

MCPHS
UNIVERSITY

It is my pleasure to welcome you to the MCPHS Manchester/Worcester School of Physician Assistant Studies. The faculty and staff are looking forward to participating in providing students with a rewarding and successful educational experience. Students will find the program to be rigorous and challenging but well worth the effort.

The Physician Assistant MS degree program requirements include completion of one year of didactic studies and one year of supervised full time clinical rotations at provided clinical settings. This is a demanding medical program that includes the rigors of the sciences, the challenges of the professional courses, and the performance standards of the clinical rotations, all designed to prepare each student to provide high quality medical services to the community in a caring and skillful manner.

Let me take this opportunity to once again welcome you to the School of Physician Assistant Studies at MCPHS Manchester/Worcester and to wish you success in pursuit of your academic and professional career goals.

A handwritten signature in black ink, reading "Kristy Altongy-Magee". The signature is written in a cursive style and is set against a light blue rectangular background.

Kristy Altongy-Magee, DScPAS, PA-C
