

Self-Service, Course Catalog Guide

Use **Self-Service** (<https://live-red.mcphs.edu/Student/Courses>) to access a searchable list of courses being offered via the **Subject Search** or **Advanced Search** (*recommended*).

Subject Search

The Subject Search lists all course subjects and includes a search bar to look for specific items. Select a course subject to view available courses.

Advanced Search

The Advanced Search can be used to search for courses by term, subject, location, and/or course type.

Enter your search criteria to display course/section information. Please be sure to enter the term. You may leave the subject code blank if you are unsure of the code. You will then see a list of courses. You must select a course to view the actual sections (note: there may be multiple sections of a course offered in a term).

The screenshot shows the 'Advanced Search' page for the Massachusetts College of Pharmacy and Health Sciences. The page title is 'Search for Courses and Course Sections'. There are two tabs: 'Subject Search' and 'Advanced Search', with 'Advanced Search' being the active tab. Below the tabs is the 'Catalog Advanced Search' section. It includes a 'Results View' section with radio buttons for 'Catalog Listing' (selected) and 'Section Listing'. The search criteria are organized into several rows of input fields: 'Term' (dropdown), 'Meeting Start Date' (text), and 'Meeting End Date' (text); 'Courses And Sections' (three rows of 'Subject' dropdown, 'Course number' text, and 'Section' text); 'Days Of Week' (checkboxes for Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday); 'Location' (dropdown); 'Time Of Day' (dropdown), 'Time Starts by' (text), and 'Time Ends by' (text); and 'Course Type' (dropdown). At the bottom are 'Clear' and 'Search' buttons.

- Note for Colleges of the Fenway (COF) consortium students wishing to search for COF-eligible courses at MCPHS: use the “COF Eligible Class” option in the Course Type Field.

A close-up of the 'Course Type' dropdown menu. The text 'Course Type' is above the dropdown. The dropdown menu is open, and the option 'COF Eligible Class' is highlighted in yellow. A downward arrow is visible on the right side of the dropdown box.

First, a brief snapshot of course information including the course description and prerequisites will show. Select **View Available Sections** to see the specific course sections available for registration – this will detail the number of seats available, meeting times/location and instructor(s).

The screenshot shows a search interface for courses and sections. On the left, there are filter results for Availability, Subjects, Locations, Terms, Days of Week, Time of Day, and Instructors. The 'Terms' filter is set to 'Fall 2022 (22)'. The search results on the right show three courses: BIO-110 Anatomy and Physiology I (3 Credits), BIO-110L Anatomy and Physiology I-Lab (1 Credits), and BIO-150L Biology I Laboratory (1 Credits). Each course entry includes a brief description, prerequisites, and a 'View Available Sections' button.

Select a section (example BIO.110.A) to view the section details. This will include the instructor(s), meeting information, dates, seats available, credits, requisites, course description, and important additional information.

The screenshot shows the section details for BIO.110-A Anatomy and Physiology I. The page includes a sidebar with navigation options like 'View A', 'Fall 2022', 'BIO.110 Anatom', 'Seats', 'BIO.110 Anatom', and 'Seats'. The main content area displays the following information:

- Section Details:** BIO.110-A Anatomy and Physiology I, Fall 2022
- Instructors:** Faculty, S
- Meeting Information:** M 8:00 AM - 9:15 AM, 9/6/2022 - 12/16/2022, Boston, White Building 300 (Lecture); W 8:00 AM - 9:15 AM, 9/6/2022 - 12/16/2022, Boston, White Building 300 (Lecture)
- Dates:** 9/6/2022 - 12/16/2022
- Seats Available:** 152 of 160 Total
- Credits:** 3
- Grading:** Graded
- Requisites:** Take BIO.110L - Must be taken either prior to or at the same time as this course.
- Course Description:** This course provides first-year students with directed study of the anatomical structure and physiological processes of the human body. Topics include subatomic, atomic, cellular, tissue, integumentary, skeletal, muscular, and nervous systems.
