

Professional Examinations and Licensure

MCPHS programs for licensed professions are designed to prepare students for applying for licensure throughout the United States and, to date, such programs have met individual state requirements. However, requirements for licensure and eligibility for professional examinations vary by state and are subject to change. Accordingly, MCPHS does not confirm whether its programs meet the requirements for professional licensure or professional examinations in individual states. MCPHS advises its students that it is the responsibility of each student to contact the licensing board in the state in which they intend to practice to determine the requirements for licensure in that state.
