topic in greater detail. Emphasis is placed on analysis of the pharmacy medical literature.

Permission of instructor required. Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

PPB 533**Pharmacotherapeutics of Women's Health**

This interdisciplinary women's health professional elective is designed to expose students to the health social issues faced by women throughout their lifespan. Through lecture, in-class case discussions, outside class reading assignments, poster presentation, students will evaluate apply evidence-based medicine to discuss develop comprehensive treatment plans for female patients throughout the lifespan.

Prerequisite: PPB.555. Corequisite: PPB.556. Lecture; 3 SH, 3.00 credits. Spring.

PPB 534**Clinical Care for the Aging Patient**

Students will be exposed to the health social issues faced by the geriatric population in this blended-format professional elective. Through classroom online activities, students will evaluate apply evidence-based medicine to discuss develop comprehensive treatment plans for patients. This 3-credit professional elective includes three hours of class time divided between online campus-based lectures/activities.

Prerequisites: PPB.446, PPB.485. Corequisite: PPB.556. Lecture; 3 SH, 3.00 credits. Spring.

PPB 535**Herbal Supplements**

The course reviews trends, epidemiology, manufacturing practices, regulations, pharmaceuticals, as well as resources in the contemporary use of herbal supplements. An evidence-based approach is used to discuss clinical therapeutic uses of herbal supplements their roles in the treatment of diverse conditions. Adverse reactions, contraindications precautions of specific herbal supplements are addressed.

Prerequisite: PSB.442. Lecture; 3 SH, 3.00 credits. Spring.

PPB 536**Oncology**

Corequisite PPB.556. Lecture; 3 SH, 3.00 credits. Spring.

PPB 537**Veterinary Pharmacy**

Introduces veterinary pharmaceuticals their use in veterinary medicine. The application of drug therapy to large, small, exotic animals to obtain optimum therapeutic outcomes the opportunity to provide veterinary pharmacy services in a community or hospital setting are emphasized. Additional emphasis is placed on selection of appropriate drugs drug regimens for selected species for common disease states. Both over-the-counter prescription medications are studied. *Prerequisites: PPB.414, PSB.430, PSB.454. Lecture; 3 SH, 3.00 credits. Spring.*

PPB 538**Global Infectious Diseases**

An interdisciplinary course designed to expose students to a broad range of topics in global infectious diseases. The course provides a specific focus on topics in travel medicine in the context of global infectious disease. In addition to pharmacotherapeutics, the public health, cultural, socio-political, psychosocial, pharmacoeconomic aspects of global infectious diseases are also addressed. Students apply interdisciplinary concepts through participation in service-learning, as well as small group discussions presentations. The service-learning component is designed to provide students with a structured learning experience that combines community service with explicit learning objectives, preparation, reflection.

Prerequisites: PPB.414, PSB.454. Lecture; 3 SH, 3.00 credits. Fall, Spring.

PPB 539**Advanced Topics in Neurology & Psychiatry**

Prerequisites: PPB.446, PPB.485. Corequisite: PPB.556. Lecture; 3 SH, 3.00 credits. Spring.

PPB 540E**Complementary Alternative Medicine**

Provides an overview of various alternative healing practices such as homeopathy Chinese, chiropractic, Ayurvedic, Shamanic medicine. Concepts of the health-belief system, administration monitoring of therapy, socioeconomic issues are explored for each discipline through lectures experiential presentations from practitioners.

Prerequisite: BIO.151. Lecture; 3 SH, 3.00 credits. Varies.

PPB 540K**ST Pharmacy Communications Laboratory**

Lecture. Spring.

PPB 541**Clinical Pharmacy Research**

This course enables students to develop an understanding of the scope, purpose, methods behind clinical pharmacydriven research projects. The didactic portion of this course covers the basics of designing a study. The practical portion allows students, to work with a clinical pharmacist to participate in a research project sponsored by the MGH pharmacy department.

Prerequisites: PSB.329, PSB.338, PPB.335, PSB.354, PSB.359L, PSB.424, PSB.320. Lecture; 3 SH, 3.00 credits. Fall.

PPB 545**Advanced Practice Management I**

This first part of the overall Advanced Practice Management course emphasizes the pharmacist as the primary provider of pharmaceutical care. Didactic laboratory experiences focus on advanced aspects of pharmacy practice, including patient counseling, physical exams, managerial applications, compliance with legal requirements, exploring complex patient care issues, self-directed learning.

Prerequisites: PPB.335, PPB.414, PPB.419, PSB.442, PSB.454. Corequisites: PPB.502, PPB.551, PPB.555, PPB.510. Lecture; 3 SH, 3.00 credits. Fall.

PPB 545L**Advanced Practice Management I Lab**

This first part of the overall Advanced Practice Management course emphasizes the pharmacist as the primary provider of pharmaceutical care. Didactic laboratory experiences focus on advanced aspects of pharmacy practice, including patient counseling, physical exams, managerial applications, compliance with legal requirements, exploring complex patient care issues, self-directed learning.

Prerequisites: PPB.335, PPB.414, PPB.419, PSB.442, PSB.454. Corequisite: PPB.545. Laboratory. Fall.

PPB 546**Advanced Practice Management II**

Second part of the Advanced Practice Management course. Builds on knowledge skills acquired in part one of this course. Emphasizes the pharmacists as the primary provider of pharmaceutical care. Didactic laboratory experiences focus on advanced aspects of pharmacy practice, including patient counseling, physical exams, managerial applications, compliance with legal requirements, exploring complex ethical patient care issues, self-directed learning. *Prerequisites: PPB.502, PPB.545, PPB.551, PPB.555. Corequisites: PPB.552, PPB.556. Lecture; 4 SH, 4.00 credits. Spring.*

PPB 546L**Advanced Practice Management II Lab**

Second part of the Advanced Practice Management course. Builds on knowledge skills acquired in part one of this course. Emphasizes the pharmacists as the primary provider of pharmaceutical care. Didactic laboratory experiences focus on advanced aspects of pharmacy practice, including patient counseling, physical exams, managerial applications, compliance with legal requirements, exploring complex ethical patient care issues, selfdirected learning. *Prerequisite: PPB.545. Corequisites: PPB.552, PPB.556, PSB.411, PPB.546. Laboratory. Spring.*

PPB 548**Critical Care Pharmacotherapy**

The course will expose students to pharmacotherapeutic challenges in critically ill patients exptheir knowledge of the pharmacist's role in caring for patients with these issues. Short online presentations in class patient cases will be used to discuss drugs landmark clinical trials related to commonly encountered ICU disease states. An ICU field trip will also be scheduled.

Prerequisite: PPB.551. Lecture; 3 SH, 3.00 credits. Spring.

PPB 551**Pharmacotherapeutics Seminar I**

This series involves case presentations followed by discussion of the presented material using the problem-based learning approach. Cases, journal clubs, consults provide the opportunity for in-depth exploration of pharmacotherapeutic topics. Elements of clinical practice are incorporated into the small-group discussion to duplicate a real-life clinical environment.

Prerequisites: PPB.485, PPB.445, PPB.445 Corequisite: PPB.555. Lecture; 1 SH, 1.00 credits. Fall.

PPB 552**Pharmacotherapeutics Seminar II**

This series involves case presentations followed by discussion of the presented material using the problem based learning approach. Cases, journal clubs, consults provide the opportunity for in-depth exploration of pharmacotherapeutic topics. Elements of clinical practice are incorporated into the small group discussion to duplicate a real life clinical environment.

Prerequisite: PPB.551 Corequisite: PPB.556. Lecture; 1 SH, 1.00 credits. Spring.

PPB 555**Advanced Therapeutics I**

This is the third of four courses that are sequenced over four semesters. Students will integrate apply pharmacological biopharmaceutical principles on an advanced level. Using evidence-based medicine, the student will focus on individualizing drug therapy solving complex medication-related problems in the treatment of selected disease states in oncology, nephrology, cardiology, gastroenterology.

Prerequisites: PPB.414, PSB.430, PSB.442, PSB.454. Corequisites: PPB.502, PPB.551, PPB.510, PPB.545. Lecture; 4 SH, 4.00 credits. Fall.

PPB 556**Advanced Therapeutics II**

Continuation of Advanced Therapeutics I. This is the last of four courses that are sequenced over four semesters. Students will integrate apply pharmacological biopharmaceutical principles on an advanced level. Using evidence-based medicine, the student will focus on individualizing drug therapy solving complex medication-related problems in the treatment of selected disease states in pediatrics, pulmonary medicine, geriatrics, neurology, psychiatry, endocrinology, dermatology.

Prerequisites: PPB.555, PPB.551, PPB.545, PPB.510, PPB.502. Corequisites: PPB.546, PPB.552. Lecture; 4 SH, 4.00 credits. Spring.

PPB 600

Principles of Pharmaceutical Care

Introduces students to the concept of pharmaceutical care the pharmacist's responsibility for ensuring optimal healthcare outcomes for the patients he or she serves. This course is designed to prepare students for future pharmacotherapeutic courses. Clinical skills focused on include collection, organization, evaluation of the patient drug information needed to render optimal pharmaceutical care recommendations; physical assessment skills; oral written healthcare communications; clinical problem solving.

Lecture; 3 SH, 3.00 credits. Fall.

PPB 623

Pharmacotherapeutics I - Postbaccalaureate Doctor of Pharmacy Pathway

This sequence of courses addresses the principles of pharmacotherapeutics functional consequences of major diseases. Discussion focuses on therapeutic problem solving the evaluation of treatment strategies commonly used in clinical practice. Emphasis includes selection of appropriate treatment regimens monitoring parameters; assessment of adverse drug reactions, drug interactions, drug-induced diseases; determination of therapeutic endpoints goals; individualization of therapy based on pharmacokinetic pharmacodynamic principles as well as pharmacoeconomic considerations. This series of courses builds on concepts knowledge in a stepwise approach. In the advanced course sequences, discussion focuses on more complex therapeutic problem solving utilizes knowledge gained previously.

Prerequisites: PPB.623, PPB.625, PPB.633, PPB.600, PPB.672, PPB.681, PSB.421. Corequisite: PPB.623A. Lecture; 5 SH, 5.00 credits. Varies.

PPB 623A

Pharmacotherapeutics I Practice

This series of courses engages students in the provision of pharmaceutical care. It involves small-group case discussions experiential coursework. Students will present discuss patient care activities from their practice sites that correspond to topics concepts learned in the pharmacotherapeutic course series. Cases, journal clubs, pharmacy consults are discussed using audio and/or textual online discussion boards. One oral patient case presentation is made by students each semester on campus. Students are expected to spend a minimum of five hours each week conducting patient care activities at the practice sites. These activities are reviewed by a faculty preceptor.

Corequisite: PPB.623. Lecture; 1 SH, 1.00 credits. Varies.

PPB 625

Pharmacotherapeutics II Nontraditional

This sequence of courses addresses the principles of pharmacotherapeutics functional consequences of major diseases. Discussion focuses on therapeutic problem- solving the evaluation of treatment strategies commonly used in clinical practice. Emphasis includes selection of appropriate treatment regimens monitoring parameters, assessment of adverse drug reactions, drug interactions drug-induced diseases, determination of therapeutic endpoints goals, individualization of therapy based on pharmacokinetic pharmacodynamic principles as well as pharmacoeconomic considerations. This series of courses builds on concepts knowledge in a stepwise approach. In the advanced course sequences, discussion focuses on more complex therapeutic problem solving utilizes knowledge gained previously.

Prerequisites: PPB.623, PPB.623. Corequisite: PPB.625A. Lecture; 6 SH, 6.00 credits. Varies.

PPB 625A

Pharmacotherapeutics II Practice

This series of courses engages students in the provision of pharmaceutical care. It involves small-group case discussions experiential coursework. Students will present discuss patient care activities from their practice sites that correspond to topics concepts learned in the pharmacotherapeutic course series. Cases, journal clubs, pharmacy consults are discussed using audio and/or textual online discussion boards. One oral patient case presentation is made by students each semester on campus. Students are expected to spend a minimum of five hours each week conducting patient care activities at the practice sites. These activities are reviewed by a faculty preceptor.

Corequisite: PPB.625. Lecture; 1 SH, 1.00 credits. Varies.

PPB 633

Pharmacotherapeutics III Postbaccalaureate Doctor of Pharmacy Pathway

This sequence of courses addresses the principles of pharmacotherapeutics functional consequences of major diseases. Discussion focuses on therapeutic problem- solving the evaluation of treatment strategies commonly used in clinical practice. Emphasis includes selection of appropriate treatment regimens monitoring parameters, assessment of adverse drug reactions, drug interactions drug-induced diseases, determination of therapeutic endpoints goals, individualization of therapy based on pharmacokinetic pharmacodynamic principles as well as pharmacoeconomic considerations. This series of courses builds on concepts knowledge in a stepwise approach. In the advanced course sequences, discussion focuses on more complex therapeutic problem solving utilizes knowledge gained previously.

Prerequisites: PPB.623A, PPB.625, PPB.625A. Corequisites: PPB.633A, PPB.623. Lecture; 6 SH, 6.00 credits. Varies.

PPB 633A**Pharmacotherapeutics III**

This series of courses engages the students in the provision of pharmaceutical care. It involves small group case discussions experiential coursework. Students will present discuss patient care activities from their practice sites that correspond to topics concepts learned in the pharmacotherapeutic course series. Cases, journal clubs pharmacy consults are discussed using audio and/or textual online discussion boards. One oral patient case presentation is presented by students each semester on-campus. Students are expected to spend a minimum of 5 hours each week conducting patient-care activities at the practice sites. These activities are reviewed by a faculty preceptor.

Corequisite: PPB.633. Lecture; 1 SH, 1.00 credits. Varies.

PPB 668**Advanced Pharmacy Practice Experience**

The Advanced Pharmacy Practice Experience consists of a four-week, full time, clinical rotation (160 hours total) under the supervision of an MCPHS University preceptor. Clinical rotation may begin after the successful completion of PPB633 PPB633A. Clinical rotation must be scheduled completed within 1 year of completion of PPB633 PPB633A.

Prerequisites: PPB.623, PPB.623A, PPB.633, PPB.633A, PPB.625, PPB.625A. Clinical; 3 SH, 3.00 credits. Varies.

PPB 668A**Pharmacotherapeutics IV Practice**

This course is a continuation of PHA I, II, III Practice Seminar. This course further engages students in the provision of pharmaceutical care at their practice sites. More complex extensive patient care activities are expected evaluated by faculty preceptors. Practice site activities are presented to small groups using online discussion boards. Students are expected to spend a minimum of 10 hours each week conducting patient-care activities at the practice sites. Students are required to present one formal presentation on campus.

Prerequisites: PPB.623A, PPB.625A, PPB.633A. Lecture; 4 SH, 4.00 credits. Varies.

PPB 672**Drug Literature Resources Evaluation**

This course focuses on three specific aspects relative to the medical literature: retrieval methods, evaluation techniques clinical application. The types of medical literature are presented, compared contrasted with regard to their applicability to clinical problem solving. Clinical situations drug related problems are presented throughout the course to illustrate the application of the literature as a primary component of the clinical problem-solving process.

Prerequisites: PPB.600, PSB.421. Lecture; 3 SH, 3.00 credits. Varies.

PPB 681**Clinical Pharmacokinetics**

This course involves clinical applications of pharmacokinetic principles. Emphasis is placed on identification of actual theoretical factors that contribute to variability's in pharmacokinetic parameters associated pharmacological responses. Several dosing methods are critically explored, contrasted, applied using a case history approach.

Prerequisite: PPB.600 Lecture; 2 SH, 2.00 credits. Varies.

PPBC 601**Internal Medicine**

These courses offer students experiences in which they communicate with patients, professionals, peers; identify clinical problems; formulate solutions. Clinical clerkship represents a full academic year (1,440 hours) of clinically oriented rotations offered primarily at off-campus sites. All rotations are six weeks in length. Required rotations: internal medicine, institutional pharmacy practice, ambulatory care, community pharmacy practice. Elective rotations: chosen from such areas as medication therapy management, medication reconciliation, administration, cardiology, critical care medicine, drug information, emergency medicine, gastroenterology, home healthcare, infectious disease, neonatology, nephrology, neurology, oncology/hematology, obstetrics/gynecology, pediatrics, poison information, psychiatry.

Prerequisites: PPB.519, PPB.502, PPB.545, PPB.551, PSB.432, PPB.546, PPB.552, PSB.411. Clinical; 6 SH, 6.00 credits. Varies.

PPBC 602**Institutional Pharmacy Practice**

These courses offer students experiences in which they communicate with patients, professionals, peers; identify clinical problems; formulate solutions. Clinical clerkship represents a full academic year (1,440 hours) of clinically oriented rotations offered primarily at off-campus sites. All rotations are six weeks in length. Required rotations: internal medicine, institutional pharmacy practice, ambulatory care, community pharmacy practice. Elective rotations: chosen from such areas as medication therapy management, medication reconciliation, administration, cardiology, critical care medicine, drug information, emergency medicine, gastroenterology, home healthcare, infectious disease, neonatology, nephrology, neurology, oncology/hematology, obstetrics/gynecology, pediatrics, poison information, psychiatry.

Prerequisites: PPB.519, PPB.502, PPB.545, PPB.551, PSB.432, PPB.546, PPB.552, PSB.411. Clinical; 6 SH, 6.00 credits. Varies.

PPBC 603

Ambulatory Care

These courses offer students experiences in which they communicate with patients, professionals, peers; identify clinical problems; formulate solutions. Clinical clerkship represents a full academic year (1,440 hours) of clinically oriented rotations offered primarily at off-campus sites. All rotations are six weeks in length. Required rotations: internal medicine, institutional pharmacy practice, ambulatory care, community pharmacy practice. Elective rotations: chosen from such areas as medication therapy management, medication reconciliation, administration, cardiology, critical care medicine, drug information, emergency medicine, gastroenterology, home healthcare, infectious disease, neonatology, nephrology, neurology, oncology/hematology, obstetrics/gynecology, pediatrics, poison information, psychiatry.

Prerequisites: PPB.519, PPB.502, PPB.545, PPB.551, PSB.432, PPB.546, PPB.552, PSB.411. Clinical; 6 SH, 6.00 credits. Varies.

PPBC 604

APEP Community

These courses offer students experiences in which they communicate with patients, professionals, peers; identify clinical problems; formulate solutions. Clinical clerkship represents a full academic year (1,440 hours) of clinically oriented rotations offered primarily at off-campus sites. All rotations are six weeks in length. Required rotations: internal medicine, institutional pharmacy practice, ambulatory care, community pharmacy practice. Elective rotations: chosen from such areas as medication therapy management, medication reconciliation, administration, cardiology, critical care medicine, drug information, emergency medicine, gastroenterology, home healthcare, infectious disease, neonatology, nephrology, neurology, oncology/hematology, obstetrics/gynecology, pediatrics, poison information, psychiatry.

Prerequisites: PPB.519, PPB.502, PPB.545, PPB.551, PSB.432, PPB.546, PPB.552, PSB.411. Clinical; 6 SH, 6.00 credits. Varies.

PPBC 605

Pharmacy Elective Rotation

These courses offer students experiences in which they communicate with patients, professionals, peers; identify clinical problems; formulate solutions. Clinical clerkship represents a full academic year (1,440 hours) of clinically oriented rotations offered primarily at off-campus sites. All rotations are six weeks in length. Required rotations: internal medicine, institutional pharmacy practice, ambulatory care, community pharmacy practice. Elective rotations: chosen from such areas as medication therapy management, medication reconciliation, administration, cardiology, critical care medicine, drug information, emergency medicine, gastroenterology, home healthcare, infectious disease, neonatology, nephrology, neurology, oncology/hematology, obstetrics/gynecology, pediatrics, poison information, psychiatry.

Prerequisites: PPB.519, PPB.502, PPB.545, PPB.551, PSB.432, PPB.546, PPB.552, PSB.411. Clinical; 6 SH, 6.00 credits. Varies.

PPBC 606

Pharmacy Elective Rotation

These courses offer students experiences in which they communicate with patients, professionals, peers; identify clinical problems; formulate solutions. Clinical clerkship represents a full academic year (1,440 hours) of clinically oriented rotations offered primarily at off-campus sites. All rotations are six weeks in length. Required rotations: internal medicine, institutional pharmacy practice, ambulatory care, community pharmacy practice. Elective rotations: chosen from such areas as medication therapy management, medication reconciliation, administration, cardiology, critical care medicine, drug information, emergency medicine, gastroenterology, home healthcare, infectious disease, neonatology, nephrology, neurology, oncology/hematology, obstetrics/gynecology, pediatrics, poison information, psychiatry.

Prerequisites: PPB.519, PPB.502, PPB.545, PPB.551, PSB.432, PPB.546, PPB.552, PSB.411. Clinical; 6 SH, 6.00 credits. Varies.

Pharmacy Practice-Worcester/Manchester (PPW)

PPW 330

Introduction to Patient Care I

A course designed to introduce pharmacy practice principles of patient care. Topics for discussion include an introduction to: prescription medical terminology, basic pharmaceutical calculations, interprofessional education, pharmacy references, patient counseling, major drug categories, basic concepts of patient care the patient care process, communication professionalism.

Lecture; 3 SH, 3.00 credits. Fall.

PPW 331

Introduction to Patient Care II

This is the second course in a sequence designed to provide students with a continuum of pharmacy practice experiences, engage students in the various practice aspects, discuss opportunities in pharmacy enhance communication skills. This will be accomplished by: 1) discussing engaging in the concept of patient care, 2) promoting professionalism, including development of organizational, citizenship, leadership skills, 3) developing interprofessional knowledge skills through collaborative experiences, 4) acquainting the student with the terminology of body systems, selected disease entities, medical procedural terms, health care related terminology, the most common prescription nonprescription medications.

Prerequisites: PSW.350, PPW.330. Lecture; 2 SH, 2.00 credits. Spring.

PPW 333

Introduction to Patientcare III

This is the third course in a series designed to continue exploring patient care in various pharmacy practice settings. Students will participate in active learning strategies that emphasize the role of the pharmacist in pharmacy operations, immunizations, interprofessional communications, the medication use system. The course culminates in an Entrustable Professional Activity (EPA) simulating community practice.

Prerequisites: PPW.331, PSW.301, PSW.312, PPW.378, PSW.313, PPW.379, PSW.325. Lecture; 2 SH, 2.00 credits. Summer.

PPW 333L

Intro to Patient Care III Lab

This is the third course in a series designed to continue exploring patient care in various pharmacy practice settings. Students will participate in active learning strategies that emphasize the role of the pharmacist in pharmacy operations, immunizations, interprofessional communications, the medication use system. The course culminates in an Entrustable Professional Activity (EPA) simulating community practice.

Laboratory. Summer.

PPW 336

Basics of Quality in Healthcare

This course will familiarize students to the definition, evolution, implications of quality in health care. Students will utilize various methods to assess quality in health care, formulate quality criteria standards, apply models for quality improvement. Students will learn how to construct a monitoring system measure outcomes to successfully implement a quality improvement plan.

Prerequisites: PPW.331, PPW.379, PPW.378, PSW.301, PSW.312, PSW.313, PSW.325. Lecture; 2 SH, 2.00 credits. Summer.

PPW 340

U.S. Healthcare Public Health Systems

An overview of the complex issues, policies, controversies, proposed solutions that surround the systems of healthcare public health in the United States.

Lecture; 3 SH, 3.00 credits. Fall.

PPW 340A

ST: Introduction to the Us Healthcare Delivery System

Lecture; 2 SH, 2.00 credits. Fall.

PPW 343

Post-Graduate Education Preparation

This course introduces students to the vast areas of postgraduate education provides opportunities to practice the skills needed for residents fellows. A professional portfolio will be constructed to illustrate the student activities their preparation for postgraduate education.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 346

Topics in Community Pharmacy

This course will provide second-year pharmacy students with an introduction to specific topics in the rapidly developing area of community pharmacy practice. The course will introduce emphasize the role of the community pharmacist in both daily community pharmacy operations extended cognitive roles responsibilities.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 348

Self Care Therapeutics/ Pharmacotherapeutics I

This course examines the principles application of nonprescription prescription drug therapy for common disease states. Utilizing a case-based approach the steps from the Pharmacists' Patient Care Process, students learn how to select appropriate pharmacotherapy that is patient-centered. Emphasis will be placed on the role of the pharmacist in determining the appropriate use of nonprescription medications.

Corequisite: PSW.385. Lecture; 3 SH, 3.00 credits. Summer.

PPW 352

Emergency Preparedness/Bioterrorism

Provides an overview of emergency management concepts functions as well as provides an understanding of the various microorganisms used as agents of mass destruction. Students examine agent characteristics, vaccines, therapeutic prophylactic treatments.

Lecture; 2 SH, 2.00 credits. Varies.

PPW 354

Emergency Medicine

Examines the pharmacotherapy of selected surgical, medical, psychiatric toxicologic emergencies. Students gain in depth exposure to illnesses injuries sustained by children adults that necessitate emergency room care. Emphasizes optimizing medication related outcomes in terms of appropriate therapy selection, patient education, safety efficacy evaluation, the determination of individual therapeutic endpoints.

Lecture; 2 SH, 2.00 credits. Varies.

PPW 355

Drug Interactions

This drug interactions elective will provide a general overview of the various types of drug interactions that commonly occur in clinical practice, outlining the major mechanisms of interaction the major classifications of drugs. Discussions will focus on pharmacokinetic pharmacodynamic drug interactions as well as interactions involving the biotransformation pathways. Patient case studies are used to help the student apply learned information in practice to illustrate clinical evidence, mechanism, importance, management of drug interactions.

Lecture; 2 SH, 2.00 credits. Varies.

PPW 356

Holistic Approach to Disease Free Living

This elective course is designed to educate students on disease prevention wellness. The course will focus on areas of nutrition, fitness, mindset. Students will also be introduced to techniques used in making lifestyle changes or helping patients make lifestyle changes.

Prerequisites: PPW.331, PPW.378, PPW.379, PSW.301, PSW.312, PSW.313, PSW.325. Lecture; 2 SH, 2.00 credits. Varies.

PPW 357

Koru Mindfulness Meditation for Stress Reduction

Koru Mindfulness is an evidence-based curriculum that teaches mindfulness, meditation, stress management. During this course, students will practice mindfulness stress reduction techniques to become more present reduce time spent worrying. Research has shown that students who Koru Mindfulness felt less stressed, grew more mindful, slept better, had more self-compassion. Daily meditation homework will be assigned.

Prerequisites: PPW.401, PPW.402, PPW.460, PPW.440, PPW.450, PSW.445, PSW.435, PPW.412. Lecture; 2 SH, 2.00 credits. Spring.

PPW 358

The Patient's Perspective on Chronic Illness

Chronic illness affects not only health, but relationships work as well. Additionally, external factors can impede treatment. After completing this course, students will achieve a more holistic understanding of chronic illness so they can successfully empathically assist patients.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 360

Pharmacy Law

This course introduces the student to the state federal regulations that govern the practice of pharmacy. Topics include but are not limited to the Food, Drug, Cosmetic Act; the Controlled Substances Act; the Omnibus Budget Reconciliation Act; the Poison Prevention Act; the Health Insurance Portability Accountability Act, as well as specific state rules regulations.

Lecture; 2 SH, 2.00 credits. Fall.

PPW 363**Drugs of Abuse**

Examines the pharmacology, pathophysiology, pharmacotherapy of selected drugs of abuse. Students gain in-depth exposure to the illnesses injuries sustained by drugs of abuse. Emphasizes understanding the pharmacology pathophysiology of these drugs on the human body, the pharmacotherapy of possible toxicologic emergencies, the determination of individual therapeutic endpoints.

Prerequisites: PPW.331, PPW.378, PPW.379, PSW.301, PSW.312, PSW.313, PSW.325. Lecture; 2 SH, 2.00 credits. Varies.

PPW 364**Infectious Diseases: Bugs & Drugs**

This course is designed to provide an overview of infectious diseases the concepts that are elementary to designing antibacterial pharmacotherapeutic plans. Emphasis is placed on infectious disease pathophysiology, epidemiology, bacterial susceptibility profiles, culture specimen collection techniques, antibacterial susceptibility testing, bacterial resistance..

Prerequisite: PPW.490. Lecture; 2 SH, 2.00 credits. Varies.

PPW 368**Antimicrobial Stewardship**

This course is designed to provide an overview of antimicrobial stewardship in the management of infectious diseases the challenges to health care from antimicrobial resistance. Emphasis is placed on strategies guidelines provided by the Infectious Diseases Society of America (IDSA) Society of Healthcare Epidemiology of America (SHEA), bacterial susceptibility profiles, resistance, susceptibility testing.

Prerequisites: PPW.331, PPW.379, PSW.301, PSW.312, PSW.313, PSW.325, PPW.378. Lecture; 2 SH, 2.00 credits. Spring.

PPW 370**Directed Study**

Individual study directed by a faculty member in an area of her/his expertise. Faculty-assisted instruction using existing or previously known data information. Eligible students must have earned a cumulative minimum 2.7 grade point average completed or is enrolled in all required courses consistent with their current academic standing.

Lecture; 2 SH, 2.00 credits. Varies.

PPW 371**Introduction to Biotechnology Industry**

Introduction to the pharmaceutical industry with focus on the biotechnology industry. Students learn about the development of clinical trials, drug approval processes novel therapies including gene therapy, cell based therapies stem cell based therapies.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 371H**Selected Topic: Pharmacotherapy of HIV Infection**

This course will introduce students to basic principles in the pharmacotherapy of HIV infection, including drug-specific issues (adverse effects, proper dosing regimen selection) as well as patient compliance medication safety.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 371HH**ST: Health Topics Debates**

This elective will provide students with the opportunity to learn about discuss controversial debatable health care topics in a safe open environment that enables them to challenge their opinions learn from others while evaluating reliable resources as content of debate.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 371I**Selected Topic: Pharmacy Advocacy**

This elective course is designed to introduce the importance of professional advocacy develop leadership skills in P1 students. Students will be introduced to the legislative process be responsible to be current on pharmacy related issues. Effective leadership skills will be discussed in the form of case scenarios using a book club.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 371JJ**ST: Acute Critical Care Medicine**

This course is an introduction to acute critical care pharmacy practice. Students will learn how to apply the Pharmacist's Patient Care Process to the hospitalized adult patient. Students will also be able to describe the pharmacist's roles responsibilities as a member of a multidisciplinary care team. Instructors will share first-haccounts of their hospital practice experience provide readings instructional materials to facilitate student learning.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 371K

Selected Topic: Fundamentals of Aging

This course will introduce general concepts regarding the biomedical principles of aging, social/behavioral issues, ethical considerations, approaches to geriatric assessment, adverse drug events, polypharmacy. Students will identify common problems controversies encountered when treating elderly patients as well as implement strategies to minimize their occurrence through a combination of face-to-face online activities.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 371KK

ST: Koru Mindfulness Medit. for Stress

Acute Critical Care Pharmacists are often required to develop, describe, justify drug therapy plans to their team members. So, much of this course will be devoted honing your oral communication skills through group-presentations group-discussions. Students will use evidence-based medicine to defend a stance on controversial drug topics to justify drug therapy decisions for patient cases. Students will also analyze critique contemporary drug-therapy literature that is impacting today's practice.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 371LL

ST: Antimicrobial Stewardship

This course is designed to provide an overview of antimicrobial stewardship in the management of infectious diseases the challenges to health care from antimicrobial resistance. Emphasis is placed on strategies guidelines provided by the Infectious Diseases Society of America (IDSA) Society of Healthcare Epidemiology of America (SHEA), bacterial susceptibility profiles, resistance, susceptibility testing.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 371M

The Patient Behind the Pills: Lessons in Effective Patient Care

This course provides students with tools to improve their patient interaction skills as healthcare practitioners. Students will learn communication techniques, such as motivational interviewing, in an effort to help patients reach their healthcare goals. Students will interact with various experts in different patient populations to help them learn about determine the specific healthcare needs beliefs that can affect that populations' healthcare outcomes.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 371O

Best Practices for Safe Medication Use

This course will expose students to medication safety topics using flipped classroom approach. Faculty will utilize audio/video technology to introduce content to students prior to the class session. Class time will be used for interactive activities with faculty students. Students will learn best practices that promote safety optimize patient outcomes.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 371W

Special Topics Ambulatory Care Health

This hybrid course focuses on the core chronic disease states in ambulatory care. The online portion will be didactic in nature focus on pharmacotherapy disease state management. The hands-on component will build on pharmacist patient care skills.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 372A

ST: Oral Communications for Pharmacy

Lecture; 3 SH, 3.00 credits. Fall.

PPW 372C

ST: Medical Terminology

Lecture; 1 SH, 1.00 credits. Fall.

PPW 372D

ST: Expository Writing-World Religions

Lecture; 3 SH, 3.00 credits. Fall.

PPW 373**Selected Topics: Oncology Pharmacy**

Introduces second year PharmD students to oncology medications selected therapeutic situations that may confront a practicing pharmacist. Students review commonly used antineoplastics, including adverse effects their management, the processing of orders for chemotherapy. Students also gain an appreciation for the process complications involved in allogeneic autologous stem cell transplantation.

Lecture; 2 SH, 2.00 credits. Spring.

PPW 376**Advanced Applications in Self Care**

This course will examine the principles application of over the counter drug therapy in the treatment of common disease states. Emphasis will be placed on the role of the pharmacist in determining the appropriate use of OTC medications. Utilizing a case base approach students will learn how to select appropriate over the counter drug regimens, monitor for the safe efficacious use of drugs, determine therapeutic endpoints, individualize over the counter drug therapy.

Prerequisites: PPW.401, PPW.402, PPW.460, PPW.440, PPW.450, PSW.445, PSW.435. Lecture; 2 SH, 2.00 credits. Spring.

PPW 378**Pharmacy Administration Pharmacoeconomics**

An overview of the complexities of pharmacy administration, pharmacoeconomics patient health outcomes assessment in various pharmacy practice settings.

Prerequisites: PPW.340, PPW.360 Lecture; 2 SH, 2.00 credits. Spring.

PPW 379**Drug Literature Evaluation Informatics I**

This course introduces retrieval methods, evaluative techniques, application of the various forms of primary, secondary, tertiary medical pharmacy literature. In small large group settings, utilizing a student-centered approach, students actively develop the skills needed to apply the literature to patient care issues.

Prerequisite: PPW.330. Corequisite: PPW.331. Lecture; 2 SH, 2.00 credits. Spring.

PPW 384**Drug Literature Evaluation Informatics II**

This course provides application of concepts introduced in Drug Literature Evaluation Informatics I, including retrieval, appraisal, summary of biomedical literature. Students will apply these skills to patient cases in small large group settings using a student-centered approach.

Prerequisites: PPW.331, PSW.301, PSW.312, PPW.378, PSW.313, PPW.379, PSW.325. Lecture; 1 SH, 1.00 credits. Summer.

PPW 401**Intermediate Pharmacy Practice Experience**

The Introductory Pharmacy Practice Experience (IPPE)-Community Pharmacy rotation is designed for the pharmacy student to actively participate in a supervised program of pharmacy practice in a community pharmacy. Students will gain experience confidence by applying their classroom laboratory training to solve practice related problems using a patient centered approach to care that incorporates the Pharmacists' Patient Care Process.

Prerequisites: PPW.330, PPW.331, PPW.333, PPW.340, PPW.379, PSW.360, PSW.362, PSW.312, PSW.313. Lecture; 4-8 SH, 4.00 credits. Fall.

PPW 402**Intermediate Pharmacy Practice Institutional Pharmacy**

The Introductory Pharmacy Practice Experience (IPPE)-Institutional Pharmacy rotation is designed for the pharmacy student to actively participate in a supervised program of pharmacy practice in an institutional pharmacy. Students will gain experience confidence by applying their classroom laboratory training to solve practice related problems using a patient centered approach to care that incorporates the Pharmacists' Patient Care Process.

Prerequisites: PPW.330, PPW.331, PPW.333, PPW.340, PPW.379, PSW.312, PSW.313, PSW.360, PSW.362. Lecture; 4 SH, 4.00 credits. Fall.

PPW 411A/B**Student Personal Professional Development IA/B**

This is the first course in the Personal Professional Development series. It is designed to prepare students for their professional responsibilities as students ultimately as pharmacists. Self-awareness, leadership, advocacy, cultural sensitivity, professionalism will be discussed applied via various activities. A framework will be established for documentation of experiences via Portfolios for participation in Co-Curricular activities.

Lecture; 1 SH, 1.00 credits. Spring.

PPW 412A/B/C

Student Personal Professional Development IIA/B/C

This second course in the Student Personal Professional Development series is designed to prepare students for their professional responsibilities as students ultimately as pharmacists. Self-awareness, leadership, advocacy, cultural sensitivity, professionalism will be discussed and applied via various activities. Documentation of experiences via Portfolios and participation in Co-Curricular activities will continue.

Lecture; 1 SH, 1.00 credits. Spring.

PPW 413 A/B/C

Student Personal Professional Development III A/B/C

This third course in the Student Personal Professional Development series is designed to prepare students for their professional responsibilities as students ultimately as pharmacists. Self-awareness, leadership, advocacy, cultural sensitivity, professionalism will be discussed applied via various activities Documentation of experiences via Portfolios for participation in Co-Curricular activities will continue.

Prerequisites: PPW.401, PPW.402, PPW.460, PPW.440, PPW.450, PSW.445, PSW.435. Corequisites: PPW.445, PPW.453, PSW.475, PSW.470, PPW.412. Lecture; 1 SH, 1.00 credits. Spring.

PPW 414

NAPLEX Readiness

The course engages students in activities designed to encourage self-assessment and supports preparation for the pharmacy licensure exam.

Self-paced; 1 SH, 0-1.00 credits. Spring.

PPW 440

Patient Care Seminar I

Students will apply knowledge skills acquired during the first professional year Drug Literature Evaluation courses, to answer patient case based questions synthesize recommendations from primary literature. Utilizing a case-based approach steps from the Pharmacists' Patient Care Process, students will be taught assessed on general patient assessment skills/techniques that will align with the Pharmacotherapeutics series

Prerequisites: PPW.348, PPW.384, PSW.335, PSW.385. Lecture; 1 SH, 1.00 credits. Fall.

PPW 445

Patient Care Seminar II

This course is the 2nd in a three part series applying knowledge skills acquired during the first professional year (Drug Literature Informatics I II) to answer case based questions synthesize recommendations from primary literature using the steps from the Pharmacists' Patient Care Process. General patient assessment skills/techniques will be discussed align with the Pharmacotherapeutics series.

Prerequisite: PPW.460, PPW.440, PPW.450, PSW.445, PSW.435. Lecture | Laboratory; 2 SH, 2.00 credits. Spring.

PPW 448

Patient Care Seminar III

This course is the 3rd in a three part series applying knowledge skills acquired during the first second professional year to answer case based questions synthesize recommendations from primary literature using the steps from the Pharmacists' Patient Care Process. Students will be involved in activities to complete a Diabetes Certificate Program the Pharmacy Curriculum Outcomes Assessment.

Prerequisites: PPW.460, PPW.440, PPW.450, PSW.445, PSW.435, PPW.445. Lecture | Laboratory; 1 SH, 1.00 credits. Summer.

PPW 450

Pharmacotherapeutics II

This sequence of courses examines the principles application of rational drug therapy in the treatment of the common disease states. Utilizing a case-based approach, students learn how to select appropriate drug regimens based on patientspecific data pharmacokinetic principles of specific drugs disease states, monitor for the safe efficacious use of drugs, determine therapeutic endpoints, individualize drug therapy.

Prerequisites: PPW.348, PPW.384, PSW.335, PSW.385. Lecture; 4 SH, 4.00 credits. Spring.

PPW 453**Pharmacotherapeutics III**

Prerequisite: PPW.460, PPW.440, PPW.450, PSW.445, PSW.435. Lecture; 6 SH, 6.00 credits. Spring.

PPW 457**Pharmacotherapeutics IV**

This sequence of courses examines the principles application of rational drug therapy in the treatment of the common disease states. Utilizing a case-based approach, students learn how to select appropriate drug regimens based on patientspecific data pharmacokinetic principles of specific drugs disease states, monitor for the safe efficacious use of drugs, determine therapeutic endpoints, individualize drug therapy.

Prerequisite: PPW.348, PSW.335, PSW.385, PPW.384, PPW.453. Lecture; 6 SH, 6.00 credits. Summer.

PPW 460**Pharmacy Ethics**

This course reviews the ethics rules and principles and their application to pharmacy practice. Students will explore the rules and principles via online lectures. Students will engage in decision making and practice professionalism during class case-study discussions.

Prerequisites: PPW.348, PPW.384, PSW.335, PSW.385. Lecture; 2 SH, 2.00 credits. Fall.

PPW 491**Pharmacotherapeutics II**

This sequence of courses examines the principles application of rational drug therapy in the treatment of the common disease states. Utilizing a case-based approach, students learn how to select appropriate drug regimens based on patient specific data pharmacokinetic principles of specific drugs disease states, monitor for the safe efficacious use of drugs, determine therapeutic endpoints, individualize drug therapy.

Prerequisite: PPW.348. Lecture; 8 SH, 8.00 credits. Spring.

PPW 550**Graduate Project Capstone**

Students develop a pharmacy-related project linked to optimizing patient outcomes and/or advancing pharmacy profession. Students work collaboratively and utilize creative and critical thinking skills to investigate, analyze, and communicate data. Students also perform self- and peer evaluations to identify professional strengths and weaknesses. The course represents an Entrustable Professional Activity (EPA) simulating a pharmacist approach to answering a healthcare-related problem.

Prerequisites: PPW.448, PPW.457, PSW.485, PSW.473. Self-paced; 1 SH, 1.00 credits. Spring.

PPWC 500**Advanced Pharmacy Practice Experience I**

The student participates in a six-week advanced clinical rotation in internal medicine. During this experience, the student identifies solves actual drug-related problems of patients by applying reinforcing the knowledge learned in the previous didactic experiential phases of the curriculum. The student develops the ability to assimilate pertinent data using a variety of sources methods used in the provision of pharmaceutical care. The student also enhances communication skills by interacting with healthcare professionals, patients, other students.

Prerequisites: PPW.445, PPW.453, PSW.475, PSW.470, PPW.448, PPW.457, PSW.485, PSW.473. Lecture; 6 SH, 6.00 credits. Varies.

PPWC 501**Advanced Pharmacy Practice Experience II**

The student participates in a six-week advanced clinical rotation in ambulatory care. During this experience, the student identifies solves actual drug-related problems of patients by applying reinforcing the knowledge learned in the previous didactic experiential phases of the curriculum. The student develops the ability to assimilate pertinent data using a variety of sources methods used in the provision of pharmaceutical care. The student also enhances communication skills by interacting with healthcare professionals, patients, other students.

Prerequisites: PPW.445, PPW.453, PSW.475, PSW.470, PPW.448, PPW.457, PSW.485, PSW.473. Lecture; 6 SH, 6.00 credits. Varies.

PPWC 502**Advanced Pharmacy Practice Experience III**

The student participates in a six-week advanced clinical rotation in advanced institutional pharmacy practice. During this experience, the student identifies solves actual drug-related problems of patients by applying reinforcing the knowledge learned in the previous didactic experiential phases of the curriculum. The student develops the ability to assimilate pertinent data using a variety of sources methods used in the provision of pharmaceutical care. The student

also enhances communication skills by interacting with healthcare professionals, patients, other students. The student also is required to provide two hours of pharmacy operations experience to the institutional site. This includes activities related to pharmaceutical distribution dispensing, other appropriate assignments.

Prerequisites: PPW.445, PPW.453, PSW.475, PSW.470, PPW.448, PPW.457, PSW.485, PSW.473. Lecture; 6 SH, 6.00 credits. Varies.

PPWC 503

Advanced Pharmacy Practice Experience IV

The student participates in a six-week advanced clinical rotation in advanced community pharmacy practice. During this experience, the student identifies solves actual drug-related problems of patients by applying reinforcing the knowledge learned in the previous didactic experiential phases of the curriculum. The student develops the ability to assimilate pertinent data using a variety of sources methods used in the provision of pharmaceutical care. The student also enhances communication skills by interacting with healthcare professionals, patients, other students. The student also is required to provide two hours of pharmacy operations experience to the community site. This includes activities related to pharmaceutical distribution dispensing, other appropriate assignments.

Prerequisites: PPW.445, PPW.453, PSW.475, PSW.470, PPW.448, PPW.457, PSW.485, PSW.473. Lecture; 6 SH, 6.00 credits. Varies.

PPWC 504

Advanced Pharmacy Practice Experience V

An advanced pharmacy practice elective that provides students with experience in any one of the related fields of pharmacy. These may include a pharmaceutical company, specialty areas such as psychiatry or oncology, clinical research, drug information, or pharmacy management.

Prerequisites: PPW.445, PPW.453, PSW.475, PSW.470, PPW.448, PPW.457, PSW.485, PSW.473. Lecture; 6 SH, 6.00 credits. Varies.

PPWC 505

Advanced Pharmacy Practice VI Experience V

An advanced pharmacy practice elective that provides students with experience in any one of the related fields of pharmacy. These may include a pharmaceutical company, specialty areas such as psychiatry or oncology, clinical research, drug information, or pharmacy management.

Prerequisites: PPW.445, PPW.453, PSW.475, PSW.470, PPW.448, PPW.457, PSW.485, PSW.473. Lecture; 6 SH, 6.00 credits. Varies.

Pharmaceutical Sciences-Boston (PSB)

PSB 210

Macroeconomics

This macroeconomics course provides a foundation for understanding fiscal monetary policies in a free market. Major course topics include supply-and-demanalysis, inflation, unemployment, gross national product.

Lecture; 3 SH, 3.00 credits. Fall, Spring.

PSB 215

Microeconomics

The student will be introduced to the principles of microeconomics which focus primarily on the basic theories of supply demas they relate to individuals to individual business. Also, the student will examine how the forces of supply demaffect decisions regarding the production marketing of goods services.

Lecture; 3 SH, 3.00 credits. Spring.

PSB 225

Anatomy Physiology for Pharmacy

Students will learn about the principles of basic human anatomy physiology as they relate to Pharmacy. Students will analyze appraise the human body maintenance of normal functions, with emphasis on important physiological drug targets.

Prerequisites: BIO.151 BIO.152. Lecture; 3 SH, 3.00 credits. Spring.

PSB 235

Introduction to Business

Introduces students to the fundamentals of business on a cross functional comprehensive level. Explores all major business disciplines. Designed for those students who have little or no business background.

Lecture; 3 SH, 3.00 credits. Spring.

PSB 238**Introduction to Life Sciences Medical Device Organizations**

Students will be introduced to the structure operations of life science medical device companies. Students will learn about value creation in these types of healthcare businesses at all stages of the business life cycle: startup, clinical development, commercialization maintenance/exit strategy. The student will explore the contribution of each key function within the business to that value creation.

Lecture; 3 SH, 3.00 credits. Spring.

PSB 240**Introduction to Health Policy Regulatory Affairs**

Students will be introduced to health policy, the process for developing analyzing policy the implications on processes, responsibilities ethical obligations for health professionals. Students will get an overview of the regulatory environment for healthcare, including the role of the FDA, the manner in which regulations are developed enforced.

Prerequisite: PSB.235 or HCM.245. Lecture; 3 SH, 3.00 credits. Spring.

PSB 301**Pharmacology for Allied Health Professionals**

An introductory course designed to familiarize students with commonly used drugs, their mechanisms of action, indications major adverse effects. The course follows a disease-based format includes pharmacotherapy of cardiovascular, CNS, endocrine, bacterial malignant conditions. Principles of drug administration pharmacokinetics are also presented.

Prerequisites: BIO.152, (CHE.232 or BIO.360). Lecture; 3 SH, 3.00 credits. Varies.

PSB 320**Introduction to Healthcare Delivery**

Introduces the complex areas of health care delivery from public policy perspectives. Lecture classroom discussions provide interdisciplinary approaches to difficult political, social economic issues that confront health care practitioners the public.

Lecture; 3 SH, 3.00 credits. Fall.

PSB 320O**Introduction to Healthcare Delivery**

This course introduces the complex areas of healthcare delivery from public policy perspectives. Lecture classroom discussions provide interdisciplinary approaches to difficult political, social, economic issues that confront healthcare practitioners the public.

Lecture; 3 SH, 3.00 credits. Varies.

PSB 326**Principles of Anatomy Physiology I**

Students learn the anatomical structure physiological processes of the human body. Using a regional approach this course will cover the cellular make up tissue organization of the human body is the first course of a two-course sequence that includes foundation level material which is necessary for further understanding of subsequent material on organ function, normal diseased. Students will analyze appraise the human body maintenance of normal functions.

Prerequisites: BIO.151, BIO.152, CHE.232. Lecture; 3 SH, 3.00 credits. Fall.

PSB 327**Principles of Anatomy Physiology II**

Students learn the anatomical structure physiological processes of the cardiovascular, immune, urinary, reproductive, endocrine, respiratory systems. This is the second course of a two-course sequence that includes foundation level material) which is necessary for further understanding of subsequent material on organ function, normal diseased. Students will analyze appraise the human body maintenance of normal functions

Prerequisite: PSB.326. Lecture; 3 SH, 3.00 credits. Spring.

PSB 328**Physiology/Pathophysiology I**

This comprehensive course deals with the principles of mammalian physiology a basic understanding of human anatomy. It emphasizes the maintenance of normal functions various abnormalities or stresses within the systems.

Prerequisites: BIO.151, BIO.152, CHE.232. Lecture; 4 SH, 4.00 credits. Fall.

PSB 329**Physiology/Pathophysiology II**

This is a continuation of the principles of mammalian physiology, human anatomy, elements of pathology presented in PSB 328. It includes discussions of the following systems: cardiovascular, respiratory, gastrointestinal, renal, metabolic, reproductive.

Prerequisite: PSB.328. Lecture; 4 SH, 4.00 credits. Spring.

PSB 331

Biochemistry I

The physical-chemical properties of the major classes of biomolecules are studied with particular emphasis on the relationship between these properties the structure function of biomolecules.

Prerequisites: (MAT.152 or MAT.172), CHE.232, BIO.152. Lecture; 3 SH, 3.00 credits. Fall.

PSB 332

Biochemistry II

The metabolic processes of the expression of genetic material, energy production storage, synthesis of biomolecules are studied. Proper nutrition is examined utilizing the processes that integrate regulate metabolism.

Prerequisite: PSB.331. Lecture; 3 SH, 3.00 credits. Spring.

PSB 335

Pharmaceutical Technology

Describes the different stages of drug formulation explores different pharmaceutical excipients, preformulation testing, different pharmaceutical unit operations, with an emphasis on quality assurance GMP. The course provides an overview of animal testing manufacturing scale-up. Applications of theories are emphasized through group projects, research, active participation in discussions.

Prerequisite: PSB.340. Lecture; 3 SH, 3.00 credits. Fall.

PSB 337

Medical Biochemistry I

The physical-chemical properties of the major classes of biomolecules are studied with particular emphasis on the relationship between these properties the structure function of biomolecules with particular focus to pharmacy students.

Prerequisites: CHE.232, MAT.152, BIO.152. Lecture; 3 SH, 3.00 credits. Fall.

PSB 338

Medical Biochemistry II

The metabolic processes of the expression of genetic material, energy production storage, synthesis of biomolecules are studied. Examples from clinical biochemistry will be presented to illustrate the effects of metabolic malfunction to understand altered cell biochemistry is the basis for pathophysiologic conditions.

Prerequisite: PSB.337 Lecture; 3 SH, 3.00 credits. Spring.

PSB 340

Pharmaceutics I

A study of the mathematical, physico-chemical, biological principles concerned with the formulation, preparation, manufacture, effectiveness of pharmaceutical dosage forms.

Prerequisites: CHE.232, PHY.270, (MAT.152 or MAT.172). Lecture; 4 SH, 4.00 credits. Fall.

PSB 341

Pharmaceutics II

This course is a continuation of Pharmaceutics I, PSB 340.

Prerequisite: PSB.340. Lecture; 3 SH, 3.00 credits. Spring.

PSB 346

Physico-Chemical Properties of Drug Molecules

This course reviews the basic physico-chemical principles as applied to small-molecule drug development, the pharmacological activities of such drugs, their mechanisms of action in various disease states. Focuses on an understanding of organic functional groups absorption, metabolism, distribution, excretion of drugs. Drug-receptor interactions will be explored using selected examples.

Prerequisite: PSB.332. Lecture; 3 SH, 3.00 credits. Spring.

PSB 349

Dosage Forms Drug Delivery Systems

Students will learn of the physical, chemical biological principles involved in formulation, preparation effectiveness of pharmaceutical dosage forms delivery systems. Students will be introduced to general considerations in the design of dosage forms including liquid, semi-solid, solid sterile including solid modified-release novel drug delivery systems.

Prerequisites: CHE.232 , PHY.270. Lecture; 3 SH, 3.00 credits. Fall.

PSB 350L

Industrial Pharmacy Lab

Students develop pharmaceutical-industry hands-on skills, including optimizing formula formulation processes, testing the quality of final dosage forms, communicating the experimental results using proper scientific terminology

Prerequisite: PSB.341. Laboratory; 1 SH, 1.00 credits. Fall, Spring.

PSB 353

Pharmaceutical Calculations I

Students will perform calculations pertinent to pharmacists in traditional specialized practice settings including research. Calculations will include: interpretation Latin terms, differentiating between prescription components, distinguishing measurements systems conversions from one to another calculating dose regimens based on age, body weight or surface area.

Prerequisite & Corequisite: CHE.232, PHY.270. (MAT.152 or MAT.172). Corequisite: PSB.349. Lecture; 2 SH, 2.00 credits. Fall.

PSB 354

Pharmaceutical Calculations II

Students will learn the calculations performed by pharmacists in traditional as well as in specialized practice settings within operational research areas in industry, academia government. Pharmaceutical Calculations II is a continuation of Pharmaceutical Calculations I.

Prerequisite: PSB.353. Lecture; 2 SH, 2.00 credits. Spring.

PSB 359L

Pharmaceutical Dosage Forms Lab

The students will learn fundamental concepts related to non-sterile compounding including extemporaneous compounding for pediatric, geriatric or patients with special disease conditions. Students will acquire knowledge of active pharmaceutical ingredients pharmaceutical functions of excipients used in each formulation. Students will also learn about container suitability, product stability, beyond use date, dosage form uniformity, maintaining quality control records.

Prerequisites: PSB.353, PSB.349. Corequisite: PSB.354. Laboratory; 1 SH, 1.00 credits. Spring.

PSB 370

Analytical Methods in Pharmacology & Toxicology I

In this laboratory-based course, students will be introduced to given the opportunity to perform standard molecular biology animal-handling techniques commonly used in drug discovery developmental research.

Prerequisites: BIO.255, CHE.232, CHE.234L. Lecture; 3 SH, 3.00 credits. Fall.

PSB 371

Analytical Methods in Pharmacology & Toxicology II

This course is a continuation of PSB.370 focusing on students' performance of standard molecular, biochemical, analytical techniques used in drug discovery developmental research.

Prerequisite: PSB.370. Lecture; 3 SH, 3.00 credits. Fall.

PSB 375

Fundamentals of Drug Development

The student will become familiar with physical, chemical, biological principles underlying the discovery of drug molecules the design, manufacture, testing of pharmaceutical products.

Prerequisites: (BIO.210 or BIO.152), (CHE.210, CHE.132 or PSB.340). Lecture; 4 SH, 4.00 credits. Fall.

PSB 376

Healthcare Marketing

Students will be introduced to commercial healthcare/pharmaceutical marketing as a functional area of the business enterprise. Students will explore the analytical managerial approaches to problem solving in market research, marketing, pricing distribution with products, services ideas in the domestic international marketplace. Students will develop a marketing toolkit for designing pathways to various marketing opportunities.

Lecture; 3 SH, 3.00 credits. Fall.

PSB 377

Healthcare Management

Students will be introduced to the principles practices of management in a variety of healthcare settings, including hospitals, outpatient settings, integrated systems managed care organizations. Also, students will focus on the current strategic operational management techniques used by professionals in the provision of healthcare services. Student learning will be facilitated through lectures, case studies contemporary articles.

Lecture; 3 SH, 3.00 credits. Fall.

PSB 380

Applied Business Techniques

This course covers statistical techniques in a business setting featuring case studies conceptual exercises. Statistical topics include effective use of numerical graphical summaries, estimation, hypotheses testing, confidence intervals regression. The course will integrate the use of Excel PowerPoint in the homework problems, student presentations exams. Professional literature computer software are integrated into the course.

Prerequisite: MAT.261. Lecture; 3 SH, 3.00 credits. Spring.

PSB 401

Pharmacology Toxicology Seminar I

In this seminar-based course, students will be introduced to the reading, evaluation, analysis, interpretation, presentation of scientific literature as it relates to pharmacology toxicology.

Prerequisite: BIO.260. Lecture; 1 SH, 1.00 credits. Fall.

PSB 402

Pharmacology/Toxicology Seminar II

A continuation of PSB 401 in which students will read, evaluate, analyze, interpret present scientific literature as it relates to Pharmacology Toxicology. This course is intended to be taken concurrently with Analytical Methods of Pharmacology Toxicology I (PSB370) to integrate conceptual knowledge with practical experience.

Prerequisite: PSB.401. Corequisite: PSB.370. Lecture; 1 SH, 1.00 credits. Spring.

PSB 403

Pharmacology/Toxicology Seminar III

This course is a continuation of PSB 402 in which students will read, evaluate, analyze, interpret, present scientific literature as it relates to pharmacology toxicology. This course is intended to be taken concurrently with Analytical Methods of Pharmacology Toxicology II (PSB 371) to integrate conceptual knowledge with practical experience.

Prerequisites: PSB.402, PSB.370. Corequisite: PSB.371. Lecture; 1 SH, 1.00 credits. Fall.

PSB 404

Pharmacology/Toxicology Seminar IV

A continuation of PSB 403 in which students will read, evaluate, analyze, interpret present scientific literature as it relates to Pharmacology Toxicology.

Prerequisite: PSB.403. Lecture; 1 SH, 1.00 credits. Spring.

PSB 410

FDA Regulatory Affairs

This course introduces the regulatory, legal, strategic aspects of pharmaceutical regulation law through readings, lectures, discussion. It explores the U.S. Food Drug Administration its authority over the Federal Food, Drug, Cosmetic Act. Topics include prescription drugs, over-the-counter drugs, biologic, device, cosmetics approval regulation.

Prerequisite: PSB.320 or PSB.420. Lecture; 3 SH, 3.00 credits. Fall, Spring.

PSB 411

Pharmacy Law

This course examines state federal legal requirements associated with pharmacy practice operations including regulation of pharmacy personnel, pharmacies, pharmacy departments, controlled substances, dispensing functions, prospective drug review counseling.

Prerequisites: PPB.325, PPB.335. Lecture; 3 SH, 3.00 credits. Spring.

PSB 412

Medical Patients' Rights Professionals' Liabilities

This course facilitates identification analysis of medical patients' legal rights from the beginning to the end of life, health care providers' corresponding legal responsibilities.

Lecture; 3 SH, 3.00 credits. Spring.

PSB 415

Financial Accounting

This course introduces the principles practices of modern accounting. Lectures classroom discussion provide a basic understanding of how business transactions are recognized how this information is used in making business decisions. Accounting rules, measures, formulas, ratios, techniques are covered in this overview course.
Lecture; 3 SH, 3.00 credits. Fall.

PSB 416

Managerial Accounting

With financial accounting as a foundation, the student will become familiar with the accounting principles, concepts, techniques that are used by healthcare providers to guide them in decision making. In this context, the student will focus on topics such as cost-revenue relationships, cost systems, the preparation analysis of budgets.
Prerequisites: PSB.210, MAT.261. Lecture; 3 SH, 3.00 credits. Fall, Spring.

PSB 418

Pharmacoeconomics

This course introduces students to economics in healthcare delivery with an emphasis on the selection of drug therapy formulary management. Covers various pharmacoeconomic quantitative methods, including decision analysis quality-of-life assessment.
Prerequisites: MAT.261, (PSB.210 or SSC.210). Lecture; 3 SH, 3.00 credits. Varies.

PSB 420

Pharmaceutical Analysis/Laboratory

This course introduces the hypothesis practice of drug analysis. It covers the preparation of drug samples for analysis, developing validating different analytical methods detection analysis of drug metabolites degradation products. Lab experiments are planned to help students apply the techniques learned in class build their hands-on skills.
Prerequisite: CHE.232. Lecture; 3 SH, 3.00 credits. Fall.

PSB 420L

Pharmaceutical Analysis/Laboratory

Introduces the hypothesis practice of drug analysis. Covers the preparation of drug samples for analysis, developing validating different analytical methods. Covers detection analysis of drug metabolites degradation products. Lab experiments are planned to help students apply the techniques learned in class build their hands-on skills.
Prerequisite: CHE.232. Corequisite: PSB.420. Laboratory. Varies.

PSB 421

Pharmacoepidemiology

Pharmacoepidemiology is introduced through concepts methods used to measure the source, diffusion, use of drugs in populations. Emphasis is placed on determining pharmaceutical care outcomes identifying potential or real drug-use problems.
Lecture; 2 SH, 2.00 credits. Fall.

PSB 424

Research Methods in Pharmacoepidemiology

Pharmacoepidemiology is introduced through concepts methods developed in epidemiology to measure the source, diffusion, use of drugs in populations. Emphasis is placed on determining pharmaceutical care outcomes identifying potential or real drug-use problems.
Prerequisites: PPB.325, PSB.328, PSB.337, PSB.349. Lecture; 2 SH, 2.00 credits. Spring.

PSB 429

Operations Management

The student will become familiar with the role that operations management plays in the efficient delivery of goods services both in the domestic global environments. Also, the student will learn how to use comprehensive approaches to address operational supply chain issues. These approaches will include tools methods that include Six Sigma, EOQ, Value Stream Mapping.
Lecture; 3 SH, 3.00 credits. Varies.

PSB 430

Pharmacokinetics I

This course is a study of absorption, distribution, metabolism, elimination (ADME) processes using mathematical models. Emphasis is placed upon determination of pharmacokinetic parameters from blood/urine data following administration of single or multiple doses of drugs by various routes. Additionally, the course includes topics on the influence of physiological, physiochemical formulation factors on the bioavailability of drugs.
Prerequisite: PSB.340. Lecture; 3 SH, 3.00 credits. Varies.

PSB 434**Managed Healthcare: Administration Management**

The student will become familiar with the evolution of managed health care the forces that have driven this phenomenon. In addition, the student will focus on the various types of managed care organizations the issues (public policy market performance) that continue to shape this delivery of health care.

Prerequisite: PSB.320. Lecture; 3 SH, 3.00 credits. Fall, Spring.

PSB 440**Molecular Biotechnology**

This course reviews molecular cellular biology emphasizes the application of recombinant DNA technology to present day biotechnology. The course reviews both theoretical practical aspects of recombinant protein expression, vaccine design gene therapy.

Prerequisite: (PSB.332, BIO.260 or BIO.332). Lecture; 3 SH, 3.00 credits. Spring.

PSB 441**Medicinal Chemistry I**

This course is a study of the effect of chemical functional groups on the physiochemical properties, biological activity, kinetics of medicinal agents. Agents affecting the autonomic nervous system are considered in detail. Drugs acting on the central nervous system are introduced. Integrated with PSB 451.

Prerequisite: PSB.338. Corequisite: PSB.451. Lecture; 3 SH, 3.00 credits. Fall.

PSB 442**Medicinal Chemistry II**

This course is a continuation of PSB 441. The discussion of central nervous system agents is concluded. The topics of cardiovascular agents, diuretics, endocrine hormones, antidiabetic agents, anticancer drugs are discussed in detail. Integrated with PSB 454.

Prerequisite: PSB.441 Corequisite: PSB.454. Lecture; 3 SH, 3.00 credits. Spring.

PSB 444**Organizational Development**

A thorough review of organizational development improvement practices is the basis for this course, including the roles values of such corporate attributes as training resource development, culture, planning strategy implementation. The focus of lectures materials is on the identification of organizational strengths weaknesses as well as their remedy.

Lecture; 3 SH, 3.00 credits. Varies.

PSB 445**Sales of Pharmaceuticals Medical Products**

This course explores sales selling strategies for medical products in a regulated environment, including selling/negotiation techniques sales agreements, emphasizing the special concerns of FDA regarding promotional material, advertisement, sales collateral in a regulated environment, including off-label uses.

Prerequisites: MAT.261, PSB.210. Lecture; 3 SH, 3.00 credits. Spring.

PSB 446**Healthcare Finance**

A thorough understanding of the principles concepts of finance as they apply to the health care industry is provided. The course utilizes financial tools strategies to understand the business of the health care environment.

Lecture; 3 SH, 3.00 credits. Spring.

PSB 447**Fundamentals of Business Law**

Introduces students to the study of law as it relates to business organizations. Explores all aspects of the court system judicial process, including torts, contracts, employment, etc. Emphasis on relationship between the law ethics.

Lecture; 3 SH, 3.00 credits. Spring.

PSB 450**Pharm Biotechnology**

Students learn the fundamental principles concepts in recombinant DNA technology its application to pharmaceuticals. Students apply these principles to the design use of therapeutic proteins, vaccines, nucleic acids, including small interfering RNA (siRNA), antisense molecules, gene therapy in various disease states. Students learn about federal regulatory issues relating to these biotechnological products.

Prerequisite: PSB.332 or PSB.338. Corequisite: PSB.451, PSB.441. Lecture; 3 SH, 3.00 credits. Fall.

PSB 451**Pharmacology I**

This course introduces the student to the science of pharmacology, with emphasis on the basic principles of pharmacology, genetic factors modifying drug responses, dose-response relationships, in-depth consideration of the effects of drugs on the autonomic nervous system; the cardiovascular system eicosanoids. Integrated with PSB 441.

Prerequisite: PSB.329. Corequisite: PSB.441. Lecture; 4 SH, 4.00 credits. Fall.

PSB 454**Pharmacology II**

This course is a continuation of PSB 451, the discussion of central nervous system drugs is concluded. Cardiovascular, renal, endocrine pharmacology is presented. In addition, cancer chemotherapy antiasthmatics will be presented. Integrated with PSB 442.

Prerequisite: PSB.451 Corequisite: PSB.442. Lecture; 4 SH, 4.00 credits. Spring.

PSB 456**Entrepreneurship**

This course introduces students to the process of developing, financing, growing exiting a business venture. The course includes how to protect intellectual capital, how to raise capital, both in the private public markets, how to value a company for a sale or merger. The role of venture capitalists, investment bankers angels as a source of capital is discussed.

Lecture; 3 SH, 3.00 credits. Spring.

PSB 457**Pharmacognosy**

The student will understand discuss natural products from plants their manufacture, assay, use in humans. The themes to be emphasized include the procedures of chemical characterization (extraction, isolation, analysis of plant constituents) the pharmacological methods to study the medicinal properties of plants (pharmacodynamics pharmacokinetics of plant constituents).

Prerequisites: PSB.442, PSB.454. Lecture; 3 SH, 3.00 credits. Fall.

PSB 458**Pharmaceutics Seminar**

Students develop abilities to search, evaluate literature deliver presentations. Includes presentations from visiting scientists from local pharmaceutical biotechnology companies on the latest developments in the pharmaceutical field.

Corequisite: PSB.335. Lecture; 1 SH, 1.00 credits. Spring.

PSB 460**Principles of Toxicology I**

This lecture-based course is designed to introduce the student to the discipline of toxicology with an emphasis on its application to basic science research. The principles of toxicology, including non-organ-targeted organ system- targeted toxicity, will be discussed, as well as the mechanisms of toxicity; toxicokinetics; chemical carcinogenesis; genetic, liver, kidney toxicity.

Prerequisites: Take 1 group: (PSB.329, PSB.332) or (BIO.152, BIO.360). Lecture; 3 SH, 3.00 credits. Fall.

PSB 461**Principles of Toxicology II**

This course is a continuation of PSB 460 will present topics such as cardiovascular, hematological respiratory toxicology. Additionally, other areas of toxicology will be presented discussed as well as direct applications in the field of toxicological research.

Prerequisite: PSB.460. Lecture; 3 SH, 3.00 credits. Spring.

PSB 462**Basic Pharmacology I**

This lecture course is designed to introduce the student to the science of pharmacology, with emphasis on its application to basic science research. Principles of pharmacology, including pharmacokinetic pharmacodynamic relationships, will be discussed, as well as the effects of drugs on the autonomic nervous system, cardiovascular system, renal system, eicosanoids.

Prerequisite: PSB.329. Lecture; 3 SH, 3.00 credits. Fall.

PSB 464**Basic Pharmacology II**

A continuation of Basic Pharmacology I (PSB 462) presenting effects of drugs on the central nervous system, respiratory endocrine systems. Additionally, antibiotics, antivirals, antifungals as well as cancer chemotherapy antiasthmatics will be presented.

Prerequisite: PSB.462. Lecture; 3 SH, 3.00 credits. Spring.

PSB 530

Undergraduate Research Project

Research participation is provided at the undergraduate level for superior students, with emphasis on the methods techniques of research. Offered at the discretion of the division.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

PSB 532

Directed Study

Provides faculty-directed study to an individual student wishing to examine a particular topic in pharmacology in greater detail. Emphasis is placed on the student's analysis of the scientific literature. Faculty-assisted instruction in all areas of pharmacology is available.

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

PSB 535

Senior Research Project/Internship

Research participation is provided at the undergraduate level for superior students, with emphasis on the methods techniques of research.

Permission of instructor required. Laboratory; 5 SH, 5.00 credits. Varies.

PSB 540

Principles of Clinical Research

Prerequisite: PSB.454 Lecture; 3 SH, 3.00 credits. Spring.

PSB 541

Principles of Pharmacoeconomics Research Outcomes

This course provides an overview of pharmacoeconomics (PE) outcomes research (OR) concepts methodologies aims to provide future practitioners with the knowledge skills needed to understutilize information from PE OR studies in the decision making process.

Lecture; 3 SH, 3.00 credits. Spring.

PSB 542

Fundamentals of the BioPharmaceutical Industry

Students develop an understanding of the Pharmaceutical Industry to enable them to contrast the impact of various positions which support the Drug Development Pathway. Students will be provided with a realistic overview of industry operations through experts including pharmacists, healthcare executives scientists who will highlight the diversity of potential roles.

Prerequisite: PSB.337 or PSB.375. Lecture; 3 SH, 3.00 credits. Spring.

PSB 560

PHCB Internship

Students will have the opportunity to do an unpaid internship in the health care industry which will expose them to real world business situations in their area of study. Students will apply knowledge techniques learned in the classroom to areas such as Marketing, Accounting, Finance, Operations General Business in a hands on environment.

Prerequisite: PSB.320, PSB.456, PSB.315, PSB.423, PSB.425. Permission of instructor required. Lecture; 3 SH, 3.00 credits. Varies.

PSB 710

Principles of Pharmaceutical Science

Students will learn receive an overview of the fundamental principles concepts in pharmaceutical sciences their applications in the areas of pharmacology, medicinal chemistry, pharmaceuticals.

Lecture; 3 SH, 3.00 credits. Fall.

PSB 715

Clinical Toxicology

Students will learn the foundations of clinical toxicology with a particular emphasis on common poisons/overdoses their corresponding antidotes/treatments. Students will apply knowledge by analyzing solving case studies in an online discussion board.

Prerequisites: BIO.210, CHE.232, BIO.360. Permission of instructor required. Lecture; 3 SH, 3.00 credits. Spring.

PSB 751

Research Methods Bio-Analytical Techniques

Prerequisite: PSB.341 Lecture; 4 SH, 4.00 credits. Spring.

PSB 755

Cosmetic Personal Care Products

Students will learn the fundamental knowledge, to the development commercialization of novel personal care products including advances in raw materials, cosmetic actives, formulations characterization, clinical assessment compendium standards in hair, skin, color cosmetics, dental hygiene, contact lens cleansers. They will also acquire some laboratory skills related to this science.

Prerequisites: PSB.359L, PSB.341, PSB.710. Lecture; 3 SH, 3.00 credits. Spring.

PSB 802

Chemistry of Macromolecules

This course covers the structure, stability, properties, isolation, purification, identification, synthesis of proteins. Bases of theoretical experimental approaches to conducting protein-binding studies are considered in detail.

Prerequisite: PSB.332. Lecture; 3 SH, 3.00 credits. Fall.

PSB 807

Unit Operations

This course imparts a firm understanding of various industrial operations used in the manufacturing of pharmaceutical dosage forms in order to lay a foundation for other courses dealing with the specific aspects of dosage form development manufacture.

Lecture; 3 SH, 3.00 credits. Spring.

PSB 808

Advanced Physical Pharmacy I

This course provides analysis of the theory of physical chemical properties, such as solubility, diffusion, dissolution, interfacial phenomena, rheology, their application in the development of dosage forms.

Lecture; 3 SH, 3.00 credits. Fall.

PSB 815

Drug Metabolism

The metabolism of drugs other foreign compounds is considered. Emphasis is placed on those substances that are of therapeutic importance. Phase I Phase II metabolism, hepatic intestinal drug metabolism, pharmacogenetics variability, active metabolites toxicity, drug-drug herbal-drug interactions, in vitro systems, in-vivo methods, inducers of CYP450 isozymes are all considered in depth.

Prerequisite: PSB.332 Lecture; 3 SH, 3.00 credits. Fall, Spring.

PSB 818L

Laboratory Rotations

Provides new graduate students opportunities to gain preliminary hands-on experience in laboratory techniques to identify an area of research of potential interest.

Laboratory; 1 SH, 1.00 credits. Fall, Spring.

PSB 819

Graduate Seminar

This seminar is required for all graduate students in the pharmaceutical sciences offered each semester.

Lecture; 0-1 SH, 1.00 credits. Fall, Spring.

PSB 819G

Graduate Seminar

This seminar is required for all graduate students in the pharmaceutical sciences offered each semester.

Lecture; 1 SH, 1.00 credits. Varies.

PSB 820

Advanced Medicinal Chemistry I

The rational utilization of drug structure-activity relationships in the design of new drugs is considered. Specific topics include enzyme inhibition as a tool to develop new therapeutic agents the AIDS virus as a potential target for drug design.

Prerequisite: PSB.442 Lecture; 3 SH, 3.00 credits. Fall.

PSB 825

Controlled Drug Delivery

This course is a study of the principles involved in the formulation of various controlled-release drug dosage forms mechanisms responsible for drug release. The emphasis is placed on the oral, ophthalmic, nasal, pulmonary, transdermal, vaginal, wound care drug device combination.

Prerequisite: PSB.808 Lecture; 3 SH, 3.00 credits. Fall.

PSB 826

Novel Drug Delivery Systems

The study of the principles involved in the formulation of various controlled-release drug dosage forms mechanisms of drug release from such dosage forms. The emphasis is placed on transdermal peptide/protein drug delivery systems.

Prerequisite: PSB.808 Lecture; 3 SH, 3.00 credits. Spring.

PSB 835

Advanced Pharmacokinetics

This course is an advanced study of pharmacokinetic principles pertaining to ADME processes as they apply to mammillary other complex pharmacokinetic models. It emphasizes the utility of multicompartment concepts in the analysis of blood/urine data following the administration of the drug by intra- extravascular routes.

Lecture; 3 SH, 3.00 credits. Fall.

PSB 841

Advanced Pharmacology: Receptor Pharmacology

The pharmacological response is examined as the interactions between the physico-chemical properties of a drug the body tissues. Explores the interactions of drugs with whole tissues individual receptors. Emphasis is placed on the analysis of ligand-binding data.

Lecture; 3 SH, 3.00 credits. Fall.

PSB 845

Advanced Pharmacology: Anti-Cancer Drugs

Students will evaluate the pharmacology of conventional novel targeted antineoplastic agents. The focus of learning is on the use of in-vitro in-vivo models in anti-neoplastic drug discovery in understanding the underlying mechanisms of cytotoxicity resistance through journal club discussions, assigned readings peer presentations.

Lecture; 3 SH, 3.00 credits. Fall.

PSB 847

Graduate Biochemistry

A course designed to present basic advanced topics in molecular biology biochemistry.

Lecture; 3 SH, 3.00 credits. Fall.

PSB 851

Bio-organic Chemistry

This course reviews the organic chemistry of biological catalysts including the essentials of enzymatic reactions. Emphasizes enzyme coenzyme structure functions, mechanisms of action modes of inhibition.

Prerequisite: PSB.332 Lecture; 2 SH, 2.00 credits. Spring.

PSB 855

Care Use of Laboratory Animals

Provides information for the graduate student on the various animal welfare agencies the proper care use of laboratory animals involved in scientific experimentation.

Lecture; 1 SH, 1.00 credits. Spring.

PSB 856B

Advanced Pharmacology: Neuropharmacology

A course designed to present basic applied neuropharmacology in a functional context, emphasizing the anatomical biochemical basis or treatment or neurological disorders.

Lecture; 3 SH, 3.00 credits. Spring.

PSB 856G

ST: Advanced Medicinal Chemistry II

This course is designed to introduce graduate students in Medicinal Chemistry to various approaches of drug design. Special emphasis will be given to computer aided drug design.

Prerequisite: PSB.820. Permission of instructor required. Lecture; 3 SH, 3.00 credits. Varies.

PSB 856I

Selected Topics in Medicinal Chemistry

Medicinal Chemistry graduate students (in the PhD program) will be made to apply fundamental principles to the understanding design of emerging future drugs. Drug development of agents to treat viral infections such as HIV HBV, Diabetes Mellitus will be given special emphasis.

Prerequisite: PSB.856G. Permission of instructor required. Lecture; 3 SH, 3.00 credits. Fall.

PSB 860

Chromatography

This course discusses the practical application of chromatography with emphasis on liquid chromatography, reviewing the theory basic principles of chromatography as a separation tool, techniques of method development validation.

Prerequisite: CHE.717 Lecture; 2 SH, 2.00 credits. Spring.

PSB 861

Chromatography Laboratory

This lab provides experience in the development validation of the HPLC method for the analysis of pharmaceuticals by evaluating the effects of molecular structures the selection of columns mobile phases in the practical development of the HPLC method.

Corequisite PSB.860. Laboratory; 1 SH, 1.00 credits. Spring.

PSB 870

Practicum in Pharmaceutical, Regulatory Applied Sciences

Student participates in a practicum at an off-campus site in the student's major field of study. Student submits a proposal of the practicum's goals objectives to the Program Director for approval prior to start of practicum. At practicum's conclusion, student practicum site coordinator submit reports to the Program Director regarding the student's activities performance.

Research; 3-4 SH, 3.00-4.00 credits. Varies.

PSB 872

Special Problems in Pharmaceutical Sci

A student may be permitted by the Graduate Dean to undera less extensive investigation than that of the PhD dissertation or to participate in a field study program at an off-campus site. This investigation / field study program is conducted in the areas of the student's major or minor field of study is open to all doctoral graduate students having completed at least two years of doctoral study two semesters of research credits. Students are expected to prepare a proposal including the nature of the fieldwork, the study objective, the field study site, the fieldwork supervisor, other topics related to the student's major/minor field of study. The proposal is to be approved by the student's Graduate Advisory Committee several months prior to beginning the program. At the conclusion of the field study program, the student field supervisor submit a report to the Graduate Advisory Committee the Dean of Graduate Studies. A cumulative maximum of 2 semester hours may be applied toward the graduate degree. The amount of credit awarded for a special problem is subject to review by the Graduate Advisory Committee the Dean of Graduate Studies. This course is not subject to tuition remission.

Lecture; 1-2 SH, 1.00-2.00 credits. Varies.

PSB 880

Research

Four (4) semester hours required for the master's degree 7 or 8 semester hours required for the doctorate, including 1 seminar hour. In no case shall more than 3 research credits be taken until after the proposal has been approved by the Graduate Advisory Committee the Dean of Graduate Studies.

Lecture; 1-4 SH, 1.00-4.00 credits. Varies.

PSB 895

Graduate Study Extension

All degree students are expected to remain continuously enrolled each semester, excluding summer semesters, until all requirements for the degree have been completed. Students maintain continuing registration by indicating PSB 895 Graduate Study Extension on the registration form paying a fee. This course is not subject to tuition remission.

Lecture. Varies.

Pharmaceutical Sciences-Worcester/Manchester (PSW)

PSW 300

Pharmaceutical Biochemistry I

A study of the structure, physical/chemical properties, function, interactions of molecules found in biological systems: amino acids, peptides, proteins; nucleotides nucleic acids; carbohydrates; lipids; hybrid molecules.

Lecture; 2 SH, 2.00 credits. Fall.

PSW 301

Pharmaceutical Biochemistry II/ Nutrition

The course covers: the metabolism of molecules found in biological systems, energy storage utilization, molecular biosynthesis its regulation; the storage, use replication of genetic information; an overview of human nutrition, including standards guidelines, weight control, food-drug interactions.

Prerequisite: PSW.300. Lecture; 3 SH, 3.00 credits. Spring.

PSW 311

Pharmaceuticals I Pharmacokinetics I

Introduction to drug delivery systems the physical chemical properties of drugs that can be applied to pharmacy practice.

Lecture; 3 SH, 3.00 credits. Fall.

PSW 312

Pharmaceuticals II Pharmacokinetics I

Calculations required to determine the correct dosage of medication based on individual patient needs characteristics as well as quantities of ingredients necessary to prepare extemporaneously compounded prescriptions are taught in this course.

Prerequisite: PSW.311. Lecture; 2 SH, 2.00 credits. Spring.

PSW 312L

Pharmaceuticals II Lab

This course will provide students with the requisite skills in the preparation of non-sterile compounded products (including solutions, gels, ointments, suppositories, capsules, tablets, troches), as well as sterile compounded preparations.

Prerequisites: PPW.340, PPW.330, PSW.300, PSW.311, PSW.350, PPW.360. Corequisites: PSW.312, PPW.331, PPW.379, PSW.301, PSW.313, PSW.325, PPW.378. Laboratory; 1 SH, 1.00 credits. Varies.

PSW 313

Pharmacokinetics/Biopharmaceutics

The students will be introduced to the principles of biopharmaceutics pharmacokinetics, how they affect dosage regimen design therapeutic efficacy evaluations. The impact of the physical chemical nature of drugs dosage forms will be studied as they relate to the absorption, distribution, metabolism elimination.

Prerequisite: PSW.311. Lecture; 3 SH, 3.00 credits. Spring.

PSW 325

Introduction to Human Physiology/ Pathophysiology

This course is the first in a series focused on comparative study of organ system functions their relationship to the etiology, pathogenesis, clinical manifestation of human diseases. Students will learn pathophysiological fundamentals, cell communication dysfunction, peripheral central nervous system function dysfunction, muscle motor function dysfunction, immunological system function dysfunction. - Also fix Prerequisites: Successful completion of all preceding required courses, Co-requisites: Concurrent enrollment in all required courses.

Prerequisite: PPW.330. Lecture; 3 SH, 3.00 credits. Spring.

PSW 335

Human Physiology/Pathophysiology I

This course is the second in a series focused on comparative study of organ system functions their relationship to the etiology, pathogenesis, clinical manifestation of human diseases. Students will learn reproductive, gastrointestinal, hepatobiliary, renal systems function dysfunction. Students will learn fluid acid-base balance in the human body.

Prerequisites: PPW.331, PSW.301, PSW.312, PPW.378, PSW.313, PPW.379, PSW.325, PPW.333. Corequisite: PPW.348. Lecture; 3 SH, 3.00 credits. Summer.

PSW 346

Introductory Transdermal Product Development

This course will introduce the principles of transdermal delivery, the technologies for enhancing drug penetration across the skin, the process regulations to the development of successful transdermal products. The course will also offer hands on experience in the preparation of transdermal patches the evaluation of the penetration of the patch product across the skin.

Lecture; 2 SH, 2.00 credits. Varies.

PSW 348

Advanced Pharmaceutical Compounding Implementation, Evaluation

This course teaches the student, many facets of the pharmaceutical compounding process, from initial assessment of the patient needs, through physical preparation of, billing of the final product. In the laboratory students will use specific equipment to aid in the preparation of various dosage forms, become proficient in the billing required record keeping of these preparations.

Lecture; 2 SH, 2.00 credits. Spring.

PSW 349

Health Program Planning, Implementation, Evaluation

This course focuses on the program planning model utilized to develop, implement, evaluate community health programs. Students will complete a needs assessment design a health intervention intended to meet the needs of a specific community population. Students will learn about program evaluation create an evaluation plan that could be used to assess the outcomes of the intervention.

Lecture; 2 SH, 2.00 credits. Spring.

PSW 350

Service Care in the Community

An introduction to the concepts practice of service, care, responsibility. Students perform community service meet in seminars to discuss the work they are doing, thus combining integrating service learning.

Lecture; 1 SH, 1.00 credits. Fall.

PSW 353

Drug Discovery & Translational Medicine

This course considers issues that impact drug discovery translational medicine. Translational medicine is the laboratory clinical research needed to advance a chemical or biological entity "from bench to bedside". Students are required to participate in classroom online discussions of readings that complement the lectures textbook assignments to complete in-class presentations written review assignments.

Prerequisites: PSW.300, PSW.301, PSW.313, PPW.379. Lecture; 2 SH, 2.00 credits. Varies.

PSW 355

Directed Study

Individual study directed by a faculty member in an area of her or his expertise. Faculty-assisted instruction using existing or previously known data information. Eligible students must have earned a cumulative minimum 2.7 grade point average have completed or be enrolled in all required courses consistent with their current academic standing.

Lecture; 2 SH, 2.00 credits. Spring, Summer.

PSW 364

Infectious Diseases: Bugs & Drugs

This course is designed to provide an overview of infectious diseases the concepts that are elementary to designing antibacterial pharmacotherapeutic plans. Emphasis is placed on infectious disease pathophysiology, epidemiology, bacterial susceptibility profiles, culture specimen collection techniques, antibacterial susceptibility testing, bacterial resistance.

Prerequisites: PSW.320, PSW.322, PSW.380, PSW.481. Lecture; 2 SH, 2.00 credits. Varies.

PSW 365L

ST: Medicinal Chemistry Research

Laboratory; 2 SH, 2.00 credits. Varies.

PSW 365M

ST: Virtual Experimental Pharmacology

Students will use computer software simulations to perform virtual classical in vivo in vitro pharmacology experiments. Students will observe the action of representative drugs at the organ system level or intact animal level. Students will learn perform graphical analysis of data to gain an in-depth appreciation of the dose-response relationship, drug-antagonist interactions, receptor subtypes.

Lecture; 2 SH, 2.00 credits. Varies.

PSW 365N**ST; Medical Cannabis**

This course will introduce doctor of pharmacy students to the medical uses of cannabis, commonly known as "medical marijuana", from a scientific perspective. Students will explore cannabis, cannabinoid, endocannabinoid: pharmacology fundamental science concepts, differences between cannabis cannabinoids, therapeutics, ethical, social, legal complexities.

Lecture; 2 SH, 2.00 credits. Varies.

PSW 368**Experimental Cancer Research**

Major differences between normal tumor tissues will be discussed. The lecture content will establish the intellectual framework necessary for understanding cancer research treatment. Students will be assigned literature-based topics that they will develop critically evaluate in stages.

Prerequisite: PSW.311. Lecture; 2 SH, 2.00 credits. Varies.

PSW 369**Pharmaceutical Nanotechnology**

The goal of this course is to introduce students to the science of pharmaceutical nanotechnology with an added emphasis on its clinical application. The course has three integrated aspects; in-class course experience in the (1) scientific basis (2) clinical application of nanotechnology/nanomedicine; (3) project-based theoretical approach to nanoparticle design/formulation.

Lecture; 2 SH, 2.00 credits. Varies.

PSW 371**Research Project**

Independent research directed by a faculty member in an area of her/his expertise. The student's work will generate new data or knowledge or apply significantly new methodologies to analyze previously published data.

Lecture; 2 SH, 2.00 credits. Varies.

PSW 385**Pharmacology, Toxicology, Medicinal Chemistry I**

A review of organic functional groups, stereochemistry, acid/base chemistry reaction mechanism, introduction to pharmacodynamics, drug discovery, the drug approval process, mechanism of drug action, drug receptor/enzyme interactions, drug metabolism, drug toxicity, drug safety evaluation risk assessment.

Prerequisites: PPW.331, PSW.301, PSW.312, PPW.378, PSW.313, PPW.379, PSW.325. Lecture; 3 SH, 3.00 credits. Summer.

PSW 413**Applied Clinical Pharmacokinetics**

This is an application course building on basic principles of Pharmacokinetics covered in the previous year. Dose adjustments required to assure safety efficacy for specific population subgroups will be covered. Furthermore, specific drugs spanning a cross-section of clinically monitored drug classes (i.e. commonly used low-therapeutic-index drugs) will be addressed.

Prerequisites: PPW.412, PPW.445, PPW.453, PSW.475, PSW.470. Corequisites: PPW.448, PPW.457, PSW.485, PSW.473. Lecture; 1 SH, 1.00 credits. Summer.

PSW 435**Physiology/Pathophysiology II Toxicology II**

This course is the third in a series focused on comparative study of organ system functions their relationship to the etiology, pathogenesis, clinical manifestation of human diseases. Students will learn endocrine system function dysfunction; control of vascular tone associated pathophysiology.

Prerequisites: PPW.348, PPW.384, PSW.335, PSW.385. Lecture; 1 SH, 1.00 credits. Fall.

PSW 445**Pharmacology, Medicinal Chemistry, Toxicology II**

This course is the second in the series of Pharmacology, Toxicology, Medicinal Chemistry, involves a coordinated approach for learning structure-activity relationships, mechanism of drug action, toxicity profiles, for selected classes of drugs for common disease states. Emphasis is on drugs affecting the cholinergic system, some endocrine disorders the renal system.

Prerequisites: PPW.348, PPW.384, PSW.335, PSW.385. Lecture; 2 SH, 2.00 credits. Fall.

PSW 470**Human Physiology/Pathophysiology III Pathophysiology**

This course is the fourth in a series focused on comparative study of organ system functions their relationship to the etiology, pathogenesis, clinical manifestation of human diseases. Students will learn functions associated pathophysiology in the following systems: A) cardiovascular: control of coronary circulation, cardiac contractility; B) respiratory; C) muscle D) somatosensory.

Prerequisite: PPW.440, PPW.450, PSW.445, PSW.435, PPW.460. Lecture; 2 SH, 2.00 credits. Spring.

PSW 473**Pharmacogenomics: An Introduction to Personalized Medicine**

This study of Pharmacogenomics builds on concepts introduced in courses encountered during earlier semesters, such as Pharmacology Pharmacotherapeutics. Students will examine the factors responsible for differing responses of individuals to specific drug therapy. This includes analyses of genomic polymorphisms their implications for pharmacotherapy. Students will be equipped to integrate these factors into the Pharmacists' Patient Care Process.

Prerequisites: PPW.440, PPW.450, PPW.460, PSW.435, PSW.445, PSW.475. Lecture; 2 SH, 2.00 credits. Summer.

PSW 475**Pharmacology, Medicinal Chemistry, Toxicology III**

This course involves a coordinated approach for learning structure activity relationships, mechanisms of drug action, toxicity profiles for common disease states. Emphasis is on drugs used in the treatment of diseases of the cardiovascular pulmonary systems, antimicrobial therapies, pain.

Prerequisites: PPW.460, PPW.440, PPW.450, PSW.445, PSW.435. Lecture; 7 SH, 7.00 credits. Spring.

PSW 485**Pharmacology, Toxicology, Medicinal Chemistry IV**

This course is the fourth in the series of Pharmacology, Toxicology, Medicinal Chemistry, involves a coordinated approach for learning structure-activity relationships, mechanism of drug action, toxicity profiles, for selected classes of drugs for common disease states. Emphasis is on drugs affecting the central nervous system, some neuro/psychiatric disorders oncology.

Prerequisites: PPW.460, PPW.440, PPW.450, PSW.445, PSW.435, PSW.475. Lecture; 3 SH, 3.00 credits. Summer.

PSW 730**Fundamentals Pharmacokinetics**

This course prepares students for clinical aspects of Personalized Medicine helps students to appreciate the impact of genomic related polymorphisms on drug therapy outcomes. Central foci are associations of polymorphisms with drug disposition property modifications. Quantitative qualitative aspects of drug absorption disposition are examined. Highlighted concepts include drug elimination, with reference to the kidneys liver.

Lecture; 3 SH, 3.00 credits. Fall.

PSW 735**Introduction to Genomics Proteomics Bioinformatics**

This course provides foundations for clinical coursework relevant to personalized medicine. Introductory concepts in the study of genomes proteomes are addressed, including those associated with human genomics, proteomics, metabolomics, epigenetics metagenomics. Based on these, polymorphisms their associated impact on pharmacotherapy are explored later in the curriculum. Computational approaches databases utilizing genomics proteomics data are introduced.

Lecture; 3 SH, 3.00 credits. Fall.

Physical Therapy (PTH)

PTH 501**PT as a Profession**

Students learn the history of the profession, scope of practice, how to apply the core values of the APTA to professional practice expectations. They will attain an understanding of the role of the physical therapist in primary, secondary, tertiary care prevention. This course will include ethics professionalism, communication, cultural competence, the role of the physical therapist as an educator.

Lecture; 2 SH, 2.00 credits. Fall.

PTH 510**Foundations of PT Management I**

This course is designed to provide a basic practical understanding of patient management skills used in physical therapy practice, including infection control, the use of a medical record documentation, oral written communication,

vital signs, body mechanics, transfer techniques, range-of-motion exercises, guarding techniques for patient ambulation, the measurement of assistive devices.

Lecture; 3 SH, 3.00 credits. Fall.

PTH 510L

Foundations of Pt Management I Lab

This course is designed to provide a basic practical understanding of patient management skills used in physical therapy practice, including infection control, the use of a medical record documentation, oral written communication, vital signs, body mechanics, transfer techniques, range-of-motion exercises, guarding techniques for patient ambulation, the measurement of assistive devices.

Laboratory. Fall.

PTH 515

Foundations of Pt Management II

Topics include the anatomical physiological responses to physical agent modalities including the appropriate selection application of these modalities to meet specific patient needs. Students will become competent in the selection, application, proper documentation of commonly used electrotherapeutic modalities, as well as thermal mechanical agents. Theories underlying these patient interventions are explored in detail. An additional focus of this course is the integration of these modalities into the overall physical therapy plan of care. Prerequisite: Successful completion of DPT Year I Fall semester.

Prerequisites: PTH.501, PTH.510, PTH.520, PTH.530, PTH.552, PTH.570. Lecture; 3 SH, 3.00 credits. Spring.

PTH 515L

Foundations of Pt Management II Lab

Corequisite: PTH.515. Laboratory. Fall.

PTH 520

Clinical Medicine & Pathology I

Students will acquire foundational knowledge of the pathological processes of major body systems, including immune, hematological, hemodynamic, cardiovascular, cardiopulmonary, integumentary, gastrointestinal, genitourinary, hepatobiliary, renal, genitourinary, endocrine, lymphatic. General medicine, laboratory medicine, pathophysiology as related to patient conditions that impact physical therapy management will be addressed.

Lecture; 3 SH, 3.00 credits. Fall.

PTH 525

Clinical Medicine & Pathology II

Students will learn foundational knowledge of pathological processes of major body systems. General medicine, laboratory medicine pathophysiology as related to patient conditions that impact physical therapy management will be addressed. This second course will focus the Musculoskeletal diagnoses.

Prerequisites: PTH.501, PTH.510, PTH.520, PTH.530, PTH.552, PTH.570. Lecture; 2 SH, 2.00 credits. Spring.

PTH 530

Clinical Human Anatomy

Students will learn normal anatomy, function, pathology with emphasis on the skeletal, articular, muscular systems. Students will use a regional approach to study surface anatomy, range of motion, clinical palpation. In the laboratory experience, students will study human anatomy preparations anatomy models.

Lecture; 6 SH, 6.00 credits. Fall.

PTH 530L

Clinical Human Anatomy I Lab

Students will learn normal anatomy, function, pathology with emphasis on the skeletal, articular, muscular systems. In this first course, students will focus on lower body anatomy. Students will use a regional approach to study surface anatomy, range of motion, clinical palpation. In the laboratory experience, students will study human anatomy preparations anatomy models.

Laboratory. Fall.

PTH 535L

Clinical Human Anatomy II Lab

Students will learn normal anatomy, function, pathology with emphasis on the skeletal, articular, muscular systems. In this second course, students will focus on upper body anatomy. Students will use a regional approach to study surface anatomy, joint range of motion, clinical palpation. In the laboratory experience, students will study human anatomy preparations anatomy models.

Corequisite: PTH.535. Laboratory. Fall.

PTH 540

Evidence for PT Practice I

Students are introduced to the foundation of scientific inquiry in physical therapy including library search methods, establishment of research questions, research methods, research ethics, AMA format. Prerequisite: DPT student
Prerequisites: PTH.501, PTH.510, PTH.520, PTH.530, PTH.552, PTH.570. Lecture; 2 SH, 2.00 credits. Fall.

PTH 545

Evidence for PT Practice II

Students are introduced to the concepts of scientific inquiry as related to clinical practice clinical outcomes. Students use current PT literature to explore the use of best research evidence outcomes measurement applying critical appraisal techniques. Prerequisite: Successful completion of DPT Year I Fall semester.

Prerequisites: PTH.515, PTH.525, PTH.585, PTH.540, PTH.558, PTH.560, PTH.575. Lecture; 2 SH, 2.00 credits. Spring.

PTH 552

PT in the Acute Care Environment

This course is designed to prepare physical therapy students to safely manage patients in acute critical care settings. The course will focus on integrative analysis of multiple disease processes (spanning all practice patterns: musculoskeletal, neuromuscular, cardiovascular, pulmonary, integumentary) their respective medical surgical management that is relevant to physical therapy management.

Lecture; 2 SH, 2.00 credits. Fall.

PTH 552L

Pt in Acute Care Env. Lab

This course is designed to prepare physical therapy students to safely manage patients in acute critical care settings. The course will focus on integrative analysis of multiple disease processes (spanning all practice patterns: musculoskeletal, neuromuscular, cardiovascular, pulmonary, integumentary) their respective medical surgical management that is relevant to physical therapy management.

Laboratory. Fall.

PTH 554

Lifespan Motor Control

The course will examine neural, behavioral, physical mechanisms that contribute to the control of movement in humans (motor control) over the lifespan. The focus will be on motor control in healthy persons across the lifespan. The course also will examine factors that influence the learning of new motor skills (motor learning) as a result of practice and/or experience.

Prerequisites: PTH.515, PTH.525, PTH.585, PTH.540, PTH.560, PTH.558, PTH.575. Lecture; 3 SH, 3.00 credits. Summer.

PTH 556

Human Gait

This course will cover the examination, evaluation, beginning treatment interventions for human gait balance. The focus will be on gait analysis will include standardized measures. Students will explore control mechanisms, including pattern generators, motor sensory mechanisms, cognitive systems, nonneural contributions to locomotion. Task-oriented mobility interventions such as body weight support treadmill training will be introduced. In the lab portion of this course, students learn the skills of gait analysis using visual, mechanical, technology assisted methodologies.

Prerequisites: PTH.515, PTH.525, PTH.585, PTH.540, PTH.560, PTH.558, PTH.575. Lecture; 2 SH, 2.00 credits. Summer.

PTH 556L

Human Gait Lab

This course will cover the examination, evaluation, beginning treatment interventions for human gait balance. The focus will be on gait analysis will include standardized measures. Students will explore control mechanisms, including pattern generators, motor sensory mechanisms, cognitive systems, nonneural contributions to locomotion. Task-oriented mobility interventions such as body weight support treadmill training will be introduced. In the lab portion of this course, students learn the skills of gait analysis using visual, mechanical, technology assisted methodologies.

Prerequisites: PTH.515, PTH.525, PTH.585, PTH.540, PTH.560, PTH.558, PTH.575. Laboratory. Summer.

PTH 558

Clinical Kinesiology

This course is designed to study normal movement through the analysis of muscle joint function. Emphasis will be placed on the analysis of major joints regions of the body. The laboratory portion of this course is designed to provide the student with the clinical skills of goniometry manual muscle testing to assess joint mobility muscle performance.
Prerequisites: PTH.501, PTH.510, PTH.520, PTH.530, PTH.552, PTH.570. Lecture; 3 SH, 3.00 credits. Summer.

PTH 558L

Clinical Kinesiology Lab

This course is designed to study normal movement through the analysis of muscle joint function. Emphasis will be placed on the analysis of major joints regions of the body. The laboratory portion of this course is designed to provide the student with the clinical skills of goniometry manual muscle testing to assess joint mobility muscle performance.
Lecture. Varies.

PTH 560

Standardized Measurement in Pt Practice

Students will learn information about measurement in physical therapy. Topics to be covered include measurement levels, reliability, validity, sensitivity specificity of standardized measurements in physical therapy. Specific measurement tools at different levels of the International Classification of Functioning, Disability Health (ICF) will be covered.

Prerequisites: PTH.501, PTH.510, PTH.520, PTH.530, PTH.552, PTH.570. Lecture; 2 SH, 2.00 credits. Spring.

PTH 560L

Standardized Measurement in Pt Practice

Students will learn information about measurement in physical therapy. Topics to be covered include measurement levels, reliability, validity, sensitivity specificity of standardized measurements in physical therapy. Specific measurement tools at different levels of the ICF will be covered across the four practice patterns. Prerequisite: Successful completion of DPT Year I Fall semester.

Corequisite: PTH.560. Laboratory. Spring.

PTH 565

Cardiopulmonary Patient Management

This course covers physical therapy management of patients needing cardiovascular pulmonary care. The laboratory component presents examination skills clinical applications of physical therapy intervention. The lecture part of the course includes the etiology, pathology, prognosis of common cardiopulmonary conditions. Medical, surgical, physical therapy management for these conditions will be addressed in both lecture laboratory sessions.

Prerequisites: PTH.515, PTH.525, PTH.585, PTH.540, PTH.560, PTH.558, PTH.575. Lecture; 3 SH, 3.00 credits. Summer.

PTH 565L

Cardiopulmonary Patient Management

This course covers physical therapy management of patients needing cardiovascular pulmonary care. The laboratory component presents examination skills clinical applications of physical therapy intervention. The lecture part of the course includes the etiology, pathology, prognosis of common cardiopulmonary conditions. Medical, surgical, physical therapy management for these conditions will be addressed in both lecture laboratory sessions.

Lecture. Varies.

PTH 570

Integrated Clinical Education I

This first course provides students with opportunities to synthesize integrate content from concurrent courses to patient encounters in clinical settings. The focus of this course will be professional communication behavior, the application of clinical skills learned in concurrent courses. This is accomplished through seminars, reflection, service learning, learning activities, case studies, observation.

Lecture; 2 SH, 2.00 credits. Fall.

PTH 575

Integrated Clinical Education II

This second course provides students with opportunities to synthesize integrate content from concurrent previous courses to patient encounters in clinical settings. The focus of this course will be professional communication behavior, the application of clinical skills learned in concurrent previous courses. This is accomplished through seminars, reflection, service learning, learning activities, case studies observation

Prerequisites: PTH.501, PTH.510, PTH.520, PTH.530, PTH.552, PTH.570. Lecture; 2 SH, 2.00 credits. Spring.

PTH 580

Professional Issues in PT Practice I

Students will learn about the roles responsibilities of a physical therapist within the healthcare system. Methods of healthcare delivery issues of access, availability, financial coverage will be examined.

Prerequisites: PTH.515, PTH.525, PTH.585, PTH.540, PTH.560, PTH.558, PTH.575. Lecture; 1 SH, 1.00 credits. Summer.

PTH 585

Neuroscience

Students learn basic neuroanatomy neurophysiology with an emphasis on issues that have clinical relevance to physical therapy rehabilitation. Emphasis will be placed on developing an understanding of the neural control of the human body. Pathological processes of the neurological system will be covered as related to patient conditions that impact physical therapy.

Prerequisites: PTH.501, PTH.510, PTH.520, PTH.530, PTH.552, PTH.570. Lecture; 4 SH, 4.00 credits. Fall.

PTH 585L

Neuroscience Lab

Students learn basic neuroanatomy neurophysiology with an emphasis on issues that have clinical relevance to physical therapy rehabilitation. Emphasis will be placed on developing an understanding of human performance motor control.

Corequisite: PTH.585. Laboratory. Varies.

PTH 590

Therapeutic Exercise

Students will focus on the role of therapeutic exercise as an intervention utilized by physical therapists. Students will become skilled in exercise prescription execution of exercise to address impairments, functional limitations participation restrictions seen across the lifespan. The role of exercise as a tool in prevention programs is explored.

Prerequisites: PTH.515, PTH.525, PTH.540, PTH.558, PTH.560, PTH.575, PTH.585. Lecture; 2 SH, 2.00 credits. Summer.

PTH 601

Clinical Imaging

This course will introduce students to diagnostic imaging principles techniques as applied to physical therapy assessment management. The course will emphasize radiographic anatomy, common normal variants, pathological traumatic conditions. In addition to standard radiographic techniques, other imaging techniques, such as CT scan, nuclear medicine, angiography, magnetic resonance imaging, ultrasound imaging, will be addressed.

Prerequisites: PTH.545, PTH.554, PTH.556, PTH.565, PTH.580, PTH.590. Lecture; 2 SH, 2.00 credits. Fall.

PTH 610

Musculoskeletal Patient Management I

Students learn the theoretical basis clinical application of examination, assessment, diagnosis, prognosis, intervention for musculoskeletal conditions that are commonly encountered by physical therapists, with application to the lumbo-sacral spine lower extremity. In the lab portion of this course, students develop decision-making reasoning processes that enhance their examination skills, differential diagnosis, clinical application of interventions.

Prerequisites: PTH.545, PTH.554, PTH.556, PTH.565, PTH.580, PTH.590. Lecture; 3 SH, 3.00 credits. Fall.

PTH 610L

Musculoskeletal Patient Management I

Students learn the etiology pathology of common orthopedic disorders of the lower extremities. Medical, surgical, physical therapy management will be discussed. Students learn the theoretical basis clinical application of examination, assessment, diagnosis, prognosis, intervention for conditions that are commonly encountered by physical therapists. In the lab portion of this course, students learn examination skills, differential diagnosis, clinical application of intervention approaches for selected musculoskeletal conditions.

Prerequisites: PTH.554, PTH.556, PTH.558, PTH.565, PTH.580. Lecture. Fall.

PTH 615

Musculoskeletal Patient Management II

Students learn the theoretical basis clinical application of examination, assessment, diagnosis, prognosis, intervention for musculoskeletal conditions that are commonly encountered by physical therapists, with application to the cervico-thoracic spine upper extremity. In the lab portion of this course, students develop decision-making reasoning processes that enhance their examination skills, differential diagnosis, clinical application of interventions.

Prerequisites: PTH.601, PTH.610, PTH.640, PTH.653, PTH.630, PTH.654, PTH.670. Lecture; 3 SH, 3.00 credits. Spring.

PTH 615L

Students learn the theoretical basis clinical application of examination intervention for orthopedic dysfunction of the extremities for conditions that are commonly encountered by physical therapists. In the lab portion of this course, students are exposed to the philosophies of various noted practitioners in the field of orthopedic physical therapy. Prerequisite: Successful completion DPT Year 2, Fall Semester.

Prerequisites: PTH.601, PTH.610, PTH.640, PTH.590, PTH.585, PTH.654, PTH.670. Laboratory. Spring.

PTH 620**Musculoskeletal Patient Management III**

Students learn practice selected advanced interventions applied in physical therapy practice to the spine periphery, advancing their decision-making skills in the creation modification of a plan of care. Thrust manipulations, manual therapy techniques, neural mobilization, functional exercise interventions are included.

Prerequisites: PTH.615, PTH.635, PTH.645, PTH.656, PTH.658, PTH.660, PTH.675. Lecture; 3 SH, 3.00 credits. Summer.

PTH 620L**Musculoskeletal Patient Management III Lab**

Students will learn apply different theories of patient examination physical therapy intervention for all regions of the spine, pelvis, temporomandibular joint. Patient management using Cyriax, Maitland, Mulligan, McKenzie will be discussed demonstrated. Neural mobilization techniques will also be included with an emphasis on individual nerve testing, self-mobilization practices, functional exercise interventions.

Prerequisites: PTH.615, PTH.630, PTH.645, PTH.656, PTH.658, PTH.660, PTH.675. Laboratory. Summer.

PTH 630**Neuromuscular Patient Management I**

This course focuses on the neurological physical therapy examination evaluation. Concepts include examination skills for neurological conditions, clinical decision making, overview of neurological rehabilitation, components of the neurological examination process, vestibular examination, an introduction into neurological interventions for patients with neurological deficits. Concepts related to the environmental considerations, neuroplasticity, motor control will be covered.

Prerequisites: PTH.515, PTH.525, PTH.585, PTH.540, PTH.558, PTH.560, PTH.575. Lecture; 3 SH, 3.00 credits. Spring.

PTH 630L**Neuromuscular Patient Management I Lab**

This course covers the foundations of the physical therapy examination, evaluation an introduction to interventions with patients with neurological deficits. The laboratory component presents examination skills clinical applications of integrated intervention approaches. The lecture part of the course includes the etiology, pathology physical therapy management of adult non-progressive disorders that affect the CNS. Prerequisite: Successful completion of DPT Year 2 Fall Semester

Prerequisites: PTH.545, PTH.554, PTH.556, PTH.565, PTH.580, PTH.590. Laboratory. Spring.

PTH 635**Neuromuscular Patient Management II**

This course focuses on the physical therapy management of adult neurological disorders. Progressive disorders non-progressive disorders of the spinal cord nervous system will be covered. This course builds upon skills learned in Neuromuscular Patient Management I focuses on application critical analysis of evidence-based treatment approaches as well as clinical application of different intervention approaches.

Prerequisites: PTH.653. PTH.601, PTH.610, PTH.630, PTH.640, PTH.654, PTH.670. Lecture; 3 SH, 3.00 credits. Spring.

PTH 635L**Neuromuscular Patient Management II Lab**

This course builds upon skills learned in Neuromuscular Patient Management I focuses on the application critical analysis of evidenced-based treatment approaches. The lecture part of the course includes the etiology, pathology, physical therapy management of adult progressive disorders that affect the central nervous system as well as nonprogressive disorders of the spinal cord peripheral nervous system.

Corequisite: PTH.635. Laboratory. Summer.

PTH 640**Evidence for PT Practice III**

In small groups, students develop work on a concentrated project of community interest and/or relevance related to the field of physical therapy. Ongoing work includes detailed literature searching continued critical appraisal of related literature, with the development of a research proposal related to the concentrated project. In-class, independent group work off-campus work may be necessary.

Prerequisites: PTH.545, PTH.554, PTH.556, PTH.565, PTH.580, PTH.590. Lecture; 2 SH, 2.00 credits. Fall.

PTH 645

Evidence for PT Practice IV

In small groups, students utilize a patient case to create a comprehensive case report that is presented at the close of the semester. Additionally, students continue utilizing evidence based practice skills in relation to didactic content, as well as continued work on the project started in PTH 640. In-class, independent group work off-campus work may be necessary.

Prerequisites: PTH.653, PTH.601, PTH.610, PTH.630, PTH.640, PTH.654, PTH.670. Lecture; 2 SH, 2.00 credits. Spring.

PTH 650L

Therapeutic Exercise Lab

Students will focus on the role of therapeutic exercise as an intervention utilized by physical therapists. Students will become skilled in exercise prescription execution of exercise to address impairments, functional limitations participation restrictions seen across the lifespan. The role of exercise as a tool in prevention programs is explored as well.

Corequisite: PTH.590. Lecture. Fall.

PTH 651

Special Topics in Therapeutic Exercise

Students will focus on the role of therapeutic exercise as an intervention utilized by physical therapists. In this course, interventions which are advanced, specialized, and/or complementary will be the focus. The concepts of exercise progression regression are expanded. Recommendations for complementary therapies adjunctive to physical therapy will be explored, as will the examination of evidence supporting their use.

Prerequisites: PTH.615, PTH.635, PTH.656, PTH.658, PTH.645, PTH.660, PTH.675. Lecture; 1 SH, 1.00 credits. Summer.

PTH 653

Pharmacology

Students will learn an introduction to the basic principles of pharmacology including pharmacokinetics pharmacodynamics. The pharmacology of drug classes used in the management of disorders of the nervous, musculoskeletal, cardiovascular, respiratory, pain, integumentary, endocrine system, as well as, infectious neoplastic diseases will be addressed. Emphasis will be placed on how pharmacology interacts with physical rehabilitation. Prerequisite: Successful completion DPT Year 1, Fall Semester.

Prerequisites: PTH.545, PTH.554, PTH.556, PTH.565, PTH.580, PTH.590. Lecture; 3 SH, 3.00 credits. Fall.

PTH 654

Orthotics Prosthetics

This course includes the theory current clinical practices related to upper lower extremity prostheses along with the ability to evaluate recommend the use of orthotic devices for upper lower extremities as well as the spine. Examination implementation of physical therapy interventions in the management of this patient population will also be covered.

Prerequisites: PTH.545, PTH.554, PTH.556, PTH.565, PTH.580, PTH.590. Lecture; 3 SH, 3.00 credits. Fall.

PTH 654L

Orthotics Prosthetics Lab

This course includes the theory current clinical practices related to upper lower extremity prostheses along with the ability to evaluate recommend the use of orthotic devices for upper lower extremities as well as the spine. Examination implementation of physical therapy interventions in the management of this patient population will also be covered.

Prerequisites: PTH.554, PTH.556, PTH.558, PTH.565, PTH.580. Laborator. Fall.

PTH 656

PT Management of the Geriatric Patient

This course provides a survey of geriatric concerns relating to each of the body systems. The changes normally expected with aging are contrasted with pathological changes. Emphasis of this course will be on screening, examination, evaluation intervention when working with the older adult. Nutrition, pharmacology health promotion wellness will also be addressed. Prerequisite: Successful completion DPT Year 2, Fall Semester.

Prerequisite: PTH.653, PTH.601, PTH.610, PTH.630, PTH.640, PTH.654, PTH.670. Lecture; 3 SH, 3.00 credits. Spring.

PTH 658**PT Management of the Pediatric Patient**

This course provides a survey of pediatric concerns relating to each of the body systems the corresponding physical therapy management of the child from the newborn period through adolescence. Emphasis is on development including motor patterns, sensory integration, oral-motor skills; setting-specific considerations; health promotion wellness for children with without disabilities; family-therapist collaboration communication. Prerequisite: Successful completion of the DPT Year 2 Fall semester.

Prerequisites: PTH.653, PTH.601, PTH.610, PTH.630, PTH.640, PTH.654, PTH.670. Lecture; 3 SH, 3.00 credits. Spring.

PTH 660**Professional Issues in PT Practice II**

Physical therapy students continue to examine issues related to the role responsibilities of the physical therapist in professional practice. Effective communication, cultural competency, ethical moral decision-making, leadership, delegation, supervision, other professional issues are covered. The guiding documents of the APTA are used as tools for this course.

Prerequisites: PTH.653, PTH.601, PTH.610, PTH.630, PTH.640, PTH.654, PTH.670. Lecture; 2 SH, 2.00 credits. Spring.

PTH 665**Professional Issues in PT Practice III**

Students will learn the basic concepts principles of management as they apply to the administration direction of physical therapy services. Included are development planning design, fiscal management, principles of supervision, legal issues, quality assurance telehealth.

Prerequisites: PTH.615, PTH.635, PTH.645, PTH.656, PTH.658, PTH.660, PTH.675. Lecture; 2 SH, 2.00 credits. Summer.

PTH 670**Integrated Clinical Education III**

This third course provides students with opportunities to synthesize integrate content from concurrent previous courses apply it to patient encounters in clinical settings. The focus of this course will be professional communication behavior as well as the application of clinical skills learned in concurrent previous courses. This is accomplished through seminars, reflection, learning activities, case studies, observation.

Prerequisites: PTH.545, PTH.554, PTH.556, PTH.565, PTH.580, PTH.590. Lecture; 2 SH, 2.00 credits. Fall.

PTH 675**Integrated Clinical Education IV**

This fourth course provides students with opportunities to synthesize integrate content from concurrent previous courses to patient encounters in clinical settings. The focus of this course will be professional communication behavior, the application of clinical skills learned in concurrent previous courses. This is accomplished through seminars, reflection, learning activities, case studies observation.

Prerequisites: PTH.653, PTH.601, PTH.610, PTH.630, PTH.640, PTH.654, PTH.670. Lecture; 2 SH, 2.00 credits. Spring.

PTH 680**Integrated Clinical Education V**

This fifth course provides students with opportunities to synthesize integrate content from concurrent previous courses apply it to patient encounters in clinical settings. The focus of this course will be professional communication behavior as well as the application of clinical skills learned in concurrent previous courses. This is accomplished through seminars, reflection, learning activities, case studies, observation.

Prerequisite: PTH.615, PTH.635, PTH.645, PTH.656, PTH.658, PTH.660, PTH.675. Lecture; 2 SH, 2.00 credits. Summer.

PTH 680L**Integrated Clinical Ed. V Lab**

This fifth course provides students with opportunities to synthesize integrate content from concurrent previous courses apply it to patient encounters in clinical settings. The focus of this course will be professional communication behavior as well as the application of clinical skills learned in concurrent previous courses. This is accomplished through seminars, reflection, learning activities, case studies, observation.

Prerequisite: PTH.615, PTH.630, PTH.645, PTH.656, PTH.658, PTH.660, PTH.675. Corequisite: PTH.680. Laboratory. Summer.

PTH 685**Directed Study for Physical Therapy**

This course is organized as an individual study directed by a faculty member from the School of Physical Therapy. Student learning involves self-instruction and/or faculty-assisted instruction using existing or previously known knowledge.

Lecture; 1-3 SH, 1.00-3.00 credits. Summer.

PTH 690**Occupational Health**

Students will explore topics related to ergonomics including worksite task analysis develop solutions for the prevention of workplace injury. Healthcare, patient safety, worksite ergonomics will be addressed, focusing on identifying risk factors, generating solutions opportunities for improvements. Students will practice ergonomic assessment, develop teach intervention strategies for musculoskeletal disorder (MSD) prevention postural health.

Prerequisites: PTH.615, PTH.635, PTH.645, PTH.656, PTH.658, PTH.660, PTH.675. Lecture; 1 SH, 1.00 credits. Summer.

PTH 740**Health Promotion Wellness: Population Health**

Physical therapists are well positioned to meet societal needs reduce the global burden of noncommunicable diseases through the integration of evidence-based population health, prevention, health promotion, wellness (PHPW) activities into practice. This course prepares students to meet consensus-based competencies in PHPW.

Prerequisites: PTHC.700, PTHC.710. Corequisite: PTHC.720. Lecture; 1 SH, 1.00 credits. Spring.

PTH 761**Exercise for Select Populations**

In this elective course, students will be introduced to the clinical applications, physiological effects/benefits, potential contraindications to Amplitude-oriented exercise techniques for patients with Parkinson's disease through advance readings, lecture, laboratory practice.

Prerequisites: PTH.620, PTH.665, PTH.651, PTH.690, PTH.680. Lecture; 1 SH, 1.00 credits. Varies.

PTH 771**Strength Conditioning in Rehabilitation**

In this elective course, students will learn principles of strength conditioning how to apply them to the physical therapy setting. Using hands-on practice in a lab based setting, students will implement new approaches to progress regress exercises, techniques for effective coaching, strength conditioning programming.

Prerequisites: PTH.620, PTH.665, PTH.651, PTH.690, PTH.680. Lecture; 1 SH, 1.00 credits. Varies.

PTH 810**Evidence for PT Practice V**

In small groups, students conclude the concentrated project of community interest and/or relevance related to the field of physical therapy that was begun in PTH 640. Student groups will organize, analyze present findings from the project. Presentation of the findings is done in poster podium presentations to faculty, peers clinicians.

Prerequisites: PTHC.700, PTHC.710. Lecture; 1 SH, 1.00 credits. Spring.

PTH 830**Professional Issues in PT Practice IV**

Students will prepare for entry to professional work in physical therapy by developing job search strategies identifying post-graduation career opportunities including clinical education instruction. Students will develop two key plans for success: a study plan for licensure preparation a career plan for lifelong learning.

Prerequisites: PTHC.700, PTHC.710. Lecture; 2 SH, 2.00 credits. Spring.

PTHC 700**Clinical Education Experience I**

This course is the first 10-week full-time clinical education experience, conducted in a variety of clinical settings. Students will be provided with opportunities to apply skills previously learned in the DPT curriculum. Students will work under the supervision guidance of a licensed physical therapist to develop competency in the management of patients with a variety of diagnoses.

Prerequisites: PTH.620, PTH.665, PTH.651, PTH.690, PTH.680. Lecture; 8 SH, 8.00 credits. Fall.

PTHC 710**Clinical Education Experience II**

This course is the second 10-week full-time clinical education experience, conducted in a variety of clinical settings. Students will be provided with opportunities to apply skills previously learned in the DPT curriculum. Students will work under the supervision guidance of a licensed physical therapist to develop competency in the management of patients with a variety of diagnoses.

Prerequisite: PTHC.700. Lecture; 8 SH, 8.00 credits. Fall.

PTHC 720

Clinical Education Experience III

This course is the third 10-week full-time clinical education experience, conducted in a variety of clinical settings. Students will be provided with opportunities to apply skills previously learned in the DPT curriculum. Students will work under the supervision guidance of a licensed physical therapist to develop competency in the management of patients with a variety of diagnoses.

Prerequisites: PTHC.700, PTHC.710. Lecture; 8 SH, 8.00 credits. Spring.

Radiography (RAD)

RAD 201C

Radiography Internship I

The Clinical Internship rotation is designed to allow the student hands on training in their desired field of radiography. The student will work one on one with the clinical instructor or, technologist with direct or indirect instruction in the affiliate hospital performing diagnostic images. RAD 201C 15 week rotation. RAD 202C 10 week rotation. Progression contingent upon successful completion of previous rotation. (Locations pending approval.)

Prerequisites: RAD.210, RAD.210L, RAD.220, RAD.220L. Lecture; 4 SH, 4.00 credits. Varies.

RAD 202C

Radiography Internship II

The Clinical Internship rotation is designed to allow the student hands on training in their desired field of radiography. The student will work one on one with the clinical instructor or, technologist with direct or indirect instruction in the affiliate hospital performing diagnostic images. RAD 201C 15 week rotation. RAD 202C 10 week rotation. Progression contingent upon successful completion of previous rotation. (Locations pending approval.)

Prerequisites: RAD.201C, RAD.211, RAD.211L, RAD.221. Lecture; 5 SH, 5.00 credits. Varies.

RAD 205

Foundations of Radiography

This course introduces radiography students to the use of ionizing radiation in healthcare. Topics include the principles of radiation safety, radiologic credentialing professional organizations, customer service, an overview of the history of radiology in medicine

Lecture; 3 SH, 3.00 credits. Summer.

RAD 210

Radiographic Procedures I

This course is the first course in a three part series of radiography procedural courses. The series of courses cover the procedures outlined in the ARRT content specifications. All procedure courses include instruction in positioning terminology, anatomy, procedural adaptation, image evaluation utilized during radiographic procedures. Simulated exams are performed within the laboratory.

Prerequisites: RAD.205, RAD.240, RSC.110, RSC.250, RSC.325. Lecture; 3 SH, 3.00 credits. Fall.

RAD 210L

Radio Procedures I Lab

This course includes instruction in positioning terminology, anatomy, image evaluation utilized during radiographic procedures. Simulated exams are performed within the laboratory.

Prerequisite: RAD.205, RAD.240, RSC.110, RSC.250, RSC.325. Laboratory; 1 SH, 1.00 credits. Fall.

RAD 211

Radiographic Procedures II

This course is the second course in a three part series of radiography procedural courses. The series of courses cover the procedures outlined in the ARRT content specifications. All procedure courses include instruction in positioning terminology, anatomy, procedural adaptation, image evaluation utilized during radiographic procedures. Simulated exams are performed within the laboratory.

Prerequisites: RAD.210, RAD.210L, RAD.220, RAD.220L. Lecture; 3 SH, 3.00 credits. Spring.

RAD 211L

Radio Procedures II Lab

This course includes instruction in positioning terminology, anatomy, image evaluation utilized during radiographic procedures. Simulated exams are performed within the laboratory.

Prerequisites: RAD.210, RAD.210L, RAD.220, RAD.220L. Laboratory; 1 SH, 1.00 credits. Spring.

RAD 212

Radiographic Procedures III

This course is the third course in a three part series of radiography procedural courses. The series of courses cover the procedures outlined in the ARRT content specifications. All procedure courses include instruction in positioning terminology, anatomy, procedural adaptation, image evaluation utilized during radiographic procedures. Simulated exams are performed within the laboratory.

Prerequisites: RAD.202C, RAD.250. Lecture; 3 SH, 3.00 credits. Fall.

RAD 212O

Radiographic Procedures III

This course is a continuation of Radiographic Procedures II. Students will be able to evaluate perform advanced imaging procedures that involve the delivery of contrast material in the clinical setting.

Prerequisites: RAD.210, RAD.211, RAD.221, BIO.110, BIO.210. Lecture; 2 SH, 2.00 credits. Fall.

RAD 220

Radiographic Exposure Principles I

This course explains discusses X-ray production emission, X-ray-matter interactions, image receptors, exposure factors, processing, other factors related to image production as well as principles of radiation protection.

Prerequisites: RAD.205, RAD.240, RSC.110, RSC.250, RSC.325. Lecture; 4 SH, 4.00 credits. Fall.

RAD 220L

Radio Exposure I Lab

This course explains discusses X-ray production emission, X-ray-matter interactions, image receptors, exposure factors, processing, other factors related to image production as well as principles of radiation protection.

Corequisite: RAD.220. Laboratory. Fall.

RAD 221

Radiographic Exposure Principles II

Continuation of Radiographic Exposure Principles I, with a focus on image quality evaluation. The design utilization of a quality assurance program to achieve optimal image quality with minimal radiation dose is discussed.

Prerequisites: RAD.220, RAD.220L, RAD.210. Lecture; 3 SH, 3.00 credits. Spring.

RAD 240

X-ray Radiation Physics

The fundamental processes governing the production, transmission, interactions of x-rays for the purpose of medical radiography will be presented. Topics will include not only the basic physical principles of ionizing radiation but also the technologies that have been developed to use x-rays for producing diagnostically useful radiographs (high-voltage x-ray circuitry, rectification, thermionic diodes filtration materials).

Prerequisites: PHY.181, MAT.141, (MAT.150 or MAT.152). Lecture; 2 SH, 2.00 credits. Summer.

RAD 250

Image Critique in Radiography

Students will enhance critical thinking problem solving skills in the radiologic sciences through group focused assessment evaluation of diagnostically acceptable radiographic images. Facilitators will guide students through reflective image analysis of selected case studies using an interactive seminar format that reinforces imaging science principles theories introduced throughout the curriculum. The synthesis approach to analytical critique of image quality integrates concepts previously explored in didactic courses clinical rotations.

Prerequisites: RAD.201C, RAD.211 RAD.211L. Lecture; 2 SH, 2.00 credits. Summer.

RAD 270

Introduction to Problem Solving in Radiography

This course is designed to assist the student in learning to integrate synthesise material presented over the program's curriculum in order to prepare for the certification exam in Radiography. Content will be reviewed through peer tutoring sessions, case studies, online testing presentations.

Prerequisites: RAD.202C RAD.250. Lecture; 2 SH, 2.00 credits. Fall.

RAD 303C

Radiography Internship III

Clinical internship in radiography. The student observes performs diagnostic imaging procedures under direct indirect supervision while completing required competency evaluations.

Prerequisites: RAD.202C, RAD.250. Lecture; 6 SH, 6.00 credits. Fall.

RAD 304C

Radiography Internship IV

This is a continuation of the internship sequence. Students perform radiographic procedures under direct indirect supervision of a qualified radiographer successfully complete the required competency evaluations. Progression is contingent upon successful completion of previous rotations.

Prerequisites: RAD.212, RAD.270, RSC.320, RAD.303C. Lecture; 6 SH, 6.00 credits. Spring.

RAD 370

Problem Solving in Radiography

Offered in the final semester of the radiography program to integrate synthesize the full content of the program into a coherent whole. Using a combination of online classroom activities discussions, including problem solving self assessment techniques, students coalesce their knowledge base improve their clinical decision making skills.

Prerequisites: RAD.211, RAD.221, RAD.240, RAD.250, RAD.270. Lecture; 3 SH, 3.00 credits. Spring.

Respiratory Therapy (RES)

RES 420

Protocols, Guidelines, Policies In Respiratory Therapy

Students will apply current best practice into building administering guidelines, protocols as a solid foundation for the bedside clinician. Students will also be able to develop policies to measure outcomes reinforce best practice.

Lecture; 3 SH, 3.00 credits. Spring.

RES 440

Advanced Cardiopulmonary Physiology For the Respiratory Therapist

Covers advanced in-depth integrated physiology of the cardiovascular, renal, pulmonary systems. Discusses the physiological dynamics, control mechanisms, system interrelationships of the cardiovascular, pulmonary, renal systems. Offers students an opportunity to make applications of advanced cardiopulmonary renal physiology concepts to the management of neonatal, pediatric, adult, geriatric patients requiring cardiovascular, pulmonary, renal diagnosis treatment.

Lecture; 3 SH, 3.00 credits. Fall.

RES 450

Teaching in the Clinical Setting Simulation

This course provides an overview of the clinical setting simulation labs as a teaching environment the roles/responsibilities of the clinical instructor/preceptor/mentor. Focus is on learning theory best practices in designing an environment processes for developing clinical competence. Students examine the selection application of various clinical teaching/learning approaches the importance of constructive feedback evaluation.

Lecture; 3 SH, 3.00 credits. Varies.

RES 460

Fundamentals of Extracorporeal Life Support (ECLS)

Students will synthesize information from readings learning modules progress through the stages of researching composing a review paper. They will gain further insight into the Respiratory Care profession reflect on its successes future challenges.

Lecture; 3 SH, 3.00 credits. Varies.

RES 480

Evidence Based Care in Respiratory Therapy Practice

Students will explore research that has driven best practice in Respiratory Therapy examine prominent studies that continue to impact invasive non-invasive ventilation strategies, morbidity patient outcomes. Students will learn what comprises a high-quality research study, explore various research methods gain understanding of data analysis.

Lecture; 3 SH, 3.00 credits. Varies.

RES 490

Respiratory Therapy Capstone

Students will synthesize information from readings learning modules progress through the stages of researching composing a review paper. They will gain further insight into the Respiratory Care profession reflect on its successes future challenges.

Prerequisites: RES.420, RES.440, RES.460, RES.480. Lecture; 3 SH, 3.00 credits. Varies.

Radiologic Science (RSC)

RSC 110

Medical Terminology for the Radiologic Sciences

The course consists of a medical terminology overview with a major emphasis on the radiologic sciences.

Lecture; 1 SH, 1.00 credits. Varies.

RSC 250

Elements of Clinical Care

Clinical care is paramount to caring for patients in radiologic sciences. In this course, students will be introduced to clinical care through the use of case studies, discussions, text materials, lab practicums. Professional communication, infection control, ethical dilemmas, patient safety, empathy clinical competency is the focus of this class.

Lecture; 2 SH, 2.00 credits. Summer.

RSC 287

Radiation: Protection Biology

Presents the basic principles, concepts procedures of radiation protection radiobiology. Topics include radiation units, principles of radiation protection, absorbed dose calculations, health physics procedures, radiation exposure regulations, reduction of radiation exposure to patients, personnel the environment.

Prerequisite: (PHY.181, RAD.240, RTT.280 or RAD.221). Lecture; 3 SH, 3.00 credits. Spring.

RSC 310

Cross Sectional Anatomy

The course will focus on anatomy of the human body as it is viewed in the various axial, coronal, sagittal planes. Radiologic anatomy will be viewed in the context of illustrations pictures of gross anatomical sections.

Prerequisites: BIO.210, CHE.210, (MAT.141, MAT.150, MAT.151 or MAT.171), (PHY.181, PHY.275 or PHY.270) Lecture; 3 SH, 3.00 credits. Fall, Spring.

RSC 3100

Cross Sectional Anatomy

The course will focus on anatomy of the human body as it is viewed in the various axial, coronal, sagittal planes. Radiologic anatomy will be viewed in the context of illustrations pictures of gross anatomical sections.

Prerequisites: BIO.210, CHE.210, PHY.181, (PHY.275 or PHY.270), MAT.141, (MAT.150 or MAT.151). Lecture; 3 SH, 3.00 credits. Summer, Fall.

RSC 3150

CT Imaging-Board Review Course

This is an online course designed to provide students with an overview of CT instrumentation, cross sectional anatomy, imaging procedures, clinical competencies, physics, radiation protection, data analysis, contrast agents history for board preparation. Students will learn to apply theory to patient imaging, different types of CT equipment, data acquisition systems.

Prerequisite: (RSC.320, RTT.260, NMT.271 or RAD.240). Lecture; 3 SH, 3.00 credits. Varies.

RSC 320

CT & Cross-Sectional Anatomy

Students will acquire comprehensive knowledge of computed tomography (CT). Students will be able to describe the various concepts related to physics instrumentation in CT. Identifying various anatomical structures in the CT images is required. Students will also be able to list the parameters for various CT protocols discuss the importance of patient care, contrast administration, radiation safety.

Prerequisites: BIO.210, PHY.181. Lecture; 3 SH, 3.00 credits. Varies.

RSC 325

Clinical Pathophysiology

Students build on prerequisite biological sciences courses gain foundational knowledge regarding normal abnormal pathophysiological principles. Students learn the etiology, pathogenesis, clinical manifestations of selected health problems across the lifespan in diverse populations. Students analyze data for actual potential pathophysiological

processes. Emphasis is given to the analysis of pathophysiological manifestations related complications of common health problems.

Prerequisites: BIO.210, CHE.210, (PHY.270 PHY.275 or PHY.181), (MAT.141 or MAT.150). Lecture; 4 SH, 4.00 credits. Summer.

RSC 330

Research in Radiologic Sciences

Students will acquire the basic knowledge required to become a critical consumer of medical literature, data handling interpretation, plus the dissemination of the data in this course. Students will identify a research question, identifying hypotheses, complete a literature review on the research topic utilizing peer-review journal articles, explain their methodology data analysis plan.

Prerequisites: LIB.112, MAT.261. Lecture; 2 SH, 2.00 credits. Spring.

RSC 425C

CT Clinical Internship

This course is designed to allow the students hands-on experience documenting performing CT exams within the clinical setting under the direct supervision of a registered technologist. This course is competency based, students will be assessed through competency exams to document the achievement of clinical objectives.

Corequisite: RSC.320 Lecture; 3 SH, 3.00 credits. Varies.

RSC 450

Mammography Board Review Assurance

This is an online course designed to provide students with an overview of mammography instrumentation, breast anatomy, imaging procedures, clinical competencies, physics, radiation protection, quality assurance, data analysis, patient care history for board preparation. Students will learn to apply theory to patient imaging, different types of mammography equipment, image acquisition systems.

Prerequisite: RSC.452. Lecture; 3 SH, 3.00 credits. Varies.

RSC 452

Mammography Imaging Procedures & Patient Care

Provides an introduction to patient care positioning skills specific to mammography. Students are provided with an overview of patient education, routine advanced mammographic positioning, radiation safety issues specific to mammography.

Corequisite: RSC.450. Lecture; 3 SH, 3.00 credits. Varies.

RSC 456C

Mammography Clinical Internship Positioning Qc Tests

Clinical internship training includes the application of patient care positioning skills specific to mammography. Students are provided with an overview of patient education, routine advanced mammographic positioning, radiation safety in mammography quality control testing.

Corequisites: RSC.450, RSC.452. Clinical; 3 SH, 3.00 credits. Varies.

RSC 532

Directed Study Radiologic Sciences

Lecture; 1-6 SH, 1.00-6.00 credits. Varies.

RSC 532O

Directed Study Radiologic Sciences

Lecture; 1-6 SH, 1.00-6.00 credits. Varies.

Radiation Therapy (RTT)

RTT 110

Introduction to Radiation Therapy

Students will explore the radiation therapy profession its role within the healthcare delivery system, along with interrelationships with other healthcare providers. Cancer management principles of radiation therapy will be introduced. The student will be exposed to the infusion of clinical applications as it pertains to an introductory-level course. The second half of the course will allow the student to integrate class content within a clinical environment.

Prerequisites: PHY.181, MAT.141, BIO.210, BIO.210L. Lecture; 3 SH, 3.00 credits. Summer.

RTT 260

Foundations of Radiation Therapy I

This course is part one of a two-part foundations course. Basic principles of the radiation therapy profession are highlighted. Discussions based on agencies professional societies will address professionalism. Key radiation therapy concepts are examined. The needs of the cancer patient are probed to include side effects nutritional status as they relate to treatment. Radiation its properties are examined. Radiation therapy equipment procedures are introduced. Diagnostic radiography simulation principles are overviewed.

Prerequisites: RTT.110, RSC.325 Lecture; 3 SH, 3.00 credits. Fall.

RTT 260L

Foundations of Radiation Therapy I Lab

Course is designed as a laboratory session for RTT 260. Lab is introductory, participatory experience focused on the hands-on, procedural content in radiation therapy. Students learn simulation treatment procedures, gain expertise in patient setups using CT imaging treatment DRR's, are introduced to critical thinking, appropriate patient interactions, explanation of procedures, considerations for interacting with specific patient populations.

Prerequisites: RSC.110, RSC.250, RSC.325, RTT.110. Corequisite: RTT.260. Laboratory; 2 SH, 2.00 credits. Fall.

RTT 262

Foundations of Radiation Therapy II

Part II of a two-part foundations course. Focuses on assessment-based tests of concepts covered in RTT 260, the first foundation course. Includes (but is not limited to) critical thinking exercises (peer reciprocal questioning answering). Special procedures are introduced along with key chemotherapy concepts as they relate to radiation therapy.

Prerequisites: RTT.260, RTT.280 Lecture; 3 SH, 3.00 credits. Spring.

RTT 262L

Foundations of Radiation Therapy II -Lab

Course is a companion laboratory session to RTT 262 is held at a clinical setting. Students will learn procedures relevant to didactic content learned in RTT 262. The lab will prepare students for the clinical setting rotations, including safety procedures, patient communication anatomical positioning verification.

Prerequisites: RSC.110, RSC.250, RSC.325, RTT.110, RTT.260, RTT.280, RSC.320. Corequisites: RSC.287, RTT.290O, RTT.281, RTT.262, RTT.283. Laboratory; 2 SH, 2.00 credits. Spring.

RTT 280

Medical Radiation Physics I

This course is a noncalculus examination of the basic concepts principles in radiation nuclear physics, including math/classical physics review; radioactive decay, radionuclide production; x-ray circuitry, particle generators, production, properties.

Prerequisite: RSC.325 Corequisite: RTT.260. Lecture; 3 SH, 3.00 credits. Fall.

RTT 281

Medical Radiation Physics II

A continuation of RTT 280. Topics include radioactive decay, high energy treatment machines, particulate/photon interactions, quality of radiation, x-ray intensity exposure, measurement of radiation, radiation protection. Emphasizes concepts applicable to radiation therapy.

Prerequisite: RTT.280 Lecture; 3 SH, 3.00 credits. Spring.

RTT 283

Physics for Treatment Planning

Detailed presentation of principles, aims techniques of applying radiation to the human body. Covers dose calculation methods, comparison of isodose curves for various radiation energies beam arrangements, with emphasis on performing calculations.

Prerequisite: RTT.280 Lecture; 2 SH, 2.00 credits. Spring.

RTT 290O

Radiation Therapy Treatment Methods

An in-depth presentation of the use of radiation therapy in the treatment of cancers covering specific pathologies; skin cancers; sarcomas; cancers of the digestive tract, female reproductive organs, breast, urinary systems. Topics discussed are anatomy, epidemiology etiology, presenting symptoms, pathology, treatment methods, outcomes.

Prerequisites: RTT.110, RSC.250, RSC.325, RTT.260, RTT.280 Lecture; 3 SH, 3.00 credits. Varies.

RTT 325C

Radiation Therapy Internship I

This course is part one of a radiation therapy clinical internship sequence that provides supervised, competency based education that includes participation in the practice of radiation therapy. Clinical competency requirements are based

on the content specifications of the American Registry of Radiologic Technologists, as well as program curriculum requirements. Progression in the clinical internship sequence is contingent upon successful completion of this rotation.
Prerequisites: RTT.110, RTT.260, RTT.260L, RTT.262, RTT.262L, RTT.280, RTT.281, RTT.283, RTT.290O, RSC.287. Lecture; 7 SH, 7.00 credits. Varies.

RTT 3400

Radiation Therapy Quality Assurance Laboratory

Topics include purposes principles of a quality assurance program in radiation therapy, quality control procedures, effect of beam geometry on imaging treatment technique, methods of radiation measurement machine calibration.

Prerequisites: RTT.281, RTT.350C. Lecture; 2 SH, 2.00 credits. Spring.

RTT 3450

Brachytherapy

Students will examine understphysical properties, uses, dose calculation methods, care of sealed source radionuclides used in therapeutic applications of brachytherapy. Surface applicators, interstitial intra-cavity implants are discussed. Radiation protection as related to radionuclides use is presented.

Prerequisites: RTT.281, RTT.283, RTT.350C. Lecture; 2 SH, 2.00 credits. Spring.

RTT 350C

Radiation Therapy Internship II

This course is part two of a radiation therapy clinical internship sequence that provides supervised, competency based education that includes participation in the practice of radiation therapy. Clinical competency requirements are based on the content specifications of the American Registry of Radiologic Technologists, as well as program curriculum requirements. Progression in the clinical internship sequence is contingent upon successful completion of this rotation.

Prerequisite: RTT.325C Lecture; 10 SH, 10.00 credits. Varies.

RTT 3700

Radiation Therapy Registry Review

The course is a hybrid course, with a combination of face to face meetings online sessions using Blackboard. The purpose of this class is to provide a review of material that may be on the ARRT examination, to practice study methods strategies to successfully pass the exam.

Prerequisites: RTT.110, RTT.325C, RTT.260, RTT.260L, RTT.262, RTT.262L, RTT.280, RTT.281, RTT.283, RTT.290O. Lecture; 1 SH, 1.00 credits. Spring.

RTT 3710

Radiation Therapy Registry Review II

The purpose of this course is to continue providing a review of material that may be on the ARRT examination, to practice study methods strategies to successfully pass the examination. The course will include the use of Blackboard LMS an online mock examination software package.

Corequisite: RTT.3400, RTT.3450, RTT.375C. Prerequisites: RTT.110, RTT.260, RTT.262, RTT.280, RTT.281, RTT.283, RTT.325C, RTT.370 Lecture; 1 SH, 1.00 credits. Varies.

RTT 375C

Radiation Therapy Internship III

This course is part three of a radiation therapy clinical internship sequence which provides supervised participation in the practice of radiation therapy. Clinical competency requirements are based on the content specifications to the American Registry of Radiologic Technologists, as well as program curriculum requirements.

Prerequisite: RTT.350C Lecture; 10 SH, 10.00 credits. Varies.

RTT 530

Directed Study

Lecture; 1-3 SH, 1.00-3.00 credits. Varies.

Acupuncture

SABUS 711

Practice Management: Marketing & Business

Students will learn the importance of advertising, branding, networking, use of websites social media. Students will learn issues of running a small business, including accounting, finance, banking, budgeting, financial statements, insurance, debt management. Participants will develop a vision business plan for a private practice. This course helps students build businesses that successfully attract retain patients.

Prerequisite: SACAS.626. Lecture; 2 SH, 2.00 credits. Fall.

SABUS 722**Practice Management: Acupuncture Professional Issues**

Students will learn business issues specific to the acupuncture profession, including usage of acupuncture in the US, credentialing, competition, insurance coding, billing. Guest speakers will describe their successful practices. This course is taught during spring term for third year students.

Prerequisite: SABUS.711 Lecture; 1 SH, 1.00 credits. Spring.

SACAS 270**Clinical Theater**

Students consider integrate the diagnostic methods of TCM the clinical application of acupuncture techniques by observing patient intakes treatments performed by NESA faculty. Case discussion follows treatment incorporates analysis of interview techniques/diagnostic data gathering, diagnosis treatment strategy development, prognosis, treatment planning, patient communication, patient education, charting ethics.

Corequisite: SACAS.624, SAEXM.620. Lecture; 1 SH, 1.00 credits. Fall.

SACAS 510**History of Chinese Medicine**

By studying the cultural theoretical foundations of Chinese medicine, students explore how the culture in which this medical system evolved has shaped theory practice. Additionally, students are introduced to some major classic texts of traditional Chinese medicine, their effects on the evolution of medical theory, their value today. Modern international evolution of Chinese medicine is also discussed.

Lecture; 1 SH, 1.00 credits. Fall.

SACAS 511**TCM Theory I**

An essential foundation for understanding Chinese medical theory its use in the diagnosis treatment of disease, this course covers basic concepts of Chinese medicine such as tao, qi, yin, yang, Five Element correspondences as they relate to human health. Other content includes eight principles, fundamental substances, syndrome differentiation, the four diagnostic methods, functional categories of points.

Lecture; 4 SH, 4.00 credits. Fall.

SACAS 512**Point Location I**

Through a combination of lectures, demonstrations supervised practice in small groups, students learn the precise location of all acupuncture points on the twelve main channels, as well as the conception (ren) governing (du) channels. A number of extra points not located on the major channels also are identified. Also covered are cautions contraindications.

Corequisites: SACAS.513, SASCI.517. Lecture; 2.50, 2.50 credits. Fall.

SACAS 513**Materials Methods of TCM I**

Through lecture, demonstration supervised practice in small groups, students learn foundational skills of needle insertion, removal manipulation for tonification dispersion; direct indirect moxibustion; cupping; gua sha; plum blossom; electroacupuncture; bloodletting. Special emphasis is placed on cautions contraindications, sensitivity to patient response, management of adverse treatment reactions, Clean Needle Technique (CNT), universal precautions.

Corequisites: SACAS.512, SASCI.517, SASCI.522. Lecture; 2 SH, 2.00 credits. Fall.

SACAS 524**TCM Theory II**

An essential foundation for understanding Chinese medical theory its use in the diagnosis treatment of disease, this course covers basic concepts of Chinese medicine such as Tao, qi, yin, yang, Five Element correspondences as they relate to human health. Other content includes eight principles, fundamental substances, syndrome differentiation, the four diagnostic methods, functional categories of points.

Prerequisite: SACAS.511. Lecture; 4 SH, 4.00 credits. Spring.

SACAS 525**Point Location II**

Through a combination of lectures, demonstrations supervised practice in small groups, students learn the precise location of all acupuncture points on the twelve main channels, as well as the conception (ren) governing (du) channels. A number of extra points not located on the major channels also are identified. Also covered are cautions contraindications.

Prerequisite: SACAS.512. Corequisites: SASCI.527 SACAS.526. Lecture; 2.50, 2.50 credits. Spring.

SACAS 526

Materials Methods of TCM II

Through lecture, demonstration supervised practice in small groups, students learn foundational skills of needle insertion, removal manipulation for tonification dispersion; direct indirect moxabustion; cupping; gua sha; plum blossom; electroacupuncture; bloodletting. Special emphasis is placed on cautions contraindications, sensitivity to patient response, management of adverse treatment reactions, Clean Needle Technique (CNT), universal precautions.

Prerequisite: SACAS.513. Corequisite: SACAS.525, SASCI.527. Lecture; 2 SH, 2.00 credits. Spring.

SACAS 537

Actions Effects of Points

Acupuncture points are presented individually, with other points sharing similar functions, focusing on the properties functions of the points meridians. Special groupings categorizations of points their uses are discussed, the general therapeutic domains of the channels are reviewed. Finally, methods of combining points into effective treatment prescriptions are discussed in depth.

Prerequisite: SACAS.525. Corequisite: SACAS.539. Lecture; 3 SH, 3.00 credits. Fall.

SACAS 538

Acupuncture Channel Theory

Building on their foundation of clinical skills, students will learn advanced needling techniques be able to provide additional needling interventions, based on both classical modern sources. Students will practice strategies from the Neijing, with their applications for modern patients. Strategies from the I Ching based on the classical ba gua will be taught to provide effective treatments for pain using distal points that reflect the body's balanced geometry.

Corequisites: SACAS.539, SACAS.537. Lecture; 2 SH, 2.00 credits. Summer.

SACAS 539

Clinical Skills of Traditional Chinese Medicine

This course is designed for students to refine their clinical skills. Practicing on each other in small groups under faculty supervision, students locate needle acupuncture points, perform patient evaluation diagnosis using The Four Examinations, begin to analyze organize signs symptoms, are introduced to the actions effects of frequently used points.

Prerequisites: SACAS.526. Corequisites: SACAS.524, SAEXM.530. Lecture; 2 SH, 2.00 credits. Summer.

SACAS 611

TCM Etiology & Pathology I

In this two-course sequence, students learn to diagnose treat a number of common illnesses from the perspective of TCM. Differentiation of syndromes is emphasized as students learn to identify signs symptoms. Treatment strategies point prescriptions are covered for all the conditions. Clinical research findings are included for many conditions, establishing a foundation for evidence-informed practice.

Prerequisites: SACAS.524, SACAS.537, SACAS.539. Corequisite: SACAS.612. Lecture; 3 SH, 3.00 credits. Fall.

SACAS 612

Intro to Clinical Internship I

Students refine their diagnostic skills by practicing differential diagnosis, researching cases, presenting case analyses. After establishing diagnoses, students articulate the treatment principles, identify appropriate treatment plans, including specific point prescriptions other potential treatments. Under close faculty supervision, students practice needling, point location, pulse tongue diagnosis on each other in small groups.

Prerequisites: SACAS.539, SAEXM.530. Corequisite: SACAS.611. Lecture; 2.50, 2.50 credits. Fall.

SACAS 624

Intro to Clinical Internship II

Students refine their diagnostic skills by practicing differential diagnosis, researching cases, presenting case analyses. After establishing diagnoses, students articulate the treatment principles, identify appropriate treatment plans, including specific point prescriptions other potential treatments. Under close faculty supervision, students practice needling, point location, pulse tongue diagnosis on each other in small groups.

Prerequisite: SACAS.612. Lecture; 2.50, 2.50 credits. Spring.

SACAS 626

TCM Etiology & Pathology II

In this two-course sequence, students learn to diagnose treat a number of common illnesses from the perspective of TCM. Differentiation of syndromes is emphasized as students learn to identify signs symptoms. Treatment strategies

point prescriptions are covered for all the conditions. Clinical research findings are included for many conditions, establishing a foundation for evidence-informed practice.

Corequisite: SACAS.624. Lecture; 3 SH, 3.00 credits. Spring.

SACAS 635

Patient-Provider Relationship

Students learn basic psychological health assessment, when referral for further assessment is indicated. Topics covered include suicide risk, substance abuse, survivors of trauma or abuse. Students learn skills for building rapport trust, for communicating effectively, for coaching patients in compliance with healthy behaviors. Fundamental self-awareness tools are identified, fostering self-care of the healer.

Prerequisites: SASCI.620, SACAS.624. Lecture; 3 SH, 3.00 credits. Summer.

SACAS 636

Microsystems of Acupuncture Treatment

This course provides an overview of auricular acupuncture, with a focus on the therapeutic potential of these systems within an overall acupuncture treatment or when each modality is used alone, including a map of point locations. Students practice locating needling microsystem acupuncture points under faculty supervision.

Prerequisite: SACAS.526. Lecture; 2 SH, 2.00 credits. Summer.

SACAS 717

Clinical Case Management

Designed to address issues experiences that arise during Clinical Internship, this course explores cases presented by students faculty. Discussions focus on diagnosis, treatment plan, point selection, the patient-provider relationship, case management referral. Students review methods systems for planning, carrying out evaluating treatments prognoses.

Corequisite: SACLC.636A, SACLC.636B, SACLC.636C. Lecture; 1 SH, 1.00 credits. Fall.

SACAS 718

Chinese Nutrition

This introductory course gives students a basic understanding, from a Chinese medical perspective, of the role that food nutrition play in the healing process. Course topics include the influence of diet on the organ/meridian systems, the five flavors, the thermal nature of foods, the effects of different cooking preparation methods, how these can enhance clinical treatment.

Prerequisite: SACAS.524. Lecture; 1 SH, 1.00 credits. Fall.

SACAS 729

Survey of Chinese Classic Medical Texts

By comparing Chinese medical texts, students begin to develop familiarity with the origins of Chinese medical practice. Through selected readings, students explore the development of acupuncture Oriental medicine. These readings form the basis for examining treatment strategies in modern clinical settings, for understanding the conceptual basis of modern Oriental Medicine.

Prerequisite: SACAS.510. Lecture; 1 SH, 1.00 credits. Fall.

SACHM 520

Introduction to Chinese Herbal Medicine

This course introduces the history, development, application of Chinese herbal medicine. Covered are important traditional contemporary Chinese herbal texts, the basic concepts underlying the properties functions of herbs: the four qis, five tastes, channel entry, functional tendencies, combination theory. Combining Chinese herbal acupuncture treatments, toxicity, side effects, preparation methods are also covered.

Corequisite: SACAS.524. Lecture; 2 SH, 2.00 credits. Spring.

SACHM 531

Chinese Herbs I

As a basic foundation for the study of Chinese herbal medicine, students study more than 300 individual herbs. To gain a comprehensive understanding of each herb, students learn its name in Pin Yin English, as well as its botanical name, character, taste, channels, main functions, precautions, methods of preparation. Recent research pertaining to individual herbs is also covered.

Prerequisite: SACHM.520. Lecture; 4 SH, 4.00 credits. Summer.

SACHM 612

Chinese Herbs II

As a basic foundation for the study of Chinese Herbal Medicine, students study more than 300 individual herbs. To gain a comprehensive understanding of each herb, students learn its name in Pin Yin English, as well as its botanical

name, character, taste, channels, main functions, precautions, methods of preparation. Recent research pertaining to individual herbs is also covered.

Prerequisite: SACHM.531. Lecture; 4 SH, 4.00 credits. Fall.

SACHM 613

Chinese Herbal Dispensary Assistantship

By assisting in the NESA Herbal Dispensary, students become more familiar with the properties of individual raw Chinese herbs. Students practice preparing raw powdered Chinese herbal formulas prescribed by practitioners interns. Students also learn proper herb storage handling techniques, how to assess the quality of raw powdered herbs.

Prerequisite: SACHM.520. Laboratory. Fall.

SACHM 624

Chinese Herbal Formulas I

Students learn more than 150 Chinese herbal medicine formulas by their Pin Yin English names, constituent ingredients, how those ingredients relate interact, the primary secondary functions of each formula, possible modifications, dosage, clinical applications, contraindications. Formulas readily available as patent medicines are also covered.

Prerequisite: SACHM.612. Lecture; 4 SH, 4.00 credits. Spring.

SACHM 635

Chinese Herbal Formulas II

Students learn more than 150 Chinese Herbal Medicine formulas by their Pin Yin English names, constituent ingredients, how those ingredients relate interact, the primary secondary functions of each formula, possible modifications, dosage, clinical applications, contraindications. Formulas readily available as patent medicines are also covered.

Prerequisite: SACHM.624. Corequisite: SACHM.636. Lecture; 4 SH, 4.00 credits. Summer.

SACHM 636

CHM: Patent Herbal Medicines

This course covers patent formulas, produced by various companies, which are most commonly used in the United States today, including modern adaptations of classic formulas. Discussed are the composition of the patents, functions of the classic formula bases, comparison of modifications used in various brands. Students learn to select the most appropriate products to achieve optimum treatment results.

Prerequisite: SACHM.624. Corequisite: SACHM.635. Lecture; 2 SH, 2.00 credits. Summer.

SACHM 717

CHM: Internal Medicine I

This course explores the theoretical basis of Chinese herbal treatments for various internal medicine conditions such as cough, asthma, diarrhea, constipation, jaundice, hypertension, diabetes, edema others. Special emphasis is placed on understanding the theoretical basis of diagnosis, selecting modifying formulas.

Prerequisite: SACHM.635. Corequisite: SACHM.718. Lecture; 4 SH, 4.00 credits. Fall.

SACHM 718

CHM: Formula Writing

This course introduces students to writing individual Chinese Herbal Medicine formulas. Students begin by working with simple formulas progress to more complex formulas throughout the course. Building on the base formulas learned in CHM: Formulas I II, students learn the elements of formula modification, including dosage, specifically as it relates to chronicity severity of patient pathology (etc.)

Prerequisite: SACHM.635. Corequisite: SACHM.717. Lecture; 2 SH, 2.00 credits. Fall.

SACHM 720

Clinical Pharmacology of CHM

This course introduces basic principles of pharmacology in major Chinese herbs traditional formulas. Students gain a general understanding of pharmacotherapy as it relates to clinical application. Toxicology in Chinese Herbal Medicine is discussed, herb-drug interaction issues are presented. The course highlights major herbal classifications with emphasis on the mechanisms of action, pharmacokinetic concepts pharmacodynamic principles.

Prerequisite: SACHM.717. Lecture; 2 SH, 2.00 credits. Spring.

SACHM 729

CHM: Internal Medicine II

This course explores the theoretical basis of Chinese herbal treatments for various internal medicine conditions such as cough, asthma, diarrhea, constipation, jaundice, hypertension, diabetes, edema others. Special emphasis is placed on understanding the theoretical basis of diagnosis, selecting modifying formulas.

Prerequisite: SACHM.717. Lecture; 4 SH, 4.00 credits. Spring.

SACLC 511

Clinical Assistantship

The clinical assistantship program provides students the opportunity to observe the practice of acupuncture Oriental Medicine within various clinical settings. Students observe practitioners diagnose treat patients. During the first two years of the program, MAC students complete 150 hours MAOM students complete 180 hours observing assisting licensed acupuncturists, Chinese Herbal Medicine practitioners NESA interns.

Corequisite: SACAS.513. Clinical; 1 SH, 1.00 credits. Fall.

SACLC 522

Clinical Assistantship II

The clinical assistantship program provides students the opportunity to observe the practice of acupuncture Oriental Medicine within various clinical settings. Students observe practitioners diagnose treat patients. During the first two years of the program, MAC students complete 150 hours MAOM students complete 180 hours observing assisting licensed acupuncturists, Chinese herbal medicine practitioners NESA interns.

Corequisite: SACAS.526. Clinical; 1 SH, 1.00 credits. Spring.

SACLC 533

Clinical Assistantship III

Students observe practitioners, obtaining a close-up view of acupuncture Chinese herbal medicine within clinical settings. Students are exposed to different treatment styles professional approaches, thus enhancing the student's current studies. Students begin to assimilate the knowledge acquired in the classroom practical sessions at NESA. Students gain a better understanding of the commitment, challenges, ultimate satisfaction that accompany sustaining a TCM practice. Students also begin reflecting on practice. Under practitioner supervision, students practice taking patient pulses, inspecting patient tongues supporting the practitioner in making patients feel welcome comfortable.

Clinical; 1 SH, 1.00 credits. Summer.

SACLC 600

Clinical Assistantship VI

Students observe practitioners, obtaining a close-up view of acupuncture Chinese herbal medicine within clinical settings. Students are exposed to different treatment styles professional approaches, thus enhancing the student's current studies. Students begin to assimilate the knowledge acquired in the classroom practical sessions at NESA. Students gain a better understanding of the commitment, challenges ultimate satisfaction that accompany sustaining a TCM practice. Students also begin reflecting on practice. Under practitioner supervision, students practice taking patient pulses, inspecting patient tongues supporting the practitioner in making patients feel welcome comfortable.

Clinical; 1 SH, 1.00 credits. Varies.

SACLC 614

Clinical Assistantship IV

Students observe practitioners, obtaining a close-up view of acupuncture Chinese herbal medicine within clinical settings. Students are exposed to different treatment styles professional approaches, thus enhancing the student's current studies. Students begin to assimilate the knowledge acquired in the classroom practical sessions at NESA. Students gain a better understanding of the commitment, challenges, ultimate satisfaction that accompany sustaining a TCM practice. Students also begin reflecting on practice. Under practitioner supervision, students practice taking patient pulses, inspecting patient tongues supporting the practitioner in making patients feel welcome comfortable.

Clinical; 1 SH, Credits vary. Fall.

SACLC 625

Clinical Assistantship V

Students observe practitioners, obtaining a close-up view of acupuncture Chinese herbal medicine within clinical settings. Students are exposed to different treatment styles professional approaches, thus enhancing the student's current studies. Students begin to assimilate the knowledge acquired in the classroom practical sessions at NESA. Students gain a better understanding of the commitment, challenges, ultimate satisfaction that accompany sustaining a TCM practice. Students also begin reflecting on practice. Under practitioner supervision, students practice taking patient pulses, inspecting patient tongues supporting the practitioner in making patients feel welcome comfortable.

Clinical; 1 SH, Credits vary. Spring.

SACLC 636A

Clinical Internship CAS I

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Summer.

SACLC 636B**Clinical Internship CAS II**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Summer.

SACLC 636C**Clinical Internship CAS III**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Summer.

SACLC 717A**Clinical Internship CAS IV**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Fall.

SACLC 717B**Clinical Internship CAS V**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Fall.

SACLC 717C**Clinical Internship CAS VI**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Fall.

SACLC 728A**Clinical Internship CAS VII**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Spring.

SACLC 728B**Clinical Internship CAS VIII**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Spring.

SACLC 728C**Clinical Internship CAS IX**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Spring.

SACLC 739C**Clinical Internship CAS XII**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Summer.

SACLC 739A**Clinical Internship CAS X**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Summer.

SACLC 739B**Clinical Internship CAS XI**

Having extensively practiced clinical assessment treatment skills, student interns begin to work directly with patients in clinical settings. Under close faculty supervision, interns assume responsibility for patient care, including inevaluations, diagnoses, structuring treatment plans, carrying out treatments, assessing progress. Interns also advise patients on healthy lifestyle practices, arrange follow-up care, make referrals

Prerequisite: SAEXM.620. Corequisite: SACAS.635. Clinical; 2 SH, 2.00 credits. Summer.

SACLC AA30**Clinical Assistantship**

The clinical assistantship program provides students the opportunity to observe the practice of acupuncture Oriental Medicine within various clinical settings. Students observe practitioners diagnose treat patients. During the first two years of the program, MAC students complete 150 hours MAOM students complete 180 hours observing assisting licensed acupuncturists, Chinese Herbal Medicine practitioners NESA interns.

Corequisite: SACAS.513. Clinical; 1 SH, 1.00 credits. Fall.

SACLC AA45**Clinical Assistantship**

The clinical assistantship program provides students the opportunity to observe the practice of acupuncture Oriental Medicine within various clinical settings. Students observe practitioners diagnose treat patients. During the first two years of the program, MAC students complete 150 hours MAOM students complete 180 hours observing assisting licensed acupuncturists, Chinese herbal medicine practitioners NESA interns.

Corequisite: SACAS.526. Clinical; 1.5 SH, 1.50 credits. Spring.

SADAC 810**Professional Development: Lifelong Learning**

This course supports students in initiating the transition from student to integrated healthcare provider. Student will develop an individualized professional portfolio plan. Emphasis will be on self-evaluation. Students will develop submit 1, 5 10-year plans, supplemented with specific, attainable steps to to achieve their goals. Strategies for incorporating maintaining self-cultivation practices will be included.

Lecture; 2 SH, 2.00 credits. Fall.

SADAC 812**System-Based Medicine: Collaborative Care**

This course covers best practices in interprofessional communication in healthcare, applies them to the successful integration of acupuncturists into allopathic settings. Specific strategies related to communicating TCM concepts in

allopathic setting are covered. Understanding how teams form, define roles, communicate, share decision-making manage conflict are relevant to integration of acupuncturists in these settings.

Prerequisite: HSC.801. Lecture; 2 SH, 2.00 credits. Fall, Spring.

SADAC 820

Advanced Diagnostic Studies

Course outlines principles/applications of diagnostic imaging equipment, laboratory other diagnostic tests tools. Students learn clinical indications risks/benefits of relevant diagnostic procedures, how to interpret findings from diagnostic reports, how to utilize them to effectively communicate with patients with other healthcare providers. Course covers relevant laws regulations that affect use of tests by an acupuncturist.

Prerequisite: SASCI.610. Lecture; 2 SH, 2.00 credits. Spring, Summer.

SADAC 821

Adv Acu Integrative Pain Mgmt

Advanced Acupuncture Integrative Pain Management

Lecture; 4 SH, 4.00 credits. Spring.

SADAC 822

Adv Acu Intgrt Pain Mgt Clinic

Advanced Acupuncture Integrative Pain Management Clinic

Lecture; 4 SH, 4.00 credits. Spring.

SAEL DS1

Directed Study I

Faculty-directed study is provided to an individual student wishing to examine a specific topic.

Permission of instructor required. Lecture; 1 SH, 1.00 credits. Varies.

SAEL DS2

Directed Study II

Faculty-directed study is provided to an individual student wishing to examine a specific topic.

Permission of instructor required. Lecture; 2 SH, 2.00 credits. Varies.

SAEL DS3

Directed Study III

Faculty-directed study is provided to an individual student wishing to examine a specific topic.

Permission of instructor required. Lecture; 3 SH, 3.00 credits. Varies.

SAEXM 530

First Year Comprehensive Exam

Lecture. Summer.

SAEXM 530R

Level 1 Comprehensive Exam (Retake)

Lecture. Summer.

SAEXM 620

Second Year Comprehensive Exam

Lecture. Spring.

SAEXM 620R

Second Year Comprehensive Exam (Retake)

Lecture; Spring.

SAEXM 630

JAS Comprehensive Exam

Lecture; Summer.

SAEXM 710

CHM Comprehensive Exam

Lecture; Fall.

SAEXM 710R

CHM Comprehensive Exam Retake

Lecture; Fall.

SAJAS 521

Japanese Acupuncture I

This course presents an overview of the historical theoretical roots of Japanese acupuncture styles, along with their diagnostic treatment techniques. Students also learn Japanese techniques for palpating the abdomen, identifying diagnostic patterns, assessing pulse qualities. Students work in small, supervised groups to practice these clinical skills develop a basic understanding of the application of Japanese acupuncture.

Corequisite: SACAS.525. Lecture; 2 SH, 2.00 credits. Spring.

SAJAS 532

Japanese Acupuncture II

This course provides students with the theoretical foundations application of two predominant therapeutic styles of Japanese acupuncture: Meridian Five Phase the Extraordinary Vessels. Through lecture practice, students learn to diagnose using pulse abdominal palpation, in combination with visual verbal signs symptoms, practice needling moxibustion techniques. Students refine diagnostic skills increase sensitivity.

Prerequisite: SAJAS.521. Lecture; 2 SH, 2.00 credits. Summer.

SAJAS 613

Japanese Acupuncture III

This course provides students with an expanded continued outlook of root treatment strategies, incorporates an in-depth study of detailed clinical applications through case review. The hands-on portion of the course will promote the ability to diagnose JAS Meridian Five Phase, Extraordinary Vessels Extra Channel Polarizations.

Prerequisite: SAJAS.532. Lecture; 2 SH, 2.00 credits. Fall.

SAJAS 624

Japanese Acupuncture IV

Based on classical theories of Oriental Medicine modern information about disease healing, this course focuses on the application of techniques used to resolve symptoms. Through the practice of careful palpation the consideration of diagnostic treatment points, students learn the most appropriate techniques for achieving symptomatic change

Prerequisite: SAJAS.613. Lecture; 2 SH, 2.00 credits. Spring.

SAJAS 635

Japanese Acupuncture V

This course prepares students for Japanese acupuncture clinical internship. Students practice Meridian Five Phase Manaka ion pumping cord style diagnosis treatment. Students practice intakes, diagnosis, treatment skills on each other in small, faculty-supervised groups, which simulate the clinical setting. This intensive practice allows students to refine their Japanese acupuncture treatment planning skills.

Prerequisites: SACAS.624, SAEXM.620, SAJAS.613. Lecture; 2 SH, 2.00 credits. Summer.

SAJAS 716

Japanese Acupuncture VI

Based on the lifelong work of Shoji Kobayashi, Shakuju encompasses the palpation of both the radial pulse abdomen as derived from the classic text, the Nan Jing. Treatment strategy focuses on the back shu points, specific sequences, needle techniques. This course has both didactic practical components.

Prerequisite: SAJAS.532. Lecture; 2 SH, 2.00 credits. Fall.

SAMTP 511

Self Care I

Internal exercise techniques strengthen the body and build qi. Students are able to choose courses in Tai Chi or Qigong to complete the Self Care requirements. These courses help students establish a regular self care practice and cultivate a deeper awareness of the subtle qi within their own bodies.

Laboratory; 1 SH, 1.00 credits. Fall.

SAMTP 530

Bodywork Therapy

Through lecture, demonstration practice, students learn to apply specific, basic techniques of the Chinese medical bodywork Tui Na. Such techniques extend the range of treatment options for the therapeutic benefit of the patient, further develop the palpations skills of the practitioner. Channel palpation, body mechanics, clinical indications contraindications for Tui Na are also covered.

Prerequisite: SACAS.525. Lecture; 1 SH, 1.00 credits. Fall.

SAMTP 532**Self Care II**

Internal exercise techniques strengthen the body and build qi. Students are able to choose courses in Tai Chi or Qigong to complete the Self Care requirements. These courses help students establish a regular self care practice and cultivate a deeper awareness of the subtle qi within their own bodies.

Laboratory; 1 SH, 1.00 credits. Summer.

SARES 150**Research Seminar**

This advanced course introduces career scientists to acupuncture research findings methodology. Students review discuss important publications in acupuncture research. Students will be expected to read key publications present their directed-question, annotated bibliography. Successful completion of the online CITI training program in ethical research with human subjects is required.

Permission of instructor required. Lecture; 1 SH, 1.00 credits. Fall.

SARES 711**Research Design Evaluation**

This course examines different qualitative quantitative research. The assumptions underlying the broad traditions of research design selection methodological considerations are discussed. Current literature on acupuncture research is discussed, providing an understanding of the special problems requirements of modern acupuncture research. Students learn important research concepts, vocabulary methods, how to formally report research findings.

Lecture; 3 SH, 3.00 credits. Fall.

SARES 722**Epidemiology & Biostatistics**

Through lecture, discussion group projects, students will be able to conduct epidemiological investigations including the scientific concept of cause measures of disease frequency. Students will be able to formulate an appropriate study question design a research strategy to address it. Students will gain skill in applying basic descriptive probability statistics to evaluate current literature on acupuncture research the special problems requirements of modern research applied to acupuncture. Working in small groups, students will use their new skills to create present a health plan solution to a problem in an area of their interest.

Corequisite: SASCI.619. Lecture; 2 SH, 2.00 credits. Spring.

SASCI 511**Anatomy & Physiology I**

Using a systematic approach to human anatomy physiology, this course focuses on the normal functioning of the human body. Students study the skeletal, muscular, endocrine, respiratory, cardiovascular, digestive, reproductive, urinary, nervous systems.

Lecture; 3 SH, 3.00 credits. Fall.

SASCI 510**Anatomy Lab**

This lab provides a hands-on experience of human anatomy, focusing on the skeleton, muscles, brain, nervous system, heart, organs of the digestive system. This lab supplements the learning experiences of Anatomy & Physiology I & II, meets the Massachusetts acupuncture licensure requirement of a lab in Biology or Anatomy.

Corequisite: SASCI.511. Lecture; 1 SH, 1.00 credits. Spring.

SASCI 517**Integrated Anatomy I**

Students learn the location, origin, insertion action of all the major muscles, as well as the bony landmarks, ligaments through lecture extensive hands-on practice. Basic structural analysis is introduced, so students can begin to see the postural patterns that often precede underlie musculoskeletal imbalances pain syndromes. Course content is aligned with Point Location.

Corequisites: SACAS.512, SACAS.511. Lecture; 2 SH, 2.00 credits. Fall.

SASCI 522**Anatomy & Physiology II**

Using a systematic approach to human anatomy physiology, this course focuses on the normal functioning of the human body. Students study the skeletal, muscular, endocrine, respiratory, cardiovascular, digestive, reproductive, urinary, nervous systems.

Prerequisite: SASCI.511. Lecture; 3 SH, 3.00 credits. Fall.

SASCI 527**Integrated Anatomy II**

Students learn the location, origin, insertion action of all the major muscles, as well as the bones, bony landmarks, ligaments through lecture extensive hands-on practice. Basic structural analysis is introduced, so students can begin to see the postural patterns that often precede underlie musculoskeletal imbalances pain syndromes. Course content is aligned with Point Location.

Prerequisite: SASCI.517. Corequisite: SACAS.526. Lecture; 2 SH, 2.00 credits. Spring.

SASCI 530**General Biology**

This survey of life systems lays the foundation for the study of human anatomy, physiology health. The course begins with the study of cellular structure, metabolism reproduction, proceeds to the study of tissues more complex organisms, such as plants vertebrates. Also covered are genetics, evolution, ecology the interrelationships between organisms their environments.

Lecture; 3 SH, 3.00 credits. Summer.

SASCI 537**Acupuncture Integrative Pain Management I**

This course explores the fundamental concepts of pain including the science, nomenclature, experience of pain, pain's impact on the individual society.

Lecture; 2 SH, 2.00 credits. Summer.

SASCI 610**Chemistry for the Health Sciences**

This course examines selected topics in inorganic, organic, biochemistry in preparation for courses in microbiology, nutrition, pathology. The course will help the student obtain an understanding of the attitudes, methods, theories by which chemistry attempts to explain basic chemical phenomena within the body.

Lecture; 3 SH, 3.00 credits. Fall.

SASCI 617**Acupuncture Integrative Pain Management II**

In this course students explore how pain is assessed, quantified, communicated, in addition to how the individual, the health system, society affect these activities. This course focuses on collaborative approaches to decision-making, diversity of treatment options, the importance of patient agency, risk management, flexibility in care, treatment based on appropriate understanding of the clinical condition.

Prerequisite: SASCI.537. Corequisite: SACAS.612. Lecture; 2 SH, 2.00 credits. Fall.

SASCI 619**Western Pathophysiology & Pharmacology I**

This course sequence provides a biomedical overview of common disorders for each major body system. Provided for each disease are the physiological process, key symptoms, diagnostic testing, treatment. Pharmaceuticals are covered according to their category, effect on physiological functions, possible interactions side effects. Emphasis is placed on identifying emergency conditions that require immediate referral to a biomedical provider.

Lecture; 3 SH, 3.00 credits. Fall.

SASCI 620**General Psychology**

This course surveys historical contemporary approaches to the scientific study of human behavior. It provides an introduction to sensation, perception, emotion; human development learning; personal social influences on behavior, personality psychopathology.

Lecture; 3 SH, 3.00 credits. Spring.

SASCI 627**Acupuncture Integrative Pain Management III**

In this course students explore how pain is assessed, quantified, communicated, in addition to how the individual, the health system, society affect these activities. This course focuses on collaborative approaches to decision-making, diversity of treatment options, the importance of patient agency, risk management, flexibility in care, treatment based on appropriate understanding of the clinical condition.

Lecture; 2 SH, 2.00 credits. Spring.

SASCI 629

Western Pathophysiology & Pharmacology II

This course sequence provides a biomedical overview of common disorders for each major body system. Provided for each disease are the physiological process, key symptoms, diagnostic testing, treatment. Pharmaceuticals are covered according to their category, effect on physiological functions, possible interactions side effects. Emphasis is placed on identifying emergency conditions that require immediate referral to a biomedical provider.

Prerequisite: SASCI.619. Lecture; 3 SH, 3.00 credits. Spring.

SASCI 639

Western Pathophysiology & Pharmacology III

This course sequence provides a biomedical overview of common disorders for each major body system. Provided for each disease are the physiological process, key symptoms, diagnostic testing, treatment. Pharmaceuticals are covered according to their category, effect on physiological functions, possible interactions side effects. Emphasis is placed on identifying emergency conditions that require immediate biomedical communication referral.

Prerequisite: SASCI.629. Lecture; 3 SH, 3.00 credits. Summer.

SASCI 720

Western Nutrition

In this introductory course, students receive an overview of the healing properties of foods, nutrients such as vitamins minerals, specific diets. The functions of various nutrients, in what foods they are found, how they impact health are discussed. Students gain an understanding of the clinical uses of specific diets nutritional supplements used by many holistic practitioners.

Lecture; 1 SH, 1.00 credits. Spring.

SASCI 729

Patient Assessment

Course provides students with understanding of use of physical examination in patient evaluation/assessment development of a working diagnosis. Fundamentals of physical examination are covered, including: history-taking, palpation, percussion auscultation, laboratory testing, imaging studies. At completion of the course, student will be able to assess their patients according to physical findings, symptoms, signs, lab work other diagnostic testing.

Lecture; 2 SH, 2.00 credits. Varies.

SASCI 730

Microbiology

This practical course for health care practitioners focuses on the microorganisms relevant to clinical practice, the body's defense responses, methods of preventing disease transmission, the characteristics, activities, distribution, effects of specific pathogenic organisms on the human body.

Lecture; 3 SH, 3.00 credits. Summer.

SASCI 737

Physiology of Acupuncture

Students will understand physiologic mechanisms effects of acupuncture as the basis for communication with other healthcare professionals patients, examining the effects of acupuncture on pain, stress, inflammation. Students will evaluate a hypothesis that acupuncture acts as a signaling system via the network of fascia throughout the body explore effects observed in the brain through neuroimaging research.

Prerequisites: SASCI.619, SASCI.629, SASCI.639. Lecture; 2 SH, 2.00 credits. Summer.

Social Sciences (SSC)

SSC 230

Cultural Anthropology

An introduction to the concepts, principles, major areas of anthropology. The course focuses on the similarities differences among the world's peoples. A variety of topics are studied, including symbolic anthropology, religion, kinship, social organization, ecology, economics.

Prerequisite: LIB.133. Lecture; 3 SH, 3.00 credits. Fall, Spring.

SSC 335

Conflict Communication

Through communication, conflict begins, is avoided or resolved. It is important to understand conflict, because it powerfully affects the quality functioning of interpersonal relationships groups in multiple settings. In this course students learn about investigate communication conflict through activities including the observation analysis of real conflict interactions.

Prerequisite: LIB.220. Lecture; 3 SH, 3.00 credits. Fall.

SSC 3400**Survey of Modern Am History**

An introductory survey of U.S. history from 1860 to the present. Selected historical themes problems are studied in depth.

Prerequisite: LIB.133. Lecture; 3 SH, 3.00 credits. Varies.

SSC 3410**History of Western Civilization I**

A study of Western civilization from its origins in the Near East through the development of the Greek, Roman, and medieval worlds. The rise of European nation-states from the Middle Ages to the Reformation is examined.

Prerequisite: LIB.133. Lecture; 3 SH, 3.00 credits. Varies.

SSC 3420**History of Western Civ II**

A study of Western European social, political, cultural intellectual traditions economic development from the Reformation to 1890. Western Civilization I is not a prerequisite.

Prerequisite: LIB.133. Lecture; 3 SH, 3.00 credits. Varies.

SSC 343**The Black Freedom Struggle in the United States**

Students examine the history of Black liberation struggles in the United States, particularly during the 1950s 1960s. Students will utilize primary sources including speeches, oral histories, images, music to consider how organizations activists have conceptualized advanced demands for freedom, justice, equality, civil rights. Topics include legal segregation, voting rights, economic justice, Black Power.

Prerequisite: LIB.133. Lecture; 3 SH, 3.00 credits. Spring.

SSC 345**Immigrant Experience**

This course explores the history of immigration to the United States from 1790 to the present. Goals include developing an understanding of the continual role migration has played in the peopling of the United States of the ways in which newcomers have experienced life in America. Topics include family, community, ethnic identity, work, assimilation, nativism, immigration reform.

Prerequisite: LIB.133. Lecture; 3 SH, 3.00 credits. Varies.

SSC 349**Intro Women's & Gender Studies Perspectives**

In this course students will use multiple perspectives theories to explore intersections of gender with race, ethnicity, sexuality, class in the context of key issues, questions debates in contemporary American society. These include gender as a social category, sexuality, gendered divisions of labor, representations of the body in art popular culture, health, politics.

Prerequisite: LIB.133. Lecture; 3 SH, 3.00 credits. Varies.

SSC 351**Group Communication**

Through communication, groups determine facts, define analyze problems, generate, evaluate implement solutions. Issues arise such as conflict, lack of cohesion, groupthink, which impact communication in settings such as healthcare. Students learn about these other topics by interacting in groups, analyzing actual group interaction, reviewing group communication research literature.

Prerequisite: LIB.220. Lecture; 3 SH, 3.00 credits. Fall.

SSC 353**American Culture Evolution of the Fairy Tale Heroine in Shattering the Glass Slipper: The**

Students will study the evolution of female characters in fairy tales legends within the social cultural context of the U.S. since the 1930s, specifically heroines princesses in animated films. BA, University of Rhode Island; MA, University of South Carolina; PhD, University of Southern Mississippi

Terrick A. Andey

Interim Chair and Associate Professor of Pharmaceutical Sciences, Worcester/Manchester
BS, Kwame Nkrumah University of Science and Technology (Ghana), PhD, Florida A & M University

Michael Angelini

Professor of Pharmacy Practice, Boston
BA, MA, Boston University; BS, PharmD, MCPHS University

Stella Athanas

Assistant Professor of Pharmacy Practice, Boston
PharmD, MCPHS University

Timothy Aungst

Associate Professor of Pharmacy Practice, Worcester/Manchester
PharmD, Wilkes University Nesbitt School of Pharmacy

Cheryl Babin

Associate Director of Clinical Education; Associate Professor of Physical Therapy
BS, Physical Therapy Certificate, MHA, CAGS, Simmons University; DHS, MCPHS University

Larry Baitch

Professor of Optometry; Associate Dean for Research
OD, Illinois College of Optometry; PhD, University of Houston

Ned Barden

Associate Professor of Biology
BS, Iowa State University; MS, PhD, University of Wisconsin–Madison

Phyllis Baron

Assistant Professor of Pharmaceutical Business and Administrative Sciences, Boston
BA, Hunter College; MA, Southern Connecticut University; MBA, Suffolk University

Donna Bartlett

Associate Professor of Pharmacy Practice, Worcester/Manchester
BA, Assumption College; BS, PharmD, MCPHS University

Michael Bear

Assistant Professor of Pharmacy Practice, Worcester/Manchester
BS, Boston University; PharmD, University at Buffalo School of Pharmacy and Pharmaceutical Sciences

Paul Belliveau

Interim Dean, School of Pharmacy, Worcester/Manchester; Professor of Pharmacy Practice, Worcester/Manchester
BS, University of Rhode Island; PharmD, MCPHS University

Danielle Bellows

Assistant Professor of Physical Therapy
BS, Physical Therapy Ithaca College, MHS; DHSc, University of Indianapolis

Anelsa Beqo

Assistant Professor of Pharmacy Practice, Boston
PharmD, MCPHS University

Swati Betharia

Interim Chair of Pharmaceutical Sciences; Associate Professor of Pharmacology and Toxicology, Boston
BPharm, Delhi Institute of Pharmaceutical Sciences and Research, New Delhi, India; PhD, MCPHS University

Snehal Bhatt

Professor of Pharmacy Practice, Boston
PharmD, Northeastern University

Carlene Blais

Carlene Blais, DNP, RN-BC, Assistant Professor and Associate Dean, BSN Program Administrator, Manchester
BSN, Rivier University; MSN, Walden University; DNP, Walden University

Mary Buchinger Bodwell

Professor of English and Communication Studies
BS, Northern Michigan University; MA, The Ohio State University; PhD, Boston University

Mark Böhlke

Faculty Associate of Pharmaceutical Sciences, Boston
BS, MS, University of Michigan, Ann Arbor; PhD, University of Illinois at Chicago

Kara Bonaceto

Director of Experiential Education Coordinator; Associate Professor of Pharmacy Practice, Worcester/Manchester
BS, PharmD, University of Rhode Island

Irena Bond

Library Manager, Blais Family Library; Associate Professor of Library and Learning Resources, Worcester
MA, Southwestern University (Bulgaria); MSLIS, Simmons University

Addison Bouchard

Faculty Associate of Chemistry
BS, Saint Michael's College; MS, Dartmouth College

Linda D. Boyd

Professor of Dental Hygiene
AS, Mt. Hood Community College; BS, Oregon State University; MS, Tufts University; EdD, Portland State University

Kate Bresonis

Associate Dean, Arts and Sciences; Assistant Professor of English

BA, Boston College; MA, The College of New Jersey; MS, The College of Saint Rose; PhD, University of Massachusetts, Boston

Virginia Briggs

Associate Professor of Public Health

BA, Biology, California State University, Long Beach; MA, Environmental Science, Boston University; MS, University of Massachusetts, Amherst; PhD, University of Massachusetts Medical School, Graduate School of Biomedical Sciences

Karen Britt

Associate Professor School of Nursing

AS, Adirondack Community College; BS, Russell Sage College; MSN, University of New Hampshire; DNP, Capella University

Nalini V. Broadbelt

Assistant Professor of Biology and Chemistry

BA, MA, City University of New York; PhD, Weil Cornell Medical College

Maria Broderick

Director of Clinical Education: Program Director, Doctor of Acupuncture & Integrative Health; Associate Professor, New England School of Acupuncture

BA, Cornell University; EdM, Harvard University; MAOM, New England School of Acupuncture; EdD, Harvard University

Angela Butler

Assistant Professor, School of Occupational Therapy, Manchester

BS, MS, University of New Hampshire

Corinne Butler

Assistant Professor, Lab Manager, School of Nursing-Manchester

ADN, Berkshire Community College; BSN, University of New Hampshire; MSN, Walden University

Adriana Cabrera

Assistant Professor of Pharmacy Practice, Worcester/Manchester

PharmD, University of Florida

Jacqueline Caffrey

Assistant Professor of Physician Assistant Studies, Manchester/Worcester

BS, University of Massachusetts; MPAS, MCPHS University

Robert B. Campbell

Professor of Pharmaceutical Sciences, Worcester/Manchester

BSBA, Niagara University; MS, PhD, University at Buffalo/RPCI, State University of New York

Nicole Carace

Experiential Education Coordinator; Assistant Professor of Pharmacy Practice, Worcester/Manchester

BS, PharmD, MCPHS University; MHA, New England College

Katherine Carey

Associate Professor of Pharmacy Practice, Worcester/Manchester

BS, University of Massachusetts Amherst; PharmD, Midwestern University College of Pharmacy–Glendale

Catherine Carroca

Assistant Professor of Nursing, Worcester/Manchester

BSN, University of Massachusetts, Boston; MSN, University of Norwich

Heather Casteel

Instructor of English and Oral Communication

BA, Maryville College; MA, New York University; M.Ed Boston University

Erica Cataldi-Roberts

Head – Information Literacy Services, Assistant Professor of Library and Learning Resources, Boston
BA, MLIS, University of Rhode Island

Michelle Ceresia

Professor of Pharmacy Practice, Boston
BS, Albany College of Pharmacy; PharmD, Medical University of South Carolina

Patricia Cerreto

Assistant Professor of Physician Assistant Studies, Manchester/Worcester
BA, College of the Holy Cross; MPAS, Arcadia University

Xiang Qian Chang

Professor of Mathematics
BSc, Beijing University (China); PhD, Brown University

Norma Chase

Assistant Professor of Physics and Mathematics
BS, Boston State College; MS, PhD, Northeastern University

Anne Chiaegato

Assistant Professor, School of Physician Assistant Studies-Boston
BA, LaSalle University; MS PA, Arcadia University

Anne Chouinard

Assistant Professor of Physician Assistant Studies, Manchester/Worcester
BS, Bridgewater University; MHP/Physician Assistant Studies, Northeastern University

Judy Cheng

Chair, Pharmacy Practice; Professor of Pharmacy Practice, Boston
BS, University of Toronto (Canada); MPH, Mount Sinai School of *Medicine*; PharmD, University of the Sciences in Philadelphia

Sarah Chevrefils

Assistant Academic Fieldwork Coordinator, Instructor, School of Occupational Therapy, Manchester
BS, University of New Hampshire, MS, University of New Hampshire

Anne Chiavegato

Assistant Professor, Physician Assistant Studies, Boston
BA, LaSalle University; MSPAS, Arcadia University

Ji Hyui Choi

Associate Professor, Pharmacy Practice
BS, Pharmaceutical Sciences, Duquesne University Mylan School of Pharmacy; Doctor of Pharmacy, Duquesne University Mylan School of Pharmacy

Monica Chuong

Professor of Pharmaceutical Sciences, Boston
BS, National Taiwan University (Taiwan); MA, New York University; PhD, University of Houston

Stephen Cina

Assistant Professor, New England School of Acupuncture, Worcester
BS, Northeastern University; MAOM, New England School of Acupuncture; DAIH, MCPHS University

Edith Claros

Associate Professor of Nursing,
BSN, MSN, Worcester State University; PhD, Walden University

William Cole-French

Instructor of English as a Second Language
EdM TESOL, Boston University

Nancy Coletta

Professor of Optometry; Associate Dean for Academic Programs
BS, Providence College; BS, OD, Pennsylvania College of Optometry; PhD, University of California, Berkeley

Leonard Contardo

Assistant Professor of Optometry
BS, University of Massachusetts, Boston; OD, New England College of Optometry

Stephanie L. Conway

Associate Professor of Pharmacy Practice, Worcester/Manchester
PharmD, MCPHS University

Christopher Cooper

Associate Professor, Physician Assistant Studies, Boston
BS and Certificate in PA, University of Texas Southwestern Medical Center at Dallas; MPAS, University of Nebraska Medical Center College of Medicine

Maryann R. Cooper

Professor of Pharmacy Practice, Worcester/Manchester
PharmD, Northeastern University

Valerie Coppenrath

Associate Professor of Pharmacy Practice, Worcester/Manchester
AS, Ferris State University; PharmD, Wayne State University

R. Rebecca Couris

Professor of Nutrition Science and Pharmacy, Boston
BS, MS, MCPHS University; PhD, Tufts University

Debra Crandell

Clinical Coordinator-General, Worcester; Assistant Professor of Diagnostic Medical Sonography
BS, California State University, San Bernardino; MS, California State University, East Bay; Ed.D Concordia University, Portland, OR

Renee Crizer

Assistant Professor, School of Nursing-Worcester
PhD, University of Massachusetts-Amherst

Steven Crosby

Assistant Dean of Student Engagement and Success; Associate Professor of Pharmacy Practice, Boston
BS, MCPHS University; MA, Boston University

Jason E. Cross

Associate Professor of Pharmacy Practice, Worcester/Manchester
PharmD, University of Rhode Island

Sunnia Ko Davis

Instructor of English as a Second Language, Director of Undergraduate Bridge Program and Director of the English Language Resource Center
BA, University of California, Los Angeles; MA, Teachers College, Columbia University

Aimee Dawson

Associate Professor of Pharmacy Practice, Worcester/Manchester
BS, PharmD, University of Connecticut

Kathryn Deliso

Assistant Professor of Optometry; Director of Externships, School of Optometry
BA, Wheaton College; OD, The New England College of Optometry

Joseph DeMasi

Chair, Department of Mathematics and Natural Sciences; Professor of Biology, Director of Medical and Molecular Biology Program

BS, Carnegie Mellon University; PhD, Cornell University

Edward DePierro

Faculty Associate of Chemistry

BS, Boston State College; MS, MCPHS University

Nicole Dettmann

Associate Professor, Associate Program Director and Director of Clinical Education, Physician Assistant Studies, Manchester/Worcester

BA, Columbia University; MS, MPH, George Washington University; DScPAS, MCPHS University

Robert DiCenzo

Dean, Professor, School of Pharmacy, Boston

BS, University of Buffalo; PharmD, Albany College of Pharmacy and Health Sciences

Amy Dicupero

Assistant Director, Post BS PharmD Pathway; Assistant Professor of Pharmacy Practice

BS, MCPHS University; PharmD, MCPHS University; MEd, University of Massachusetts

Paul DiFrancesco

Associate Professor of Pharmacy Practice; Associate Dean of Pharmacy Experiential Education, Boston

BS, Northeastern University; MPA, Suffolk University; EdD, University of Massachusetts Boston

Kasey Dillon

Assistant Professor of Physician Assistant Studies, Manchester/Worcester

BS, University of New Hampshire; MPAS, AT Still University

Bryan Doldt

Program Director-Echocardiography/Assistant Professor of Diagnostic Medical Echocardiography

BS, Bridgewater State College, Bridgewater

Christine Dominick

Associate Dean of Dental Hygiene, Worcester; Professor of Dental Hygiene

BS, Northeastern University; MOcEd, University of New Hampshire

Joanne Doucette

Associate Director - University Libraries; Associate Professor of Library and Learning Resources, Boston

BA, Emmanuel College; MS, Boston University; MS, Emerson College; MS, Simmons University

Gerard G.M. D'Souza

Assistant Dean of Assessment and Accreditation, School of Pharmacy; Professor of Pharmaceutics, Boston

B Pharm, Goa College of Pharmacy (India); MS, PhD, Northeastern University

Kaelen Dunican

Professor of Pharmacy Practice and Assistant Dean of Interprofessional Education BS, PharmD, MCPHS University

Cheryl Durand

Professor of Pharmacy Practice, Worcester/Manchester; Vice-Chair of Pharmacy Practice

PharmD, Northeastern University

Lana Dvorkin-Camiel

Director of Applied Natural Products; Professor of Pharmacy Practice, Boston

BS, PharmD, MCPHS University

Kelly Ebert

Director, Radiation Therapy Program; Associate Professor of Radiation Therapy

BS, Baker College; MPA, University of Michigan

Tewodros Eguale

Professor of Pharmacoepidemiology & Health Policy, Boston

MD, Jimma University; MS, PhD, McGill University

Bruce Elliott

Associate Professor of Physical Therapy

BA, Annhurst College; BS, University of Hartford; MS, University of Connecticut; DPT, Simmons University; EdD, University of Hartford

Crystal N. Ellis

Assistant Professor of Biology; Director, Arts and Sciences Honors Program

BS, Stonehill College; PhD, University of New Hampshire

Laura Ekstrand

Assistant Professor of Physician Assistant Studies, Manchester/Worcester

BA, MA, University of North Carolina; MPAS, MCPHS University

Erin Faraclas

Associate Professor of Physical Therapy

BIS, MS Physical Therapy, American International College; DPT, Temple University

Carol-Ann Farkas

Professor of English; Director, BA in Health Humanities Program; Director, Writing Program

BA, MA, Simon Fraser University (Canada); PhD, University of Alberta (Canada)

Michael Farah

Program Director Radiography; Assistant Professor of Radiography

BS, Saint Joseph's College of Maine; MS, Saint Joseph's College of Maine

Denise Finch

Assistant Professor, School of Occupational Therapy, Manchester

BS, University of New Hampshire, OTD, Boston University

Stefanie Forman

Assistant Professor of Pharmacy Practice, Boston

PharmD, University of Wisconsin-Madison

Danielle Fournier

Assistant Professor of Physician Assistant Studies-Manchester/Worcester

BS, Worcester State College; MPAS, Northeastern University

Erika Felix-Getzik

Professor of Pharmacy Practice, Boston

PharmD, University of Pittsburgh

Joseph Ferullo

Coordinator, Advanced Practice Management Laboratory; Associate Professor of Pharmacy Practice, Boston

BS, PharmD, MCPHS University

Marie Ficociello

Clinical Coordinator; Assistant Professor of Diagnostic Medical Echocardiography

BS, Bridgewater State College, Bridgewater; MA Tufts University, Boston

Denise Finch

Assistant Professor of Occupational Therapy

Fellow American Occupational Therapy Association

BS, University of New Hampshire; OTD, Boston University

Frederick Frankhauser

Chair Pharmaceutical Business and Administrative Sciences, Program Director Regulatory Affairs and Health Policy and Program Director Clinical Research, Associate Professor, Pharmaceutical Business and Administrative Sciences

BS, MCPHS University; MBA, Fitchburg State University; JD, Western New England University

Olivia Freeman

Academic Fieldwork Coordinator, Assistant Professor, School of Occupational Therapy, Manchester

BS, Dalhousie University, MA, Rivier University

Shanti Freundlich

Assistant Director for Library Assessment and Online Learning; Assistant Professor of Library and Learning
BA, Connecticut College; MLIS, Simmons University

Carolyn J. Friel

Professor of Medicinal Chemistry, School of Pharmacy-Worcester/Manchester
BS, University of Rhode Island; PhD, Northeastern University

Elizabeth V. Fuller

Associate Director; Professor of Physical Therapy
BS, Physical Therapy, University of Connecticut; MS, Physical Therapy, Texas Women's University; EdD, Nova Southeastern University

Mikal Gaines

Assistant Professor of English
BA, Hampton University; MA, The College of William and Mary; PhD., The College of William and Mary

Ali Galindo

Associate Professor, School of Nursing-Boston

Roseann Gammal

Associate Professor of Pharmacy Practice, Boston
BS, Worcester Polytechnic Institute; PharmD, MCPHS University

Martha N. Gardner

Associate Professor of History and Social Science
BA, Brown University; PhD, Brandeis University

Sanjaykumar Gayakwad

Associate Professor of Pharmaceutics, Boston
BSc, MSc, Maharaja Sayajirao University; PhD, Mercer University

John Geary

Associate Professor of Physician Assistant Studies, Manchester/Worcester
BS, Boston University; MPAS, Touro University

Lori Giblin-Scanlon

Associate Dean for Clinical Affairs, Associate Professor of Dental Hygiene
BS, University of Rhode Island; MS, DHSc, MCPHS University

David Gilmore

Director, Nuclear Medicine Technology Program, Associate Professor
AS, Bluefield State College; BS, Old Dominion University; MS, Virginia Tech; EdD, Northeastern University

Catherine Gleeson

Instructor of English as a Second Language
MAL, University of Massachusetts Boston

Matthew Gochan

Assistant Professor of Physics, School of Arts and Sciences
BS, SUNY Binghamton; PhD, Boston College

Jennifer D. Goldman

Professor of Pharmacy Practice, Boston
BS, PharmD, MCPHS University

Carroll-Ann Goldsmith

Professor of Pharmaceutical Sciences, Worcester/Manchester
BA, University of New Hampshire; MS, Boston University; ScD, Harvard University

Patrick Gordon

Assistant Professor of Chemistry, School of Arts and Sciences

PhD, University of Manitoba

Susan Gorman

Professor of English

AB, Georgetown University; MA, PhD, University of Michigan

James Goss

Assistant Professor of Healthcare Administration, BS in Healthcare Management Program Coordinator

BS, Chapman University; BS, Loma Linda University; MHA, Chapman University; DHA, Central Michigan University

Evelyn Graeff

Associate Professor and Clinical Coordinator, School of Physician Assistant Studies – Boston

BS, University of Pittsburgh; MEd, Boston University; DHSc, A.T. Still University

Carrie Graham

Faculty Associate, Department of Pharmaceutical Sciences, Worcester/Manchester; Director, Service-Learning and Civic Engagement

MEd, Worcester State University

Mary-Kathleen Grams

Director, Post-BS PharmD Pathway; Associate Professor of Pharmacy Practice, Boston

BS, Northeastern University; PharmD, MCPHS University

Melanie Grandy

Faculty Associate of Biology; Biology Laboratory Manager

BS, Northeastern University; MS, Boston College

Tammy L. Gravel

Dean of the School of Nursing and Chief Nurse Administrator BA, BSN, Salve Regina University; MSN, University of Massachusetts Worcester; EdD, Walden University

Michael Greene

Faculty Associate, English Language Services

BS, Bates College; MDiv, Gordon-Conwell Theological Seminary; MEd, University of Massachusetts Amherst

Philip Grgurich

Associate Professor of Pharmacy Practice, Boston

PharmD, MBA, Drake University

Keri Griffin

Chair, Department of Humanities, Behavioral and Social Sciences; Associate Professor of Public Health; Director, BS in Public Health Program

BS, Clark Atlanta University; MPH, University of Alabama at Birmingham; MPA, Columbus State University; PhD, University of Alabama at Birmingham

Auston Habershaw

Instructor of English

BA, Boston College; MFA, Emerson College

Carolyn Hall

Assistant Professor of Pharmacy Practice, Boston

BA, BS, College of Charleston, PharmD, MCPHS University

Mengli Lina Han

Assistant Professor of Optometry

BS, University of Victoria, BC; OD, Illinois College of Optometry

Christy Harris

Associate Professor of Pharmacy Practice, Boston

BS, PharmD, University of Tennessee

Janet Hart

Professor of Biology

BA, MA, University of California, Santa Barbara; PhD, Université de Paris-Sud XI (France)

Robin A. Harvan

Director, BSHS Program; Professor of Health Sciences

AAS, Felician College, New Jersey; BS, Montclair State University; EdM, EdD, Rutgers University

Devan Hawkins

Instructor of Public Health

BS, University of Massachusetts, Lowell; MS, University of Massachusetts, Lowell; ScD University of Massachusetts Lowell

Cynthia D. Heden

Interim Assistant Dean School of Nursing Manchester; Assistant Professor

BSN, MS, University of the Incarnate Word; DNP, MSN, Regis University

Joy N. Heising

Assistant Professor of Chemistry

BA, Bryn Mawr College; PhD, Michigan State University

Bridget Hendricks

Associate Professor of Optometry

BS, Spelman College; MS, OD, New England College of Optometry

Janelle Herren

Assistant Professor of Pharmacy Practice, Worcester/Manchester

PharmD, MCPHS University

Jeffrey Hill

Department Chair, Diagnostic Medical Sonography Program

BS, Becker College

Dien Ho

Professor of Philosophy and Healthcare Ethics;

BA, Brandeis University; MA, Tufts University; PhD, City University of New York

Evan Horton

Associate Professor of Pharmacy Practice, Worcester/Manchester

PharmD, Shenandoah University

Nate Horowitz-Willis

Assistant Professor of Public Health

BS, University of Dayton; MPA, American Public University; MPH, Western Kentucky University; DrPH, University of Arkansas for Medical Sciences

Craig Hricz

Associate Professor of Physician Assistant Studies, Manchester/Worcester and Assistant Program Director

Manchester/Worcester

BS, MPAS, Touro College

Timothy R. Hudd

Professor of Pharmacy Practice, Boston

BS, PharmD, MCPHS University

Amy Hull

Associate Dean, Professor, New England School of Acupuncture, Worcester

MAOM, New England School of Acupuncture; MEd, Cambridge College

Julie Hurley

Assistant Professor of Physician Assistant Studies, Boston

BA, University of Notre Dame; MS, Northeastern University, DSc PAS, MCPHS University

Nancy Hurwitz

Associate Professor and Director of Clinical Education, School of Physician Assistant Studies – Boston
BS, Tufts University; PA-MHP, Northeastern University, DSc PAS, MCPHS University

Angela Imperioli

Assistant Professor of Optometry
BS, University of Waterloo; OD, New England College of Optometry

Susan Jacobson

Associate Professor of Pharmacy Practice, Boston
BS, MCPHS University; MS, Northeastern University; EdD, Nova Southeastern University

Jami Jain

Assistant Professor of Pharmacy Practice-Boston
PharmD, University of Louisiana

Nevila Jana

Instructor of Chemistry
BS, PhD, University of Tirana (Albania)

Gretchen Jehle

Experiential Education Coordinator; Associate Professor of Pharmacy Practice, Worcester/Manchester
BS, Providence College; PharmD, MCPHS University

Susan Jenkins

Associate Professor of Dental Hygiene
AS Middlesex Community College; BS, Northeastern University; MS, PhD, Simmons University

Carol Johnson

Instructor of Chemistry
BA, University of California, San Diego; PhD, University of California, Davis

Kathryn G. Jones

Assistant Professor, Assistant Program Director, School of Physician Assistant Studies–Boston
BS, Northeastern University; MS, MCPHS University, DSc PAS, MCPHS University

Jillian Joseph

Assistant Professor of Physician Assistant Studies-Manchester/Worcester
BS, UMass Boston; BA, UMass Amherst; MPAS, MCPHS University

Christopher Joyce

Assistant Professor of Physical Therapy
BS, DPT, Northeastern University, PhD, MGH Institute of Health Professions

Claudia Kale

Assistant Professor of Biology
BS and BA, Stonehill College; PhD, Vanderbilt University Medical Center

Abir Kanaan

Assistant Dean of Curriculum and New Programs; Professor of Pharmacy Practice, Worcester/Manchester
PharmD, MCPHS University

Richard B. Kaplan

Dean of Library and Learning Resources; Director of Libraries; Associate Professor of Library and Learning Resources
BA, MLS, University at Albany, State University of New York

Paul V. Kaplita

Professor of Pharmaceutical Sciences, Worcester/Manchester; Assistant Dean of Graduate Studies
BS, University of Connecticut; PhD, University at Buffalo, State University of New York

Kevin R. Kearney

Professor of Pharmaceutical Sciences and Director of Service Learning, Worcester/Manchester
BS, MTh, University of Notre Dame; MS, MPhil, PhD, Yale University

Frances Keech

Dean, School of Medical Imaging and Therapeutics (SMIT); Program Director and Associate Professor of Nuclear Medicine Technology
RT(N) Certificate, Sydney Technical College (Australia); MBA, Simmons University; DHSc, NOVA Southeastern University

Alicia Kelley

Interim Program Director, School of Physician Assistant Studies – Boston
MS, BS, MCPHS University; BA, University of Colorado Boulder, DScPAS MCPHS University

Charles J. Kelley

Associate Professor of Chemistry
BA, St. Joseph's College; PhD, Indiana University

John (Jack) Kelly

Medical Director, Clinical Assistant Professor, Physician Assistant Studies, Manchester/Worcester and Boston
BS, Tulane University; MD, Tulane Medical School

Amanda C. Kentner

Professor of Psychology
BA, PhD, University of Ottawa (Canada)

Stephen G. Kerr

Interim Assistant Provost for International Affairs; Professor of Medicinal Chemistry
BSc, St. Xavier's College (India); BSc (Tech), University of Bombay (India); PhD, University at Buffalo, State University of New York

Alia Khalaf

Assistant Professor of Optometry
BS, Northeastern University; OD, New England College of Optometry

Dan Kiel

Associate Professor of Pharmacology, Boston
BS, MCPHS University; MS, Northeastern University; PhD, Columbia University

Paul J. Kiritsy

Associate Professor of Pharmacy Practice, Boston
BS, MS, PharmD, MCPHS University

Frances E. Kistner

Program Director and Associate Professor of Physical Therapy
BS, University of Massachusetts Amherst; MS Physical Therapy, PhD, University of Miami

Maria D. Kostka-Rokosz

Assistant Dean for Academic Affairs, School of Pharmacy–Boston; Professor of Pharmacy Practice, Boston
BS, PharmD, MCPHS University

Janna Kucharski-Howard

Director of Clinical Education; Professor of Physical Therapy
BS, MS Physical Therapy, University of Massachusetts Lowell; MSM, Emmanuel College; DPT, University of Massachusetts Lowell

Steven Lachowski

Assistant Professor of Physical Therapy
BS, DPT Utica College

Anthony Lacina

Instructor of Health Sciences
BS, Eastern Nazarene College; MEd, Suffolk University; MPH, MCPHS University; DHS, MCPHS University

Greg Landry

Director BS Pharmacology & Toxicology Program, Assistant Professor of Pharmacology and Toxicology
BS, Southeastern Louisiana University; PhD, Louisiana State University

Mariana Lapidus

Reference Coordinator – DeBenedictis Library; Associate Professor of Library and Learning Resources, Boston
BA, The Academy of Culture (Russia); MLS, Simmons University

Trisha L. LaPointe

Professor of Pharmacy Practice, Boston
PharmD, Northeastern University

Lisa LaSpina

Associate Professor of Dental Hygiene
AS, Monroe Community College; BSDH, MCPHS University; MS, University of Massachusetts-Boston; DHSc, MCPHS University

Bonnie Laurent

Laboratory Manager; Associate Professor of Nursing, Worcester
BSN, Russell Sage College; MSN, Regis College

Amy Lamothe

Associate Professor of Pharmacy Practice, Worcester/Manchester
PharmD, MCPHS University

Jayne Lepage

Associate Professor of Pharmacy Practice, Worcester/Manchester
BS, MCPHS University; MPH, University of Massachusetts Amherst

Carly Levy

Director, Master of Public Health Program; Assistant Professor of Public Health
BA, MPH, Boston University; DHS, MCPHS University

A. David Lewis

Assistant Professor, School of Arts and Sciences; MHS Program Coordinator
MA, Georgetown University; PhD, Boston University

Lory Libby

Assistant Professor of Dental Hygiene
AS, Northeastern University; MS, MCPHS University

Allissa Long

Assistant Professor of Pharmacy Practice
PharmD, Western New England University College of Pharmacy and Health Sciences

Magdalena Luca

Professor of Mathematics
BSc, Transylvania University (Romania); MSc, University of Manitoba (Canada); PhD, University of British Columbia (Canada)

Ann M. Lynch

Professor of Pharmacy Practice, Worcester/Manchester
BSPHarm, Northeastern University; PharmD, MCPHS University

Matthew Machado

Professor of Pharmacy Practice, Boston
PharmD, MCPHS University

Stephanie Maclary

Assistant Professor of Physician Assistant Studies, Manchester/Worcester and Director of Didactic Education
MHS, Drexel University; RN, Beebe School of Nursing

Rebecca Macy

Instructor of Psychology, School of Arts and Sciences
MA, Lesley University

Susan S. Mahnken

Interlibrary Loan and Copyright Services Librarian; Faculty Associate of Library and Learning Resources
BA, Marietta College; JD, New England School of Law; LLM, Boston University School of Law; MLS, Simmons University

Jami B. Parsons Malloy

Associate Professor of Optometry
BS, Biology, University of Hawaii at Hilo; OD, Illinois College of Optometry

Prashant Mandela

Assistant Professor of Pharmacology, Department of Pharmaceutical Sciences, Worcester/Manchester
BS, Osmania University, Hyderabad, India; PhD, University of Mississippi Medical Center

Linda Martino

Assistant Professor of Physician Assistant Studies, Manchester/Worcester
BS, Rutgers University; MPAS, Touro College

Colleen Massey

Faculty Associate, Department of Pharmacy Practice, Worcester/Manchester; Director of Operations, Pharmacy Outreach Program
MS, Worcester State University

Michele Matthews

Professor of Pharmacy Practice, Boston
PharmD, MCPHS University

Jennifer McCarthy

Assistant Professor, Forsyth School of Dental Hygiene
AS, Dental Hygiene, Middlesex Community College; MS, Dental Hygiene, Forsyth School of Dental Hygiene/MCPHS University

Sarah McCord

Informatics and Science Librarian; Associate Professor of Library and Learning Resources
BA, MLIS, University of Wisconsin–Madison; MPH, MCPHS University

Cynthia McDermott

Faculty Associate, School of Physician Assistant Studies, Boston
BS, Albion College; PhD, Wayne State University

Matthew McDonald

Assistant Professor of Physician Assistant Studies, Boston
BS, Springfield College; MSPA, Springfield College

Gayle McGinty

Interim Associate Dean, BSN Administrator, Associate Professor
RN, Madonna University; MSN Ed, Framingham State University; DNP, Regis College

Deborah McManus

Associate Dean; Assistant Professor of Nursing, Boston
RN, MSN, Western Governor's University

Ewan McNicol

Associate Professor of Pharmacy Practice, Boston
BS, Strathclyde University, Glasgow, Scotland; MS, Tufts University; PharmD, MCPHS University

Ahmed S. Mehanna

Professor of Medicinal Chemistry, Boston
BS, University of Alexandria (Egypt); MS, University of Tanta (Egypt); PhD, University of Pittsburgh

Rania Mekary

Associate Professor of Pharmacoepidemiology & Health Policy, Boston
BS, MS, American University of Beirut; MS, PhD, Louisiana State University

Francis Melaragni

Director, Pharmaceutical Healthcare Business Program; Associate Professor of Pharmaceutical Business and Administrative Sciences
BS, Bentley College; MBA, Babson College

Matthew Metcalf

Assistant Professor of Medicinal Chemistry, Worcester/Manchester
BA, Juniata College; PharmD, PhD, University of Maryland

Mattia M. Migliore

Associate Professor of Pharmacology and Toxicology, Boston
BS, MCPHS University; MS, PhD, Northeastern University

Jennifer Miller

Interim Program Director-General; Assistant Professor of Diagnostic Medical Sonography
BS, Rochester Institute of Technology; MHS, MCPHS University

Amee Mistry

Director Postdoctoral Biopharmaceutical Industry Fellowship Program; Professor of Pharmacy Practice, Boston
PharmD, Albany College of Pharmacy

Afsoon Moktar

Associate Professor, School of Physician Assistant Studies – Boston
BSN, University of Tehran; BHS, CT (ASCP), University of Louisville; EMBA, Bellarmine University; MS, PhD, University of Louisville

Rita Morelli

Experiential Education Coordinator; Associate Professor of Pharmacy Practice, Boston
BS, PharmD, MCPHS University

Anna K. Morin

Associate Provost Worcester/Manchester and Professor of Pharmacy Practice
BA, Cornell University; BSPHarm, PharmD, University of Rhode Island

Brianne Morin

Experiential Education Coordinator; Assistant Professor of Pharmacy Practice, Worcester/Manchester
PharmD, MCPHS University

Amanda Morrill

Associate Professor of Pharmacy Practice, Worcester/Manchester
PharmD, University of Rhode Island

Dennis Moseman

Dean, Professor, New England School of Acupuncture
BS, Life University; MS, New York College of Health Professions, DC, Life University

Oussayma Moukhachen

Associate Professor of Pharmacy Practice, Boston
BS, PharmD, MCPHS University

Jeanine K. Mount, *Associate Provost for Academic and Professional Affairs; Clinical Professor of Pharmacy*
BS Pharm, MS, PhD, Purdue University

Janina Mueller

Metadata and Digital Initiatives Librarian; Assistant Professor of Library and Learning Resources,
BA, St. Thomas University; MA, University of Sussex; MLS, University of Toronto

S. Mimi Mukherjee

Associate Professor of Pharmacy Practice, Worcester/Manchester
BS, PharmD, University of Wisconsin–Madison

Christina Mullikin

Assistant Professor of Healthcare Administration, DHA Program Coordinator
MBA, Union College

Irene Murimi-Worstell

Assistant Professor of Pharmacoepidemiology & Health Policy, Boston
BS, Massachusetts Institute of Technology; MA, Yale University; PhD, University of Florida

Patricia M. Murray

Patricia Murray, DHS, MSN, FNP-BC, Interim Associate Dean of Accreditation and Assessment, Associate Professor and Family Nurse Practitioner Track Coordinator AD, Endicott College; BSN, MSN, University of Massachusetts Lowell; DHS, MCPHS University

Yulia Murray

Associate Professor of Pharmacy Practice, Boston
PharmD, MCPHS University

Jana Murry

Assistant Professor of Pharmacy Practice-Boston
PharmD, MCPHS University

Maryke N. Neiberg

Dean, School of Optometry; Associate Professor of Optometry
OD, New England College of Optometry

Christian Nelson

Associate Professor of Communication Studies
BA, Beloit College; MA, PhD, University of Wisconsin–Madison

Samar Nicolas

Assistant Professor of Pharmacy Practice, Worcester/Manchester
PharmD, Lebanese American University

Lori Nugent

Program Director- Magnetic Resonance Imaging Assistant Professor of Magnetic Resonance Imaging
AS, New Hampshire Technical Institute; BS, MEd, Northeastern University; DHS, MCPHS University

Erin O’Hora

Clinical Coordinator-General, Boston; Assistant Professor of Diagnostic Medical Sonography Program
AS, Moore Norman Technology Center, Oklahoma; BS, Oklahoma State University

Kathleen P. O’Leary

Associate Professor of Optometry
BS, Juniata College; OD, Pennsylvania College of Optometry

Uhlee Oh

Assistant Professor of Dental Hygiene
BS, MS, University of North Carolina at Chapel Hill

Phung C. On

Associate Professor of Pharmacy Practice, Boston
PharmD, MCPHS University

Scott Orrahood

Associate Professor, School of Physician Assistant Studies – Boston
AS, Northern Virginia Community College; BS, PA Studies, University of Texas Health Science Center at San Antonio; MPAS, University of Nebraska College of Medicine; Emergency Medicine PA Fellowship/GME, Madigan Army Medical Center/University of Washington Medical Center

Carolyn Parker

Interim Director of Simulation and Laboratories and Assistant Professor, School of Nursing-Manchester
ADN, Rivier College; BS, Keene State; MSN, Sacred Heart University

Janki Patel

Clinical Coordinator – Radiation Therapy, School of Medical Imaging and Therapeutics

Sheuli Peden

Faculty Associate of Biology
BS, Florida State University; MA, Boston University

Kristeen Perry

Associate Professor of Dental Hygiene
AS, Northeastern University; BSDH, MCPHS University; MSDH, University of Bridgeport

Helen Pervanas

Professor of Pharmacy Practice, Worcester/Manchester
BS, PharmD, MCPHS University

Kristen Petersen

Associate Professor of History and Social Sciences
BA, Brandeis University; MA, University of Massachusetts Boston; MA, PhD, Brown University

Ryan Piccinin

Clinical Coordinator; Assistant Professor of Radiography Program
BS, MCPHS University; BS, University of Massachusetts at Boston

Alejandro Pino-Figueroa

Associate Professor of Pharmaceutical Sciences-Boston
BS, Catholic University (Peru); MS, University of Liege (Belgium); PhD, MCPHS University

Anthony Pollano

Faculty Associate, Department of Pharmaceutical Sciences, Worcester/Manchester
BS, MCPHS University

Mary Potorti

Assistant Professor of Politics and Social Sciences
BA, University of Maryland; PhD, Boston University

Zachary Poulos

Instructor of Chemistry
BS, MCPHS University; MS, Indiana University

Ronny Prierer

Professor of Medicinal Chemistry, Boston
PhD, McGill University

Jennifer Prisco

Experiential Education Coordinator; Associate Professor of Pharmacy Practice, Boston
BA, University of Massachusetts Amherst; PharmD, MCPHS University

Lori E. Rainchuso

Professor, School of Arts and Sciences
BA, Augusta State University; ASDH, MS, University of New Haven; DHSc, A.T. Still University

Shankaran Ramaswamy

Associate Professor of Optometry, Worcester
BS Optom, Elite School of Optometry; PhD, University of Waterloo

Ashwini Ranade

Assistant Professor of Public Health, Boston

MA, Rangoonwala College of Dental Sciences and Research Center, Pune, India; MPH, PhD, Northeastern University

Kenneth A. Richman

Professor of Philosophy and Healthcare Ethics
BA, Haverford College; MA, PhD, Rutgers University

Amy Ricupero

Assistant Professor and Assistant Director of Post BS PharmD Program, Pharmacy Practice
Master of Education, University of Massachusetts – Boston; Doctor of Pharmacy, Massachusetts College of Pharmacy and Health Sciences

Lisa Riley

Assistant Professor, Physician Assistant Studies, Boston
BS, Russell Sage College; PA, Albany Medical College-Hudson Valley

Brian Rittenhouse

Director, PEP Program, Professor of Pharmacoepidemiology & Health Policy, Boston
BA, Oberlin College; MS, PhD, University of Wisconsin–Madison

Tiela Robert

Assistant Professor of Diagnostic Medical Sonography, School of Medical Imaging and Therapeutics
BS, Southern Vermont College; DMS Certificate, Hudson Valley Community College

Heidi N. Robertson

Assistant Professor, School of Occupational Therapy, Manchester
BS, University of New Hampshire; OTD, Quinnipiac University

Dorothea Rudorf

Professor of Pharmacy Practice, Boston
BS, PharmD, MCPHS University

Lauren Ruelens

Assistant Professor of Psychology
BSc University of Toronto; MS, PHD, Tulane University

Jessica Rydingsward

Assistant Professor, School of Physical Therapy
BA, Biology, Bowdoin College. DPT, Physical Therapy, MGH Institute of Health Professions

Meredith St. John

Associate Professor, New England School of Acupuncture, Worcester
BA, The University of Chicago; MAc, New England School of Acupuncture

Nikhil Sangave

Assistant Professor of Pharmacy Practice, Boston
PharmD, MCPHS University

Marion Santos

Manager and Assistant Professor of Nursing, School of Nursing
RN, St. Elizabeth's Hospital School of Nursing; BSN, MSN, Framingham State University

David Schnee

Vice Chair, Pharmacy Practice, Professor of Pharmacy Practice, Boston
PharmD, MCPHS University

Rachel R. Schneider

Instructor of English
BA, Hamilton College; MA Boston University

Sheila Seed

Professor and Chair of Pharmacy Practice, Worcester/Manchester
BS, MCPHS University; MPH, University of Massachusetts Amherst; PharmD, Idaho State University

Alissa Segal

Professor of Pharmacy Practice, Boston; Director, School of Pharmacy-Boston PharmD Honors Program
PharmD, Drake University

Alok Sharma

Professor of Pharmaceutical Sciences, Worcester/Manchester
BS, Birla Institute of Technology (India); MS, Panjab University (India); PhD, Northeastern University

Rick Shifley

Assistant Professor of Behavioral Social Sciences
BA, Ohio Northern University; MDiv, Boston University; PhD, Brandeis University

Mahesh Shivanna

Professor of Optometry
MPS, Bangalore University (India); PhD, Indiana University

Michael Short

Assistant Professor, New England School of Acupuncture, Worcester
BA, Harvard College; MAOM, New England School of Acupuncture

Matthew A. Silva

Professor of Pharmacy Practice, Worcester/Manchester
PharmD, Northeastern University

Richard J. Silvia

Professor of Pharmacy Practice, Boston
PharmD, University of Rhode Island

C. Douglas Simmons

Program Director and Professor, School of Occupational Therapy, Manchester
Fellow American Occupational Therapy Association
BS, State University of New York (SUNY) Buffalo; MS, University of New Hampshire; PhD, Nova Southeastern University

Dianne Smallidge

Interim Dean, Forsyth School of Dental Hygiene; Associate Professor of Dental Hygiene
AS, Westbrook College; BS, University of New Hampshire; MDH, University of Tennessee Health Science Center; EdD, Plymouth State University

Robert Smethers

Assistant Professor, of Dental Hygiene
ASDH, BASDH, St. Petersburg College; MSDH, MCPHS University

Irina Smilyanski

Associate Professor of Dental Hygiene, Worcester
AS, Quinsigamond Community College; MSc, Kharkov State University (Ukraine); MSDH, MCPHS University

Carla Jean Smith

Assistant Professor, School of Nursing-Manchester
ADN, Rivier College; BSN, Western Governors University; MSN, Western Governors University

Loriel Solodokin

Assistant Professor of Pharmacy Practice, Boston
BA, Yeschiva University; PharmD, University of Illinois, Chicago

Stacie Spencer

Professor of Psychology; Director, BS in Health Psychology Program
BA, Allegheny College; MA, PhD, Northeastern University

Linda M. Spooner

Professor of Pharmacy Practice, Worcester/Manchester

BS, University of Connecticut; PharmD, University of Oklahoma

Michael Spooner

Dean, School of Healthcare Business; Assistant Professor, Healthcare Business & Health Sciences
BS, MHA, Suffolk University; EdD, Northeastern University

Anand Sridhar

Associate Professor of Medicinal Chemistry, Boston
BS, University of Mumbai, India; MS, PhD University of Mississippi

Joseph Stamm

Associate Professor of Optometry
BS, Binghamton University; OD, State University of New York

Anela Stanic

Associate Professor of Pharmacy Practice, Boston
PharmD, MCPHS University

Maria Christina Stavroulakis

Assistant Professor, School of Physician Assistant Studies-Boston
MD, University of Ioannina Medical School; Pediatric Residency, Icahn School of Medicine at Mount Sinai/ Elmhurst

Michael Steinberg

Professor of Pharmacy Practice, Director of Assessment, Worcester/Manchester
BS, Brandeis University; BS, PharmD, MCPHS University

Nancy Stern

Assistant Professor of Pharmacy, Boston
BA, Brandeis University, BS Pharmacy MCPHS

Lara Stokes

Instructor of Chemistry, Arts & Sciences
BS, Chemistry, Wilkes University; MS, Inorganic Chemistry, Massachusetts Institute of Technology

Thomas Stowell

Associate Professor of Physician Assistant Studies, Manchester/Worcester
BS, Springfield College; MA, University of Maryland; DC, Northwestern College of Chiropractic; PhD, Nova Southeastern University

Andrew Szumita

Director of Experiential Education; Assistant Professor of Pharmacy Practice, Boston
BS, PharmD, University of Rhode Island

Catherine A. Taglieri

Associate Professor of Pharmacy Practice, Boston
BS, PharmD, MCPHS University

Lisa Taglieri

Assistant Professor, Physician Assistant Studies, Boston
BS, Springfield College; MSPA, Springfield College

Lindsay Tallon

Assistant Professor of Public Health
BS, University of the South, TN; MSPH, University of North Carolina; PhD, Northeastern University

Marion Taylor

Assistant Professor of Nursing, Manchester
BSc, University of Massachusetts Lowell; FNP, MSc University of Massachusetts Lowell

Ricky Thumar

Assistant Professor of Pharmacy Practice
PharmD, MCPHS University

Jennifer Towle

Associate Professor of Pharmacy Practice, Worcester/Manchester
BS, University of New Hampshire; PharmD, MCPHS University

Brian Train

Assistant Professor of Pharmacology, Boston
BA, Washington and Jefferson College; PhD, West Virginia University

Bathri Vajravelu

Associate Professor, Physician Assistant Studies, Boston
MPH, Western Kentucky University; MBBS, Tamil Nadu Dr. M.G.R. Medical University; PhD, University of Louisville

Katrina Van Dellen

Instructor of Biology
BA, Wellesley College; PhD, Harvard University

Katherine Vuolo

Assistant Professor, School of Nursing-Worcester/Manchester

Jennifer Wade

Assistant Professor of Biology; Director, B.S. in Premedical & Health Studies Program
BA, University of Chicago; PhD, University of California, San Francisco

Greg Waldorf

Associate Dean of Clinical Programs, School of Optometry; Assistant Professor of Optometry
BS, Northeastern State University; OD, Northeastern State University College of Optometry

Michelle Webb

Assistant Professor, Physician Assistant Studies, Boston
BS, Carnegie Mellon University; MPAS, MCPHS University

Erin Wentz

Electronic Resources Librarian; Assistant Professor of Library and Learning Resources
BS, College of Saint Benedict; MLIS, Simmons University

Kristine Willett

Professor of Pharmacy Practice, Worcester/Manchester
BS, University of New Hampshire; PharmD, MCPHS University

Adrian Wong

Assistant Professor of Pharmacy Practice, Boston
PharmD, Northeastern University; MPH, Harvard T.H. Chan School of Public Health

Songwen Xie

Associate Professor of Chemistry; Director, BS in Chemistry / MS in Pharmaceutical Chemistry Program
BS, Peking University (PR China); PhD, Southern Illinois University at Carbondale

Guang Yan

Associate Professor of Pharmaceutical Sciences, Worcester/Manchester
BS, MS, Shenyang Pharmaceutical University (China), PhD University of Utah

Bing Yang

Director of Chinese Herbal Medicine and Associate Professor, New England School of Acupuncture, Worcester
BS and MD(China), Beijing University of Chinese Medicine; DAIH, MCPHS University

Danielle Yocom

Assistant Professor of Nursing, Worcester
BSN, MSN, Millersville University

Dinesh Yogaratnam

Associate Professor of Pharmacy Practice, Worcester/Manchester

PharmD, University of Rhode Island

Michelle Young

Assistant Professor of Chemistry

BS, University of Maine; MS, University of New Hampshire

Iman Zaghoul

Professor of Pharmaceutics, Boston

BS, University of Alexandria (Egypt); PhD, University of Pittsburgh

Kathy Zaiken

Professor of Pharmacy Practice, Boston

PharmD, Northeastern University

Caroline S. Zeind

Vice President for Academic Affairs/Provost; Professor of Pharmacy Practice

BA, PharmD, University of Tennessee

Hongwei Zhang

Director BSPPS Program, Associate Professor of Pharmaceutical Sciences, Boston

BS, PhD, Sichuan University (China)

MCPHS 2021-2022 Academic Calendar: All Campuses

The University reserves the right to revise these dates as needed.

Notices of any changes will be issued to students, faculty, and staff with as much lead time as possible and posted at <https://www.mcphs.edu/academics/academic-support-and-resources/registrar>. Semester start dates, semester end dates, and holidays are in bold.

Date	Event
Sunday, August 1, 2021	<u>Fall 2021 Payment Due</u>
Wednesday, September 1, 2021	Summer graduation/conferral date
Thursday, September 2, 2021	Fall semester-START
Thursday, September 2, 2021	Fall Add/Drop/Late registration-START
Monday, September 6, 2021	Labor Day Holiday [no classes]
Tuesday, September 7, 2021	Fall Add/Drop/Late registration-END
Tuesday, September 7, 2021	<u>Last day to receive 100% refund for complete Fall University withdrawal</u>
Tuesday, September 14, 2021	<u>Last day to receive 75% refund for complete Fall University withdrawal</u>
Tuesday, September 21, 2021	<u>Last day to receive 50% refund for complete Fall University withdrawal</u>
Friday, September 24, 2021	Summer semesters INCOMPLETE/grade change-DEADLINE
Tuesday, September 28, 2021	<u>Last day to receive 25% refund for complete Fall University withdrawal</u>
Monday, October 11, 2021	Indigenous Peoples' Day [no classes]
Tuesday, October 12, 2021	<u>Spring 2022 Bills Sent to Students</u>
Monday, November 8, 2021	Last day to withdraw from Fall classes
Thursday, November 11, 2021	Veterans Day Holiday [no classes]
Monday, November 15, 2021	Spring pre-registration-START
Friday, November 19, 2021	Spring pre-registration-END
Wednesday, November 24, 2021	Thanksgiving recess-START [no classes]
Sunday, November 28, 2021	Thanksgiving recess-END [classes resume]
Monday, November 29, 2021	COF-Spring pre-registration-START [Boston]
Wednesday, December 1, 2021	<u>Spring 2022 Payment-Due Date</u>
Friday, December 3, 2021	COF-Spring pre-registration-END [Boston]
Saturday, December 4, 2021	Fall semester-Last Day of Classes
Monday, December 6, 2021	Fall Final exams-START [make-up day Saturday]
Friday, December 10, 2021	Fall Final exams-END [make-up day Saturday]
Friday, December 10, 2021	Fall semester-END
Saturday, December 11, 2021	Fall semester-Final exam make-up day
Monday, December 13, 2021	Winter semester break-START
Tuesday, December 14, 2021	<u>Fall final grades</u> available to students
Wednesday, December 15, 2021	Winter graduation/conferral date
Wednesday, December 15, 2021	Winter graduation ceremony
Sunday, January 9, 2022	Winter semester break-END
Monday, January 10, 2022	Spring semester-START
Monday, January 10, 2022	Spring Add/Drop/Late registration-START
Wednesday, January 12, 2022	Spring Add/Drop/Late registration-END
Wednesday, January 12, 2022	<u>Last day to receive 100% refund for complete Spring University withdrawal</u>
Monday, January 17, 2022	Martin Luther King Holiday [no classes]
Wednesday, January 19, 2022	<u>Last day to receive 75% refund for complete Spring University withdrawal</u>
Wednesday, January 26, 2022	<u>Last day to receive 50% refund for complete Spring University withdrawal</u>
Friday, January 28, 2022	Fall semester INCOMPLETE/grade change DEADLINE

Date	Event
Wednesday, February 2, 2022	<u>Last day to receive a 25% refund for complete Spring University withdrawal</u>
Monday, February 21, 2022	President's Day [no classes]
Monday, March 7, 2022	Spring Break-START [no classes]
Monday, March 14, 2022	Spring Break-END [classes resume]
Tuesday, March 15, 2022	<u>2022-2023 Financial Aid Priority DEADLINE</u>
Friday, March 18, 2022	Last day to withdraw from Spring classes
Friday, April 1, 2022	<u>Summer 2022 Bills Sent to Students</u>
